MARULA

2024

design_AL Studio

Un rivestimento verticale in pietra naturale o legno, una sorta di boiserie che impreziosisce le pareti e la zona lavabo attraverso trame e segni leggeri, tonalità sofisticate e variazioni cromatiche. Una soluzione che nobilita lo spazio nel quale si inserisce, una texture che dialoga con la luce e conferisce tridimensionalità alle superfici. Marula è composta da moduli di diverso formato che si ripetono secondo un disegno ortogonale, generando uno schema nel quale l'alternanza di elementi con diversa finitura origina un decoro raffinato ed elegante. Nella versione Marula Stone le superfici in Bianco Carrara, Pietra Luna o Grigio Vesuvio possono essere lisce o rigate, mentre nella versione Marula Wood la boiserie in legno può essere personalizzata con tutte le essenze della gamma antoniolupi.

A vertical cladding in natural stone or wood, a kind of boiserie that embellishes the walls and the washbasin area through light textures and marks, sophisticated shades and color variations. A solution that ennobles the space in which it fits, a texture that dialogues with light and gives three-dimensionality to surfaces. Marula is composed of modules of different sizes that are repeated according to an orthogonal pattern, generating a design in which the alternation of elements with different finishes originates a refined and elegant decoration. In the Marula Stone version the surfaces in Bianco Carrara, Pietra Luna or Grigio Vesuvio can be smooth or striped, while in the Marula Wood version the wood paneling can be customized with all the essences of the antoniolupi range.

TRALERIGHE

2020

design_Gumdesign

TRALERIGHE è la prima collezione di carte da parati prodotta da antoniolupi e si colloca all'interno dell'omonimo "grande contenitore" ideato da Gumdesign "TRA LE RIGHE" è comprensivo dei già noti lavabi Borghi e Gessati. La carta da parati è una nuova ulteriore sfida accolta da antoniolupi ed è una collezione che completa perfettamente il progetto bagno nella sua globalità. Il fil rouge che lega tutte le proposte del concept sono appunto le geometrie e i colori; in Borghi i colori sono caldi e intensi, ma non sono riconducibili a un codice o pantone preciso, sono una sfumatura. I disegni della collezione di carte da parati TRALERIGHE sono studiati su un algoritmo matematico: rette orizzontali, verticali e oblique si intersecano come se fossero vive ed in continuo movimento dialogando tra loro; in modo tale che il risultato ottico non sia di chiusura in una gabbia grafica prestabilita, bensì di apertura, disegnando lo spazio. I moduli si accostano liberamente creando infiniti disegni ritmati e liberi. Lo spazio incorpora il movimento che viene dato dalle righe ed è pronto ad accogliere, come un pentagramma accoglie le note. Le righe di solo 1 millimetro di spessore hanno la capacità di comunicare razionalità ed ordine eppure il loro accostamento crea emozione. Per paradosso le linee trasmettono una assenza di confini.

La collezione è composta da 41 disegni.

"Sottili linee tracciate generano una rete - sintetizzano i designer Gabriele Pardi e Laura Fiaschi di Gumdesign - Un filtro alla frenesia del giorno per fermarsi e osservare oltre. Oltrepassare la superficie per immergersi negli aspetti invisibili del quotidiano".

TRALERIGHE is the first collection of wallpaper produced by antoniolupi and is within the homonymous 'large container' designed by Gumdesign, "Tra le Righe", inclusive of the already well known sinks Borghi and Gessati.

Wallpaper is a new challenge taken on by antoniolupi that completes the bathroom project. The common thread that binds it all together, the proposals of the concept are precisely the geometries and the colors; in Borghi the colors are warm and intense but do not refer back to a code or precise pantone because they are a shade. The designs of the TRALERIGHE wallpaper collection are studied on a mathematical algorithm: horizontal, vertical and oblique lines intersect as if they were alive and constantly moving, conversing with each other; so that the optical result is not of closure within a pre-established graphical cage, but of openness, designing the space. The modules approach each other creating infinite rhythmic and free designs. The space incorporates the movement that is given by the lines and is ready to welcome, like a pentagram welcomes the notes. Lines only 1 millimeter thick communicate rationality and with order, yet their combination creates emotion. Paradoxically, the lines convey an absence of borders. The collection consists of 41 designs.

"Thin traced lines generate a network - the designers Gabriele Pardi and Laura Fiaschi summarize - A filter for a frenzy day to stop and look beyond. Go past the surface to immerse yourself in the invisible aspects of everyday life".
