OASI

2024

design_Mario Ferrarini

Un materiale morbido al tatto, vellutato, capace di trasmettere sensazioni uniche al contatto con il corpo. Una forma contemporanea, rigorosa ma organica allo stesso tempo, con i bordi che degradano verso il centro e avvolgono il corpo, invitando a immergersi per rigenerarsi completamente.

Un progetto declinabile in forme e tipologie differenti, capace di inserirsi all'interno di ambienti bagno di dimensioni diverse per catalizzare l'attenzione, nella versione freestanding o risolvere un problema di spazio, nell'installazione a nicchia o ad angolo. Oasi è un progetto completo, che proprio come riporta il nome si inserisce all'interno di uno spazio costruito andando a offrire relax e benessere. Le opzioni sono molte, dalle versioni rettangolari, all'ovale o ad angolo Dx o Sx in molteplici dimensioni, anche su misura.

Nell'impiego in nicchia la vasca può essere affiancata da piani compensatori in marmo, legno o in Cristalplant, per creare una microarchitettura domestica elegante e funzionale, con sedute, piani d'appoggio ed elementi collocati a diverse altezze.

A velvety soft-touch material capable of transmitting unique sensations in contact with the body. A contemporary shape, rigorous but organic at the same time, with edges that slope toward the center and envelop the body, inviting you to immerse yourself to completely regenerate.

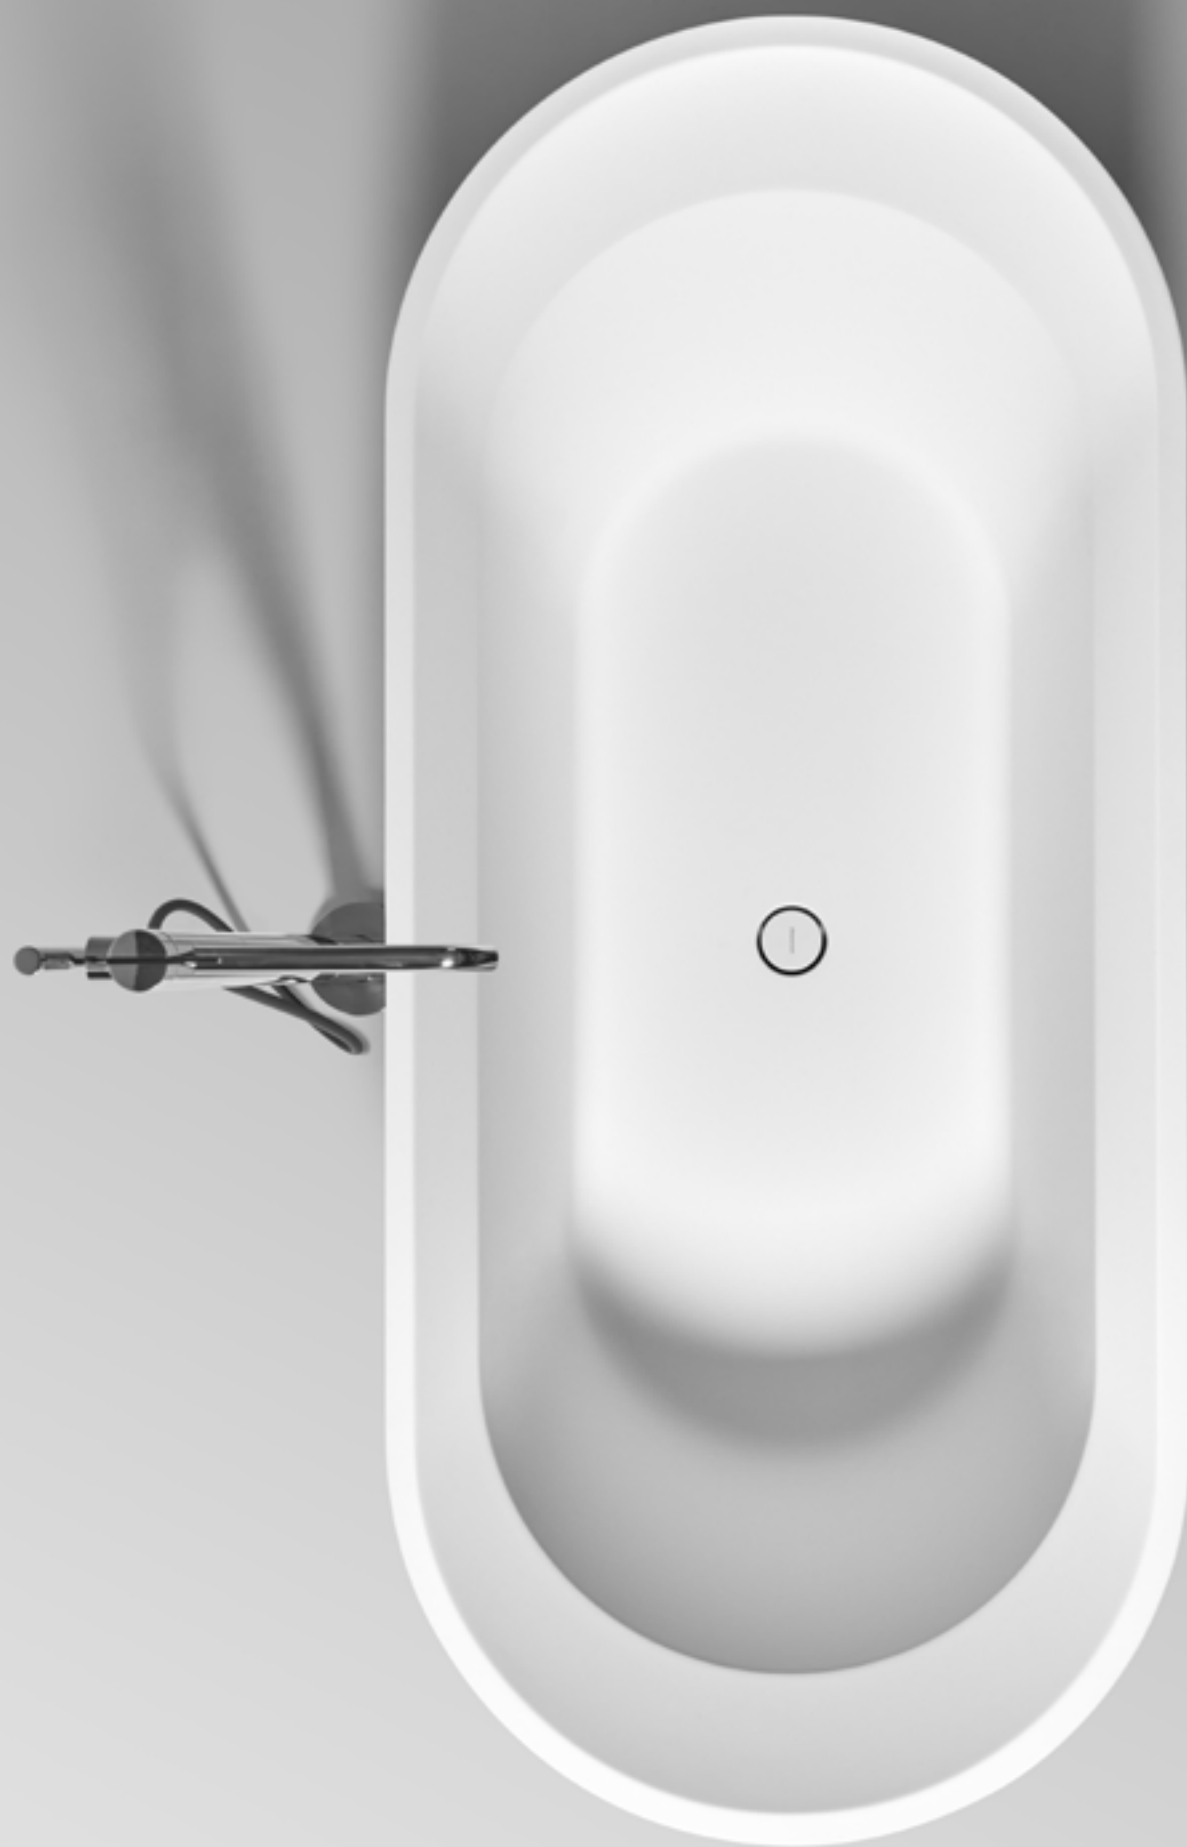

A project that can be declined in different shapes and types, able to fit within bathroom environments of different sizes to attract attention, in the freestanding version or solve a space problem, in the niche or corner installation. Oasis is a complete project, which just as the name indicates, fits within a built space offering relaxation and well-being.

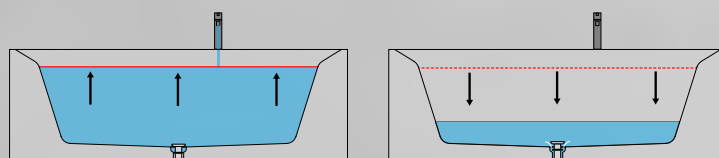

The options are many, from rectangular to oval or corner versions left or right in multiple sizes, including custom-made. If recessed, the bathtub can be complemented with compensators in marble, wood or Cristalplant, to create an elegant and functional domestic microarchitecture, with seating, surfaces and elements placed at different heights.

Sistema TROPPOPIENO AUTOMATICO INVISIBILE. La piletta si apre automaticamente al raggiungimento del livello di sicurezza PREDEFINITO, permettendo all'acqua di defluire.

AUTOMATIC INVISIBLE OVERFLOW system. The drain opens automatically when the PRESET safety level is reached allowing the water to drain away.
