I CONCI[®]
materiali per idealisti contemporanei

IT

SINTESI DELLE CONDIZIONI GENERALI DI VENDITA

Prezzi IVA esclusa - Trasporto franco Sassuolo (MO) o franco fabbrica.

I prezzi indicati potranno subire nel corso dell'anno degli aumenti, dovuti a rincari improvvisi delle materie prime.

I prezzi indicati sul listino, se non diversamente specificato, si riferiscono alla superficie PATINATA I CONCI.

Attenzione: tutte le misure indicate sono da considerare nominali.

Al fine del miglioramento dei prodotti ci riserviamo di variare senza preavviso misure, spessori o caratteristiche tecniche.

Salvo diversa comunicazione il presente listino è valido fino al 31/12/2014.

Il dettaglio di tutte le condizioni di vendita è disponibile al CAP. 5 "TECNICHE" alla pag. 18.

EN

SUMMARY SHEET OF GENERAL CONDITIONS OF SALE

Vat excluded - Material delivered in Sassuolo (Modena Italy) or ex-works.

Prices described above could be subject to some increases during the year, due to unexpected rise in prices of raw materials.

Warning: all the measurement indicated are to be considered nominal.

If unspecified, prices mentioned in the price list refer to "I CONCI" PATINATA surface.

In order to improve the product, we reserve to change without notice measurement and thicknesses of described sizes.

If otherwise mentioned, this price list is valid until 31/12/2014.

For all detailed conditions of sale please refer to CHAPTER.5 "TECNICHE" at page 18.

DE

ZUSAMMENFASSUNG DER ALLGEMEINE VERKAUFSBEDINGUNG

Preise ausgeschlossen Mehrwertsteuer - Transport ab Sassuolo (MO) oder ab Werk.

Die angegebenen Preise können im Laufe des Jahr Preiserhöhungen erleiden, infolge der Preiserhöhung des Rohmaterial.

Die angegebenen Preise der Preisliste, wenn nicht anders angegeben, beziehen sich auf die PATINIERTEN I CONCI Oberflächen.

Achtung: alle gezeigten Messungen müssen als nominal betrachtet werden.

Für die Verbesserung der Produkte reservieren wir uns, Maße, Stärken oder Kenndaten ohne Ankündigung zu ändern.

Sofern nicht anders angegeben ist die derzeitige Preisliste bis 31/12/2014 gültig.

Das Detail von allen Verkaufsbedingungen sind verfügbar (auf Italienisch und Englisch) im Kapitel 5 "TECNICHE" Seite 18.

CONSIGLI PER LA POSA

Nel progetto di una doccia con le lastre perimetrali a misura, il posatore è obbligato ad attenersi alla posizione del bacino inox. Per facilitare la posa del pavimento doccia, si propone di lasciare una tolleranza di mm 6/7 dalle pareti, vedi disegno.

1. FASE

Realizzare il massetto di sottofondo per l'alloggiamento della vasca inox a secondo della quota scelta. Per quanto riguarda le pietre di sp. 11 mm o 19 mm, vedi disegno, suggeriamo di procedere con il posizionamento a secco della vasca inox, determinando la posizione della piletta di scarico e il collegamento al tubo di scarico. Successivamente incollare la vasca inox al massetto facendo sempre attenzione al livello del piano d' appoggio.

2. FASE

Utilizzare collante "Superflex" ditta Kerakoll o similari, sia per l'incollaggio del marmo e acciaio, sia per creare una membrana di spessore minimo 3 mm che garantisca l'impermeabilità della zona doccia. Consigliamo di far risalire lo strato della colla anche sulle pareti per circa 10 cm.

3. FASE

A piatto doccia posato con relativa pedana in marmo o teak, regolare i piedini per il raggiungimento della quota desiderata. Nel caso in cui la pedana faccia difficoltà ad entrare nella zona inox, è possibile, con martello in gomma, appiattire i gommini neri posizionati su entrambi i lati.

FITTING GUIDE

It is important for the fitter to bear in mind the position of the metal undertray when planning to fit a shower with surround tiles. A distance of between 6-7 mm from the walls should be left to make tiling the area around the shower easier.

STAGE 1

Measure the area and construct a base to support the metal undertray. When working with stones of a thickness between 11mm-19 mm (see fig) wait until the base has set, then proceed to fix the metal undertray, taking into consideration the position of the waste hole and connection to the waste pipe. Glue the metal undertray to the base and ensure the surface is level and completely supported.

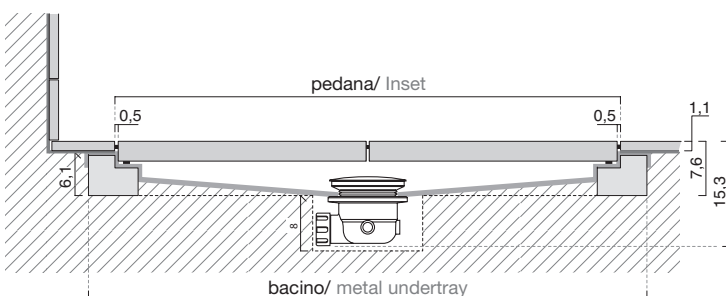

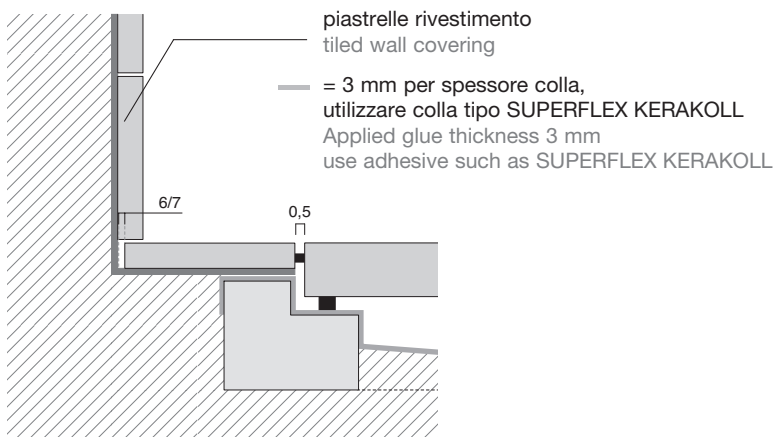

STAGE 2

Use an adhesive such as 'superflex' by kerakoll to glue the marble and metal. Coat the entire shower area including the sides to a height of up to 10cms in order to form a sealing membrane thus making the area waterproof.

STAGE 3

Once the metal undertray and shower inset in marble or teak are in place, set the height by adjusting the feet. If the shower inset does not fit properly into the metal undertray, use a rubber hammer to flatten the rubber pads located on the sides.
