Dado Group è uno gruppo industriale italiano che produce e commercializza rivestimenti in bicottura atomizzata e pavimenti in gres porcellanato. Grazie all'utilizzo delle più moderne tecnologie e l'esperienza decennale di persone dedicate con passione alla ricerca di design e della qualità, soddisfiamo le sigenze dei nostri clienti in tutto il mondo.

Dado Group

Dado Group is an industrial group based in Italy that manufactures and sells double-fired wall tiles and porcelain stoneware tiles. Thanks to the use of the most modern technologies and the decennial know-how of people dedicated with passion to the research of design and quality, we meet the needs of our customers all over the world.

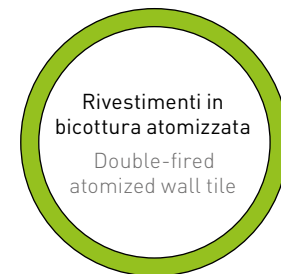

RICERCA E SVILUPPO • RESEARCH AND DEVELOPMENT

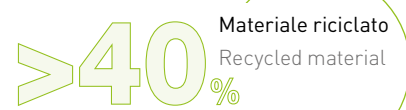

Prestando sempre la massima attenzione alle nuove soluzioni tecnologiche ed alle tendenze di mercato, la nostra area ricerca e sviluppo raccoglie costantemente idee e le elabora affinché divengano prototipi capaci di ispirare nuove superfici ed ambienti con la solita minuziosa attenzione alla qualità sostenibile.

While paying the utmost attention to technological innovations, our research and development department constantly collects ideas and processes them to become prototypes capable of inspiring new surfaces and environments with the usual meticulous attention to sustainable quality.

I NUMERI THE NUMBERS

MISSION

Il nostro impegno quotidiano e la nostra esperienza e professionalità sono tutte concentrate al miglioramento degli ambienti e delle persone, proiettandoci verso il futuro con un ruolo da protagonista nel rispetto delle nuove generazioni.

Our daily commitment and our experience and professionalism are focused on improving the environment and people, projecting us towards the future with a leading role in respecting the new generations.

Dado Group est un groupe industriel italien qui fabrique et vend de revêtements en biccuisson atomisé et de sols en grès cérame émaillé. Grâce à l'utilisation des technologies les plus modernes et une expérience décennale de personnes dévouées avec passion en quête de design et de qualité, nous répondons aux besoins de nos clients partout dans le monde.

Dado Group

Dado Group ist eine italienische Industriegruppe die Wandfliesen aus atomisiertem Zweibrandverfahren und Bodenfliesen aus glasiertem Feinsteinzeug produziert. Dank der Verwertung der modernsten Technologien und der jahrzehntenlangen Erfahrung von Fachleuten die sich leidenschaftlich der Forschung von Design und Qualitaet widmen, ist Dadogroup in der Lage die Beduerfnisse einer weltweiten Kundschaft zu erfuellen.

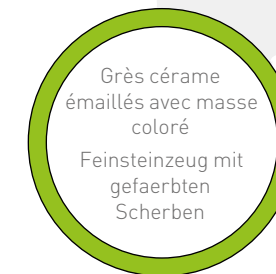

RECHERCHE ET DÉVELOPPEMENT • UNTERSUCHUNG UND ENTWICKLUNG

Toujours attentifs aux nouvelles solutions technologiques et aux tendances du marché, notre domaine de recherche et développement rassemble constamment des idées et des processus pour en faire des prototypes capables d'inspirer de nouvelles surfaces et de nouveaux environnements avec une méticuleuse attention à une qualité durable.

Immer mit der groessten Aufmerksamkeit zu den neuen technologischen Loesungen und zu den letzten Markttrends, sammelt unsere technische Abteilung durchgehend neue Ideen und Reize und entwickelt damit Prototypen die neuen Oberflaechen und optische Einstellungen mit der gebotenen Sorgfalt fuer die nachhaltige Qualitaet inspirieren koennen.

MISSION

Notre engagement quotidien, notre expérience et notre professionnalisme sont tous concentrés sur l'amélioration des environnements et des personnes, en se projetant vers l'avenir avec un rôle moteur dans le respect des nouvelles générations.

Unser taegliches Engagement, unsere langjaehrige Erfahrung und unsere Professionalitaet sind konzentriert auf die Verbesserung der Umwelt und der Wohnmoeglichkeiten der Personen, selbstverstaendlich mit Aufmerksamkeit fuer die Zukunft und mit Respekt fue die neuen Generationen.

Dado Ceramica

Dado Ceramica è un'industria ceramica **produttrice di piastrelle in grès porcellanato e bicottura** per tutti gli usi architettonici: **residenziali e commerciali**. Nasce nel 1980 a San Matteo della Decima (Bologna) al centro del comprensorio produttivo ceramico della regione Emilia-Romagna. Da 39 anni Dado Ceramica è una realtà in continua evoluzione estetica e tecnologica. Il suo stile **Made in Italy** è diffuso in tutti i principali mercati internazionali ed è da sempre una presenza stabile ed inconfondibile nel mercato italiano.

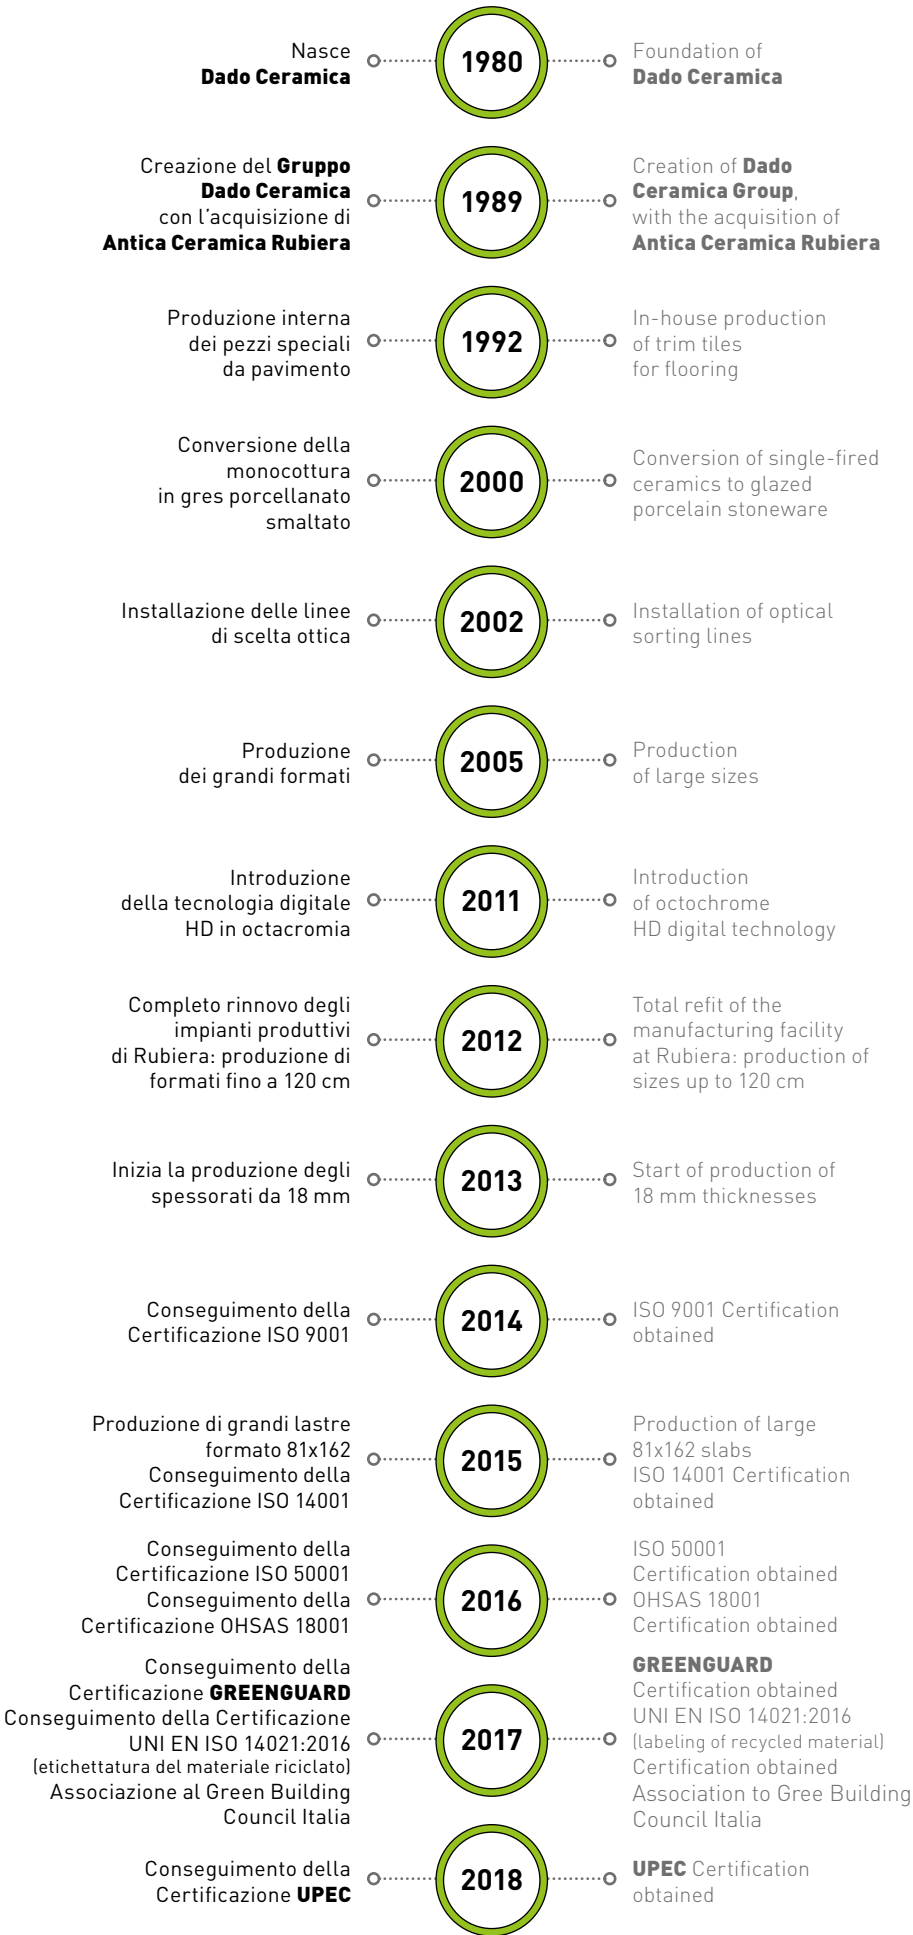

Grazie ai continui investimenti in tecnologie produttive, ricerca e sviluppo, nel tempo si è affiancata la gamma di **grès porcellanato da pavimento e rivestimento** alla rinomata tradizione produttiva della **bicottura da rivestimento**. La produzione Dado Ceramica è ora un vero caleidoscopio di superfici ceramiche, un dialogo tra colore e materia, tra textures e decori, formati e grafiche, **per personalizzare gli spazi con stile e qualità**.

Dado Ceramica è la capofila di **ecodado+™** Group formato dalla collaborazione industriale e commerciale di **Dado Ceramica, Antica Ceramica Rubiera e Cotto Petrus**.

Dado Ceramica is a ceramics company that manufactures **porcelain stoneware and double-fired tiles** for both **residential and commercial settings**. Founded in 1980 in San Matteo della Decima (Bologna), in the heart of the ceramic manufacturing district of the Emilia Romagna region, for the last 39 years it has been evolving constantly in terms of both design and technology. The company's **Italian style and craftsmanship** has gained a foothold on all the main international markets, and has been a stable, distinctive presence on the Italian market since its foundation.

Traditionally known for its **double-fired wall tiles**, thanks to ongoing investments in production technologies, research and development, over the years the company has added a range of **porcelain stoneware floor and wall tiles**. Dado Ceramica today manufactures a kaleidoscope of ceramic surfaces, in which colour engages with material, texture with decorations and sizes with graphics for a quality, stylish way to bring a personal touch to any setting.

Dado Ceramica ileads the **ecodado+™** Group in which it cooperates along with **Antica Ceramica Rubiera and Cotto Petrus**.

Dado Ceramica

Dado Ceramica est une industrie céramique productrice de **carreaux en grès cérame et en bûcuisson** pour toutes les applications de l'architecture: **résidentielles et commerciales**. Créée en 1980 à San Matteo della Decima (Bologne) en plein coeur de la zone de production céramique par excellence de la région italienne de l'Émilie-Romagne, depuis 39 ans, Dado Ceramica n'a cessé de poursuivre son évolution esthétique et technologique. La renommée de son style **Made in Italy** n'est désormais plus à faire sur les principaux marchés internationaux. Quant au marché italien, sa présence y est depuis toujours stable et la qualité de ses produits incomparable.

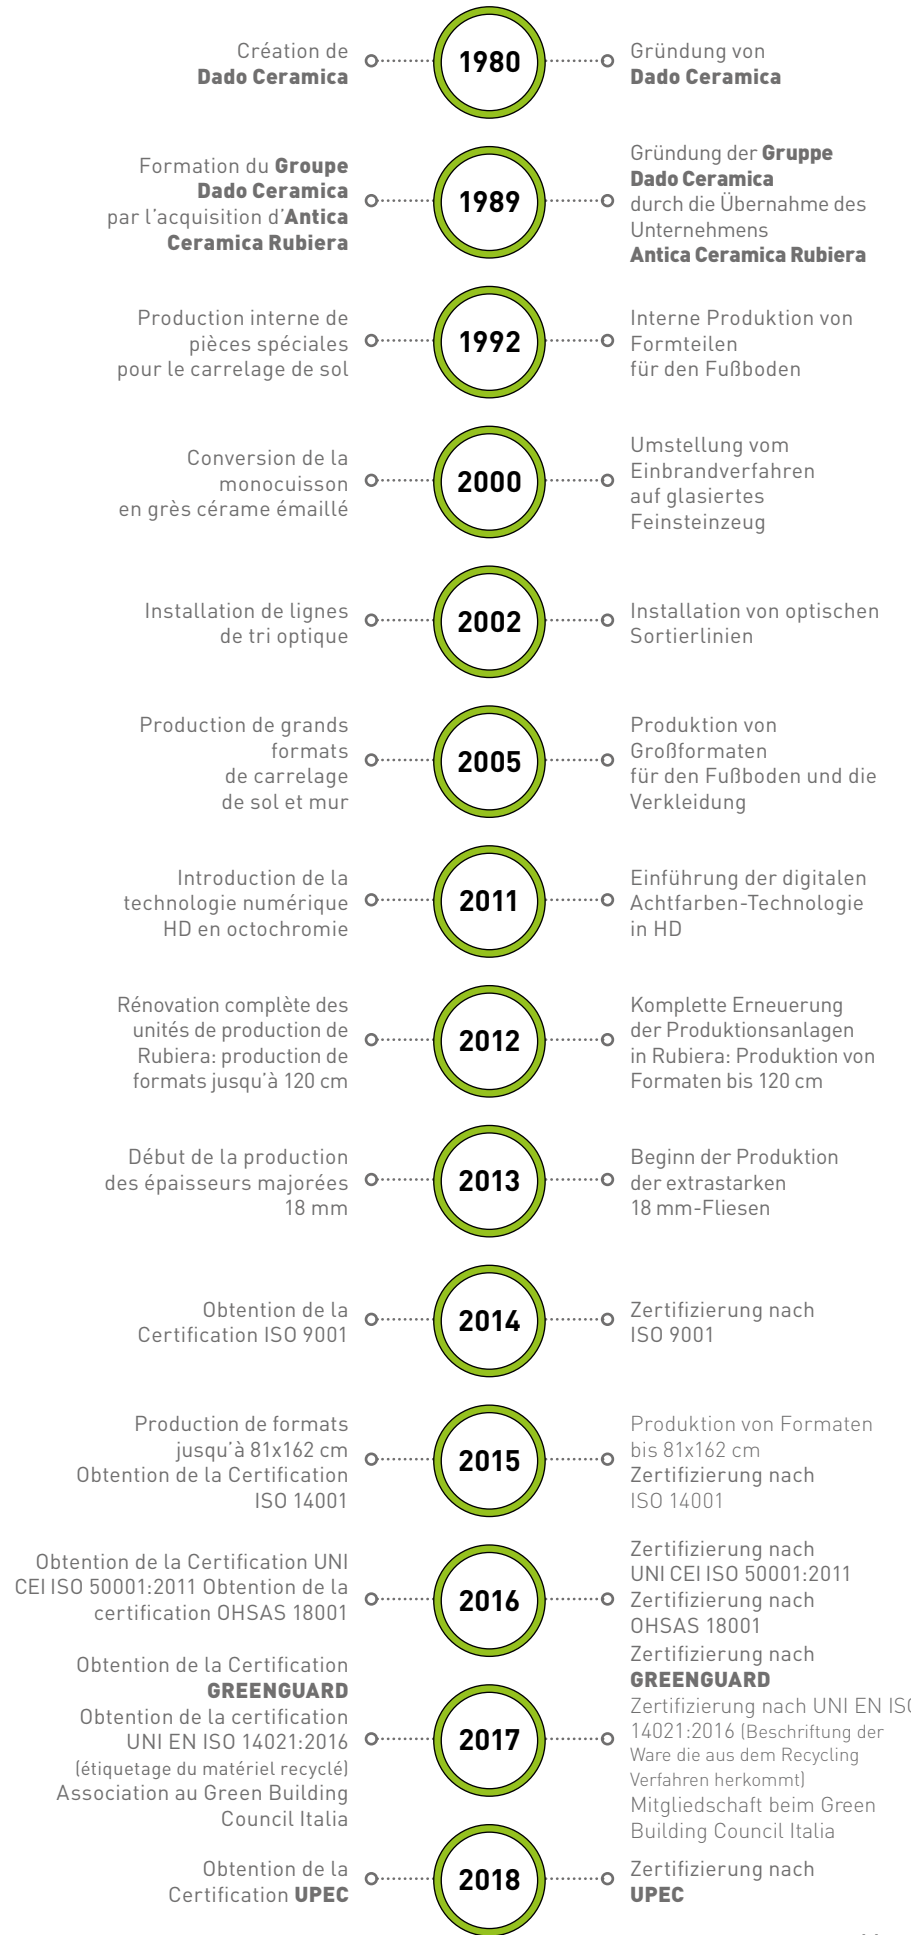

À la traditionnelle production de **bûcuisson pour carrelage mural**, elle a ajouté une gamme de **grès cérame destinée au revêtement de sols et murs**. La production Dado Ceramica est aujourd'hui un véritable caleidoscope de surfaces céramiques, un dialogue entre couleur et matière, entre textures et décors, formats et graphismes, **pour personnaliser les espaces avec style et qualité**.

Dado Ceramica èest chef de file d'**ecodado+™** Group fruit de la collaboration industrielle et commerciale entre **Dado Ceramica, Antica Ceramica Rubiera et Cotto Petrus**.

Dado Ceramica ist ein Keramikunternehmen, das **Feinsteinzeug- und Zweibrandfliesen** für alle Einsatzbereiche der Architektur erzeugt - **den Wohnbereich und Geschäftsbereiche**. Das Unternehmen entstand 1980 in San Matteo della Decima (Bologna) im Herzen des Keramikproduktionsgebiets der Region Emilia-Romagna. Seit 39 Jahren entwickelt sich Dado Ceramica in ästhetischer und technologischer Hinsicht unaufhörlich weiter. Der **typisch italienische** Stil ist auf den wichtigsten internationalen Märkten vertreten und nimmt seit jeher eine stabile, unverwechselbare Position auf dem italienischen Markt ein.

Mit der Zeit wurde die renommierte Technologie des **Zweibrandverfahrens** durch das Sortiment des **Feinsteinzeugs im Bodenbereich integriert**. Heute stellt die Produktion von Dado Ceramica ein wahres Kaleidoskop aus Keramikoberflächen dar, das bedeutet einen Dialog zwischen Farbe und Material, Texturen und Dekorationen, Formaten und Grafiken, um **die Räume mit Stil und Qualität am besten zu gestalten. Dafuer muessen wir die Leitung des Betriebs bedanken die staendig und ununterbrochen Investitionen in den Anlagen und in der faechlichen Untersuchung geplamt hat**.

Dado Ceramica steht an der Spitze der aus der industriellen und kommerziellen Zusammenarbeit von **Dado Ceramica, Antica Ceramica Rubiera und Cotto Petrus** entstandenen **ecodado+™** Group

Dado Group ha sempre ritenuto che la qualità del proprio servizio fosse il fondamento del successo commerciale dell'Azienda ed ha quindi ritenuto opportuno istituire un **Sistema di Gestione per la Qualità**, con l'obiettivo di migliorare continuamente il grado di soddisfazione dei propri Clienti. In quest'ottica, nel mese di luglio **2014**, Dado Group ha ottenuto dall'ente TÜV Austria Cert GmbH la certificazione che attesta la conformità dell'organizzazione aziendale ai requisiti della norma **UNI EN ISO 9001**. L'azienda ha implementato inoltre un Sistema di Gestione Ambientale ottenendo nel **2015** la certificazione che attesta la conformità ai requisiti della norma **ISO 14001**. Nel **2016** è stata ottenuta la conformità ai requisiti della norma **UNI CEI EN ISO 50001:2011 Sistemi di Gestione dell'Energia**, consentendo a Dado Group il miglioramento continuo della propria prestazione energetica, comprendendo in questa l'efficienza energetica nonché il consumo e l'uso dell'energia. I controlli previsti da queste normative sono i più accurati e comprendono tutte le funzioni aziendali: la progettazione, gli approvvigionamenti, i controlli sui prodotti e sul processo produttivo, la commercializzazione, l'assistenza post-vendita per tutti i marchi commerciali. Sempre nel **2016** è stata ottenuta anche la certificazione **OH SAS 18001**, che si occupa di salute e sicurezza dei lavoratori, assicurando l'ottemperanza ai requisiti previsti per i Sistemi di Gestione della Salute e Sicurezza sul Lavoro. Nel **2017** è stata ottenuta la certificazione **UNI EN ISO 14021:2016** (etichettatura del materiale riciclato). Ancora nel **2017** Dado Group si è associata al **Green Building Council Italia**, organismo indipendente che ha come obiettivo la diffusione di una cultura dell'edilizia sostenibile ed in particolare la promozione del sistema di certificazioni **LEED Leadership in Energy and Enviromental Design**. I prodotti di Dado Group contengono almeno il **40% di materia prima riciclata** e consentono ai loro utilizzatori di accedere ai crediti LEED. Sempre nel **2017** Dado Group ha ottenuto la **Certificazione Greenguard** grazie alla produzione di materiali ceramici per l'edilizia che soddisfano i più severi **limiti sulle emissioni chimiche** e di **Composti Organici Volatili** (VOCs). L'azienda risulta conforme agli standard richiesti per il miglioramento della **Qualità dell'Aria in ambienti Interni** (IAQ).

Nel **2018** Dado Group ha conseguito anche la certificazione **UPEC**. Questa, attraverso severi test, permette di identificare i prodotti più adatti ad un uso specifico in base alle proprie caratteristiche tecniche e rispecchia gli elevati standard qualitativi raggiunti dal gruppo attraverso gli investimenti nelle più moderne tecnologie e nel rispetto dell'ambiente.

Le certificazioni rappresentano il **coronamento di un'esperienza plurennale** ed il riconoscimento dell'**impegno costante** che l'azienda ha posto nella ricerca della qualità come fattore strategico prioritario. In accordo con la politica della qualità opera **la sezione di verifica ed archiviazione dei campioni base e della produzione corrente**; questa sezione controlla costantemente le **caratteristiche tecniche ed estetiche** della produzione e la loro **conformità** con i campioni base per assicurare la massima qualità e precisione nella fornitura.

Dado Group has always considered the quality of the service provided as the foundation of the company's success, so the Group has decided to implement a **Quality Management System**, with a view to constantly boosting customer satisfaction. With this objective in mind, in July **2014**, Dado Group obtained, from TÜV Austria Cert GmbH, the certification that the Group's corporate organisation complies with the requisites of the **UNI EN ISO 9001 standard**. The company has also implemented an Environmental Management System, and in **2015**, it obtained the certification of compliance with the requisites of the **ISO 14001 standard**. In **2016**, compliance was obtained with the requirements of the **UNI CEI EN ISO 50001:2011 Energy Management Systems standard**, allowing Dado Group to continually improve its energy performance, in terms of both energy efficiency and the use and consumption of energy. The checks provided for under these regulations are particularly rigorous, and regard all company departments and functions: planning and design, provisioning, checks on products and the production process, sales, post-sales assistance for all brands. In **2016**, the Group also obtained **OH SAS 18001 certification**, which regards the health and safety of workers, guaranteeing compliance with the requisites contemplated for Workplace Health and Safety Management Systems. In **2017**, the Group obtained both **UNI EN ISO 14021:2016 certification** (labelling of recycled material). In **2017**, Dado Group became a member of **Green Building Council Italia**, an independent body that seeks to spread a sustainable building culture, and in particular, to promote the **LEED Leadership in Energy and Environmental Design certification system**. Dado Group products contain at least **40% of recycled raw materials**, allowing users to obtain LEED credits. In 2017, Dado Group obtained **Greenguard Certification**, thanks to the production of ceramic materials for the building industry, which **comply with the strictest limits governing chemical** emissions and **Volatile Organic Compounds** (VOCs). The company complies with the standards requested for the improvement of **Indoor Air Quality** (IAQ).

In **2018** Dado Group obtained the UPEC certification. This, through strict tests, allows to identify the most suitable products for a special use based on their technical features and reflects the high quality standards achieved by the group through the investments in latest technologies and environment respect.

These certifications are the **crowning glory of many years' experience**, and acknowledge the **company's constant commitment** to quality, the strategic factor that is top priority for Dado Group. In accordance with the corporate quality policy, there is a **section that checks and files base samples and samples of the current production**; this section constantly monitors **the technical and aesthetic characteristics** of the products, **ensuring they comply with the base samples** in order to guarantee completely accurate, quality supplies.

Dado Group a toujours pensé que la qualité du service offert était à la base de la réussite commerciale de son activité. C'est pourquoi elle a jugé opportun de mettre en place un **système de gestion de la qualité**, dans le but d'améliorer continuellement le niveau de satisfaction de ses clients. Ainsi, en juillet **2014**, Dado Group a obtenu de la part de TÜV Austria Cert GmbH la certification attestant que son fonctionnement et son organisation sont conformes aux critères énoncés par la norme **UNI EN ISO 9001**. L'entreprise a également mis en place un système de gestion environnementale, confirmé en **2015** par l'obtention de la certification attestant sa conformité aux critères énoncés par la norme **ISO 14001**. En **2016**, elle a obtenu la conformité aux critères énoncés par la norme **UNI CEI EN ISO 50001:2011 "Systèmes de gestion de l'énergie"**, permettant à Dado Group de continuer à améliorer ses performances énergétiques comprenant l'efficacité énergétique ainsi que la consommation et l'utilisation de l'énergie. Toujours en **2016**, nous avons obtenu la **certification OH SAS 18001**, qui s'occupe de la santé et de la sécurité des travailleurs, en assurant la conformité et le respect des exigences prévues par le Système de Gestion pour la santé et la sécurité sur les lieux de travail. En **2017** nous avons obtenu soit la Certification **UNI EN ISO 14021:2016** (étiquetage du matériel recyclé). En **2017**, Dado Group s'associe au **Green Building Council Italia**, organisme indépendant qui a comme objectif la diffusion d'une culture de la construction durable et, notamment, la promotion du système de certifications **LEED (Leadership in Energy and Enviromental Design)**. Les produits de Dado Group contiennent au moins **40% de matière première recyclée** et permettent à leurs utilisateurs d'accéder aux crédits LEED. Également en **2017**, le Dado Group a obtenu la **Certification Greenguard** grâce à la production de matériaux de construction en céramique respectant les **limites les plus strictes en matière d'émissions chimiques et de composés organiques volatils** (COV). La société a bien été considérée conforme aux normes requises pour améliorer la **qualité de l'air dans les environnements intérieurs** (QAI).

En **2018**, Dado Group a également obtenu la certification **UPEC**. Grâce à des tests rigoureux, elle permet d'identifier les produits les plus appropriés pour un usage spécifique en fonction de leurs caractéristiques techniques et reflète les hauts standards de qualité atteints par le groupe grâce à des investissements dans les technologies les plus modernes et dans le respect de l'environnement.

Les certifications représentent **l'aboutissement de nombreuses années d'expérience** et la reconnaissance de **l'engagement constant** de l'entreprise dans la recherche de la qualité en tant que facteur stratégique prioritaire. Conformément à la politique de qualité, **la section de vérification et de classement des échantillons de base et de la production en cours** travaille pour surveiller constamment les **caractéristiques techniques et esthétiques** de la production et leur **conformité** avec les échantillons de base, pour assurer la plus haute qualité et la plus grande précision dans la livraison.

Dado Group vertritt seit jeher die Auffassung, dass die Qualität der Dienstleistungen die Grundlage für den wirtschaftlichen Erfolg des Unternehmens darstellt. Daher wurde es als angemessen betrachtet, ein **Qualitätsmanagementsystem** mit dem Ziel aufzubauen, die Zufriedenheit der Kunden kontinuierlich zu verbessern. In diesem Zusammenhang hat die Dado Ceramica S.r.l. von der TÜV Austria Cert GmbH die Zertifizierung erhalten, dass die Unternehmensorganisation den Anforderungen der Norm **UNI EN ISO 9001** entspricht. Das Unternehmen hat auch ein Umweltmanagementsystem eingeführt, das im Jahr **2015** nach **ISO 14001** zertifiziert wurde. Im Jahr **2016** erhielt die Dado Group weiterhin die Zertifizierung nach der Norm **UNI CEI EN ISO 50001:2011 "Energiemanagementsysteme"**, was die dauerhafte Verbesserung der energiebezogenen Leistung erlaubt, wozu insbesondere die Energieeffizienz und die Senkung des Energieverbrauchs gehören. Immer im Jahr **2016** haben wir die Bescheinigung **OH SAS 18001** erhalten, die sich um die Gesundheit und Sicherheit der Arbeiter kümmert. Hiermit sind wir in der Lage die Einhaltung der vorausgesetzten Anforderungen zu bestaetigen, die sich auf die Mangement Systems von Gesundheit und Sicherheit beziehen. Im Jahr **2017** haben wir sowohl die Bescheinigung **UNI EN ISO 14021:2016** (Beschriftung der Ware, die aus dem Recycling Verfahren herkommt) wie auch das Singapore Green Label erhalten. **2017** wurde Dado Group Mitglied des **Green Building Council Italia**, einer unabhängigen Organisation, die sich die Verbreitung der Kultur des nachhaltigen Bauens und insbesondere die Förderung des **LEED** Zertifizierungssystems (**Leadership in Energy and Enviromental Design**) zum Ziel gesetzt hat. Die Produkte von Dado Group enthalten mindestens **40% recycelte Rohstoffe** und ermöglichen den Benutzern die Zuweisung von LEED-Punkten. Ebenfalls im Jahr **2017** erhielt die Dado Group die **Greenguard Zertifizierung** dank der Herstellung von keramischen Produkten, **die die strengsten Grenzwerte für chemische Emissionen und flüchtige organische Verbindungen (VOCs)** erfüllen. Das Unternehmen erfüllt die Anforderungen zur **Verbesserung der Luftqualität in Innenräumen** (IAQ).

2018 erhielt die Dado Group auch die **UPEC**-Zertifizierung. Dies, durch strenge Prüfungen ermöglicht, in entsprechend ihre technischen Eigenschaften der am besten geeigneten Produkte für eine bestimmte Anwendung zu identifizieren und spiegelt die hohe Qualitätsstandards von der Gruppe durch Investitionen in modernste Technologien erreicht und den Schutz der Umwelt.

Die Zertifizierungen sind das Ergebnis langjähriger Erfahrung und die Anerkennung des ständigen Engagements, das das Unternehmen der Suche nach Qualität als vorrangigen strategischen Faktor beigemessen hat. **In Übereinstimmung mit der Qualitätspolitik wird der Überprüfungs- und Ablageabschnitt der Grundmuster und der aktuellen Produktion ausgeführt.** Dieser Bereich überwacht ständig die **technischen und ästhetischen Eigenschaften** der Produktion und deren **Übereinstimmung** mit den Grundmustern, um höchste Qualität und Präzision bei der Lieferung zu gewährleisten.

Honed *plus+*

L'applicazione della finitura **Honed *plus+*** attribuisce al prodotto un aspetto satinato (non riflettente) e luminoso. Il risultato ottenuto è frutto dell'utilizzo di macchine levigatrici e di speciali mole che vanno a lavorare lo strato di ricca graniglia applicato sulla superficie, grazie anche all'utilizzo combinato di modernissime applicazioni protettive a raggio completo, garantendo un'ottima finitura non lucida e buona resistenza alle macchie. Al tatto la superficie risulta molto morbida, delicata, ed i colori assumono una maggiore profondità, quasi tridimensionale. Questa finitura esalta la preziosità e la purezza materica in chiave contemporanea. L'estetica risultante è la soluzione ideale per coloro che vogliono un prodotto luminoso ma non lucido che da un tocco sobrio ed elegante, arricchendo anche le luci e gli arredi scelti. Consigli di posa e manutenzione, pag 333-337.

Lappato *plus+*

La finitura **Lappato *plus+*** conferisce alla piastrella la lucentezza e la riflettenza tipici di uno specchio. Il processo produttivo è simile a quello della finitura Honed Plus. Si tratta di un procedimento meccanico in cui le mole vanno a lavorare la speciale graniglia sulla superficie della piastrella, riducendone la rugosità, fino a renderla perfettamente liscia, come uno specchio appunto, e permettendo alla stessa di brillare di luce riflessa. La piastrella con finitura lappato plus presenta una maggior definizione della grafica ed una brillantezza inusuale che la rendono adatta a tutti gli ambienti. Consigli di posa e manutenzione, pag 333-337.

Lappato o Lappato in cresta

A differenza delle finiture Lappato Plus e Lappato Honed Plus, il Gres porcellanato lappato (detto anche lappato in cresta) presenta una superficie lavorata solo parzialmente. Si tratta infatti di una lavorazione meccanica che permette di ottenere la lucidatura delle sole parti superiori della superficie, evidenziando il contrasto con la parte non lavorata. Il risultato è un prodotto con zone lucide e brillanti ed altre non lucide, tipiche della finitura naturale del prodotto stesso. Consigli di posa e manutenzione, pag 333-337.

Naturale

Il gres porcellanato naturale, risultante dalla produzione del gres senza applicazione di ulteriori processi, si presenta con una superficie più o meno ruvida e non brillante. Risulta avere delle performance tecniche più adatte in ambienti o installazioni ad intenso traffico o in cui vengono spesso usati agenti chimici aggressivi. Le caratteristiche tecniche garantiscono risultati duraturi. Consigli di posa e manutenzione, pag 333-337.

Honed *plus+*

The implementation of the **Honed *plus+*** production process obtains a satin finish product bright yet non reflective. This result is obtained by the use of polishing machinery and special grindstones that work the rich layer of grit (graniglia) on the tile surface. During the process, a full range of protective treatments is applied. This guarantees excellent non reflective finish and a good stain resistance. The surface becomes smooth and delicate to the touch, while the colors take an almost three-dimensional depth. This finish enhances the materic preciousness with a contemporary touch. The ensuing aesthetic results are ideal for those looking for a luminous product, without the sheen, to give a touch of elegance and sobriety while enriching also the lights and furnishings. For tile setting and maintenance, pls see pag 333-337.

Lappato *plus+*

The **Lappato *plus+*** production process reaches the sheen and light reflectance of a mirror. The entire process is quite similar to the one for the Honed Plus finish. It is a mechanical process in which the grindstones smoothen the special grit (graniglia) until a perfect smoothing is achieved and light can be reflected in mirror like fashion. Graphics are better defined and the unusual brightness make for an outstanding look capable to enhance all and any setting. For tile setting and maintenance, pls see pag 333-337.

Ridge honed

Different from the "Lappato Plus" and "Lappato Honed Plus" finish, the "Lappato" (also called ridge honed) porcelain stoneware shows a surface that has only been partially smoothened. It is indeed a process that aims at polishing only the tips on the surface. The beauty is in the contrast between the smoothened and unsmoothened parts. The result is a product with matt and shiny microareas. For tile setting and maintenance, pls see pag 333-337.

Natural

The natural finish porcelain stoneware is the product as it comes out of the kiln, without any additional treatment. The surface can have different degrees of roughness depending on the item and glaze, and always a non shiny, matt, surface. It is the most suitable product for high traffic areas or where intense and frequent cleaning is done with the use of aggressive chemical agents. The technical characteristics of this finish guarantee long lasting results. For tile setting and maintenance, pls see pag 333-337.

Honed *plus+*

L'application de la finition **Honed *plus+*** confère au produit un aspect satiné (non réfléchissant) et brillant. Le résultat obtenu est le résultat de l'utilisation de ponceuses et de meules spéciales qui agissent comme une couche de gravier riche appliquée sur la surface, grâce également à l'utilisation combinée d'applications de protection modernes à gamme étendue, garantissant un excellent bonne résistance aux taches. Au toucher, la surface est très douce, délicate et les couleurs prennent une profondeur plus grande, presque en trois dimensions. Cette finition met en valeur le caractère précieux et la pureté matérielle d'une clé contemporaine. L'esthétique qui en résulte est la solution idéale pour ceux qui recherchent un produit brillant mais non brillant qui donne une touche sobre et élégante, enrichissant également les lumières et le mobilier choisis. Conseils d'installation et de maintenance, page 333-337.

Lappato *plus+*

La finition **Lappato *plus+*** confère aux carreaux la brillance et la réflectance typiques d'un miroir. Le processus de production est similaire à celui de la finition Honed Plus. C'est un processus mécanique dans lequel les meules travaillent le grain spécial sur la surface du carreau, en réduisant sa rugosité, en le rendant parfaitement lisse, à la manière d'un miroir, et en lui permettant de briller avec une lumière réfléchie. La tuile avec une finition Lappato Plus a une plus grande définition du graphique et une brillance inhabituelle qui le rendent approprié à tous les environnements. Recommandations d'installation et de maintenance, page 333-337.

Lappato ou Lappato sur la crête

Contrairement aux finitions Lappato Plus et Lappato Honed Plus, le grès cérame poli (également appelé lappato en crete) a une surface partiellement travaillée. C'est en fait un procédé mécanique qui permet d'obtenir le polissage des parties supérieures de la surface uniquement, en soulignant le contraste avec la partie non travaillée. Le résultat est un produit avec des zones polies, brillantes et non brillantes, typiques de la finition naturelle du produit lui-même. Recommandations d'installation et de maintenance, page 333-337.

Naturel

Le grès cérame naturel, issu de la fabrication de grès sans aucune autre transformation, présente une surface plus ou moins rugueuse et non pas brillante. Il présente des performances techniques les plus appropriées dans les environnements ou les installations à trafic intense ou dans lesquels des agents chimiques agressifs sont souvent utilisés. Les caractéristiques techniques garantissent des résultats durables. Recommandations d'installation et de maintenance, page 333-337.

Honed *plus+*

Die Anwendung des **Honed *plus+*** Glasur verleiht dem Produkt ein seidenmattes (nicht reflektierendes) und helles Aussehen. Das Ergebnis ist das Ergebnis der Verwendung von Schleifmaschinen und speziellen Schleifscheiben, die die auf die Oberfläche aufgebrachte Schicht aus reichhaltigem Sand bearbeiten, auch dank der kombinierten Verwendung moderner Vollschutzanwendungen, die ein ausgezeichnetes nicht glänzendes Finish garantieren Gute Fleckenbeständigkeit. Bei Berührung ist die Oberfläche sehr weich, zart und die Farben nehmen eine größere Tiefe an, fast dreidimensional. Diese Behandlung erhöht die Wertigkeit und Materialreinheit eines modernen Material. Die daraus resultierende Ästhetik ist die ideale Lösung für diejenigen, die ein helles, aber nicht glänzendes Produkt suchen, das einen nüchternen und eleganten Touch verleiht und das Licht und die ausgewählten Möbel bereichert. Installations- und Unterhaltungshinweise, Seite 333-337.

Lappato *plus+*

Die Behandlung **Lappato *plus+*** verleiht der Fliese den für einen Spiegel typischen Glanz und Reflexionsgrad. Der Produktionsprozess ähnelt dem des Honed Plus Oberfläche. Es ist ein mechanischer Vorgang, bei dem die Schleifscheiben das Spezialkorn auf der Fliesenoberfläche bearbeiten, die Rauheit reduzieren, sie perfekt glatt wie ein Spiegel machen und sie mit reflektiertem Licht leuchten lassen. Die Lappato + Fliese hat eine bessere Definition der Grafik und eine ungewöhnliche Brillanz, die sie für alle Bereiche geeignet macht. Installations- und Unterhaltungshinweise Seite 333-337.

Lappato oder Halb-poliert

Im Gegensatz zu den Oberflächen Lappato Plus und Lappato Honed Plus hat Lappato Feinsteinzeug (auch als Halb-Lappato bekannt) eine teilweise bearbeitete Oberfläche. Tatsächlich handelt es sich um ein mechanisches Verfahren, bei dem nur die oberen Teile der Oberfläche poliert werden und der Kontrast zum unbearbeiteten Teil hervorgehoben wird. Das Ergebnis ist ein Produkt mit glänzenden, hellen und anderen nicht glänzenden Bereichen, die für das natürliche Finish des Produkts selbst typisch sind. Installations- und Unterhaltungshinweise Seite 333-337.

Natürliche Oberfläche

Natursteinzeug, das bei der Herstellung von Steinzeug ohne weitere Verfahren anfällt, zeigt eine mehr oder weniger raue und nicht brillante Oberfläche. Es hat die am besten geeignete technische Leistung in Umgebungen oder Anlagen mit hohem Verkehrsaufkommen oder wo häufig aggressive chemische Mittel verwendet werden. Die technischen Eigenschaften garantieren dauerhafte Ergebnisse. Installations- und Unterhaltungshinweise Seite 333-337.

POSA SU ERBA • INSTALLATION ONTO GRASS

Posa diretta su erba
Direct installation on grass (Not suitable for lawn-mowers usage)

- 1 Manto erboso • Grass surface
- 2 Lastra • Slab

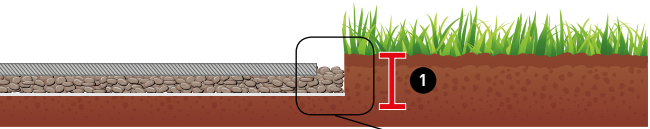

Per ottenere un effetto “tappeto”:
posizionare un cordolo in cemento
per delimitare l'area da piastrellare.
Realization of “carpet effect” flooring:
a cement curb can be laid to delimit
the area in which slabs are installed.

A Cordolo in cemento • Cement curb

Posa a secco su erba
Installation on grass (Suitable for lawn-mowers usage)

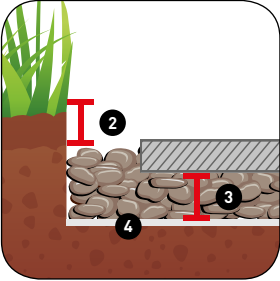

- 1 5/6 cm di profondità • 5/6 cm dragging

2 Lastra posizionata più in basso del
manto erboso calpestabile • Slab to be
laid below grass level

3 Letto di ghiaia di almeno 3 cm di
profondità (granulometria > 4 mm)
Layer of gravel, minimum 3 cm
recommended (granulometry > 4mm)

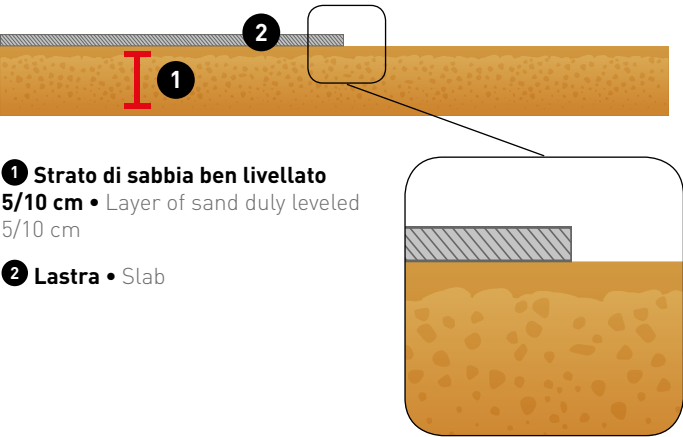

4 Eventuale TNT • Macro-holed,
non-woven polypropylene fabric

Distance between the slabs: slabs can be install to obtain several aesthetics effects/designs (walkway, stepping stone pattern and so on).
Distance between slabs depends on the design we want to create.

Queste indicazioni rappresentano delle indicazioni generali basate sullo stato dell'arte e non vincolanti.
The following tips and suggestions are not binding for the manufacturer.

POSA SU SABBIA • INSTALLATION ONTO SAND

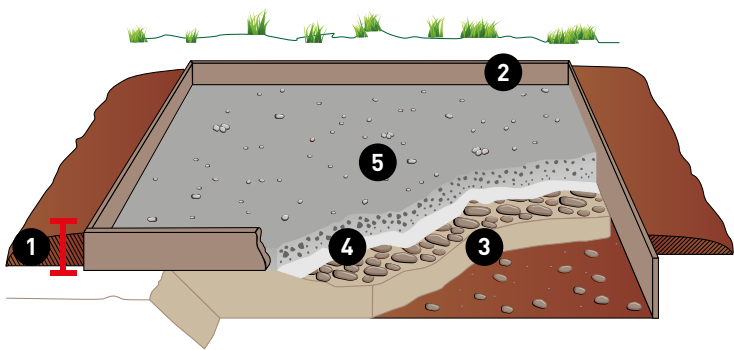

- 1** Strato di sabbia ben livellato
5/10 cm • Layer of sand duly leveled
5/10 cm
- 2** Lastra • Slab

Pendenza sottofondo 2%
Creation of 2% inclination during levelling and compacting phases.

Distanza tra le lastre: posizionare le lastre distanziate tra loro in base all'effetto estetico che si vuole ottenere (camminamento "a passi", vialetto ecc). Le fughe possono essere riempite con sabbia o ghiaia.

Distance between the slabs: slabs can be install to obtain several aesthetics effects/designs (walkway, stepping stone pattern and so on). Distance between slabs depends on the design we want to create. Joints can be filled with sand or gravel.

POSA SU GHIAIA • INSTALLATION ONTO GRAVEL

- 1** Asportare uno strato di terreno di 10-20 cm di profondità
Drag a layer of ground (10-20 cm)
- 2** Cordolo in cemento o assi di legno • Cement curb or wooden plank
- 3** Pietrisco compatto granulometria mista (16-35 mm) per 10 cm di profondità • Crushed stone, mixed granulometry (16-35 mm), 10 cm depth
- 4** TNT • Macro-holed, non-woven polypropylene fabric
- 5** Ghiaia ben livellata granulometria 4-8 mm per 10 cm di profondità
Duly leveled gravel, granulometry between 4-8 mm, 10 cm depth

Queste indicazioni rappresentano delle indicazioni generali basate sullo stato dell'arte e non vincolanti.
The following tips and suggestions are not binding for the manufacturer.

POSA SU MASSETTO CON COLLA • LAYING ON SCREED WITH ADHESIVE

Posa su pavimento esterno non impermeabilizzato (terreno)
Installation on outdoor non waterproof floor (ground)

1 Terreno • Ground

2 Strato di ghiaia compatto eventualmente stabilizzato con calcestruzzo • Compact layer of gravel (eventually stabilized using concrete)

3 Strato di livellamento in calcestruzzo avente spessore adeguato. Pendenza 1,25-2,5% • Concrete leveling layer with adequate thickness. Inclination 1,25-2,5%

4 Massetto di 8-10 cm con rete elettrosaldata posizionata a metà dello spessore dello strato • 8-10 cm screed, arc welded mesh to be positioned in the centre

5 Lastra • Slab

Posa delle lastre con un collante per esterni seguendo sempre le indicazioni specifiche del produttore dell'adesivo utilizzato e seguendo la tecnica della doppia spalmatura • Slabs must be fixed by using an adhesive suitable for outdoor use and strictly following the instructions and specifications indicated by the adhesive's manufacturer (a double adhesive layer is always recommended)

Fughe: obbligatoria la fuga a giunto aperto con ampiezza di fuga variabile maggiore di 5 mm ed utilizzo di sigillanti cementizi di classe 2. I giunti di dilatazione sono obbligatori.

Grout: using class 2 cement grouting and a minimum 5 mm grout line is mandatory. Expansion joints are mandatory too.

Posa su pavimento esterno impermeabilizzato
Installation on outdoor waterproof floor

1 Struttura portante (solaio) Floor

2 Strato di livellamento/pendenza Levelling/inclination layer

3 Strato di impermeabilizzazione Waterproofing layer

4 Strato di separazione termoisolante • Heat insulating layer

5 Strato drenante • Draining layer

6 Massetto di 8-10 cm con rete elettrosaldata posizionata a metà dello spessore dello strato • 8-10 cm screed, arc welded mesh to be positioned in the centre

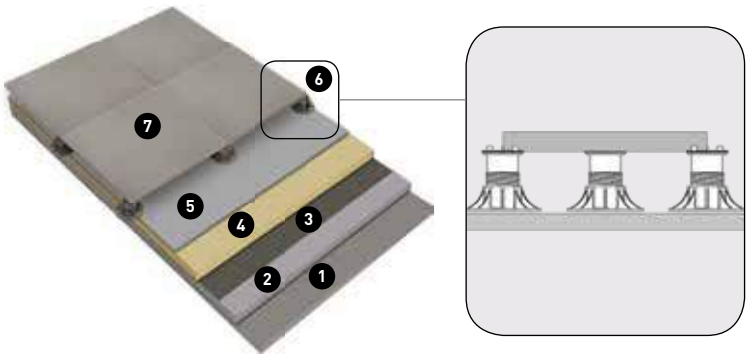

7 Lastra • Slab

Posa delle lastre con un collante per esterni seguendo sempre le indicazioni specifiche del produttore dell'adesivo utilizzato e seguendo la tecnica della doppia spalmatura • Slabs must be fixed by using an adhesive suitable for outdoor use and strictly following the instructions and specifications indicated by the adhesive's manufacturer (a double adhesive layer is always recommended)

Queste indicazioni rappresentano delle indicazioni generali basate sullo stato dell'arte e non vincolanti.
The following tips and suggestions are not binding for the manufacturer.

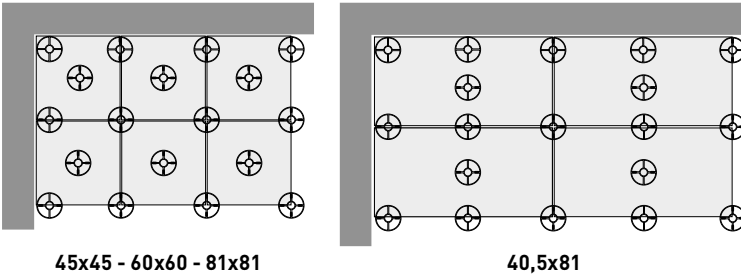

POSA SOPRAELEVATA • INSTALLATION ONTO FLAT SURFACES (RAISED LAYING)

- 1 **Terreno o struttura portante •** Ground or floor
- 2 **Massetto in pendenza •** Screed with adequate inclination
- 3 **Strato di impermeabilizzazione •** Waterproofing layer
- 4 **Strato di separazione termoisolante (foglio di polietilene)**
Heat insulating layer (polyethylene sheet)
- 5 **Opzionale: pannello termoisolato di adeguata densità**
Optional: heat insulating panel with adequate density
- 6 **Supporto da esterno in polipropilene (fisso, regolabile o autolivellante)**
Polypropylene load-bearing supports suitable for outdoor (may be fixed, adjustable or self-levelling)
- 7 **OUTDOOR spessore 17 • 20 • 30 mm**
OUTDOOR 17 • 20 • 30 mm thick slabs

Ad oggi non esiste una normativa specifica per i pavimenti sopraelevati da esterno, si rimanda pertanto al professionista progettista un'attenta valutazione dei requisiti del progetto.
Dado Ceramica S.r.l. prescrive l'adizione di supporti aggiuntivi sotto le piastrelle, come da schema sotto riportato.
To date, there is no existing regulatory standard regarding outdoor raised floors. Therefore, the Customer/Designer/Project Manager has to arrange for a careful assessment of the project and its requirements.
Dado Ceramica S.r.l. recommends the adoption of additional supports under the tiles, as per diagram below.

Per maggiore sicurezza e a tutela dell'utente, Dado Ceramica S.r.l. richiede di impostare un'altezza di sopraelevazione non superiore a 5 cm.
For grater safety and protection of the user, Dado Ceramica S.r.l. requires an overlay height not exceeding 5 cm.

Queste indicazioni rappresentano delle indicazioni generali basate sullo stato dell'arte e non vincolanti.
The following tips and suggestions are not binding for the manufacturer.

PAVIMENTAZIONE CARRABILE
INSTALLATION ON DRIVEWAYS

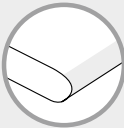

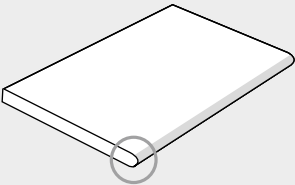

L'impiego di lastre con spessore 30 mm permette la realizzazione di pavimentazioni carrabili senza l'utilizzo di collanti per la posa.

30 mm porcelain pavers could be installed on driveways with no need of adhesives.

Queste indicazioni rappresentano delle indicazioni generali basate sullo stato dell'arte e non vincolanti.
The following tips and suggestions are not binding for the manufacturer.

OUTDOOR

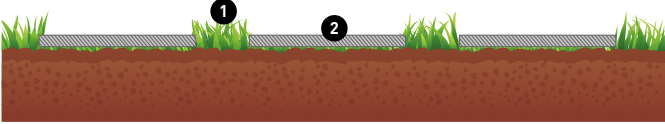

POSE SUR HERBE • VERLEGUNG AUF GRAS

Pose directe sur herbe

Direkte Verlegung auf Gras

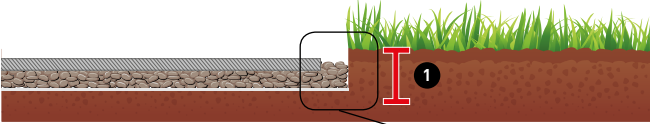

- 1 Couche d'herbe • Grasdecke
- 2 Dalle • Platte

Pose à sec sur herbe

Trockenverlegung auf Gras

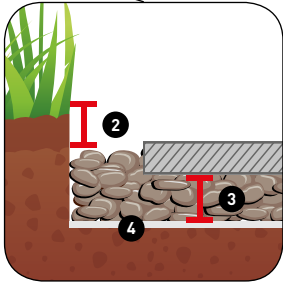

- 1 5/6 cm de profondeur • 5/6 cm tiefe

- 2 Dalle positionnée plus bas que la couche d'herbe destinée au passage
Platte niedriger als die begehbare Grasdecke verlegt

- 3 Lit de graviers d'au moins 3 cm de profondeur (granulométrie > 4 mm)
Kiesbett mit mindestens 3 cm Tiefe (Korngröße > 4 mm)

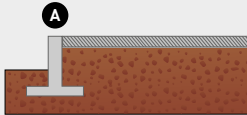

- 4 Éventuel TNT • Eventuell vlies

Pour obtenir un effet "tapis": placer un cordon en ciment pour délimiter la zone à daller.

Um eine „teppich“-optik zu erzielen: einen zementring installieren, um den zu verfliesenden bereich abzugrenzen.

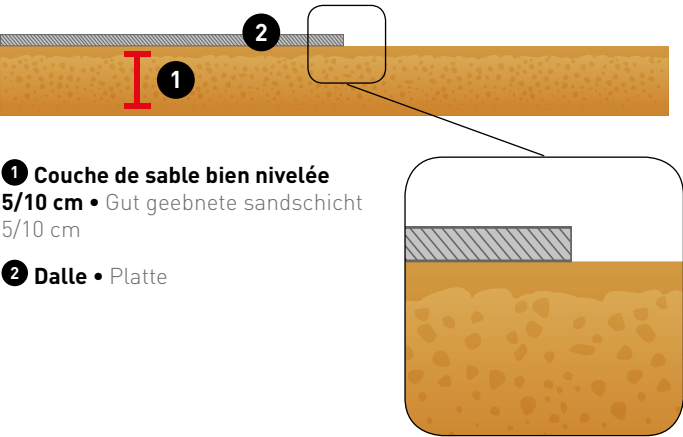

- A Cordon en ciment • Betonring

Distance entre les dalles: placer les dalles distancées les unes des autres en fonction de l'effet esthétique que l'on souhaite obtenir (chemins de dalles, allées, etc.) • Abstand zwischen den platten: Den Abstand zwischen den Platten je nach der ästhetischen Wirkung wählen, die man erzielen möchte ("schrittweise" Gehwegplatten, Gehwege etc.).

Ces indications représentent des conseils généraux non contraignants, basés sur l'expérience des professionnels du secteur.
Diese Anweisungen stellen allgemeine Empfehlungen auf Grundlage des letzten Stands der Technik dar, die nicht bindend sind.

POSE SUR SABLE • VERLEGUNG AUF SAND

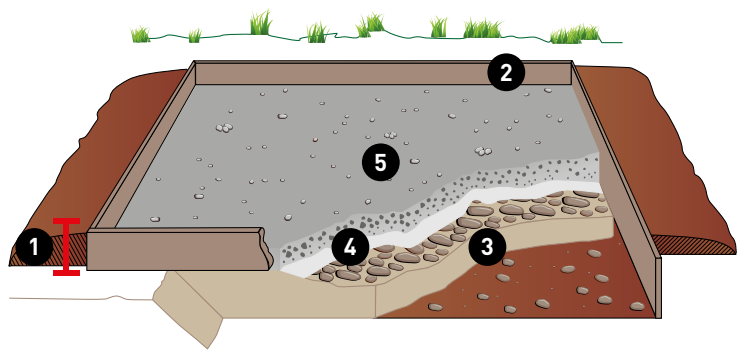

- 1 Couche de sable bien nivelée 5/10 cm • Gut geebnete Sandschicht 5/10 cm
- 2 Dalle • Platte

Inclinaison sous-couche 2%
Neigung des Untergrunds 2%

Distance entre les dalles: placer les dalles distancées les unes des autres en fonction de l'effet esthétique que l'on souhaite obtenir (chemin de dalles, allées, etc.). Les joints peuvent être remplis de sable ou de graviers.
Abstand zwischen den Platten: Den Abstand zwischen den Platten je nach der ästhetischen Wirkung wählen, die man erzielen möchte ("schrittweise" Gehwegplatten, Gehwege etc.). Die Fugen können mit Sand oder Kies gefüllt werden.

POSE SUR GRAVIERS • VERLEGUNG AUF KIES

- 1 Retirer une couche de terrain de 10-20 cm de profondeur
Eine 10-20 cm tiefe Schicht Erde abtragen
- 2 Cordon en ciment ou planches en bois • Betonring oder Holzplatten
- 3 Pierraille compacte granulométrie mixte (16-35 mm) sur 10 cm de profondeur • Kompakter Schotter mit gemischter Korngröße (16-35 mm), 10 cm Tiefe
- 4 TNT • Vlies
- 5 Gravier bien nivelés granulométrie 4-8 mm sur 10 cm de profondeur
Gut geebneter Kies mit Korngröße 4-8 mm, 10 cm Tiefe

POSE SUR FOND AVEC COLLE • VERLEGUNG AUF ESTRICH MIT KLEBER

Pose sur sol extérieur non imperméabilisé (terrain)
Verlegung auf nicht wasserdichtem Fußboden im Freien (Erdreich)

1 Terrain • Erdreich

2 Couche de graviers compacte, éventuellement stabilisée à l'aide de béton
Kompakte KIESSCHICHT, die eventuell mit Beton stabilisiert werden kann

3 Couche de nivellement en béton présentant une épaisseur adaptée inclinaison 1,25-2,5% • Nivellierungsschicht aus Beton mit angemessener Stärke. Neigung 1,25-2,5%

4 Fond de 8-10 cm avec filet électrosoudé placé à mi-épaisseur de la couche • 8-10 cm hoher Estrich mit elektroverschweißtem Netz in der Mitte der Schichthöhe

5 Dalle • Platte
Pose des dalles avec un adhésif pour extérieurs en suivant toujours les indications spécifiques du fabricant de l'adhésif utilisé et en respectant la technique du double encollage • Verlegung der Platten mit einem Kleber für den Außenbereich unter Befolgung der spezifischen Anweisungen des Herstellers des verwendeten Klebers mit der Technik des doppelten Auftragens

Pose sur sol extérieur imperméabilisé
Verlegung auf wasserdichtem Fußboden im Freien

1 Structure portante (plancher)
Tragstruktur (Estrich)

2 Couche de nivellement/inclinaison
Nivellierungs-/neigungsschicht

3 Couche d'imperméabilisation
Abichtungsschicht

4 Couche de séparation thermo-isolante • Wärmedämmende Trennschicht

5 Couche drainante • Dränschicht

6 Fond de 8-10 cm avec filet électrosoudé placé à mi-épaisseur de la couche • 8-10 cm hoher Estrich mit elektroverschweißtem Netz in der Mitte der Schichthöhe

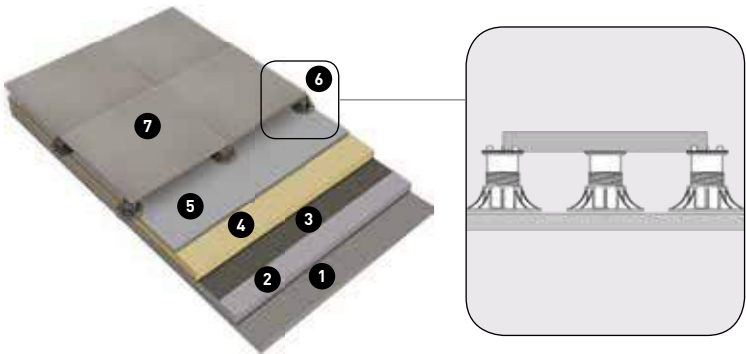

7 Dalle • Platte
Pose des dalles avec un adhésif pour extérieurs en suivant toujours les indications spécifiques du fabricant de l'adhésif utilisé et en respectant la technique du double encollage • Verlegung der Platten mit einem Kleber für den Außenbereich unter Befolgung der spezifischen Anweisungen des Herstellers des verwendeten Klebers mit der Technik des doppelten Auftragens

Joints: le joint ouvert avec une amplitude variable de plus de 5 mm et l'utilisation de ciments-joints de classe 2 est obligatoire.
Les joints de dilatation sont obligatoires.
Fugen: Hohlfugen mit variabler Fugenbreite über 5 mm und die Verwendung von Zementfugenmassen der Klasse 2 sind verpflichtend.
Außerdem sind Dehnungsfugen verpflichtend.

Ces indications représentent des conseils généraux non contraignants, basés sur l'expérience des professionnels du secteur.
Diese Anweisungen stellen allgemeine Empfehlungen auf Grundlage des letzten Stands der Technik dar, die nicht bindend sind.

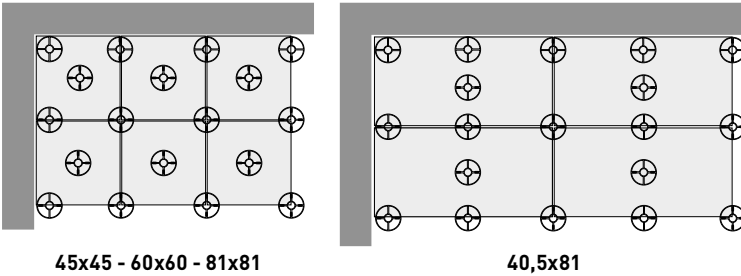

POSE SURÉLEVÉE • VERLEGUNG ALS DOPPELBODEN

- 1 Terrain ou structure portante • Erdreich oder tragstruktur
- 2 Fond en pente • Estrich bei neigung
- 3 Couche d'imperméabilisation • Abdichtungsschicht
- 4 Couche de séparation thermo-isolante (feuille de polyéthylène)
Wärmedämmende trennschicht (polyethylenfolie)
- 5 Optionnel: panneau thermo-isolant de densité adaptée
Optional: wärmedämmplatte mit geeigneter Dichte
- 6 Support pour extérieur en polypropylène (fixe, réglable ou auto-nivelant)
Träger für den aussenbereich aus polypropylen (fix, verstellbar oder selbstnivellierend)
- 7 OUTDOOR épaisseur 17 • 20 • 30 mm
OUTDOOR Staerke 17 • 20 • 30 mm

Il n'existe pas aujourd'hui de norme spécifique pour les sols surélevés extérieurs. Par conséquent, s'adresser au concepteur professionnel pour une évaluation minutieuse des conditions du projet. Dado Ceramica S.r.l. préconise d'utiliser des plots supplémentaires à placer sous la dalle comme indiqué sur les images ci-dessous. Bisher gibt es keine spezifischen Vorschriften für Doppelböden für den Außenbereich, der für die Planung zuständige Fachmann ist daher für eine sorgfältige Bewertung der Projektvoraussetzungen verantwortlich. Dado Ceramica S.r.l. empfiehlt die Benutzung von Stelzlager unter der Platte wie unten im entsprechenden Bild dargestellt.

Pour améliorer la sécurité et la protection de l'utilisateur, Dado Ceramica S.r.l. de définir à 5 cm la hauteur maximale de surélévation. Zur erhöhten Sicherheit und zum Schutz des Benutzers fordert Dado Ceramica S.r.l. eine maximale Erhöhung von 5 cm.

Ces indications représentent des conseils généraux non contraignants, basés sur l'expérience des professionnels du secteur. Diese Anweisungen stellen allgemeine Empfehlungen auf Grundlage des letzten Stands der Technik dar, die nicht bindend sind.

SOLS CARROSSABLES
FAHRBARE BOEDEN

L'utilisation de dalles de 30 mm d'épaisseur permet de réaliser des sols carrossables sans utiliser d'adhésif pour la pose.

Die Verwendung von 30 mm Dicke Platten ermoeoglicht dei Realisierung von fahrbare Boden ohne Kleber.

Ces indications représentent des conseils généraux non contraignants, basés sur l'expérience des professionnels du secteur. Diese Anweisungen stellen allgemeine Empfehlungen auf Grundlage des letzten Stands der Technik dar, die nicht bindend sind.

CONSIGLI DI POSA, PULIZIA E MANUTENZIONE • ADVICE FOR INSTALLATION AND CLEANING
CONSEILS DE POSE, DE NETTOYAGE ET D'ENTRETIEN • RATSCHLÄGE FÜR DIE VERLEGUNG, REINIGUNG
UND WARTUNG

Consigli di posaITA

Non si accettano reclami relativi a materiale già posato.

Per una posa eseguita a regola d'arte è richiesta, in generale, l'osservanza dei seguenti criteri:

1. Resistenze adeguate del sottofondo;
2. Rispetto dei tempi di maturazione del massetto;
3. Posa in ambienti di sole civili abitazioni.

Applicazioni diverse dovranno essere sottoposte a verifica di **Dado Ceramica S.r.l.**;

4. Rispetto degli eventuali giunti strutturali presenti;
5. Realizzazione di giunto elastico perimetrale, per ogni elemento in elevazione, con limitazione delle superfici continue a non oltre 50-60 m (25-30 m in presenza di grandi vetrate);
6. Utilizzo di opportuno adesivo di classe C2 (per interno) o C2E (per esterno) secondo EN 12004, utilizzando la tecnica della doppia spalmatura;
7. Utilizzo di idoneo stucco avendo cura di effettuare prove preventive di pulibilità in caso di stuccature a contrasto;
8. All'atto della posa prelevare piastrelle alternativamente da diverse scatole;
9. Controllare, prima della posa, tonalità, calibro e scelta.

Il prodotto rettificato consente anche di ottenere una superficie in cui la giunzione fra una lastra e l'altra è appena percettibile (minimo 2/3 mm).

Nell'utilizzo del prodotto naturale si consiglia una fuga di 4/5 mm tra una lastra e l'altra.

Conseils de poseFRA

Aucune réclamation portant sur des matériaux déjà posés ne sera acceptée.

Pour une pose dans les règles de l'art, il convient d'une manière générale de respecter les conditions suivantes:

1. Résistance adaptée de la sous-couche;
2. Respect des temps de maturation de la chape;
3. Pose uniquement dans des habitations civiles.

Toute autre application sera soumise au contrôle de **Dado Ceramica S.r.l.**;

4. Respect des éventuels joints structurels présents;
5. Réalisation d'un joint élastique périphérique, pour chaque élément surélevé, avec limitation des surfaces continues à un maximum de 50-60 m (25-30 m en présence de grandes baies vitrées);
6. Utilisation d'une colle adaptée de classe C2 (pour intérieur) ou C2E (pour extérieur) conformément à la norme EN 12004, en utilisant la technique du double encollage;
7. Utilisation d'un ciment-joint adapté en prenant soin de vérifier préalablement qu'il peut être nettoyé en cas de joints en contraste;
8. Lors de la pose, prélever les carreaux en alternant entre différents paquets;
9. Avant de procéder à la pose, contrôler la teinte, le calibre et l'aspect du carreau.

Le produit rectifié permet également d'obtenir une surface où la jonction entre une dalle et l'autre est à peine perceptible (2/3 mm minimum).

Lors de l'utilisation du produit avec surface naturelle, il est conseillé de respecter un joint de 4/5 mm entre chaque dalle.

Advice for intallationENG

We cannot accept complaints made after the material has been installed.

To achieve a state-of-the-art installation the following criteria must be observed:

1. Adequate sub-base resistance;
2. Respect of the slab setting times;
3. Installation in residential environments only.

Any different applications must be examined by **Dado Ceramica S.r.l.**;

4. Respect of any existing structural joints;
5. Realization of expansion joint for the perimeter, for all raised elements, with limitation of continuous surfaces to no more than 50-60 sqm (25-30 sqm in areas containing large window/glass installations or when used externally);
6. The use of a suitable C2 (for interior use) or C2E (for external use) adhesive according to EN12004, applied with the double spread coating technique;
7. The use of a suitable grout, checked and tested first, in the case of contrasting grout, and tested in a small area to verify that it can be effectively cleaned away;
8. During laying, pick tiles alternately from different boxes;
9. Check that the calibre, shade and sorting grade are correct before installing.

Rectified products also enable to obtain surfaces where joints are hardly perceptible (minimum 2/3 mm).

For the natural finish, a joint of 4/5 mm is recommended between one slab and the next.

VERLEGEHINWEISEDE

Es werden keine Reklamationen bezüglich von bereits verlegtem Material akzeptiert.

Um nach allen Regeln der Kunst zu verlegen, müssen allgemein folgende Kriterien eingehalten werden:

1. Angemessene Widerstandsfähigkeit des Untergrunds;
2. Einhaltung der Reifungszeiten des Estrichs;
3. Verlegung in ausschließlich aus Zivilwohnungen bestehenden Umgebungen. Andere Anwendungsarten müssen von **Dado Ceramica S.r.l.** überprüft werden;
4. Einhaltung eventuell vorhandener Bauwerksfugen;
5. Errichtung einer Dehnungsrandfuge für jedes erhöhte Element mit Beschränkung der durchgehenden Flächen auf maximal 50-60 m (25-30 m, falls große Glasflächen vorhanden sind!);
6. Verwendung eines geeigneten Klebers der Klasse C2 (für den Innenbereich) oder C2E (für den Außenbereich) nach EN 12004 unter Anwendung der Technik des zweifachen Kleberaufstrichs;
7. Verwendung eines geeigneten Fugenmittels, wobei man im Fall von kontrastierenden Fugen zuvor Reinigungstests durchführen sollte;
8. Bei der Verlegung die Fliesen abwechselnd aus verschiedenen Schachteln verwenden;
9. Vor dem Verlegen den Farbton, die Größenklasse und die Wahl kontrollieren.

Mit dem geschliffenen Produkt kann man auch eine Fläche mit einer kaum wahrnehmbaren Fuge zwischen den einzelnen Platten erzielen (mindestens 2-3 mm). Bei Verwendung des naturbelassenen Produkts wird empfohlen, eine 4-5 mm breite Fuge zwischen den einzelnen Platten einzuhalten.

Lavaggio-protezione e manutenzione del gres porcellanato

ITA

1. Lavaggio dopo posa

Il lavaggio dopo posa è un una fase di fondamentale importanza per tutti gli interventi successivi e per la manutenzione.

Con il lavaggio acido dopo posa si eliminano i residui di posa e il normale sporco di cantiere come: malta, colla, pittura, sporco da cantiere di varia natura... È bene sapere che oltre il 90% delle contestazioni in cantiere è dovuto ad un cattivo, o addirittura inesistente, lavaggio con detergente acido dopo posa.

Per questa operazione **Fila** propone **Deterdek**, detergente disincrostante acido che non sviluppa fumi nocivi e non aggredisce le fughe. Rimuove lo sporco da cantiere - malta, stucco, incrostazioni di varia natura. **Fila Deterdek** unisce all'azione disincrostante anche una efficace azione pulente. La pulizia di fine cantiere si esegue a completa stagionatura dello stucco cementizio (almeno 36-48 ore), attenendosi scrupolosamente ai consigli di seguito riportati:

- Utilizzare Fila Deterdek diluito 1:5
(1 litro di Detredek in 5 di acqua possibilmente calda)
- Spazzare bene il pavimento quindi distribuire uniformemente la soluzione di **Detredek** diluito, utilizzando un normale spazzettone, mop-lavapavimenti (mocio) o uno straccio ruvido per ambienti residenziali oppure frizionando con monospazzola dotata di dischi con tampone di colore verde per grandi superfici;
- Lasciare agire per qualche minuto, in funzione dell'intensità dello sporco;
- Intervenire energicamente con spugna abrasiva tipo verde oppure con spazzolone con setole in nylon o nel caso di grandi superfici con monospazzola munita di disco verde e aspira liquidi.
- Raccogliere il residuo con stracci oppure con aspiraliquidi.

Resa: 1 litro/40 m² – diluizione 1:5.

Per rimuovere i residui di stucco epossidico consigliamo di utilizzare lo specifico detergente **Fila CR10**.

Prima di eseguire la pulizia con il Fila CR10 attendere i tempi di messa in esercizio del fugante utilizzato, attenendosi scrupolosamente ai consigli di seguito riportati:

- Stendere direttamente sulla superficie da pulire con una pennellessa, coprendo perfettamente tutti i residui di stucco;
- Lasciare agire per circa 30 minuti;
- Strofinare con spugna abrasiva o eventualmente spatola sui residui più consistenti. Per l'applicazione a pavimento è possibile intervenire con monospazzola utilizzando il disco più opportuno;
- Risciacquare con cura.
- Nel caso di residui più tenaci ripetere l'applicazione seguendo le stesse modalità e lasciando agire più a lungo il prodotto.

2. Protezione tipo levigato

Con la protezione si:

- Impermeabilizza la superficie, rendendola antimacchia
- Impermeabilizza le fughe, rendendole antimacchia
- Facilita la manutenzione ordinaria

La migliore protezione si realizza con **Fila MP/90**, un protettivo liquido antimacchia che penetra in profondità proteggendo il pavimento senza generare pellicole superficiali, per questo motivo **Fila MP/90** non altera il colore della superficie e la sua efficacia rimane inalterata per diversi anni.

- Stendere puro a pavimento asciutto e pulito (almeno 4 ore dopo il lavaggio), applicarlo con pennellessa, rullo o straccio avendo cura di distribuirlo in modo omogeneo su tutta la superficie comprese le fughe.
- A pavimento asciutto (dopo circa 4-8 ore) togliere la parte in eccesso che si è seccata ed è rimasta in superficie, con straccio di cotone pulito e asciutto, lucidatrice o monospazzola con disco beige. I residui tenaci si possono rimuovere utilizzando un panno pulito imbevuto di **Fila MP/90**.

Resa: 1 litro/30 m² circa.

3. Protezione tipo lappato

Con la protezione si:

- Impermeabilizza la superficie, rendendola antisporco
- Ridona lucentezza superficiale
- Facilita la manutenzione ordinaria

La migliore protezione si realizza con **Fila PD15**, un protettivo liquido antisporco che penetra in profondità proteggendo il pavimento senza generare pellicole superficiali, per questo motivo **Fila PD15** non altera il colore della superficie e la sua efficacia rimane inalterata nel tempo e resiste agli agenti chimici.

- Stendere il prodotto puro a pavimento perfettamente asciutto e pulito (almeno 4-8 ore dopo il lavaggio), applicarlo con pennellessa o straccio avendo cura di distribuirlo in modo omogeneo su tutta la superficie comprese le fughe.
- Massaggiare accuratamente il prodotto in fase di stesura in modo da farlo penetrare bene e di eliminare completamente i residui di prodotto dalla superficie.
- Entro 10 minuti dall'applicazione di **Fila PD15** bisogna togliere la parte in eccesso che si eventualmente è rimasta in superficie, con straccio di cotone pulito e asciutto o della semplice carta tipo scottex.

Resa: 1 litro/70 m² circa.

4. Protezione tipo naturale-strutturato

Nel caso di superfici rustiche lo sporco si deposita negli interstizi del materiale, rendendo difficile la manutenzione.

In questo caso, per pavimentazioni interne ed esterne si consiglia di utilizzare **Fila STOP DIRT** che protegge il pavimento dallo sporco rendendo più facile la manutenzione ordinaria. Il protettivo **Fila STOP DIRT** protegge il pavimento senza creare pellicole superficiali, non altera il colore della superficie e non modifica l'originale grado di scivolosità (prove eseguite secondo i metodi B.C.R.A. e ASTM C 1028-2007).

- Stendere il prodotto puro a pavimento perfettamente asciutto e pulito (almeno 4-8 ore dopo il lavaggio), applicarlo con pennellessa o straccio avendo cura di distribuirlo in modo omogeneo su tutta la superficie comprese le fughe.
- Massaggiare accuratamente il prodotto in fase di stesura in modo da farlo penetrare bene e di eliminare completamente i residui di prodotto dalla superficie.
- Entro 10 minuti dall'applicazione di **Fila STOP DIRT** bisogna togliere la parte in eccesso che si eventualmente è rimasta in superficie, con straccio di cotone pulito e asciutto o della semplice carta tipo scottex.

5. Manutenzione per tutte le superfici

Per la pulizia di tutti i giorni

FilaCleaner detergente neutro a basso residuo.

Si diluisce a seconda dello sporco. Ad elevate diluizioni non necessita di risciacquo. Non lascia, sulla superficie lavata, residui cerosi o siliconici in quanto ne è privo.

Si può usare anche con macchine lavasciuga.

Resa: 2.000 m² con 1 litro - diluizione 1:200.

Per sporchi più intensi e per togliere le macchie

Fila PS/87 detergente sgrassante e smacchiatore.

Un prodotto, tante funzioni: detergente, sgrassante, decerante e smacchiatore.

Basta scegliere la diluizione giusta per ottenere l'effetto desiderato.

- Diluito 1:10 in acqua, per rimuovere sporchi intensi
- Puro, lasciandolo agire per circa 20-40 minuti per rimuovere le macchie e residui di stucco epossidico.

 UND WARTUNG

Washing-protection and maintenance of porcelain tiles

ENG

1. Washing after laying

Washing after laying is a fundamentally important stage for any subsequent treatment and for maintenance.

Acid washing after laying removes laying residues and normal building site dirt, such as: grout, glue, paint, different kinds of building site dirt. It is a good thing to know that over 90% of site complaints are due to poor, or even inexistent, washing with acid detergent after laying.

For this operation, Fila suggests **Deterdek**, the acid-based descaling detergent that does not emit harmful fumes and does not harm the grouting. It removes building-site dirt - grout, plaster, different kinds of encrusted dirt.

Fila Deterdek combines descaling with effective cleaning.

The site must be cleaned on completion, when the concrete grouting is completely dry (at least 36-48 hours), closely following the instructions given below:

- Use **Fila Deterdek** diluted 1:5 (1 litre of Deterdek in 5 of water, preferably hot)
- Brush the floor thoroughly, then evenly apply the solution of diluted **Deterdek** using a normal flat brush, floor mop or a rough household floor cloth or rubbing with a single-brush machine, fitted with discs with green buffer for large surfaces;
- Leave for a few minutes, depending on how dirty the surface is;
- Rub hard with a green abrasive sponge or flat brush with nylon bristles or, for large areas, a single-brush machine fitted with green disc and liquid vacuum cleaner;
- Remove residues with cloths or a liquid vacuum cleaner.

Coverage: 1 litre/40 m² – dilution 1:5

To remove residues of epoxy grouting we recommend using the specific **Fila CR10** detergent.

Before cleaning with **Fila CR10** wait until the grouting product applied is ready for use, closely following the instructions given below:

- Apply directly to the surface to be cleaned using a large flat paintbrush, perfectly covering all residues of plaster.
- Leave for about 30 minutes
- Rub with an abrasive sponge or even a spatula to remove larger residues. A single-brush machine fitted with the most appropriate disc can be used for floors
- Rinse thoroughly
- For more stubborn residues, repeat the same procedure, leaving the product to work for longer.

2. Polished protection

Protection:

- Waterproofs the surface, making it stain proof
- Waterproofs grouting, making it stain proof
- Makes ordinary maintenance easier

The best protection is offered by **Fila MP/90**, a stain-proofing liquid protector that penetrates deep down. **Fila MP/90** protects the floor without forming a surface film and therefore does not alter the surface colour and its effectiveness remains unaltered for several years.

- On a clean dry floor and at least 4 hours after washing, apply undiluted with a flat paintbrush, roller or cloth, taking care to spread evenly over the entire surface, including the grouting.
- When dry (after about 4-8 hours), remove any dried excess from the surface with a clean dry cotton cloth, machine polisher or single-brush machine with beige disc. Stubborn residues can be removed with a clean cloth soaked in **Fila MP/90**.

Coverage: 1 litre/30 m² approx.

3. Lappato protection

Protection:

- Waterproofs the surface, making it dirt proof
- Restores surface sheen
- Makes ordinary maintenance easier

The best protection is offered by **Fila PD15**, a dirt-proofing liquid protector that penetrates deep down. **Fila PD15** protects the floor without forming a surface film and therefore does not alter the surface colour and its effectiveness remains unaltered over time and resists chemical agents.

- On a perfectly clean dry floor and at least 4-8 hours after washing, apply undiluted with a flat paintbrush or cloth, taking care to spread evenly over the entire surface, including the grouting.
- Rub thoroughly when applying to make the product penetrate well and completely remove product residues from the surface.
- 10 minutes after applying, any excess residues of **Fila PD15** must be removed from the surface, with a clean dry cotton cloth or simple kitchen roll.

Coverage: 1 litre/70 m² approx.

4. Natural-textured protection

Dirt gets stuck in the uneven surface of rough-finish floors, making maintenance difficult.

In this case, we recommend using **Fila STOP DIRT** for indoor and outdoor floors and paving. It protects the surface from dirt and makes everyday cleaning easier.

Fila STOP DIRT protects the floor or paving without forming a surface film and does not alter the surface colour or the original skid resistance of the material (tests carried out using B.C.R.A. and ASTM C 1028-2007 methods).

- On a perfectly clean dry floor and at least 4-8 hours after washing, apply undiluted with a flat paintbrush or cloth, taking care to spread evenly over the entire surface, including the grouting.
- Rub thoroughly when applying to make the product penetrate well and completely remove product residues from the surface.
- 10 minutes after applying, any excess residues of **Fila STOP DIRT** must be removed from the surface, with a clean dry cotton cloth or simple kitchen roll.

5. Maintenance for all surfaces

For everyday cleaning

FilaCleaner low-residue neutral detergent.

Dilute depending on the dirt. When highly diluted it does not need rinsing.

It does not leave waxy or silicon residues on the washed surface as it does not contain them.

It can also be used with washing and drying machines.

Coverage: 2,000 m² with 1 litre – dilution 1:200

For more intense dirt and for removing stains

Fila PS/87 degreasing detergent and stain remover.

One product, lots of uses: detergent, degreaser, wax remover

and stain remover.

Just choose the right dilution to give the desired effect.

- Diluted 1:10 in water to remove intense dirt
- Undiluted, left to work for around 20-40 minutes to remove stains and residues of epoxy grouting.

CONSIGLI DI POSA, PULIZIA E MANUTENZIONE • ADVICE FOR INSTALLATION AND CLEANING
 CONSEILS DE POSE, DE NETTOYAGE ET D’ENTRETIEN • RATSCHLÄGE FÜR DIE VERLEGUNG, REINIGUNG UND WARTUNG

CONSIGLI PER LA PULIZIA DOPO POSA E MANUTENZIONE

dei pavimenti in gres porcellanato **naturali** e **lappati** Dado Ceramica srl

All’attenzione del posatore: prima pulizia

La cura con la quale si esegue la pulizia dopo posa influenzerà la pulibilità del pavimento per tutta la sua durata.

Importantissimo è pulire bene a fine posa, a pavimento nuovo. È necessario infatti, dopo aver applicato il fugante, togliere tutti i residui di cemento lasciati in fase di posa e stuccatura dai posatori con l'utilizzo di acido tamponato (tipo Keranet o similari). Lasciare agire per circa 40 minuti e poi risciacquare bene con appositi strumenti aspira liquidi fino a vedere l'acqua utilizzata limpida. A seguire effettuare un lavaggio con un prodotto sgrassante leggermente alcalino (tipo sgrassatore per cappe da cucina o tipo Chante Clair) ed un buon risciacquo. Dopo queste operazioni la messa in servizio del pavimento è terminata a regola d'arte.

ATTENZIONE: Si consiglia di utilizzare fuganti non addittivati con polimeri. In caso di utilizzo di questa tipologia si prega di pulire immediatamente con un detergente alcalino.

Se queste operazioni non vengono effettuate correttamente il pavimento conserverà un invisibile strato di calcare che col tempo si potrà macchiare o impedire una pulizia profonda.

Fatto questo e avuta la certezza che le piastrelle siano ben pulite, il pavimento non presenterà problemi. Se però la pulizia iniziale non è stata eseguita correttamente ed il pavimento presenta aloni, macchie o piastrelle con superficie opacizzata è possibile rimediare ripartendo dalla prima pulizia, cioè utilizzando un detergente a base acida e risciacquando ripetutamente con acqua pulita, in quanto non esistono detergenti in grado di pulire all'istante e al solo passaggio un pavimento così sporco.

Manutenzione e pulizia ordinaria

Si consiglia l'utilizzo di acqua e aceto una volta al mese per asportare il calcare che inevitabilmente si deposita sul pavimento durante le normali operazioni di pulizia.

Per la pulizia quotidiana è sufficiente utilizzare, con moderazione, un detergente neutro a basso residuo, prodotti acquistabili nei supermercati. È importante sciacquare spesso il panno utilizzato nella pulizia e non eccedere nella quantità di detergente, infatti l'uso di acqua sporca, prodotti auto lucidanti o eccesso di detergenti può formare, col tempo, una patina invisibile causa di aloni e macchie.

Di norma, i produttori consigliano di provare i loro detergenti su una piccola porzione nascosta del pavimento o del rivestimento prima di utilizzarli su tutta la superficie da trattare.

Nel caso di uso accidentale o volontario di prodotti chimici (detergenti, acidi o solventi), seguire attentamente le istruzioni d'uso previste per ogni prodotto, in particolare si suggerisce di effettuare una prova su una piccola porzione nascosta della superfice da trattare e comunque deve sempre seguire un abbondante risciacquo e accurata asciugatura.

ATTENZIONE: di fondamentale importanza è non utilizzare mai smacchiatori tipo antiruggine o di tipo spray perché contengono acido fluoridrico, il danno che provocherà sarà irreversibile ed irreparabile in quanto non esiste pavimento resistente a tale acido.

ADVICE FOR CLEANING AFTER INSTALLATION AND FOR MAINTENANCE

of Dado Ceramica srl **natural** and **lapped** porcelain stoneware floor tiles

For installers: initial cleaning

Careful, scrupulous cleaning of new floors after installation will make them easier to clean for the rest of the time thereafter, so it is extremely important.

After the grout has been applied, all the cement residue left behind at the installation and grouting stage must be removed using buffered acid (such as Keranet or similar).

Leave the acid to work for about 40 minutes, then rinse thoroughly using suitable wet vacuum devices until the water runs clear.

After this, wash using a slightly alkaline degreasing product (such as the type used for kitchen hoods, Chante Clair or similar) and rinse carefully.

The flooring is now perfectly ready for use.

N.B.: We recommend using grout without polymer additives. If this type of grout is used, cleaning must be carried out immediately using an alkaline detergent.

If these operations are not carried out correctly, the floor will retain an invisible layer of limescale which in time may become soiled or prevent proper cleaning.

Once this has been done and you are sure the tiles have been properly cleaned, there will be no problems with the floor. If, however, this initial cleaning has not been carried out properly and there are shades or stains on the floor, or tiles with a dull surface, the problem can be solved by starting out from the initial cleaning process, i.e. using an acid-based detergent and rinsing repeatedly with clean water, because no detergent is able to clean such a dirty floor in just one go.

Ordinary cleaning and maintenance

Water and vinegar should be used once a month to remove the limescale that inevitably settles on the floor during normal cleaning operations.

For everyday cleaning, it is sufficient to use a moderate amount of neutral, low-residue detergent, which can be purchased in supermarkets.

It is important to rinse the cloth used for cleaning frequently, and not to use too much detergent; in time, dirty water, self-polishing products or too much detergent can leave an invisible patina to form that causes shades and stains. Manufacturers generally recommend testing their detergents on a small section of floor or wall hidden from view before using it on the whole surface to be treated. If chemicals (detergents, acids or solvents) are used either accidentally or voluntarily, carefully follow the instructions provided for the product in question.

We suggest trying products out on a small section hidden from view of the surface to be treated, and in all cases the surface must be thoroughly rinsed and dried.

N.B.: spray stain removers or rust removers must never be used, because they contain hydrofluoric acid, which causes irreversible, irreparable damage to all kinds of flooring.

 CONSEILS DE POSE, DE NETTOYAGE ET D’ENTRETIEN • RATSCHLÄGE FÜR DIE VERLEGUNG, REINIGUNG UND WARTUNG

CONSEILS DE NETTOYAGE APRÈS LA POSE ET D’ENTRETIEN

des revêtements de sol en grès cérame **naturels** et **polis** Dado Ceramica srl

À l’attention de la personne en charge de la pose: premier nettoyage

Le soin apporté au nettoyage une fois la pose achevée a une incidence sur la nettoyabilité du revêtement de sol pendant toute sa durée d'utilisation. Il est fondamental de procéder à un nettoyage correct du nouveau revêtement de sol une fois la pose achevée. Après le remplissage des joints, éliminer tous les résidus de ciment laissés lors de la pose et du remplissage des joints par les personnes en charge de la pose en utilisant de l'acide tamponné (type Keranet ou produit similaire). Laisser agir pendant environ 40 minutes puis rincer avec soin à l'aide d'outils adaptés d'aspiration de liquide, jusqu'à ce que l'eau utilisée soit limpide. Procéder ensuite à un nettoyage avec un produit dégraissant légèrement alcalin (comme un dégraissant pour hottes de cuisine ou un produit de type Chante Clair) et rincer convenablement. Une fois ces opérations réalisées, la mise en service du revêtement de sol est considérée comme achevée dans les règles de l'art.

ATTENTION: il est recommandé d'utiliser des produits de jointoiment sans additifs polymères. En cas d'utilisation de ce type de produits, nettoyer immédiatement avec un produit de nettoyage alcalin.

Si ces opérations ne sont pas réalisées correctement, une couche de calcaire invisible demeurera sur le revêtement de sol qui, avec le temps, pourrait se tacher ou empêcher un nettoyage en profondeur. Une fois ces opérations réalisées et lorsque l'on a la certitude que les carreaux sont bien propres, le revêtement de sol ne présente plus aucun problème. Cependant, si le nettoyage initial n'a pas été réalisé correctement et si le revêtement de sol présente des auréoles, des taches ou des carreaux dont la surface est opaque, il est possible d'y remédier en recommençant un nettoyage initial. Utiliser alors un produit de nettoyage à base acide puis rincer de manière répétée à l'eau propre, dans la mesure où il n'existe pas de produits capables de nettoyer instantanément et en un seul passage un revêtement de sol présentant un tel degré de saleté.

Entretien et nettoyage ordinaire

Il est conseillé d'utiliser de l'eau et du vinaigre une fois par mois pour éliminer le calcaire qui se dépose inévitablement sur le revêtement de sol lors des opérations de nettoyage normales. Pour le nettoyage quotidien, il suffit d'utiliser, avec modération, un produit de nettoyage neutre à faible résidu, vendu couramment dans le commerce. Il est important de rincer régulièrement le linge utilisé pour le nettoyage et de ne pas utiliser une quantité excessive de produit de nettoyage. L'utilisation d'eau sale, de produits autolustrants ou d'une quantité excessive de produit nettoyant peut avec le temps entraîner la formation d'une patine invisible et l'apparition d'auréoles et de taches.

Généralement, les fabricants recommandent d'essayer leurs produits de nettoyage sur une petite portion cachée du revêtement avant de les utiliser sur l'ensemble de la surface à nettoyer. En cas d'utilisation accidentelle ou volontaire de produits chimiques (produits de nettoyage, acides ou solvants), suivre attentivement les instructions d'utilisation de chaque produit, en particulier s'il est recommandé d'effectuer un essai sur une petite portion cachée de la surface à traiter, et toujours procéder à un rinçage abondant et à un séchage méticuleux.

ATTENTION: il est fondamental de ne jamais utiliser de détachants antirouille ou en spray, qui contiennent de l'acide fluorhydrique. Les dégâts causés seraient irréversibles et irréparables dans la mesure où il n'existe aucun revêtement de sol résistant à cet acide.

RATSCHLÄGE FÜR DIE REINIGUNG NACH DEM VERLEGEN UND DIE WARTUNG von **naturbelassenen** und **geläpten** Feinsteinzeugböden von Dado Ceramica srl

Für den Verleger: erste Reinigung

Die Sorgfalt, mit der man die Reinigung nach dem Verlegen durchführt, wird die Reinigungsfähigkeit des Fußbodens während seiner gesamten Lebensdauer beeinflussen. Es ist sehr wichtig, den neuen Bodenbelag nach der Verlegung gut zu reinigen. So ist es notwendig, nach dem Auftragen der Fugenmasse alle beim Verlegen und Verfugen hinterlassenen Zementrückstände mit einer gepufferten Säure (der Art Keranet oder ähnlichem) zu entfernen.

Ungefähr 40 Minuten lang einwirken lassen und dann gut mit geeigneter Ausrüstung zur Ansaugung von Flüssigkeiten spülen, bis das verwendete Wasser klar bleibt. Danach eine Reinigung mit einem leicht alkalischen Entfetter (der Art der Entfetter für Abzughauben oder z.B. Chante Clair) ausführen und gut spülen.

Nach diesen Vorgängen ist der Fußboden nach allen Regeln der Kunst für eine Inbetriebnahme bereit.

ACHTUNG: Es wird empfohlen, Fugenmittel ohne Polymerzusätze zu verwenden. Bei Verwendung dieser Typologie wird empfohlen, sofort mit einem alkalischen Reinigungsmittel nachzureinigen.

Falls diese Vorgänge nicht korrekt durchgeführt werden, wird eine unsichtbare Kalkschicht auf dem Fußboden verbleiben, die mit der Zeit Flecken erzeugen oder eine tiefgehende Reinigung verhindern könnte. Nach diesen Maßnahmen und nachdem man sich vergewissert hat, dass die Fliesen gut gereinigt sind, wird der Fußboden keine Probleme aufweisen. Falls die Erstreinigung dagegen nicht korrekt ausgeführt wird und der Fußboden Schlieren, Flecken und Fliesen mit matter Oberfläche aufweist, kann man Abhilfe schaffen, indem man die Erstreinigung unter Verwendung eines Reinigungsmittels auf Säurebasis wiederholt und mehrmals mit sauberem Wasser nachspült, da es keine Reiniger mit sofortiger Wirkung gibt, die einen auf diese Weise verunreinigten Fußboden in einem Durchgang reinigen.

Normale Wartung und Reinigungsge

Es wird empfohlen, einmal im Monat Wasser mit Essig zu verwenden, um den Kalk zu entfernen, der sich unvermeidlich bei der normalen Reinigung auf dem Fußboden ablagert. Für die tägliche Reinigung ist es ausreichend, mit Maßen einen in Supermärkten erhältlichen Neutralreiniger mit geringem Rückstand zu verwenden. Es ist wichtig, das bei der Reinigung verwendete Tuch häufig auszuspülen und nicht mit der Reinigermenge zu übertreiben, da die Verwendung von schmutzigem Wasser, Reinigern mit Selbstglanzeffekt oder zu viel Reinigungsmittel mit der Zeit eine unsichtbare Patina bilden kann, die Schlieren und Flecken erzeugt. Normalerweise empfehlen die Hersteller, die Reiniger auf einer kleinen, verborgenen Stelle des Fußbodens oder der Verkleidung zu testen, bevor man sie auf der gesamten zu behandelnden Fläche einsetzt. Im Fall einer unabsichtlichen oder gewollten Verwendung von chemischen Produkten (Reiniger, Säuren oder Lösungsmittel), die Gebrauchsanweisungen für das jeweilige Produkt aufmerksam befolgen, insbesondere wird empfohlen, einen Test auf einer kleinen verborgenen Stelle der zu behandelnden Fläche auszuführen und in jedem Fall reichlich abzuspülen und sorgfältig zu trocknen.

ACHTUNG: Es ist von grundlegender Bedeutung, niemals Fleckenentferner der Art Rostschutzmittel oder Sprays zu verwenden, da sie Fluorwasserstoffsäure enthalten, die irreversible Schäden verursachen, da es keinen Fußboden gibt, der dieser Säure widersteht.

Dado Ceramica

S.A.P. Distanziatore Livellante

La Soluzione per una Posa Perfetta

Gentile cliente/posatore,
le aziende ceramiche hanno immesso sul mercato pavimenti e rivestimenti di grandi formati rettificati che necessitano di una posa più specifica e accurata.
Il **distanziatore livellante S.A.P.** è nato per migliorare la messa in opera delle piastrelle e semplificare il lavoro del posatore ottenendo così un prodotto finito esteticamente perfetto.

Per questo motivo, **DADO CERAMICA** consiglia di posare con il **distanziatore livellante S.A.P.** per prevenire gli inconvenienti che possono presentarsi durante la posa.

In particolare, il **distanziatore livellante S.A.P.** :

- Allinea piastrelle di diverso spessore
- Elimina il dislivello tra le piastrelle
- Assicura una fuga minima di 1 mm
- Non necessita di alcuno strumento aggiuntivo
- Diminuisce le contestazioni
- Risultati professionali

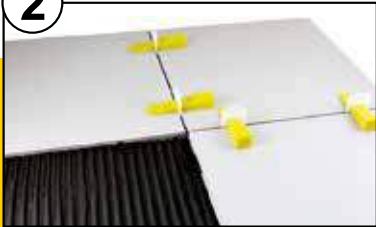

Per maggiori informazioni, visita il sito www.andalsystem.it oppure contatta i nostri tecnici **0962 431436 - info@andalsystem.it**

1

Posizionare due o più tiranti al di sotto della piastrella a circa 10 cm dagli angoli. Posizionare la piastrella successiva.

2

Far scivolare il cono all'interno del tirante, spingendo con forza fino all'allineamento delle piastrelle.

3

Una volta indurito il collante sarà sufficiente un calcio in linea di fuga sul tirante per eliminarlo.

S.A.P.3

S.A.P.4

FOR THE ATTENTION OF THE INSTALLER

FÜR FLIESENLEGER

S.A.P. LEVELING SPACERS:
THE BEST SOLUTION FOR A PERFECT TILE INSTALLATION

Dear customer/installer,
large-format rectified porcelain produced by ceramic factories needs a more precise and accurate tile installation.

The **SAP leveling spacer** is designed to improve tile installation and oversimplify the work of the installer and achieve an excellent result. For all these reasons, **DADO CERAMICA** recommends to install tiles with the **SAP leveling spacer** in order to prevent inconveniences which may occur during tile installation.

In particular, the **SAP leveling spacer**:

- Aligns tiles of different thicknesses,
- Virtually eliminates lippage,
- Allows a minimum joint of 1 mm
- No special tools are required
- Decreases call-backs due to poor installation
- Professional results

For further information, please visit our website www.andalsystem.it or contact our specialists **0039 (0)962 431436 - info@andalsystem.it**

SYSTEM S.A.P. ZUM NIVELLIEREN VON FLIESEN BEI DER VERLEGUNG

DADO CERAMICA empfiehlt Andalsystem:
Mit diesem **SAP System** ist es möglich Fliesen absolut Plan zu verlegen. Überzähne werden zuverlässig vermieden.
Die Anwendung ist einfach und schnell.
Man spart Zeit und erhält einen perfekt verlegten Boden, bei geringem Kostenaufwand.
Besonders vorteilhaft erweist sich bei großformatigen und kalibrierten Fliesen.
Die Zuglaschen (Weiß) werden bei der Verlegung in die Fugen (1 mm) eingesetzt.
Nach Einlegen der benachbarten Fliese drückt man den Keil (Gelb) mit der Spezialzange durch die Lasche, bis die Oberfläche beider Fliesen auf gleicher Ebene ist.
Nach dem Erhärten des Klebers wird die Lasche an der Sollbruchstelle einfach abgebrochen.
Der Keile kann wiederverwendet werden.
Das System ist nach dem Ausfugen nicht mehr erkennbar.

Info unten www.andalsystem.it oder **0049 (0) 151 11 15 77 57 - info@andalsystem.it**

A LA ATENCIÓN DEL ALICATADOR

À L'ATTENTION DE L'INSTALLATEUR

SEPARADORES DE NIVELACIÓN S.A.P. :
LA MEJOR SOLUCIÓN PARA UNA PERFECTA COLOCACIÓN

Estimado cliente/alicatador,
las empresas de cerámicos han introducido en el mercado pavimentos y revestimientos de gran formato rectificado que necesitan una colocación más precisa.

El **separador de nivelación S.A.P.** es un producto diseñado para mejorar la colocación de las baldosas y simplificar el trabajo del alicatador, así que logre un resultado excelente.
Por este motivo, **DADO CERAMICA** recomienda colocar con el **separador de nivelación S.A.P.** para prevenir los inconvenientes que pueden verificarse durante la colocación.

En particular, el **separador de nivelación S.A.P. :**

- Nivelas baldosas de diferente espesor;
- Elimina el desnivel entre las baldosas;
- Permite una junta mínima de 1 mm;
- No necesita alguna herramienta adicional;
- Disminuye las contestaciones debidas a una incorrecta colocación;
- Resultados profesionales.

Para mayor informaciones, por favor visite nuestro sitio web www.andalsystem.it o contacte nuestros especialistas al número **0039 (0)962 431436 - info@andalsystem.it**

CROISILLONS AUTONIVELANTS S.A.P. :
LA MEILLEURE SOLUTION POUR POSER VOTRE CARRELAGE

Cher client/installateur,
Les sociétés de carreaux ont réalisé carreaux de grand format rectifié que exigent de une pose plus précise.

Le **croisillon autonivelant S.A.P.** est développé pour améliorer la pose des carreaux et simplifier le travail de l'installateur, obtenant un résultat excellent.

Pour toutes ces raisons, **DADO CERAMICA** préconise le **croisillon autonivelant S.A.P.** afin de prévenir problèmes que peuvent se produire pendant la pose des carreaux.

En particulier, le **croisillon autonivelant S.A.P. :**

- Est idéal pour une utilisation avec des carreaux de différentes épaisseurs;
- Permet d'éliminer tout décalage de niveau entre les carreaux;
- Permet un largeur minimale du joint de 1 mm entre les carreaux;
- Ne nécessite aucun outil particulier;
- Diminue rappels dus à une mauvaise installation;
- Résultats professionnels.

S.A.P. 4

S.A.P. 3

339

OGGETTO DELLA FORNITURA - La fornitura comprende esclusivamente quanto indicato nella conferma d'ordine. Eventuali caratteristiche e dati risultanti da cataloghi o illustrazioni sono sempre approssimativi ed è quindi facoltà della Venditrice apportare quelle variazioni che si ritenessero opportune senza obbligo di preavviso.

ORDINI - Sono sempre impegnativi per il Compratore: la Venditrice sarà vincolata solo dopo la conferma scritta. S'intende comunque che ogni ordine viene fatto con la completa accettazione da parte del Compratore di tutte le condizioni generali stabilite dalla Venditrice. Nell'ordinazione dovranno essere contemplati soltanto articoli di produzione corrente: non saranno comunque oggetto di conferma quei materiali per i quali la Venditrice in dipendenza di esigenze interne o di mercato, ha ritenuto opportuno sospendere la produzione. Ogni ordine deve essere inoltrato per iscritto, anche se, per ragioni di urgenza dovesse essere preceduto da comunicazione telefonica.

TRATTATIVE - Quanto contemplato nella conferma della Venditrice annulla eventuali accordi o trattative che non siano riportati nella conferma stessa.

TERMINE DI CONSEGNA - Decorre dalla data della conferma d'ordine e deve intendersi come approssimativo: esso non costituisce comunque condizione essenziale e può essere prorogato del diritto dalla Venditrice per cause indipendenti dalla propria volontà.

SPEDIZIONE - La spedizione si intende effettuata al momento in cui la fornitura viene messa a disposizione dell'acquirente o all'atto della consegna al vettore. Sono ammesse spedizioni anche parziali senza che ciò debba costituire per il Cliente causa di ritardo.

TRASPORTO - La merce, salvo specifico patto contrario scritto, è sempre venduta franco Stabilimento **Dado Ceramica S.r.l.** e viaggia a rischio e pericolo del Compratore anche se la Venditrice si fosse assunta l'onere della consegna a domicilio. Il Compratore è tenuto a precisare al momento dell'ordine dettagliate modalità di trasporto: la Venditrice spedisce la merce col mezzo ritenuto più opportuno qualora mancassero preventive indicazioni al riguardo, senza che ciò costituisca per il Compratore motivo di reclamo.

ASSICURAZIONE - Se richiesta è sempre a carico dell'acquirente. **IMBALLO** - Salvo accordi diversi, preventivamente accettati dalla Venditrice, l'imballo sarà sempre in cartoni: avvenuta la consegna all'acquirente o al vettore senza reclami o riserve, cessa ogni responsabilità della venditrice.

Gli europallet saranno addebitati al costo di Euro 9,00/pz. Ci riserviamo la possibilità di variare l'importo in caso di significative variazioni del costo delle materie prime.

RECLAMI - I reclami relativi ad eventuali ammanchi o rotture dovranno essere fatti esclusivamente al vettore: qualunque altro reclamo relativo alla natura e caratteristiche del materiale dovrà essere tempestivamente inoltrato alla Venditrice a mezzo lettera raccomandata, non oltre in ogni caso 10 gg. dal ricevimento della merce. TRASCORSO TALE TERMINE SI INTENDE CHE LA MERCE È STATA VISTA ED ACCETTATA nello stato in cui si trova.

CARATTERISTICHE MATERIALI - Le tonalità dei colori campionati hanno carattere puramente indicativo, così come la possibilità di ripetere tonalità precedentemente fornite, non rappresenta impegno per la fornitrice e motivo di reclamo per l'acquirente.

GARANZIA - La Venditrice garantisce la qualità di quanto fornito conformemente alla scelte richieste dal Compratore: si impegna a sostituire in pari quantità quei materiali che, a suo insindacabile giudizio, dovessero presentare difetti tali da non essere considerati conformi all'ordine, senza peraltro essere tenuta a risarcimento di danni diretti o indiretti di qualsiasi ragione. La garanzia non è trasferibile ed è valida soltanto nei confronti dell'acquirente cui è intestata la fattura di vendita.

CONTESTAZIONI - Nel modo più assoluto non saranno presi in esami i reclami riferentisi a materiali già in opera. In ogni caso, anche qualora il Compratore ritenesse di poter vantare reclami o diritti, non sono ammissibili ritardi o sospensioni di pagamento in corso.

INADEMPIENZE E INSOLVENZE - In caso di mancato o ritardato pagamento totale o parziale, sarà facoltà della Venditrice risolvere in tutto o in parte qualsiasi contratto in atto, facendo valere ogni suo diritto.

PREZZI - Si intendono sempre riferiti al listino in vigore al momento della conferma della Venditrice. Sono sempre relativi a merce franco stabilimento e non comprendono quindi altri oneri come I.V.A. bolli o tasse di qualsiasi natura, che saranno sempre a carico del Compratore.

PAGAMENTI - I pagamenti dovranno essere effettuati come indicati nella conferma d'ordine: a tutti gli effetti il luogo del pagamento resta fissato nella sede della **Dado Ceramica S.r.l.** anche se effettuati a mezzo di personale autorizzato, rimessa diretta, tratte autorizzate o effetti. La Venditrice ha facoltà di porre in circolazione i titoli ricevuti in pagamento, i quali si intendono sempre accettati prosolvendo e salvo buon fine.

L'inosservanza dei termini di pagamento dà diritto alla Venditrice:

- di esigere gli interessi di mora al tasso commerciale corrente più le spese;
- di emettere tratte ritenendole autorizzate in luogo dei pagamenti pattuiti per rimessa diretta;
- di sospendere ogni evasione di ordini in corso;
- in caso di protesti di esigere a vista l'importo totale dovutole.

SPESE TRATTE - Gli oneri relativi al bollo delle tratte emesse dalla Venditrice sono a carico dell'acquirente e saranno conteggiate in fattura e comprese nella tratta stessa.

FORO - Qualsiasi controversia dipendente o conseguente da contratti con **Dado Ceramica S.r.l.**, anche se riferibili ad affari trattati da propri dipendenti o incaricati fuori dalla propria Sede, unico Foro competente è quello di Reggio Emilia.

RISERVA DI PROPRIETÀ - La merce resta di proprietà della **Dado Ceramica S.r.l.** fino a suo completo pagamento.

SUBJECT OF THE SUPPLY - The supply only includes that indicated in the order confirmation. Features and information given in catalogues or illustrations are always approximate and it is therefore the seller's right to make any variations considered necessary without advance warning.

ORDERS - These are always binding for the purchaser: the seller shall only be committed after written confirmation. It is, however, understood that each order is placed with the purchaser's full acceptance of all general conditions established by the seller.

Only articles of current production shall be contemplated in the order: those materials the production of which the seller has considered it advisable to suspend owing to internal or market requirements shall not therefore be subject to confirmation. Every order shall be made in writing although this can be preceded by a telephone call in the event of urgent need.

NEGOTIATIONS - Everything indicated in the seller's confirmation voids an agreement or negotiation which may not be included in the confirmation itself.

DELIVERY TERM - This runs from the date of the order confirmation and shall be considered as approximate; it shall not, in any case, be considered an essential condition and may be extended by the seller in the event of unforeseen circumstances.

DISPATCH - Dispatch is understood to have been made the moment in which the goods are placed at the purchaser's disposal on deliver to the carrier. Partial dispatches are also permitted without this being considered by the customer as cause of delay.

TRANSPORT - Excepting specific agreement in writing to the contrary, the goods are always understood as having been sold ex works **Dado Ceramica S.r.l.** and travel at the purchaser's risk even when the seller has assumed the charge of delivery at the purchaser's. The purchaser undertakes to live details about the means of transport when placing the order: failing this, the seller shall dispatch the goods via the means considered most opportune without this entitling the purchaser to make claims.

INSURANCE - If requested and always at the purchaser's charge. **PACKING** - Excepting different agreements accepted by the seller packing shall always be in cartons: all responsibilities of the seller shall cease once delivery has been made to the purchaser or carrier without claims or reserves. **Europallets will be charged Euro 9,00/each. We reserve the possibility to change this amount in case of significant increases in the cost of raw material.**

CLAIMS - Claims pertaining to missing goods or breakages shall only be made to the carrier. Any other claim concerning the nature or features of the material shall be immediately forwarders to the seller by means of registered letter no later than 10 days following receipt of the goods themselves. Once this terms has elapsed the goods shall be understood to have been examined and accepted as they are.

FEATURES OF THE MATERIALS - The shades of the sample colours are purely indicative while the possibility of repeating previously supplied colour tones shall not be binding for the seller and shall not entitle the purchaser to make claims.

GUARANTEE - The seller guarantees the quality of the supplied materials according to the grades requested by the purchaser: the seller undertakes to replace in equal quantities those materials which, according to his final judgement, present defects as

to be considered not in compliance with the order, without, moreover, being obliged to reimbursement of direct or indirect damages for any reason whatsoever. The guarantee cannot be transferred and shall only be valid for the purchaser to whom the sales invoice is made out.

DISPUTES - In no case shall claims pertaining to already laid materials be considered. Moreover, in no case shall delays or suspensions of payments in progress be permitted even if the purchaser considers himself entitled to make claims.

UNFULMIMENTS AND INSOLVENCIES - In the case of total or partial unfulfilled or delayed payment the seller shall have the right to completely or partly withdraw from a contract in progress and to demand all his rights.

PRICES - These are always understood to refer to the price list in force at the moment of the seller's confirmation. They always pertain to goods delivered ex works and do not, therefore, include other chares such as VAT, stamps or taxes of any nature which

shall be at the purchaser's charge.

PAYMENTS - Payments shall always be fulfilled as indicated on the order confirmation: in any case, the place of payment shall always be the registered offices of **Dado Ceramica S.r.l.** even if made through authorized personnel direct remittance, authorized drafts or bills. The seller has the rights to circulate the instruments received in payment which shall always be understood to have been accepted pro solvendo and subject to collection.

Failure to comply with the terms of payment entitles the seller to:

- exact the arrears interests at the current commercial rate, plus expenses;
- issue drafts, considering them authorized in place of the agreed payments by direct remittance;
- suspend fulfilment of orders in progress;
- in the event of protests, to exact the total due sum on sight.

DRAFT EXPENSES - Charges pertaining to the stamps on the drafts issued by the seller shall be at the Purchaser's charge, shall be calculated in future and included in the draft itself.

COMPETENT COURT - The only competent court shall be that of Reggio Emilia for all disputes resulting from or following contracts with **Dado Ceramica S.r.l.** even when they concern business negotiated by employees of the company or authorized persons outside the registered offices.

RESERVE OF PROPERTY - All goods shall remain the property of **Dado Ceramica S.r.l.** until payment is made in full.

FRA

OBJET DE LA FORNITURE - La fourniture comprend exclusivement ce qui est indiqué dans la confirmation de commande. Les caractéristiques et données indiquées sur les catalogues ou les illustrations sont toujours indicatives; le vendeur a donc la faculté d'apporter les variations qu'il retiendrait opportunes sans obligation de préavis.

COMMANDES - Elles engagent toujours l'acheteur; le vendeur sera retenu engagé uniquement après la confirmation écrite. Il est entendu dans tous les cas que chaque commande est faite sous acceptation totale et entière de l'acheteur des conditions générales fixées par le vendeur. La commande devra reporter uniquement les articles de production courante; en aucun cas les matériaux pour lesquels le vendeur, dépendamment des exigences internes ou de marché a retenu opportun d'arrêter la production, ne feront pas l'objet d'une confirmation. Toute commande doit être adressée par écrit, même si pour des raisons d'urgence elle devait être précédée d'une communication téléphonique.

NEGOCIATIONS - Ce qui est prévu dans la confirmation du vendeur invalide tous accords éventuels ou négociations qui n'auraient pas été reportées dans la dite confirmation.

DELAIS DE LIVRAISON - Les délais courent à compter de la date de la confirmation de commande et son donnés à titre indicatif; ils ne constituent en aucun cas une condition essentielle et peuvent être prorogés de droit par le vendeur pour des causes indépendantes de sa volonté.

EXPÉDITION - L'expédition s'entend effectuée au moment où la fourniture est mise à disposition de l'acheteur lors de livraison au transporteur les envois, même partiels sont admis sans que cela constitue une cause de retard pour le client.

TRANSPORT - La marchandise, sauf accord écrit contraire, est toujours vendue franco établissement **Dado Ceramica S.r.l.** et voyage aux risques et périls de l'acheteur même si le vendeur aurait pris à sa charge la livraison à domicile. L'acheteur est tenu de préciser, lors de la commande, les modalité détaillées de transport; le vendeur expédiera la marchandise avec le moyen qu'il retiendra plus opportun dans le cas où des indications précises ne lui seraient pas fournies à ce sujet, sans que cela constitue un motif de réclamation de la part de l'acheteur.

ASSURANCE - Quand elle est requise, elle est toujours à la charge de l'acheteur.

EMBALLAGE - Sauf accords contraires, acceptés préalablement par le vendeur, l'emballage sera toujours en cartons: une fois que la livraison a été effectuée à l'acheteur ou au transporteur sans réclamations ou réserves, toute responsabilité du vendeur cesse. **Les europalettes seront débitées Euro 9,00/pièce. Nous nous reservons la possibilité de changer le montant au cas d'importantes variations du cout des matières premières.**
RECLAMATIONS - Les réclamations relatives à d'éventuels manques ou cassures devront être présentées exclusivement au transporteur; toute autre réclamation concernant la nature et les caractéristiques du matériel devra être adressée immédiatement au vendeur par lettre recommandée dans les dix jours qui suivent la réception de la marchandise. Passé de cela, la marchandise sera considérée comme acceptée dans l'état dans lequel elle se trouve.

CARACTERISTIQUES DES MATERIAUX - Les tonalités des couleurs échantillonnées ont un caractère purement indicatif, ainsi que la possibilité de repérer des tonalités fournies précédemment, ne représente pas un engagement pour le fournisseur ou un motif de réclamation pour l'acheteur.

GARANTIE - Le vendeur garantit la qualité du produit fourni conformément aux choix requis par l'acheteur; il s'engage à remplacer dans les mêmes quantités les matériaux qui, d'après son jugement sans appel, présenteraient des défauts tels à ne pas être considérés conformes à la commande, sans pour cela être tenue au remboursement de dégâts directs ou indirects de quelconque nature. La garantie n'est pas aliénable et elle est valable uniquement à l'égard de l'acheteur auquel est instituée la facture de vente.

CONTESTATIONS - Les réclamations concernant des matériaux déjà en oeuvre ne seront absolument pas prises en compte. Dans tous les cas, même si l'acheteur estimerait pouvoir avancer des réclamations ou prétendre des droits, aucun retard ou cessation des paiements en cours ne sera admissible.

INEXECUTION ET INSOLVIBILITE - Dans le cas de non paiement ou paiement retardé total ou partiel, le vendeur aura faculté de résilier tout ou partie du contrat en cours, en faisant valoir tous ses droits.

PRIX - Les prix se réfèrent toujours au tarif en vigueur au moment de la confirmation du vendeur pour la marchandise franco établissement et ne comprennent donc pas tout autre frais tels que TVA, timbres fiscaux ou taxes de quelconque nature, qui seront toujours à la charge de l'acheteur.

PAIEMENTS - Les paiements doivent être effectués comme indiqué dans la confirmation de commande; à tous les effets le lieu de paiement est fixé auprès du siège de **Dado Ceramica S.r.l.** même s'ils sont effectués par l'intermédiaire de personnel autorisé, par paiement direct, traites acceptés ou effets bancaires. Le vendeur a la faculté de mettre en circulation les effets reçus pour paiement, que s'entendent toujours acceptés par cession en vue de paiement et sauf bonne fin. La non observation des délais de paiement donnera droit au vendeur:

- d'exiger les intérêts de retard au taux commercial courant en plus des frais;
- d'émettre des traites en les considérant autorisées à la place des paiements convenus comme paiement direct;
- de suspendre toute exécution de commande en cours;
- d'exiger le paiement à vue, en cas de protêts, du montant total qui lui est du.

FRAIS D'EMISSION DE TRAITES - Les frais relatifs au timbre fiscal des traites émises par le vendeur sont à la charge de l'acheteur et seront reportés sur facture et comprises dans la traite.

TRIBUNAL - Seul le tribunal de grande instance de Reggio Emilia sera compétent pour tout différent dépendant ou conséquent de contrats avec **Dado Ceramica S.r.l.** même si pouvant se référer à des affaires négociées par ses propres employés ou mandatés hors de son Siège.

RISERVE DE PROPRIÉTÉ - La marchandise reste de notre propriété jusqu'au payement total.

DE

VERKAUFSGEGENSTAND - Die Lieferung wird ausschließlich entsprechend der Auftragsbestaetigung aussggefuehrt. Alle Angaben und Daten aus Katalogen und Abbildungen sind als richtungsweisend anzusehen, und daher ist der Verkaeuer befugt, erforderliche Abaenderungen ohne vorherige Benachrichtigung durchzufuehren.

AUFTRAEGE - Diese sind fuer den Kaeufer immer verbindlich. Der Verkaeuer ist erst nach einer schriftlichen Bestaetigung daran gebunden. Bei jedem Auftrag muß der Kaeufer den allgemeinen Verkaufsbedingungen zustimmen, die vom Verkaeuer festgelegt wurden. Am Auftrag duerfen nur Artikel der laufenden Produktion angefuert werden. Jede Waren, die der Verkaeuer aus innenbetrieblichen oder marktbedingten Gruenden aus der Produktion genommen hat, werden nicht bestaetigt. Jeder Auftrag muß per Einschreiben uebermittelt werden, auch wenn aufgrund von Dringlichkeit eine vorherige telefonische Mitteilung erfolgt ist.

VERHANDLUNGEN - Alle Vereinbarungen oder Verhandlungen, die nicht auf der Auftragsbestaetigung aufscheinen, sind unguelstig.

LIEFERFRIST - Sie beginnt ab dem Datum der Auftragsbestaetigung und ist als annaehernd anzusehen . Diese ist nicht als Grundbedingung anzusehen und kann seitens des Verkaeufers verlaengert wird, wenn hoehere Gewalt vorliegt.

AUSLIEFERUNG - Als Auslieferung ist der Zeitpunkt anzusehen, an dem die Ware dem Kaeufer durch Uebergabe an den Transportunternehmer zur Verfuegung steht. Es sind auch Teillieferungen erlaubt, ohne daß dies fuer den Kunden als Verzoeigerung gilt.

TRANSPORT - Die Ware wird, sofern nicht ausdruecklich schriftlich etwas Anderslautendes festgelegt wird, immer ab Werk **Dado Ceramica S.r.l.** oder ab Dado Lager bei Frascari Adriano, Via Radici in Piano, 116, Castellarano (RE) - Tel. 0536-824747 - Fax. 0536-823535, geliefert, und der Kaeufer traegt die Verantwortung fuer den Transport, auch wenn der Verkaeuer sich fuer eine Lieferung frei Haus verpflichtet hat. Der Kaeufer muß bei Auftragserteilung die genauen Transportmodalitaeten angeben. Wenn diese nicht genau angefuehrt sind, kann der Verkaeuer ueber die Transportart entscheiden, ohne daß der Kaeufer nachtraeglich Beschwerde einlegen kann.

VERSICHERUNG - Auf Wunsch und immer zu Lasten des Kaeufers. **VERPACKUNG** - Wenn nicht anders vereinbart und vom Verkaeuer im voraus genehmigt wurde, erfolgt die Verpackung in Kartons. Nach Uebergabe der Ware an den Kaeufer oder den Transportunternehmer, ohne daß Reklamationen oder Vorbehalte erhoben wurden, erlischt die Verantwortung des Verkaeufers. Euopal. werden Euro 9,00 / Stück berechnet. Wir behalten uns vor, den Betrag bei signifikanten Veränderungen der Rohstoffkosten zu ändern.

REKLAMATIONEN - Reklamationen ueber Fehlbestand oder Bruch muessen ausschließlich an den Transportunternehmer, gestellt werden. Alle uebrigen Reklamationen betreffend Material muessen fristgemaß per Einschreiben innerhalb 10 Tage nach Erhalt der Ware an den Verkaeuer gerichtet werden. Nach Ablauf dieser Frist wird die Ware als besichtigt und angenommen betrachtet, so wie sie ist.

MATERIALIEN - Die Farbtoenungen der Muster sind nur richtungsweisend. Ebenso ist der Verkaeuer nicht verpflichtet, die Farbtoenung vorangegangener Lieferungen zu wiederholen, und der Kaeufer kann deswegen nicht reklamieren.

GARANTIE - Der Verkaeuer garantiert da die Qualitaet der gelieferten Waren der gewuenschten Auswahl des Kaeufers entspricht. Weiters verpflichtet sich der Verkaeuer jene die Defekte aufweisen und daher nicht dem Auftrag entsprechen, nach eigenem unanfechtbarem Urteil durch qualitaetsmaeßig gleichwertige Materialien zu ersetzen, ohne jedoch fuer direkte oder inderekte Schaeden jeglicher Art zu haften. Die Garantie ist nicht uebertragbar und nur dem Kaeufer gegennueber gueltig, auf dessen Name die Rechnung ausgestellt wurde.

BEANSTANDUNGEN - Auf keinem Fall koennen bereits verarbeitete Waren reklamiert werden. Sollten jedoch seitens des Kaeufers Reklamationen oder Rechte beansprucht werden, so duerfen faellige Zahlungen weder verzoegert noch eingestellt werden.

NICHTEINHALTUNG UND ZAHLUNGSUNFAEHIGKEIT - Bei Nichtbezahlung oder teilweisem oder totalem Zahlungsrueckstand behaelt sich der Verkaeuer das Recht vor, alle laufenden Vertraege teilweise oder im ganzen aufzuloesen und alle seine Rechte geltend zu machen.

PREISE - Es gilt die bei Auftragsertilung gueltige Preisliste. Die Preise sind ab Werk und enthalten weder die mehrwertsteuer, Stempelmarkengebuehren oder Steuern jedlicer Art, die immer zu lasten des Kaeufer gehen.

ZAHLUNG - Die Zahlung erfolgt entsprechend den Anfuehrungen auf der Auftragsbestaetigung. Der Zahlungsort bleibt in jeder Hinsicht der Firmensitz der **Dado Ceramica S.r.l.** auch wenn die Zahlung durch Bevollmaechtigte, durch Barzahlung, gezogen Wechsel oder Effekten erfolgt. Der Verkaeuer hat das Recht, die erhaltenen Wertpapiere im Umlauf zu setzen, die immer zahlungshalber und unter ueblichem Vorbehalt angenommen werden. Bei Nichteinhaltung der Zahlungsziele der Verkaeuer:

- Verzugszinsen zum ueblichen Zinssatz zuzueglich Spesen verlagen;
- Wechsel ziehen anstelle der vereinbarten Barzahlung;
- alle laufender Auftraege stoppen;
- bei Protesterhebung die Gesamtschuld eintreiben.

WECHSELSPESEN - Alle anfallenden Wechselspesen gehen zu Lasten des Kaeufers. Sie werden auf der Rechnung gesondert angefuert und sind im Wechselbetrag beruecksichtigt.

GERICHTSSTAND - Bologna ist alleiniger Gerichtsstand fuer alle Streitfaelle, die sich aus den Vertraegen der **Dado Ceramica S.r.l.** ergeben und damit verbunden sind, sowie aus Geschaeftsverhandlungen seitens Arbeitnehmer oder bevollmaechtigten Personen außerhalb des Werks.

EIGENTUMSVORBEHALT - Die Ware bleibt bis zur vollstaendigen Bezahlung unser Eigentum.
