1990-2020

Dal 1990 Artesi realizza mobili
per l'arredobagno **100% made in Italy**,
coniugando l'**esperienza** tecnica,
la **qualità** dei materiali e la **ricerca**
continua con una grande attenzione
per i **nuovi trend**.

Artesi has been manufacturing
since 1990 furniture for the bathroom 100% Made in Italy,
combining technical experience, quality of materials,
continuous research and great attention
to new trends.

Progettisti e clienti hanno a disposizione una
combinazione infinita di soluzioni per la
personalizzazione dell'ambiente bagno.

Designers and customers have infinite combinations
of solutions to personalize the bathroom.

**DESIGN E
SAPER FARE
SI FONDONO**

Design and know how
fuse together

Design sostenibile

Produzione **Made in Italy**,
attenzione ai **dettagli e**
qualità certificata.

Sustainable design

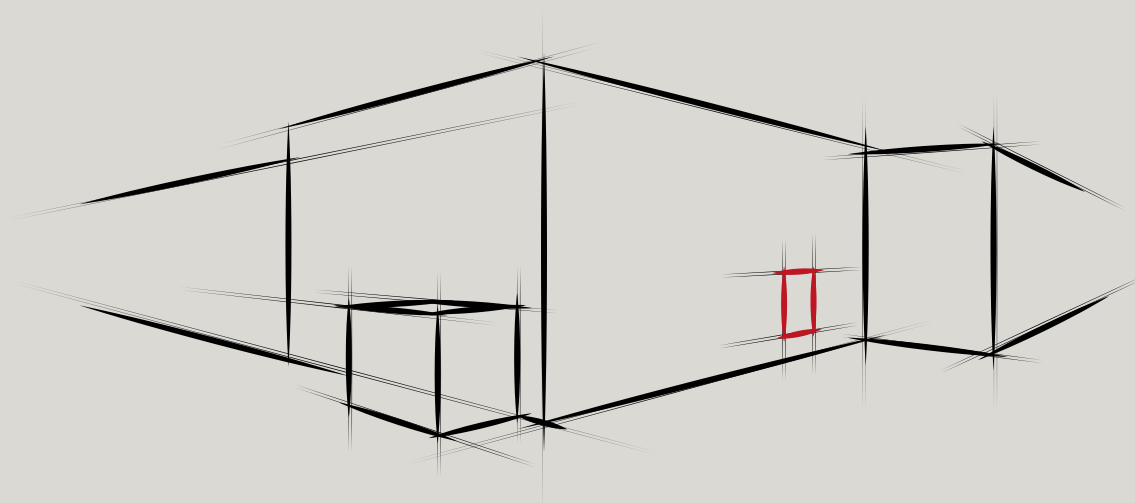

Production Made in Italy, attention to detail and certified quality.

Tutto il ciclo produttivo di Artesi è tecnologicamente all'avanguardia ed in costante aggiornamento, nel rispetto delle normative europee vigenti in fatto di sicurezza e di rispetto per l'ambiente.

La ricerca, i controlli e la selezione scrupolosa delle materie prime unite all'attenzione verso l'ecosostenibilità e alle politiche ambientali fanno di Artesi azienda leader di mercato.

Artesi's entire production cycle is technologically advanced and constantly updated, in compliance with the European regulations in terms of safety and respect for the environment.

The research, the controls and the scrupulous selection of the raw materials together with the attention towards eco-sustainability and environmental policies make Artesi a company leader of the market.

CARATTERISTICHE TECNICHE GENERALI – RINFORZI PARETE

TECHNICAL GENERAL FEATURES - RESILIENT BARS FOR PLASTERBOARD

Rinforzi a parete per basi sospese

Resilient bars for base cabinets

Nelle situazioni dove per scelta o per necessità si utilizzano pannellature di rivestimento con vari materiali non resistenti o cedevoli come il “cartongesso”, si devono adottare alcuni accorgimenti.

Alla struttura (parete) è di rigore porre alcuni rinforzi nell’area destinata all’installazione della base del mobile, al fine di sostenerlo adeguatamente.

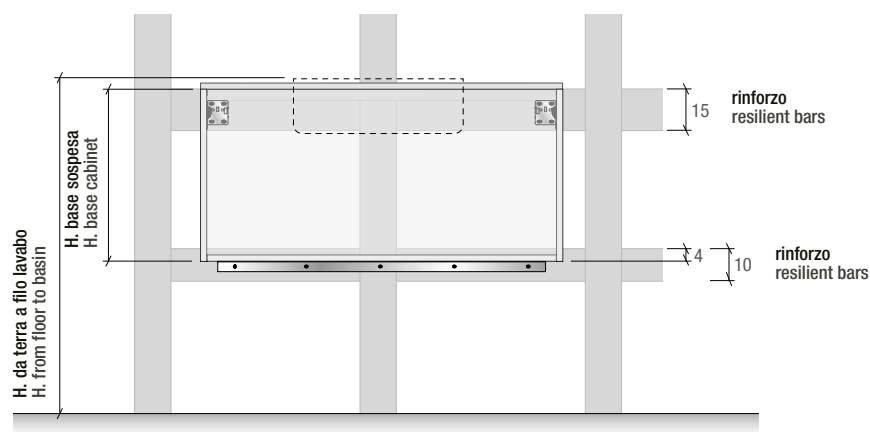

In such cases where, by choice or necessity, you use panels with various non-resistant or unstable materials such as “plasterboard”, some precautions must be taken.

It is mandatory to place some resilient bars in the area where you want to install the base cabinet, in order to support it adequately.

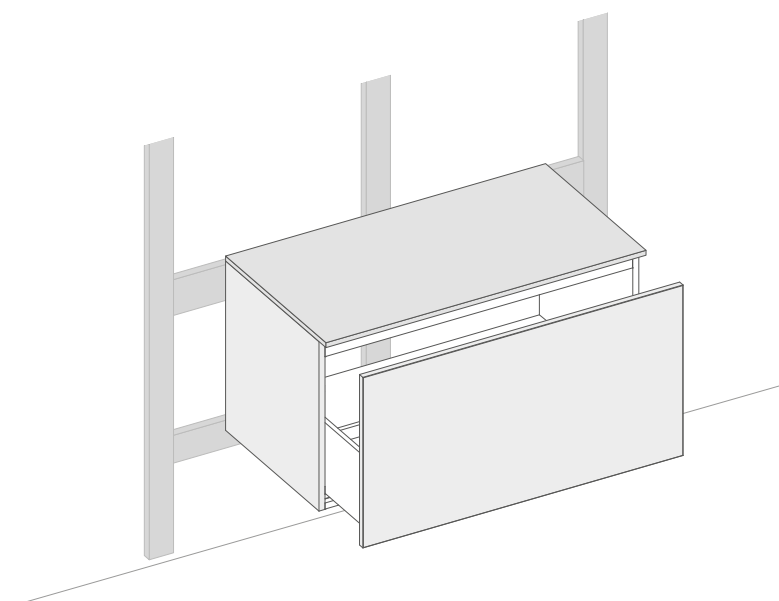

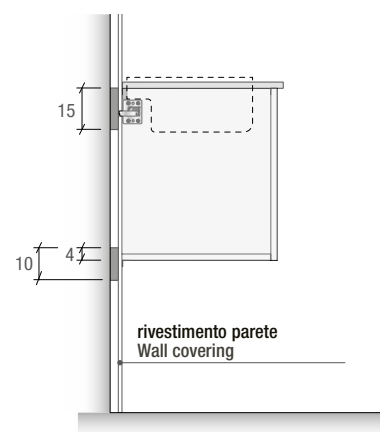

Posizionamento dei rinforzi

Position of resilient bars

CARATTERISTICHE TECNICHE – LAVORAZIONI SU MISURA

TECHNICAL GENERAL FEATURES - CUSTOM-MADE PRODUCTION

Alla fine di soddisfare le diverse esigenze, si offre la possibilità di apportare dei tagli a misura, ad eccezione per gli elementi curvi. Ciascun taglio a misura deve essere verificato e approvato dall'Ufficio Tecnico.

In order to meet different needs, we offer the possibility of making customized cuts, with the exception of curved cabinets. Each customized cut must be verified and approved by our Technical Dpt.

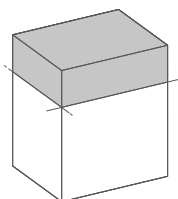

Per calcolare il prezzo della maggiorazione partire sempre dal prezzo dell'elemento con le dimensioni maggiori

Es. per base L. 40 partire dalla base L. 50

To calculate the price of the surcharge, always start from the price of the element with the largest dimensions

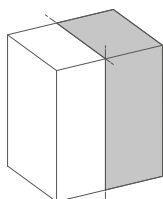

Ex.: for a base cabinet W. 40 cm start from the cabinet W. 50

riduzione in ALTEZZA
HEIGHT reduction

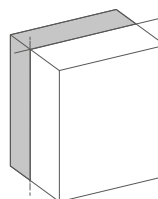

+ 30 %

riduzione in LARGHEZZA
WIDTH reduction

+ 30 %

riduzione in PROFONDITÀ
DEPTH reduction

+ 30 %

In presenza di più modifiche (es. larghezza e profondità) sullo stesso elemento, il prezzo della modifca rimane sempre del 30%.

If there is more than one customized cut (e.g. width and depth) on the same element, the price increase always remains 30%.

per elementi con cassetto, la riduzione è disponibile solo per P. 50, le guide vengono sostituite con quelle della P. 35

For elements with drawers, the reduction is available only for D. 50; the slides are replaced with those used for D. 35

CARATTERISTICHE FOLDING

SPECIFICATIONS OF THE MITRE-FOLDED CARCASS

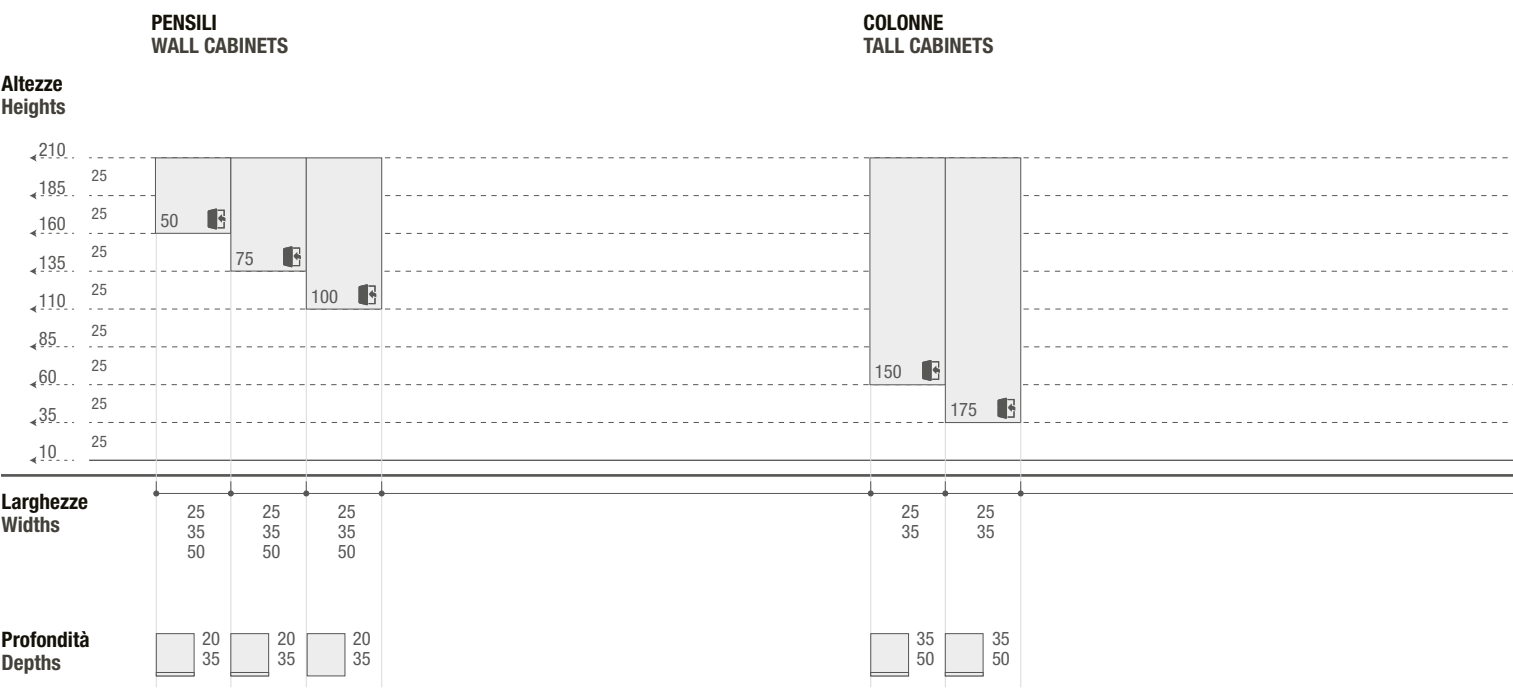

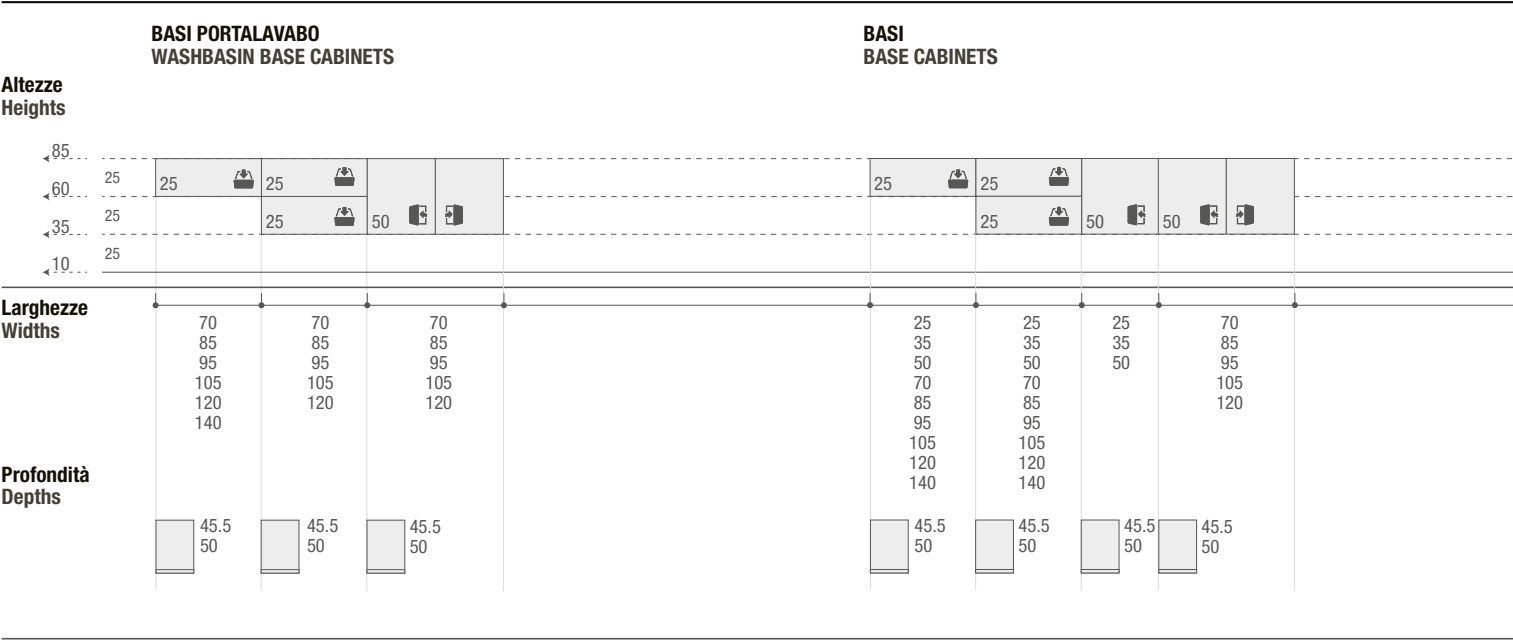

La tecnica del Folding prevede la realizzazione delle scocche da un unico pannello, su cui vengono ricavati dei tagli a “V” (punto 1) che serviranno poi a “ripiegare” il pannello stesso per ottenere la struttura del prodotto senza la presenza di giunzioni o bordature visibili (punti 2 - 3 - 4).

The Mitre-folded technique (called Folding in Italian) makes it possible to produce carcasses from a single panel in which V-shaped cuts are performed (step 1) and which are subsequently used to “fold” at 90° the various sections of the panel to obtain a carcass without visible joints or edgings (see steps 2 - 3 - 4).

Il pannello così lavorato viene assemblato, formando la scocca del mobile.
After the V-shaped cuts have been made, the panel is folded to form the carcass.

Filo+

Push & Handles

Semplice nella sua eleganza ed essenzialità, esclusiva e personalizzabile grazie alle molteplici possibilità di abbinamento. L'intramontabile pulizia estetica dell'anta push o il segno grafico e funzionale di una maniglia, esprimono la capacità di rendere sartoriale ogni progetto, di realizzare ogni composizione come un abito "su misura".

Simple in its elegance and essentialism, exclusive and customizable thanks to the many matching possibilities. Both the timeless aesthetic simplicity of a door with the push-to-open system and the graphic and functional form of the handle express the ability to make every project sartorial, to give to each composition a "tailored" suit look.

Filo+

Plain

PLAIN

Un sottile profilo in alluminio crea un segno orizzontale, continuo, grafico e lineare. Finiture nickel o colorate permettono di liberare la progettualità e personalizzare gli abbinamenti. Con utilizzo al profilo fianco terminale assume l'estetica e la preziosità di un'anta con telaio.

A thin aluminium profile creates a horizontal, continuous, graphic and linear sign. It is available in nickel or coloured finishes, so that you can plan totally free your bathroom and personalize the combinations. If you match it with an optional metal profile for the side, the aesthetics and preciousness will be those ones of a door with frame.

Horizon

La gola in alluminio è il segno distintivo, un tratto semplice, deciso e geometrico. La maniglia si integra nell'anta e permette di definire abbinamenti cromatici in nuance con il frontale oppure a contrasto in grado di rispondere ad ogni esigenza estetica.

The aluminium groove is here the distinguishing feature; a simple, resolute and geometric line. The handle is integrated into the door surface. It allows you to make a chromatic combination with the front, by choosing a matching or a contrasting colour, thus meeting any aesthetic need.

HORIZON

Filo+

Vertical

La maniglia diventa verticale e si posiziona lateralmente creando un segno grafico unico e riconoscibile. Un segno essenziale e rigoroso che crea nuove estetiche quotidiane. Tono su tono oppure a contrasto la maniglia ridefinisce il look del mobile.

The handle becomes vertical and side positioned, creating a unique and recognizable graphic sign. An essential and rigorous line that creates new daily aesthetics. Tone on tone or in contrast: the handle gives a new look to the furniture.

AREA

Specchiera a misura variabile, telaio PVC finitura alluminio
Mirror with size on demand, PVC frame color aluminium

Per specchiera 1.2 m x 0.8 m, calcolare la superficie (1.2 x 0.8 = 0.96 m²), quindi considerare la fascia prezzo superiore (0.96 m² < 1.0 m²)=SM0110

For the 1.2 m x 0.8 m mirror, calculate the surface (1.2 x 0.8 = 0.96 m²), and then refer to the upper price category (0.96 m² < 1.0 m²)=SM0110

CARATTERISTICHE TECNICHE GENERALI – MATERIALI

GENERAL TECHNICAL FEATURES - MATERIALS

CERAMICA CERAMIC

Materiale da sempre presente nell'arredobagno, la ceramica si distingue per la sua elevata durezza e una buona resistenza agli urti e ai segni di usura, oltre a garantire ottimi livelli di igiene grazie alla facilità di pulizia e manutenzione. Per la pulizia si consigliano prodotti neutri e acqua tiepida, non utilizzare sostanze acide o aggressive.

Ceramic is a material that has always been present in bathroom furnishings. It stands out for its high hardness and good resistance to impact and signs of wear. It guarantees excellent levels of hygiene thanks to the easy cleaning and maintenance. For cleaning we recommend neutral products and warm water, do not use acid or aggressive substances.

MINERAL TECH MINERAL TECH

I top e le consolle sono realizzati in Mineral Tech, un materiale composto al 75% di minerali naturali e il rimanente 25% di resina poliestere rivestito da un film di smalto tecnico protettivo di tipo poliestere acrilato che consente di ottenere ottime caratteristiche di resistenza. L'estetica e le caratteristiche meccaniche e chimiche rendono questo materiale adatto all'arredo del bagno, in maniera molto versatile che permette lo sviluppo di forme quali top, consolle e lavandini. La pulizia frequente dei prodotti in mineralmarmo, assicura il mantenimento della bellezza originaria e impedisce il formarsi dei segni dell'usura nel tempo. Alcune sostanze chimiche aggressive possono danneggiare la superficie: è sufficiente l'utilizzo di prodotti neutri e non abrasivi; si sconsiglia l'uso di acidi e basi forti (come acido cloridrico e soda caustica), chetoni (acetone), solventi clorurati (triellina) e prodotti usati nel settore della verniciatura.

Tops and basins can be made of Mineral Tech, a material composed of 75% natural minerals and the remaining 25% of polyester resin coated with a film of protective enamel in polyester acrylate which allows to obtain excellent resistance characteristics. The aesthetics as well as mechanical and chemical characteristics make this material suitable for bathroom furnishings, in a very versatile way that allows to create shapes such as tops, tops with integrated basin or only basins. A frequent cleaning of Mineral Tech products ensures that the original beauty is maintained and prevents signs of wear over time. Some aggressive chemicals can damage the surface: it's better to use neutral and non-abrasive products; the use of strong acids and bases (such as hydrochloric acid and caustic soda), ketones (acetone), chlorinated solvents (trichlorethylene) and products used in the painting sector is not recommended.

CRISTALPLANT® CRISTALPLANT®

Un materiale innovativo dal tipico effetto "soft touch", igienico, piacevole al tatto e resistente. CRISTALPLANT® è un materiale composto per la maggior parte da cariche minerali, soprattutto triidrati di alluminio, legate a basse percentuali di resine. Per la pulizia usare acqua saponata o comuni detergenti per rimuovere la maggior parte delle macchie e dello sporco. Per pulire più in profondità si consiglia l'uso di detergenti in gel o abrasivi (anche con l'utilizzo di una spugna abrasiva) avendo cura di risciacquare bene la superficie. Non utilizzare solventi come acetone o triellina e altre sostanze chimiche aggressive come acidi forti (acido muriatico...) e basi forti (soda caustica...).

An innovative material with the typical "soft touch" effect, hygienic, pleasant to the touch and resistant. CRISTALPLANT® is a material composed mostly of mineral elements, especially aluminum trihydrates, aggregated to low percentages of resins. For cleaning most stains use soapy water or common detergents. For a deeper cleaning we recommend the use of gel or abrasive detergents (also with the use of an abrasive sponge), taking care to rinse the surface. Do not use solvents such as acetone or trichlorethylene and other aggressive chemicals such as strong acids (muriatic acid) and strong bases (caustic soda).

SOLID SURFACE® SOLID SURFACE®

Il solid surface è un materiale composito avanzato, formato da tri-idrato di alluminio e resina acrilica, con aggiunta di pigmenti colorati: una volta completata la loro combinazione (polimerizzazione) nel processo produttivo, gli ingredienti si trasformano in un materiale chimicamente stabile con un impatto minimo sulla qualità dell'aria negli ambienti interni. Si tratta di materiali con alte prestazioni funzionali ed estetiche, utilizzati per realizzare superfici piane oppure curve di forte impatto visivo: grazie ad un particolare processo produttivo, questi materiali possono essere termoformati e assemblati unendo più elementi con giunte impercettibili, creando così applicazioni di ogni dimensione che rimangono inalterate nel tempo.

Il materiale non è poroso, non assorbe acqua e quindi qualsiasi macchia si elimina facilmente, per la pulizia è sufficiente l'utilizzo di prodotti neutri non abrasivi; si sconsiglia l'uso di acidi e basi forti (come acido cloridrico e soda caustica), chetoni (acetone) solventi clorurati (triellina) e usati nel settore della verniciatura.

The solid surface is an advanced composite material, made of aluminium tri-hydrate and acrylic resin, with the addition of coloured pigments: once their combination (polymerization) in the production process is completed, the ingredients are transformed into a chemically stable material with a minimal impact on indoor air quality. These materials have an high functional and aesthetic performance, used to create linear or curved surfaces with a strong visual impact as, thanks to a particular production process, they can be thermoformed and assembled by combining more elements with no visible joints, thus creating tops that remain unchanged over time.

The material is not porous, does not absorb water and therefore any stain is easily eliminated. For an easy clean use non-abrasive neutral products; the use of strong acids and bases (such as hydrochloric acid and caustic soda), ketones (acetone), chlorinated solvents (trichlorethylene) and products used in the painting sector is not recommended.

RECOMPLAX® (Reef) RECOMPLAX®

Il pannello recomplax® 1100 è realizzato in compositi fibro-rinforzati riciclati (vetroresina-kevlar-fibra di carbonio, etc) finemente lavorati e riaggregati a pressione elevata con percentuali minime di collanti vergini. Il procedimento è brevettato e genera un materiale double-green innovativo, quindi nuovamente riciclabile a fine vita. La densità del pannello in puro composito fibro-rinforzato (1100 kg/m3) garantisce robustezza all'intera sezione, permettendo una lavorazione tridimensionale senza rischio di sfibramento. Il pannello recomplax® 1100 è un materiale sostenibile certificato da CSI.

The recomplax® 1100 panel is made of recycled fiber-reinforced composites (fiberglass-kevlar-carbon fiber, etc.) finely processed and re-aggregated at high pressure with minimum percentages of virgin glues. The process is patented and generates an innovative ecological material, which is recyclable at the end of its life. The density of the pure fiber-reinforced composite panel (1100 kg / m3) ensures strength to the entire top, thus allowing three-dimensional processing without risk of fibre removal. The 1100 recomplax® panel is a sustainable material with the CSI Certification.

GRES PORCELLANATO (by Laminam®) GRES PORCELAIN (by Laminam®)

Il gres porcellanato è una superficie di alto livello tecnologico ed estetico che offre performance d'eccezione in tutti gli ambiti di applicazione. Realizzato con tecnologie avanzate, unisce allo spessore ridotto e alle grandi dimensioni un'elevata resistenza alle sollecitazioni meccaniche, ai prodotti chimici, all'usura, ai graffi, all'abrasione profonda e alla flessione, sono facilmente igienizzabili, resistenti al gelo, alle muffe, all'azione dei raggi UV. Tutte le caratteristiche e le proprietà cromatiche delle lastre sono inalterabili, restando immutate nel tempo ed in presenza di ogni condizione atmosferica. Ultima caratteristica, ma non meno importante, è un prodotto che resiste al fuoco: in caso di incendio non sprigiona fumo e non emette sostanze tossiche. Il piano si può pulire con i normali prodotti per la pulizia della casa.

Porcelain stoneware is a high-tech and aesthetic surface that offers exceptional performances in all areas of application. Made with advanced technologies, it combines reduced thickness and large dimensions with high resistance to mechanical stress, chemicals, wear, scratches, deep abrasion and flexion. It is easy to sanitize, resistant to frost, mold and to the action of UV rays. All the characteristics and chromatic properties of the top are unalterable, remaining unchanged over time and in all weather conditions. Last, but not least: it is a product that resists fire: in case of fire it does not release smoke and does not emit toxic substances. The top can be cleaned with normal household cleaning products.

CARATTERISTICHE TECNICHE GENERALI – MATERIALI

GENERAL TECHNICAL FEATURES - MATERIALS

ECOMALTA®

ECOMALTA®

Materiale utilizzato per il rivestimento dei mobili e come finitura dei top, con e senza vasca integrata, "Ecomalta" e "Campus": un innovativo materiale che presenta una straordinaria flessibilità di applicazione rendendolo un prodotto contemporaneo e materico. Ecomalta® e' ignifuga, atossica ed antistatica, resistente allo sporco ed alle macchie e grazie alla completa assenza di giunzione, impermeabile all'acqua. Rispetta l'ambiente essendo realizzata per almeno il 40% di materiale riciclato. Una buona e costante manutenzione, usando detergenti neutri non schiumogeni e senza solventi, conserverà nel tempo l'integrità del piano. Per l'installazione usare silicone non acetico.

Ecomalta is a material that can be used to cover the sides or fronts of cabinets or the tops "Ecomalta" and "Campus", with or without integrated basin. It is an innovative material that features an extraordinary flexibility, that makes it contemporary and materic. It is an innovative material that is very versatile and gives any product a contemporary and textured appeal. Ecomalta® is fireproof, non-toxic, antistatic and resistant to dirt and to stains. As the layer of Ecomalta® is without junction joints, it is also waterproof. It is environment-friendly because it is made of at least 40% recycled material. Good and constant maintenance, using neutral, non-foaming detergents without solvents will preserve the integrity of the top for a long time. Use non-acetic silicone to install the top.

CORIAN®

CORIAN®

Corian® è un composito avanzato per superfici da arredamento perfettamente uniforme e senza giunture visibili che lo rendono particolarmente adatto all'utilizzo in abbinamento a diversi materiali, creando soluzioni di design e mantenendo comunque elevate prestazioni di resistenza. Affinchè il materiale mantenga la sua bellezza nel tempo, necessita solamente di un ordinaria pulizia/manutenzione attraverso l'uso di un panno umido insieme ad un comune detergente. Per ulteriori informazioni fare riferimento alle istruzioni inserite nella confezione.

Corian® is an high-tech composite for perfectly uniform surfaces with no visible joints, that makes it particularly suitable to be used in combination with different materials, creating design solutions while maintaining high resistance performances. To maintain its beauty over time, it only requires ordinary cleaning / maintenance through the use of a damp cloth together with a common detergent. For further information, refer to the instructions included in the package.

VETRO

GLASS

I piani in vetro sono particolarmente adatti all'impiego nell'arredobagno. Sono realizzati con materiale non temperato e verniciato nella superficie inferiore con vernici all'acqua non tossiche, che richiedono massima attenzione durante l'installazione, evitando urti, graffi e, soprattutto, l'utilizzo di siliconi acetici che li potrebbero irrimediabilmente danneggiare. Si consiglia quindi l'utilizzo di silicone neutro non acetico, sia per l'installazione dei lavabi sottopiano, che per i top integrati. Nell'utilizzo quotidiano, particolare attenzione va posta nell'evitare cadute accidentali di oggetti sul piano e l'esposizione dello stesso a shock termici superiori a 40°. Per effetto della rifrazione della luce, colori uguali potrebbero acquisire sfumature diverse. Per la pulizia si consiglia l'utilizzo dei normali prodotti per il vetro, evitando sostanze acide o basiche e, se strettamente necessario, impiegare i prodotti anticalcare unicamente sulla superficie evitando il contatto con la parte verniciata. Qualora tali accorgimenti di installazione/manutenzione non venissero rispettati ARTESI non riconoscerà eventuali richieste di sostituzione.

Glass tops are particularly indicate to be used in a bathroom. They are made from non-tempered glass that is lacquered on the lower side with non-toxic, water-based products that require utmost attention during installation to avoid impact and scratches. It is also mandatory to avoid using acetic silicone that can irreparably damage these tops. We therefore recommend the use of neutral, non-acetic silicone to install both under countertop washbasins and tops with integrated basins. For daily use, special attention must be paid to prevent objects from accidentally falling on the tops. Moreover, these tops must not be exposed to thermal shocks exceeding 40°. Depending on how the light reflects on the glass, identical colours may take on slightly different hues. For cleaning purposes it is advisable to use normal glass-cleaning products and avoid acid or alkaline detergents. Only when strictly necessary, use limescale removers only on the surface, avoiding any contact with the lacquered side. ARTESI will not acknowledge any requests for replacements if these installation/care instructions are not respected.

MARMO

MARBLE

Marmi e graniti sono materiali tradizionalmente usati nell'arredobagno. Essendo materiali Naturali possono differire di volta in volta rispetto ai campioni: si possono riscontrare variazioni di tonalità, piccoli fori e venature più o meno marcate. Tutti i marmi e i graniti tendono ad assorbire i liquidi attraverso la presenza di microscopiche porosità: questa caratteristica fa sì che alcune sostanze li possano macchiare irrimediabilmente se non vengono prontamente tolte dalla superficie (cosmetici, smalti, profumi ed altre sostanze come il calcare stesso). Sono sensibili alle sostanze acide e quindi anche un errata pulizia può danneggiarli. Una buona e costante manutenzione, usando detergenti neutri ed evitando la stagnazione di qualsiasi liquido sulla superficie, conserverà nel tempo l'integrità del piano. I marmi tecnici sono agglomerati di marmo o pietre naturali al 95%. Non hanno la medesima porosità dei marmi naturali e quindi tendono ad essere impermeabili alle sostanze che li potrebbero macchiare, rimanendo comunque sensibili alle sostanze acide. Si consiglia semplicemente l'utilizzo quotidiano dello straccio umido o, qualora sia necessario, di detergenti neutri e non abrasivi. Le pietre tecniche sono a loro volta composte da quarzi e resine che le rendono simili ai marmi tecnici: la superficie del prodotto presenta increspature e avvallamenti volutamente casuali, che la rendono irregolare e che tendono a richiedere maggiore attenzione alla pulizia quotidiana data la maggiore possibilità di stagnazione dei liquidi.

Natural marble and granite are materials traditionally used for bathroom furniture. Due to the fact that they are natural, they can differ from time to time from the samples provided: there may be differences in colour or small holes and veins on the surface that are more or less visible. All types of marble and granite tend to absorb liquids through their microscopic pores: this means that some substances can stain them irreparably if they are not immediately removed from the surface (cosmetics, nail varnishes, perfumes and other substances like calcium deposits). They are sensitive to acid products so even using unsuitable detergents can damage them. Proper and constant care using neutral detergents and preventing liquids from stagnating on the surfaces for a long time will give the tops a long life. Technical marble is made of 95% marble composite or natural stone. It isn't as porous as natural marble and tends to be more resistant to stains but is still sensitive to acid substances. It is advisable to use a damp cloth daily or, when necessary, neutral, non-abrasive detergents. Technical stone (Pietra Bianca/Nera) is composed of quartz and resins and is similar to technical marble: the surface has irregularities and holes that make it uneven with a "stone" effect. A daily cleaning care is recommended, due to the fact that liquids are more likely to stagnate in the surface irregularities.

LEGNO

WOODEN

Il top in legno rappresenta la soluzione ideale per completare l'ambiente bagno con combinazioni di elementi in vari spessori. Tutte le finiture presenti sono realizzate su base idropan.

These tops represent the ideal solution to complete the bathroom with combinations of elements in various thicknesses. All the available finishes are made of an hydropan panel.

LEGNO MASSELLO

SOLID WOOD

Le caratteristiche morfologiche del legno massello, spesso considerate difetti del legno, sono le qualità che gli conferiscono il meritato titolo di "materiale unico e privilegiato": si tratta di piccole crepe o fessure, nodi e variazioni di colore che garantiscono l'autenticità di questa materia prima. Il legno massello si ricava dal centro o "cuore" dell'albero, cioè dalla parte più resistente e massiccia del tronco; con esso si realizzano i nostri piani, durevoli, resistenti e di qualità eccellente, senza l'utilizzo di alcun trattamento chimico che ne deturpi la naturalezza. Pulire con prodotti neutri e acqua tiepida, non utilizzare spugne abrasive, sostanze acide o a base di solventi.

The morphological characteristics of solid wood, often considered defects, are on the contrary the qualities that give it the deserved title of "unique and privileged material": small cracks or fissures, knots and color variations guarantee the authenticity of this raw material. The solid wood is obtained from the center or "heart" of the tree, that is, the strongest and more solid part of the trunk; with it we realize our tops, which are long-lasting, resistant and of excellent quality, without using any chemical treatment that disfigure the naturalness. Clean with neutral detergents and warm water, do not use abrasive sponges, acidic or solvent-based products.

ESEMPIO CALCOLO PREZZI
EXAMPLE OF PRICE CALCULATIONS

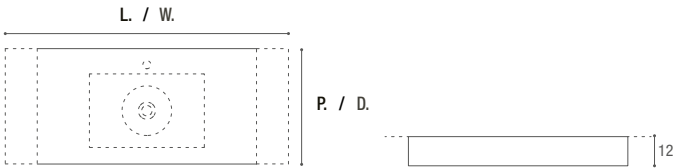

Per calcolare il prezzo totale del top sommare il prezzo del top al ml. nella profondità scelta moltiplicato per la lunghezza complessiva, aggiungere il prezzo della maggiorazione per vasca oppure foro lavabo e l'eventuale kit staffe per fissaggio a muro.

Choose first the depth of the top. Then to calculate the price, multiply the price per linear meter by the total length, add the price of the increase for basin or for basin hole and eventually for the wall brackets if needed.

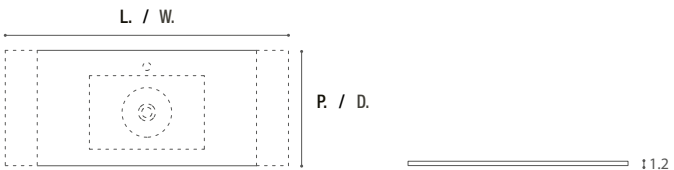

Art. TLS950 (1,204) x € + Art. AX9415 (€) + Art. AX9001 (€) = totale
Art. TLS950 (1,204) x € + Art. AX9415 (€) + Art. AX9001 (€) = total

TOP al ml.

Positioning rules for integrated basins integrate at page 371

Il pannello recomplax® 1100 è realizzato in compositi fibro-rinforzati riciclati (vetroresina-kevlar-fibra di carbonio, etc) finemente lavorati e riaggregati a pressione elevata con percentuali minime di collanti vergini. Il procedimento è brevettato e genera un materiale double-green innovativo, quindi nuovamente riciclabile a fine vita. La densità del pannello in puro composito fibro-rinforzato (1100 kg/m3) garantisce robustezza all'intera sezione, permettendo una lavorazione tridimensionale senza rischio di sfibramento. Il pannello recomplax® 1100 è un materiale sostenibile certificato da CSI.

- Impermeabile
- Formaldeide Free
- 100% riciclati e riciclabile

The recomplax® 1100 panel is made of recycled fiber-reinforced composites (fiberglass-kevlar-carbon fiber, etc.) finely processed and re-aggregated at high pressure with minimum percentages of virgin glues. The process is patented and generates an innovative ecological material, which is recyclable at the end of its life. The density of the pure fiber-reinforced composite panel (1100 kg / m3) ensures strength to the entire top, thus allowing three-dimensional processing without risk of fibre removal. The 1100 recomplax® panel is a sustainable material with the CSI Certification.

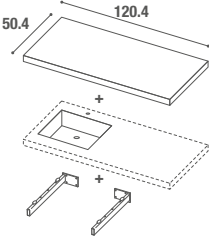

- Waterproof
- Formaldehyde free
- 100% recycled and recyclable

ESEMPIO CALCOLO PREZZI

EXAMPLE OF PRICE CALCULATIONS

Per calcolare il prezzo totale del top sommare il prezzo del top al ml. nella profondità scelta moltiplicato per la lunghezza complessiva, aggiungere il prezzo della maggiorazione per vasca oppure foro lavabo e l'eventuale kit staffe per fissaggio a muro.

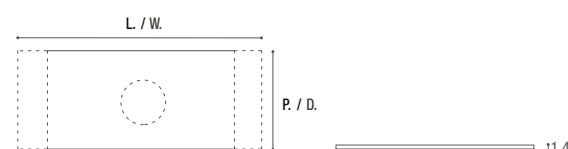

Choose first the depth of the top. Then to calculate the price, multiply the price per linear meter by the total length, add the price increase for the basin hole and eventually for the wall mounting brackets

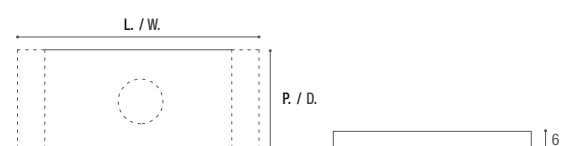

Art. TLL650 (1,204) x € + Art. AX9100 (€) + Art. AX9001 (€) = totale

Art. TLL650 (1,204) x € + Art. AX9100 (€) + Art. AX9001 (€) = total

TOP al ml. TOP per lm.

CONDIZIONI GENERALI DI VENDITA

VALIDITÀ:

- Il presente listino decorre dal 1 Settembre 2020.
- Non costituisce offerta e la ditta Artesi s.r.l. si riserva il diritto di apportarvi in qualunque momento e senza preavviso tutte le modifiche opportune, declinando ogni responsabilità per eventuali inesattezze in esso contenute, se derivanti da errori di stampa o trascrizione.
- Le condizioni Generali di Vendita regolano tutti i rapporti di Artesi s.r.l. con i Committenti, e si intendono tacitamente accettate integralmente con l'emissione d'ordine da parte degli stessi.

ORDINE E CONFERMA ORDINE:

- I singoli ordini saranno inviati dal Committente ad Artesi s.r.l., per iscritto, a mezzo fax o e-mail. Artesi s.r.l. si riserva il diritto di non accettare ordini non chiari o incompleti.
- Artesi s.r.l. si impegnerà ad inviare la relativa conferma nel più breve tempo possibile.

ANNULLAMENTI/VARIAZIONI:

- La conferma ordine s'intende ricevuta ed integralmente accettata, salvo diversa comunicazione, entro 2 giorni dal ricevimento della stessa; trascorso tale tempo, nessun ordine potrà essere annullato o modificato senza il consenso di Artesi s.r.l. che si riserva di addebitare eventuali oneri e spese che ne derivano.
- Si specifica che, in ogni caso, le conferme di prodotti non a catalogo e/o fabbricati su specifica richiesta vanno tassativamente controfirmate.

PREZZI:

- I prezzi esposti in Euro, si intendono quali quotazioni al pubblico.
- Gli sconti al rivenditore vengono praticati sulle quotazioni al pubblico; ai valori così ottenuti si applica l'IVA.
- I prezzi praticati al rivenditore si intendono per merce imballata resa franco destino o franco fabbrica a seconda degli accordi commerciali concordati, al netto di oneri fiscali, imposte, installazione e di qualsiasi altra prestazione da ritenersi sempre a carico del committente.

MISURE:

- Le misure indicate sono espresse in centimetri, salvo specifica diversa indicazione.

MOBILI SPECIALI FUORI MISURA:

- Misure e caratteristiche fuori della norma vengono accettate con riserva; il prezzo deve essere maggiorato del 30% salvo casi particolari, per i quali il prezzo stesso dovrà essere concordato di volta in volta.
- La stessa maggiorazione va applicata per le colorazioni fuori standard e a campione.

PRODOTTO:

- La conformità al campione non deve intendersi in senso tassativo, in quanto agenti ambientali o esterni (luce, vapore, ecc.) possono alterare l'aspetto esteriore dei mobili e su tutti i tipi di top; ciò potrà rendere difficile l'abbinamento di elementi acquistati in tempi diversi e tali inconvenienti, che peraltro si attenuano col trascorrere del tempo, rappresentano il normale comportamento delle varie finiture e non possono costituire motivo di contestazione.
- L'azienda si riserva di apportare eventuali aggiornamenti alle specifiche tecniche indicate nel presente listino, in relazione ad eventuali miglioramenti del prodotto.

APERTURA ANTE:

- L'indicazione "apertura sinistra" o "apertura destra" sta a significare che le cerniere sono fissate, rispettivamente, sul fianco sinistro o sul fianco destro guardando frontalmente il mobile.

TERMINI DI CONSEGNA:

- Gli ordini saranno evasi entro 30 gg. lavorativi.
- Per tutti gli articoli fuori misura la consegna verrà concordata con l'azienda.
- Resta inteso che in nessun caso Artesi s.r.l. sarà tenuta a rifondere indennizzi per eventuali danni diretti o indiretti dovuti alla ritardata, mancata o parziale consegna, qualsiasi sia la causa.

TRASPORTO:

- Il destinatario è obbligato a controllare la merce in arrivo e a contestare subito gli eventuali danni evidenti ed accertabili direttamente al trasportatore che ne è responsabile, indicandolo chiaramente nel DDT del trasportatore.
- Eventuali colli rovinati, solo esternamente, possono essere ritirati indicando sul DDT "RISERVA DI CONTROLLO". Il cliente ha 48 ore di tempo per contestare l'eventuale danno; diversamente Artesi s.r.l. si riserva di non riconoscere, in ogni caso, alcun rimborso per danni e/o rotture riscontrate.

SPECIAL PACKAGING - CONTATTARE L'AZIENDA:

- Realizziamo su richiesta barre di rinforzo o casse in legno per articoli con dimensioni particolari o trasporti che prevedano molti trasbordi.

INSTALLAZIONE:

- Il montaggio deve essere eseguito da personale realmente competente, seguendo le istruzioni consegnate con il prodotto. In caso contrario, si declina ogni responsabilità per vizi e/o difetti di installazione o per eventuali danni conseguenti.

RECLAMI:

- I reclami di eventuali difetti o non conformità, che non possono essere constatati alla consegna, dovranno essere effettuati entro 7 giorni dalla stessa pena decadenza.
- Nel caso di eventuali reclami di difetti o non conformità occulti che non possono essere constatati entro 7 giorni, Artesi s.r.l. si riserva il diritto di accettare o meno il reclamo e di addebitare eventuali oneri e spese che ne derivano.
- Il reclamo effettuato nelle tempistiche corrette e riconosciuto, comporterà unicamente la sostituzione dei prodotti e/o delle parti da noi riconosciute difettose e, qualora concordato preventivamente, l'eventuale intervento di ripristino.
- Qualora, al momento dell'apertura dell'imballo in occasione del montaggio, venissero riscontrati difetti o non conformità è indispensabile contattare immediatamente il servizio clienti in Artesi S.r.l. e concordare con esso come procedere. Con l'installazione del prodotto, se non concordata, il cliente conferma che lo stesso è arrivato in perfette condizioni e non sarà possibile presentare reclami per difetti o non conformità evidenti a posteriori; unitamente alcun rimborso per smontaggio e rimontaggio verrà riconosciuto.

RESI:

- Nessun articolo potrà essere reso senza l'autorizzazione scritta di Artesi s.r.l.
- I resi autorizzati dovranno pervenire imballati idoneamente per il trasporto ed in porto franco al ns. stabilimento.
- Il materiale reso sarà gravato del 30% per spese generali, percentuale minima a seconda della situazione, oltre ad eventuali spese di ripristino in base alle reali condizioni della merce.
- I prodotti non a catalogo e/o fabbricati su specifica richiesta non possono essere restituiti.

GARANZIE:

- La ditta Artesi s.r.l. fornisce la garanzia secondo i termini di legge, di prodotti forniti, quando non sussistano condizioni verificabili di errata installazione, cattivo uso e cattiva manutenzione.

FORO COMPETENTE:

- Per qualsiasi controversia il Foro competente sarà quello di Pordenone

AVVERTENZA:

- Per ragioni di ordine fiscale, il documento di trasporto e la fattura rifletteranno il prodotto articolato nei singoli componenti fisicamente caricati sui mezzi di trasporto

GENERAL CONDITIONS OF SALE

VALIDITY:

- This price list is valid from 1st September 2020.
- It does not represent an offer and the company Artesi Srl reserves the right to make whenever any needed changes without prior notice, refusing any responsibility for possible imprecisions in its contents, when resulting from printing or transcription faults.
- These general terms of sale regulate all relations of Artesi s.r.l. with the customers, and they are tacitly fully accepted when the customer sends the order.

ORDER AND ORDER CONFIRMATION:

- Each order will be sent in a written form by the customer to Artesi s.r.l., by fax or e-mail. Artesi s.r.l. reserves the right not to accept unclear or incomplete orders.
- Artesi s.r.l. will undertake to send the order confirmation as soon as possible.

CANCELLATIONS / CHANGES:

- The order confirmation is understood to be received and fully accepted, unless otherwise communicated within 2 days after Artesi has sent it; after this time, no order can be canceled or modified without Artesi's consent, who reserves the right to charge the customer for any expenses due to cancellations or changes.
- It is specified that, in any case, confirmations of products not in the catalogue and / or manufactured on specific request must be undersigned by the customer.

PRICES:

- Indicated prices are public price, expressed in Euros.
- Agreed discounts granted to retailers have to be calculated on public prices. To these prices, the VAT has to be added.
- The retailer prices include the packaging; delivery terms can be either ex-works or free delivered, as per trade agreement with company Artesi. Possible fiscal charges, taxes, installation expenses or any other service are excluded and charged to the buyer.

DIMENSIONS:

- The indicated dimensions are expressed in cm., if not otherwise indicated

NO STANDARD ITEMS:

- Measures and features outside the norm are accepted with reserve; the price must be increased by 30% except in special cases, for which the price itself must be agreed from time to time. The same surcharge must be applied for non-standard and sample colors.

PRODUCT:

- The exact correspondence with samples has not to be considered as an absolute, as ambient conditions or external agents (light, steam, etc) could modify the external aspect of the furniture and of all tops. For this reason it could be difficult to match pieces of furniture bought in several stages. These inconveniences, that however attenuate in the course of time, are normal considering for all finishing and are not to be considered a reason for complaint.
- The company reserves the right to up-date the technical data indicated in this price list, in order to improve the product

DOORS OPENING:

- The words "left door" or "right door" mean that hinges are mounted respectively on the left or on the right side, when looking at the element frontally.

DELIVERY:

- Orders will be produced within 30 working days.
- For all no standard items delivery has to be agreed with the company.
- It is understood that in no case Artesi s.r.l. will be required for compensation for any direct or indirect damage due to delayed, failed or partial delivery, whatever the cause may be.

TRANSPORT:

- The customer is obliged to check the goods on arrival and immediately contest any obvious damage directly to the carrier, who is responsible for them, by clearly indicating it in the transporter's delivery document or CMR.
- Any package, damaged only externally, can be accepted indicating on the delivery document or CMR "UNDER RESERVE OF CONTROL ". The customer has then 48 hours to contest any damage; otherwise Artesi s.r.l. reserves the right not to recognize any reimbursement for damages and / or breakages found

FOR SPECIAL DIMENSION PACKAGINGS' COST-SURCHARGE, PRICE-QUOTATIONS ON REQUEST:

- On request we provide special wooden bars to re-enforce packaging and or manufacture wooden containers-carcases for special dimension-size products; transport logistics that involve multiple third party transfers.

INSTALLATION:

- Installation must be done from qualified personnel only, following the assembling instructions delivered together with the goods. The company declines any responsibility regarding wrong installation and/or for damages resulting therefrom.

COMPLAINTS:

- Claims for any defects or non-conformities, which can not be ascertained upon delivery, must be made within 7 days, otherwise shall be invalid.
- In the event of any claims for hidden defects or non-conformity that can not be ascertained within 7 days, Artesi s.r.l. reserves the right to accept or refuse the claim and to charge for any expenses resulting therefrom.
- The claim made within the correct timing and accepted by Artesi S.r.l. will only involve the replacement of the defective products and / or parts, and if only agreed in advance, any related work.
- If, when installing the product, the customer opens the packaging and finds any defects or non-conformities, he should contact the customer service immediately at Artesi S.r.l. and agree on how to proceed. By installing the customer confirms that the same has arrived in perfect condition and it will not be possible, after, to send claims for visible defects or non-conformities (if not agreed before as explained above); likewise, no refund for disassembly and reassembly will be recognized.

RETURNED GOODS:

- Returned goods will not be accepted unless previously authorized in a written form by Artesi Srl.
- The authorised returned goods should be properly packed.
- The returned material will be charged anyway of minimum 30% as management and handling expenses, and of any necessary restoring operation needed; this minimum percentage can increase according to the real conditions of the goods.
- Return of no standard goods or of goods not present in this catalogue will never be accepted.

GUARANTEE:

- Artesi Srl guarantees the delivered products according to standard law terms, only when there do not subsist conditions of wrong installation, bad use and bad maintenance.

PLACE OF JURISDICTION:

- Any legal dispute will be settled by Pordenone law court.

WARNING:

- For fiscal reasons, delivery note and invoice will mention the single components of the product, exactly like effectively loaded.
