Object: PRICELIST OCTOBER 2022

Dear Clients,

as everyone knows, for several months we have been witnessing a constant increase in the costs of all the main production factors, and with particular emphasis on those related to energy.

We have waited to intervene on the pricelists, but their adjustment cannot be postponed any longer, even if only to partially cover the increase in costs we are managing. For this reason, starting from **October 1st** all price lists will be increased by 9%, with the following exceptions:

increase of 6% in all 6mm thick products and all items in 60x120, 120x120 and 80x160 sizes.

Increase of 12% of the products of the Contract Solution and Delta range and of all the items in 60x60 format with 20mm thickness

The new price lists will be applied to all orders received **from October 1st**; all orders received up to that date will be processed under current conditions, as long as they are shipped by **October 31st**.

All orders shipped **after October 31st** will be automatically adjusted to the new prices, regardless of the availability of the material.

The changes will also be applied to the particular conditions and net prices in place.

You will shortly receive the October 2022 Price List in .xls format which replaces all the previous price lists, and then the .pdf. Our sales network will be at your disposal as usual for any further information.

Sure of your understanding, we thank you again for the trust and attention you have always given us, and we send you our cordial greetings.

The Direction
Ceramiche Caesar Spa
