Lamiera | Metal

Partendo da una base in acciaio per tutte le finiture, i processi produttivi sono: Lamiera materica: l'acciaio viene nichelato per immersione su tutta la superficie. Successivamente viene acidato e lavato con acqua per poi essere verniciato con uno strato trasparente protettivo. Ogni elemento in lamiera materica è unico e non potrà mai presentare le stesse sfumature. Lamiera bianca - nera: l'acciaio subisce un processo di verniciatura a polvere, passando attraverso un forno di cottura che permette la copertura dell'oggetto con un leggero ma resistente strato di vernice. | Starting from a stainless steel base for all finishes, the production processes are: Metal rough effect: steel is nickelplated by immersion

on the entire surface. Subsequently it is etched and washed with water and then painted with a transparent protective layer. Each piece element is unique and can never have the same nuances. White - black painted: steel has a powder coating process, passing through an oven that allows the object to be covered with a light but resistant layer of paint. | Partant d'une base en acier pour toutes les finitions, les processus de production sont les suivants: Métal brut: l'acier est nickelé par immersion sur toute la surface. En suite, il est gravé et lavé à l'eau et en suite peinté avec une couche protectrice transparente. Chaque élément piece est unique et ne peut jamais avoir les mêmes

nuances. Métal blanche - noir: l'acier subit un processus de revêtement de poudre, passant à travers un four de cuisson qui permet à l'objet d'être recouvert d'une couche de peinture légère mais résistante. | Ausgehend vom Basismaterial Edelstahl für alle Ausfuehrungen, wird beim Roheffekt "Materica" nach diversen Haertungen, Vernickelungen ecc. einen transparenten Schutzlack aufgetragen. Jedes Element in dieser Ausfuehrung ist einzigartig in seinen Strukturen und Zeichnungen. Die weiss - schwarz Version ist eine Pulverbeschichtung und matte Lackierung, die im Ofen eingebrannt wird und so sehr resistent wird. | Partiendo de una base de acero todos los

acabados, los procesos de producción son: Plancha matérica: el acero viene niquelado por inmersión de toda la superficie. Sucesivamente viene grabado al acido lavado con agua para después ser barnizado con otra capa transparente protectora. Cada elemento en plancha matérica es único y no podrá nunca presentarr las mismas tonalidades. Planchqa blanca/ negra: El ácido experimenta un proceso de barniz opaco al polvo, pasando a través de un horno con una cocción que permite el recubrimiento del objeto con un ligero pero resistente capa de barniz.

Lamiera | Lamiera

Partendo da una base in acciaio per tutte le finiture, i processi produttivi sono: Lamiera materica: l'acciaio viene nichelato per immersione su tutta la superficie. Successivamente viene acidato e lavato con acqua per poi essere verniciato con uno strato trasparente protettivo. Ogni elemento in lamiera materica è unico e non potrà mai presentare le stesse sfumature. Lamiera bianca - nera: l'acciaio subisce un processo di verniciatura a polvere, passando attraverso un forno di cottura che permette la copertura dell'oggetto con un leggero ma resistente strato di vernice. | Starting from a stainless steel base for all finishes, the production processes are: Metal rough effect: steel is nickelplated by immersion

on the entire surface. Subsequently it is etched and washed with water and then painted with a transparent protective layer. Each piece element is unique and can never have the same nuances. White - black painted: steel has a powder coating process, passing through an oven that allows the object to be covered with a light but resistant layer of paint. | Partant d'une base en acier pour toutes les finitions, les processus de production sont les suivants: Métal brut: l'acier est nickelé par immersion sur toute la surface. En suite, il est gravé et lavé à l'eau et en suite peinté avec une couche protectrice transparente. Chaque élément piece est unique et ne peut jamais avoir les mêmes

nuances. Métal blanche - noir: l'acier subit un processus de revêtement de poudre, passant à travers un four de cuisson qui permet à l'objet d'être recouvert d'une couche de peinture légère mais résistante. | Ausgehend vom Basismaterial Edelstahl für alle Ausfuehrungen, wird beim Roheffekt "Materica" nach diversen Haertungen, Vernickelungen ecc. einen transparenten Schutzlack aufgetragen. Jedes Element in dieser Ausfuehrung ist einzigartig in seinen Strukturen und Zeichnungen. Die weiss - schwarz Version ist eine Pulverbeschichtung und matte Lackierung, die im Ofen eingebrannt wird und so sehr resistant wird. | Partiendo de una base de acero todos los

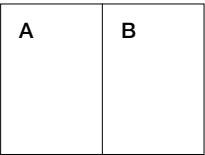

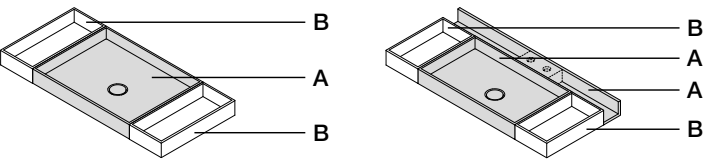

acabados, los procesos de producción son: Plancha matérica: el acero viene niquelado por inmersión de toda la superficie. Sucesivamente viene grabado al acido lavado con agua para después ser barnizado con otra capa transparente protectora. Cada elemento en plancha matérica es único y no podrá nunca presentarr las mismas tonalidades. Planchqa blanca/ negra: El ácido experimenta un proceso de barniz opaco al polvo, pasando a través de un horno con una cocción que permite el recubrimiento del objeto con un ligero pero resistente capa de barniz.

Acid Shield

Acid Shield è il rivoluzionario trattamento protettivo per marmi e pietre contro agenti acidi, coloranti e grassi. Forma un vero e proprio scudo invisibile satinato al tatto e, senza alterare le qualità cromatiche naturali dei materiali, protegge da macchie, aloni, rigature e perdite di tonalità e brillantezza. Il trattamento è frutto della ricerca del nostro partner ed è applicato dall'azienda presso i propri laboratori non solo su lastre e altri oggetti piani, ma anche su manufatti tridimensionali, torniti o scavati. Acid Shield è certificato dal Laboratorio del marmo di Verona in base alla norma UNI EN 12720 (Valutazione della resistenza delle superfici ai liquidi freddi, prodotti di pulizia e agenti macchianti) e consente di superare tutte le problematiche di manutenzione e pulizia dei materiali lapidei naturali. | Acid Shield is a revolutionary treatment for marbles and stones conceived against acids, colorants and grease. It creates an invisible satin-like shield without altering its natural chromatic aspect and protects it from stains, etches

and loss of brilliance and colors. This treatment has been developed internally by our partner and is applied by the firm on marble slabs and surfaces, but also on 3D-shaped or carved objects. Acid Shield is certified by the Marmo di Verona Laboratory in compliance with UNI EN 12720 regulation (Assessment of surface resistance to cold liquids). | Acid Shield est le traitement protecteur révolutionnaire du marbre et de la pierre contre les agents acides, les colorants et les graisses. Il forme un véritable bouclier invisible avec une finition satinée au toucher et, sans altérer les qualités chromatiques naturelles des matériaux, protège contre les taches, les halos, les rayures et la perte de teinte et de brillance. Le traitement est le résultat de la recherche de notre partenaire et est appliqué par l'entreprise dans ses laboratoires non seulement sur des plans et autres objets plats, mais aussi sur des objets tridimensionnels, tournés ou excavés. Acid Shield est certifié par le Laboratoire de Marbre de Vérone selon UNI EN 12720

(Évaluation de la résistance des surfaces aux liquides froids, aux produits de nettoyage et aux agents de coloration) et permet de surmonter tous les problèmes d'entretien et de nettoyage des matériaux en pierre naturelle. | Acid Shield ist die revolutionäre Schutzbehandlung für Marmor und Stein gegen Säuremittel, Farbstoffe und Fette. Es bildet einen echten und eigenen unsichtbaren Schild mit einem satinierten Finish und schützt, ohne die natürlichen chromatischen Eigenschaften der Materialien zu verändern, vor Flecken, Lichthöfen, Streifen und Farb- und Brillanzverlust. Die Behandlung ist das Ergebnis der Forschung unseres Partners und wird vom Unternehmen in seinen Labors nicht nur auf dreidimensionalen, gedrehten oder ausgegrabenen Artefakten angewendet. Acid Shield ist vom Verona Marble Laboratory gemäß UNI EN 12720 (Bewertung der Beständigkeit von Oberflächen gegenüber kalten Flüssigkeiten, Reinigungsmitteln und

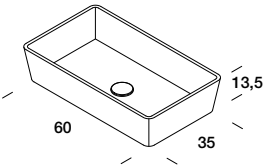

Färbemitteln) zertifiziert und ermöglicht die Überwindung aller Probleme bei der Wartung und Reinigung von Natursteinmaterialien | Acid Shield es el revolucionario tratamiento protector para mármol y piedra contra agentes ácidos, colorantes y grasos. Forma un escudo real de satén invisible al tacto y, sin alterar las cualidades cromáticas naturales de los materiales, protege contra manchas, halos, rayas y pérdida de matiz y brillo. El tratamiento es el resultado de la investigación de nuestro socio y la empresa lo aplica en sus laboratorios no solo en losas y otros objetos planos, sino también en artefactos tridimensionales, torneados o excavados. Acid Shield está certificado por el Verona Marble Laboratory según UNI EN 12720 (Evaluación de la resistencia de las superficies a líquidos fríos, productos de limpieza y agentes de tinción) y permite superar todos los problemas de mantenimiento y limpieza de materiales de piedra natural.

Materiali

Materials

Corian® è un materiale non poroso, omogeneo e inalterabile alla luce, composto da ±1/3 di resina acrilica (polimetil-metacrilato o PMMA) e da ±2/3 di sostanze minerali. Il componente principale è il tri-idrato di alluminio (ATH), minerale derivato dalla bauxite, da cui si ricava l'alluminio. Dal 1967, anno della sua produzione, a oggi il Corian® ha dimostrato di essere un materiale resistente, versatile e igienico. Non essendo poroso, muffe e batteri non trovano appigli e non possono diffondersi nelle giunture o sotto la superficie. Inerte e non tossico, in condizioni normali di temperatura non emette gas. Quando viene bruciato rilascia ossidi di carbonio, il fumo è leggero e non contiene gas alogeni tossici. Per ulteriori informazioni consultare il sito internet: www.dupont.it

Corian® is a solid, non-porous, homogeneous surfacing material, composed of ±1/3 acrylic resin (also known as Polymethyl Methacrylate or PMMA), and ±2/3 of natural minerals. These minerals are composed of Aluminium Trihydrate (ATH) derived from bauxite, an ore from which aluminium is extracted. Since its birth in 1967 Corian® has proved to be really resistant, versatile and hygienic. Being a non-porous material, mold and bacteria cannot root nor spread themselves in the joints or under the surface. Corian® is non-toxic and inert. In normal temperature conditions is not emitting gas. If burnt releases mostly carbon monoxide and the light smoke does not have any halogen toxic gas. For further information on its composition, consult the website: www.corian.uk

Corian® est un matériel de revêtement homogène massif et non poreux, composé de ±1/3 de résine acrylique (également connue sous le nom de Polyméthyle Méthacrylate ou

Corian®

Impiegato per la realizzazione di top, lavabi, piatti doccia, vasche, rivestimenti e accessori. | Used for the realisation of tops, washbasins, shower trays, bathtubs, wall panelling and accessories | Employé pour plans, vasques, receveurs de douche, baignoire, revêtement mural et accessoires | Es wurde für die Herstellung von Platten, Waschbecken, Duschtassen und Badewannen entwickelt | Es empleado para la realización de encimeras, lavabos, platos de ducha, bañeras, revestimiento de paredes y accesorios

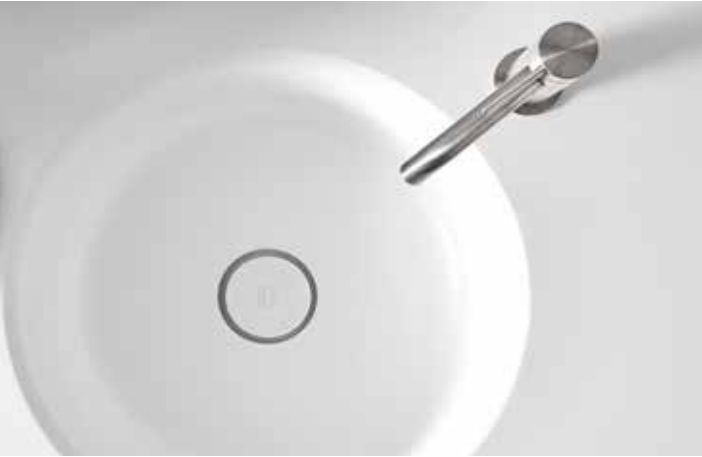

PMMA), et de ±2/3 de minéraux naturels. Son composant principal est le Trihydrate de la bauxite (ATH), un minéral dérivé de la bauxite, le minéral dont on extrait l'aluminium. Depuis sa naissance en 1967, Corian® a démontré d'être vraiment résistant, versatile et hygiénique. Etant aussi un matériel homogène et non-poreux, moisissures et bactéries ne se déposent pas ni dans les joint et ni en dessous de la surface. Corian® est inerte et nontoxique. En condition de température normale, il génère aucune émission de gaz. En cas de combustion, il émet surtout des oxydes de carbone et le fumée est léger et contient pas des gaz halogènes toxiques. Pour plus d'information, consultez le site: www.dupontdenemours.fr

Corian® ist ein massives, nicht poröses und homogenes Oberflächenmaterial aus ±1/3 Acrylharz (auch als Polymethylmetacrylat oder PMMA bekannt) und ±2/3 natürlichen Mineralien. Der Hauptbestandteil ist das Mineral Aluminiumhydroxid (ATH), das aus Bauxit (Aluminiumerz) gewonnen wird. Seit der Markteinführung im Jahr 1967 hat sich Corian® als langlebiges und nutzerfreundliches Material bewährt. Das porenlose, massive Corian® kann optisch fugenlos verarbeitet werden und verfügt deshalb über eine besonderes hygienische Oberfläche. Diese verhindert das Wachstum von Bakterien oder Schimmelpilzen. Corian® ist ein inaktives, nicht toxisches Material. Bei Normaltemperatur kommt es zu keiner Gasentwicklung. Wird es verbrannt, setzt der Werkstoff hauptsächlich Kohlendioxid frei. Der Rauch ist optisch hell und enthält keine toxischen halogenierten Gase. Informationen zur Materialzusammensetzung entnehmen Sie bitte dem Corian® auf: www.dupont.de

Corian® es un material no poroso, homogéneo e inalterable a la luz, compuesto de ±1/3 de resina acrílica (también conocida como Polimetil-Metacrilato o PMMA) y ±2/3 de minerales naturales. Su principal ingrediente es el mineral trihidrato de aluminio (ATH), un derivado de la bauxita que sirve de base para la producción de aluminio. Desde su introducción en 1967, Corian® ha demostrado ser un material resistente, versátil e higiénico. Como no es poroso, el moho y las bacterias no encuentran bodegas y no pueden propagarse en las articulaciones o debajo de la superficie. Corian® es un material inerte y no tóxico. Bajo condiciones normales de temperatura, no emite gases. Cuando se quema, principalmente desprende gas carbónico, el humo que genera es liviano y no contiene gases halogenados tóxicos. Para tener más información sobre la composición del material, consulte Corian® la página: www.dupont.es

Korakril

Impiegato per la realizzazione di top, lavabi, e vasche | Used for the production of tops, washbasins and bathtubs | Employé pour plans, vasques et baignoires | Wird für die Herstellung von Platten, Waschbecken und Badewannen verwendet | Empleado para la realización de encimeras, lavabos y bañeras.

Materiale realizzato con una mescola di resine acriliche e minerali naturali, il Korakril è resistente, igienico, antistatico, inalterabile alla luce, resistente alle macchie e termoformabile: le lastre scaldate possono essere modellate con stampi di legno o metallo, creando forme bi e tridimensionali. La sua particolare composizione permette di realizzare top in totale assenza di giunzioni percettibili con il vantaggio di una continuità estetica all'interno delle composizioni. L'uniformità del materiale impedisce che si possano verificare punti critici per lo sporco o il deposito di batteri e muffe. Questo materiale viene realizzato sia in versione bianca opaca sia in quella colorata disponibile in cinque differenti tonalità. La presenza discreta di granuli visibili dei vari minerali di diverse dimensioni e cromie, conferisce un aspetto materico alla superficie mantenendo la sua omogeneità nell'intera superficie.

Material realised with a mixture of acrylic resins and natural minerals. Korakril is resistant, hygienic, anti-static, inalterable to light, stain resistant and can be thermoformed: the heated slabs can be moulded with wooden or metal moulds, creating two and three-dimensional shapes. The particular composition of Korakril enables the manufacture of tops without visible joints that make the composition continuative. With its uniformity, you will not find critical point for the deposit of dust and neither for bacteria. This material is made both in a matt white version and in a colored one available in five different shades. The discreet presence of different sizes and colours of various minerals visible grains, gives the surface a texture effect while maintaining its homogeneity throughout the entire surface.

C'est un matériel réalisé avec un mélange des résines acryliques. Korakril est résistant, hygiénique,

antistatique, inaltérable à la lumière, résistant aux taches et thermoformable: les dalles chauffées peuvent être modélisées avec des moules en bois ou en métal, en créant des formes bidimensionnelles et tridimensionnelles. Sa particulière composition permet de réaliser des plans tops sans joints visibles avec l'avantage d'avoir une continuité esthétique à l'intérieur des compositions. L'uniformité de ce matériel empêche la formation des points critiques pour la poussière ou l'accumulation des bactéries. Ce matériau est fabriqué soit en version blanc mat soit en couleur disponible en cinq teintes différentes. La présence discrète de grains visibles de divers minéraux de différentes tailles et couleurs donne à la surface un aspect matériel tout en conservant son homogénéité sur toute la surface.

Ist eine Mischung von Acrylherzen und natürlichen Mineralen. Korakril ist fest, hygienisch, antistatisch, lichteht, fleckbeständig und man kann es Thermoformen: die beheizten Platten können mit Holzoder Metallformen modelliert werden, um bi oder dreidimensionale Formen zu schaffen. Mit dieser speziellen Zusammensetzung, kann man mit Korakril Platten ohne Verbindungen realisieren, die den Kompositionen eine schöne ästhetische Kontinuität bieten. Die Gleichmäßigkeit des Material gibt die Möglichkeit eine andauernde saubere Oberfläche ohne kritische Punkte für Schmutz zu haben. Inert und ungiftig, es kann an öffentlichen Plätzen verwendet werden, da es keinerlei Gas ausströmt. Die Herstellung von Korakril entsteht mit Systemen, die den Abfall minimieren, der jedoch auch in den Produktionsprozess zurückgeführt wird, ein optimiertes Verfahren, das auf die maximale Energieeinsparung führt.

Es un material realizado por una mezcla de resinas acrílicas y minerales naturales. Korakril es resistente, higiénico, antiestático, inalterable a la luz, resistentes a las manchas y puede ser termoformado: las losas calentadas pueden ser modeladas con moldes de madera o de metal, creando formas bidimensionales y tridimensionales. La composición particular de Korakril permite realizar encimeras en total ausencia de uniones perceptibles donando continuidad estética a las composiciones. La uniformidad del material no permite el deposito de mugre y bacterias. Este material está hecho tanto en una versión blanca mate como en una de color disponible en cinco tonos diferentes. La presencia discreta de granos visibles de varios minerales de diferentes tamaños y colores le da a la superficie una apariencia matérica mientras mantiene su homogeneidad en toda la superficie

Corian® coloré A—B—G	
Nettoyez toujours en effectuant un mouvement circulaire. L'eau de javel risque de décolorer le Corian® si elle n'est pas ensuite rincée complètement à l'eau.	

Methodes de nettoyage

- A. Épongez avec un chiffon doux.
- B. Rincez à l'eau chaude et séchez avec un chiffon doux.
- C. Utilisez un chiffon humide et un détergent doux en crème (type Cif).
- D. Utilisez une éponge et frottez la tâche avec un détergent ou un nettoyant pour surface dure à l'ammoniaque dilué (type Ajax ou Monsieur Propre).

Corian®, Korakril (Blend und Stone) Reinigungsmethode

Corian® et Korakril (Stone) gebrauch und wartung	Ammoniakbasis (z.B. Ajax, Meister Proper, General) über den Fleck reiben.
Tägliche Reinigung A—B—C	
Kalk-, Seifen- Mineralablagerungen A—B—F—I	E. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und Haushaltsbleiche. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.
Lilienpollen, Safran, leichte Kratzer, Zigarettenbrandfleck Tinte, Filzstift A—B—C—E—I	F. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und einem standard-mäßigen Haushaltsmittel zur Entfernung von Kalkablagerungen (Sidel) oder Essig über den Fleck reiben. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.
Mercurochrom, Blut, Rotwein, Parfum A—B—C—D—E—I	
Nagellack A—B—C—G—I	
Eisen oder Rost A—B—C—H—I	G. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und einem acetonfreien Nagellackentferner über den Fleck reiben. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.
Jod A—B—C—E—I	H. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und einem Metallreiniger oder Rostentferner über den Fleck reiben. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.
*Reinigen Sie die Oberfläche immer mit kreisenden Bewegungen **Bleiche sofort mit Waser vollständig abspülen, andernfalls kann sich die Corian® Oberfläche verfärben.	I. Wenn Flecken nicht entfernt werden können, setzen Sie sich mit Rexa Design (tel: +39 0434 593182) in Verbindung.

Reinigungsmethode

- A. Rückstände mit einem weichen Tuch entfernen.
- B. Oberfläche mit warmen Wasser abspülen und mit einem weichen Tuch trockenwischen.
- C. Ein feuchtes Tuch und eine milde Scheuermilch verwenden (z.B. Viss, Frosch Scheuermilch).
- D. Mit einem abrasiven Scheuerschwamm (z.B. Scotch Brite®) und einem Reinigungsmittel oder Reiniger für Massivoberflächen auf

Cleaning methods for Corian®, Korakril (Blend and Stone)

Corian® and Korakril (Blend and Stone) use and maintainance	F. Use a microfiber cloth and rub over the stain with a standard household lime-scale remover (Viakal®, Lime-lite) or vinegar . Rinse several times with warm water and dry with a soft cloth.
For everyday cleaning A – B – C	
Water rich of limestone, soaps, minerals A—B—F—H	G. Use a microfiber cloth and rub over the stain with a non-acetone based Nail varnish remover. Rinse several times with warm water and dry with a soft cloth.
Light scratch, cigarette burns, ink, marker pen A—B—C—E—H	
Mercurochrome, blood, perfume A—B—C—D—E—H	H. If the stains persist, contact Rexa Design (tel: +39 0434 593182).
Nail varnish spills A—B—C—G—H	Most damages, including sever impact, heat or chemical damage, can usually be repaired on site to restore the original, smooth, hygienic solid surface integrity.
Iron or rust A—B—C—G—H	
Iodine A—B—C—E—H	
Colored Corian® A—B—G	
Always clean using circular motion. Bleach can discolour Corian® if not removed completely by rinsing with water afterwards.	

Cleaning methods

- A. Remove excess with a soft cloth.
- B. Rinse surface with warm water and dry with a soft cloth.
- C. Use a damp microfiber cloth and a light abrasive cream.
- D. Use a microfiber cloth and wipe the stain with an ammonia detergent
- E. Use a microfiber cloth and rub over the stain with some diluted bleach. Rinse several times with warm water and dry with a soft cloth.

Corian®, Korakril (Blend y Stone) metodos de limpieza:

Corian® y Korakril (Blend y Stone) uso y mantenimiento	Aclare varias veces con agua caliente y seque con un trapo suave.
Para la limpieza cotidiana A—B—C	
Cal de agua dura, jabon, minerales A—B—F—H	F. Con un estropajo que esté gastado frote la mancha con un producto doméstico para eliminar los residuos de cal (Viakal®) o vinagre. Aclare varias veces con agua caliente y seque con un trapo suave.
Rasguños significativos, quemaduras de cigarrillos, tinta, marcas de lápiz A—B—C—E—H	G. Con un estropajo que esté gastado frote la mancha con un detergente sin acetona. Aclare varias veces con agua caliente y seque con un trapo suave.
Sangre, vino, perfume A—B—C—D—E—H	
Manchas de esmalte de uñas A—B—C—G—H	H. Si la mancha persiste, contacte Rexa Design (tel: +39 0434 593182).
Hierro u oxidacion A—B—C—G—H	La mayoría de los daños, incluso los causados por un golpe, el calor y productos químicos, se pueden reparar en el sitio de instalación.
Yodo A—B—C—E—H	
Corian® de colores A—B—G	

Siempre limpie con movimientos circulares. La Lejía puede dejar manchas blancas en la superficie de Corian® si no se aclare con agua abundante.

Metodos de limpieza

- A. Elimine manchas con un trapo suave.
- B. Aclare la superficie con agua caliente y segue con un trapo suave.
- C. aplique una crema ligeramente abrasiva (como Cif) con un paño mojado.
- D. Con un estropajo que esté gastado frote la mancha con un producto para limpiar superficies sólidas a base de amoniaco.
- E. Con un estropajo que esté gastado frote la mancha con un poco de lejía diluida.

Korakril Blend

Impiegato per la realizzazione di vasche stampate e lavabi | Used for the realization of injected basins and bathtubs | Utilisé pour la réalisation de vasque injectées et baignoires | Verwendet für die Realisierung von gegossenen Waschbecken | Se utiliza para la realización de los lavabos inyectados y baneras

Parte della famiglia dei Solid Surface, Korakril Blend è un materiale realizzato dalla combinazione tra minerali naturali e resine di altissima qualità. Korakril Blend nasce sottoforma di resina liquida che viene iniettata in stampi per creare il prodotto finale. Grazie a questi processi di lavorazione, Korakril Blend risulta un materiale compatto e omogeneo sull'intera superficie che, non presentando nessuna porosità, lo rende igienico, ignifugo e antibatterico.

As a solid surface, Korakril Blend is a material made from the combination of natural minerals and very high quality resins. Korakril Blend is basically in the form of liquid resin which is injected into molds to create the final product. Thanks to these manufacturing processes, Korakril Blend is a compact and homogeneous material on the entire surface which, without presenting any porosity, makes it hygienic, flame retardant and antibacterial.

Faisant partie de la famille Solid Surface, le Korakril Blend est un matériau fabriqué à partir de la combinaison de minéraux naturels et de résines de très haute qualité. Korakril Blend est né sous forme de résine liquide qui est injectée dans des moules pour créer le produit final. Grâce à ces procédés de fabrication, Korakril Blend est un matériau compact et homogène sur toute la surface qui, sans présenter de la porosité, le rend hygiénique, ignifuge et antibactérien.

Verbundwerkstoff mit 2/3 Aluminiumhydrate, gemischt mit Polyesterharzen, modifiziert mit Acrylmonomeren mit hohen chemischen und mechanischen Leistungen gemacht, um die Homogenität und die Gleichförmigkeit durch die Dicke zu gewährleisten. Kompakte Bauweise, Beständigkeit gegenüber Chemikalien und / oder Lösungsmittel und Kratzfestigkeit sind die Hauptmerkmale von Korakril Mischung.

Parte de la familia de Solid Surface, Korakril Blend es un material hecho de la combinación de minerales naturales y resinas de muy alta calidad. Korakril Blend nació en forma de resina líquida que se inyecta en moldes para crear el producto final. Gracias a estos procesos de fabricación, Korakril Blend es un material compacto y homogéneo en toda la superficie que, sin presentar porosidad, lo hace higiénico, ignífugo y antibacteriano.

Korakril Stone

Impiegato per la realizzazione di piani | Used for the realization of tops | Utilisé pour la réalisation de plans | Verwendet für die Realisierung von Tops | Se utiliza para la realización de las encimeras

Korakril Stone è un materiale che fa parte della famiglia dei Solid Surface ed è costituito dalla combinazione di più minerali naturali e resina polimerica prestazionale. I minerali di cui è composto sono di varie colorazioni e dimensioni, per questo motivo viene fornito in cinque tonalità che, pur mantenendo l'omogeneità in tutto lo spessore, caratterizza la superficie con un marcato effetto materico tipico delle pietre naturali. Grazie a queste sue proprietà, il Korakril Stone risulta durevole e facilmente ripristinabile nel caso di piccoli tagli o graffi lungo la superficie.

Korakril Stone is part of the family of Solid Surface materials, consisting of the combination of several natural minerals and performing polymer resin. The minerals of which composed it are of various colors and sizes, for this reason it is supplied in five shades which, while maintaining homogeneity throughout the thickness, characterizes the surface with a marked texture effect typical of natural stones. Thanks to these properties, Korakril Stone is durable and easy to restore in the case of small cuts or scratches along the surface.

Korakril Stone est un matériau qui fait partie de la famille des Solid Surface, formé par la combinaison de plusieurs minéraux naturels et de résine de polymère performante. Les minéraux dont il est composé sont de différentes couleurs et tailles, c'est pour ça que il est fourni en cinq teintes qui, tout en conservant une homogénéité dans toute l'épaisseur, caractérisent la surface avec un effet structuré mtypique des pierres naturelles. Grâce à ces propriétés, le Korakril Stone est durable et facile à restaurer en cas de petites coupures ou rayures le long de la surface.

Korakril Stone ist Teil der Familie der Solid Surface Materialien, bestehend aus der Kombination von mehreren natürlichen Mineralien und Polymer-Harz. Der Korakril Stone ist kompakt, nicht beschichtet oder laminiert

und ermöglicht eine elegante Ausführung und hoher Leistung. Die hygienische Oberfläche, fiammwidrig, nicht porös, ist langlebig und leicht zu reinigen mit gängigen Reinigungsmitteln. Die Zusammensetzung und die Farbe von Korakril Stone, die in verschiedenen Farbtönen erhältlich sind, machen sie homogen in ihrer gesamten Stärke: Aufgrund dieser besonderen Merkmale können kleine Schnitte und Kratzer (in der glatten Oberfläche) leicht entfernt werden und das Produkt seine originale Schönheit zurückbringen.

Korakril Stone es parte de la familia de materiales Solid Surface, consiste en la combinación de varios minerales naturales y resina polimérica performante. El Korakril Stone es compacto, no recubierto ni laminado, y permite unas instalaciones elegantes y con alto rendimiento. Los minerales que lo componen son de varios colores y tamaños, por esta razón se suministra en cinco tonos que, si bien mantienen la homogeneidad en todo el grosor, caracterizan la superficie con un marcado efecto máterico típico de las piedras naturales. Gracias a estas propiedades, Korakril Stone es duradero y fácil de restaurar en caso de pequeños cortes o rasguños a lo largo de la superficie.

Impiegato per la realizzazione di top, lavabi e vasche | Used for the construction of tops, washbasins and bathtubs | Utilisé pour la construction des plans, évier et baignoires | Verwendet für die Konstruktion der Tops und Waschbecken | Se utiliza para la construcción de encimeras, lavabos y bañeras

Come tutti i materiali solid surface, Shark è il risultato dell'unione tra un mineralenaturale e una resina poliestere, il tutto rivestito poi da un ulteriore film superficiale di resina. Questo sottile strato conferisce al materiale un'ottima resistenza all'acqua e ai batteri soprattutto nel tempo. La parte più esterna del materiale è inoltre caratterizzata da una particolare lucentezza molto marcata ed evidente specialmente nella versione lucida. Shark matt o glossy è disponibile anche in quattro differenti tonalità oltre al bianco, in cui viene applicato uno specifico prodotto che conferisce al materiale ottime proprietà di idro e oleo repellenza.

Like all solid surface materials, Shark is the result of the union between a natural mineral and a polyester resin, all then covered with an additional surface resin film. This thin layer gives the material excellent resistance to water and bacteria especially over time. The outermost part of the material is also characterized by a particular very marked and evident shine, especially in the glossy version. Shark matt or glossy is also available in four different shades in addition to white, in which a specific product is applied which gives the material excellent hydro and oil repellency properties.

Comme tous les Solid Surfaces, Shark est le résultat de l'union entre un minéral naturel et une résine polyester, le tout ensuite recouvert d'un film de résine de surface supplémentaire. Cette fine couche confère au matériau une excellente résistance à l'eau et aux bactéries, notamment dans le temps. La partie la plus externe du matériau se caractérise également par un éclat particulier, très marqué et évident, en particulier dans la version brillante. Shark mat ou brillant est également disponible en quatre teintes différentes en plus du blanc, dans lesquelles un produit spécifique est appliqué, ce qui confère au matériau d'excellentes propriétés hydrofuges et oléofuges.

Wie alle Verbundmaterialien ist Shark eine Mischung von einem natürlichen Mineral und einem Polyesterharz. Das ganze wird mit einer Oberflaechenschicht aus Acrylharz/hochwertigem Polyester beschichtet, das eine ausgezeichnete haltbare physikalische chemische Bestaendigkeit ueber die Zeit verleiht, eine Wasserfestigkeit und Hygiene im taeglichen Gebrauch. Die externe letzte Schicht verleiht speziell in der Glanzversion einen eleganten Effekt und ist angenehm in der Beruehrung. Shark matt und glanz ist nebst weiss, noch in 4 Farben erhaeltlich. Eine letzte Behandlung gibt dem Material noch eine zusaetzliche Schicht, die die Oberflaeche weniger sensibel auf Kratzer und Flecken macht.

Como todos los Solid Surfaces, Shark es el resultado de la unión entre un mineral natural y una resina de poliéster, todo cubierto con una película de resina de superficie adicional. Esta capa delgada le da al material una excelente resistencia al agua y a las bacterias, especialmente con el tiempo. La parte más externa del material también se caracteriza por un brillo particular, muy marcado y evidente, especialmente en la versión brillante. Shark mate o brillante también está disponible en cuatro tonos diferentes además de blanco, en el que se aplica un producto específico que le da al material excelentes propiedades de repelencia al aceite y al hidrógeno.

Pulizia
Per una facile manutenzione e un duraturo utilizzo di un lavabo o di un piano, pulire la superficie con acqua tiepida e detergente delicato usando un panno morbido e umido. Risciacquare e asciugare sempre con un panno morbido. Per questo materiale sia nella versione bianca che in quella colorata è meglio utilizzare come detergente uno sgrassatore universale o candeggina, mentre evitare i saponi in polvere. Per macchie difficili come fondotinta, tinte per capelli o smalti per unghie, si consiglia di pulire immediatamente per evitare di far asciugare il prodotto e ridurre le possibilità di smacchiamento. Si sconsiglia l'utilizzo di spugna abrasiva. Nel caso di graffi o danneggiamenti superficiali, il materiale non sarà ripristinabile.

Cleaning
For easy maintenance and long-term use of a sink or top, clean the surface with warm

water and mild detergent, using a wet soft cloth or sponge. Always rinse and dry with a soft cloth. For this material, both in the white and colored versions, it is better to use a universal degreaser or bleach as a detergent, while avoiding soap soaps. For difficult stains such as make-up, hair dyes or nail polishes, we recommend cleaning immediately to avoid drying the product and reducing the possibility of stain removal. The use of abrasive sponges is not recommended. In the case of scratches or surface damage, the material cannot be restored.

Nettoyage
Pour un entretien facile et une utilisation durable d'un lavabo ou d'un plan de travail, nettoyez la surface avec de l'eau tiède et un détergent doux à l'aide d'un chiffon doux et humide. Rincez et séchez toujours avec un chiffon doux. Pour ce matériau, à la fois dans les versions blanches et colorées, il est préférable d'utiliser un dégraissant universel ou un javellissant comme détergent, tout en évitant les savons au savon. Pour les taches difficiles telles que le fond de teint, les teintures capillaires ou les vernis à ongles, nous recommandons de nettoyer immédiatement pour éviter de sécher le produit et de réduire la possibilité d'élimination des taches. L'utilisation d'éponges abrasives n'est pas recommandée. En cas de rayures ou d'endommagement de la surface, le matériau ne peut pas être restauré.

Reinigung
Für eine einfache Wartung und langfristige Nutzung eines Waschbeckens oder einem Top, reinigen Sie die Oberfläche mit warmem Wasser und einem milden Reinigungsmittel mit einem weichen nassem Tuch oder Schwamm. Spülen Sie die Oberfläche und dann mit einem weichen Tuch trocknen. Für die glänzende Shark wird es empfohlen, die Verwendung von Reinigungsmitteln und Scheuerschwämme zu vermeiden. — Im Falle Flecken, die von Wasser reich an Kalkstein, Seifen oder Mineralprodukte verursacht werden, reinigen mit einer Entkalkungsmittel (zB: Essig, Cif Entkalker).Beenden der Reinigung mit warmem Wasser und trocknen mit einem weichen Tuch.— Im Fall von anderen Arten von Flecken (Filzstift, Lippenstift, Fett, Speisereste, etc.) mit ammoniakhaltigen Reinigungsmittel reinigen (zB: Cif).Beenden der Reinigung mit warmem Wasser und trocknen mit einem weichen Tuch.

Limpieza
Para facilitar el mantenimiento y el uso duradero de un lavabo o encimera, limpie la superficie con agua tibia y detergente delicado con un paño suave y húmedo. Siempre enjuague y seque con un paño suave. Para este material, tanto en la versión blanca como en la de color, es mejor usar un desengrasante universal o lejía como detergente, evitando jabones jabonosos. Para manchas difíciles como maquillajes, tintes para el cabello o esmaltes de uñas, recomendamos limpiar de inmediato para evitar secar el producto y reducir la posibilidad de eliminar manchas. No se recomienda el uso de esponjas abrasivas. Se recomienda el uso de esponjas abrasivas. En caso de arañazos o daños en la superficie, el material no se puede restaurar.

Impiegato per la realizzazione di top | Used for the realization of tops | Utilisé pour la réalisation de plans | Verwendet für die Realisierung von gegossenen Waschbecken | Se utiliza para la realización de encimeras

È un materiale costituito da strati di cellulosa impregnati da resine termoidurenti e da una superficie acrilica che viene legata chimicamente tramite l'applicazione di calore a pressione. Hpl Polaris risulta un materiale particolarmente pratico grazie alla spiccata capacità anti impronta e all'estrema opacità. La proprietà più importante di questo materiale è però la resistenza della superficie al calore, alla luce all'acqua e all'umidità data dai pori superficiali completamente chiusi. Per questo motivo molte volte risulta specialmente idoneo al contatto alimentare.

It is a material made up of cellulose layers impregnated with thermosetting resins and an acrylic surface that is chemically bonded by applying pressure heat. Polaris Hpl is a particularly practical material thanks to its antifingerprint characteristic and its extreme opacity. The most important property of this material, however, is the resistance of the surface to heat, light, water and humidity given by completely closed surface pores. For this reason it is often used in food contact environments.

Il s'agit d'un matériau composé de couches de cellulose imprégnées de résines thermodurcissables et d'une surface acrylique chimiquement liée par application d'une chaleur sous pression. Le statifié Hpl Polaris est un matériau particulièrement pratique grâce à sa capacité antiempreintes digitales et son opacité extrême. Cependant, la propriété la plus importante de ce matériau est la résistance de la surface à la chaleur, à la lumière à l'eau et à l'humidité procurée par des pores de surface complètement fermés. Pour cette raison, il est souvent adapté au contact alimentaire.

Hpl Polaris ist ein revolutionäres Produkt, warm mit angenehmer Oberfläche. Mit erstaunlicher Oberflächenmerkmalen, es ist sehr beständig gegen Kratzer und Hitze, auch gegen

Fingerabdrücke. Die besondere Kombination seiner Haltbarkeit und seiner samtigen Oberfläche verleiht Hpl Polaris einen futuristischen Appell; es wird die ideale Wahl für ultramoderne Projekte, die Befriedigung der Sinne mit seinen schönen und einzigartigen Effekten. Hpl Polaris ist ein qualitativ hochwertiges, funktionales und ästhetisches Material: es vergilbt nicht, verhindert Schimmelwachstum, es ist resistent gegen Feuchtigkeit, Wasserdampf, antistatisch, ammhemmend und feuerbeständig; Es eignet sich auch für den Lebensmittelkontakt

Es un material compuesto por capas de celulosa impregnadas con resinas termoendurecibles y una superficie acrílica que se une químicamente mediante la aplicación de calor a presión. Polaris Hpl es un material particularmente práctico gracias a su marcada capacidad antihuellas y su extrema opacidad. La propiedad más importante de este material es la resistencia de la superficie al calor, a la luz, al agua y la humedad dada por los poros de la superficie completamente cerrados. Por esta razón, muchas veces es especialmente adecuado para el contacto con alimentos.

Pulizia
Essendo un materiale compatto e non poroso, è facilmente pulibile con i comuni prodotti di pulizia domestica.

Cleaning
Compact and non-porous, it is easy to clean with common household cleaning products.

I Marmi e i Graniti selezionati offrono la possibilità di inserire in casa materiali naturali con toni abbinabili alle collezioni bagno. Il Marmo bianco di Carrara lascia trasparire un leggero grigio chiaro che si scurisce nelle venature. I marmi: Carrara, Grigio Veneto, Marquinia, Grigio Carnico ed Emperador sono caratterizzati da venature. Sulla superficie dei marmi sono presenti delle porosità. Il Nero Assoluto è un Granito naturale nero, resistente, con un bassissimo assorbimento e una texture uniforme contenente piccoli elementi in avorio.

Marbles and Granites selected offer the opportunity to incorporate natural materials at home with tones matching the bathroom collections. The white Carrara marble reveals a light gray which darkens in the grail. The marbles: Carrara, Grigio Veneto, Marquinia, Grigio Carnico and Emperador are characterized by their veins. Porosity can be seen on the surface of marbles. The Nero Assoluto is a natural black granite, resistant, with very low absorption and a uniform texture containing small items made of ivory.

Marbres et granits sélectionnés offrent la possibilité d'insérer chez soi des matériaux naturels avec des tons correspondants aux collections de salle de bains. Le marbre blanc de Carrare révèle un gris clair qui obscurcit dans le veinage: Le marbre: Carrara, Grigio Veneto, Marquinia, Grigio Carnico et Emperador se caractérisent par leurs veines. Sur la surface des marbres il est possible de percevoir la porosité. Le granit Nero Assoluto noir est un produit naturel, durable, avec une très faible absorption et une texture uniforme contenant de petites parties en ivoire.

Ausgewählte Marmors und Granite bieten, mit den passenden Tönen zu den Badkollektionen die Möglichkeit, natürlichen Materialien zu Hause einzusetzen. Der weiße Carrara-Marmor zeigt einen hellgrauen

Impiegato per la realizzazione dei top integrati e lavabi | Used for the realization of integrated top and washbasins | Utilisé pour la réalisation de plans intégrés et vasques | Wird für die Produktion von integrierten Waschbecken und Waschbecken verwendet | Se utiliza para la realización de la lavabo integrados y lavabos.

Ton, der in der Maserung dunkler wird. Die Marmor: Carrara, Grigio Veneto, Grigio Carnico, Marquinia und Emperador sind durch ihre Maserung gekennzeichnet. Auf der Oberfläche der Marmore ist die Porosität sichtbar. Der Nero Assoluto schwarze Granit ist ein natürliches, langlebiges Produkt, mit einer sehr geringen Absorption und einer einheitlichen Textur, mit kleinen Stücken aus Elfenbein.

Pulizia
Pulire la superficie con acqua e detergenti neutri. I piani vengono trattati con un prodotto specifico (olio/idrorepellente) per migliorare le caratteristiche di resistenza all'assorbimento. È consigliabile trattare il piano con prodotti protettivi almeno una volta all'anno.

Cleaning
Clean the surface with water and mild detergents. The plans are treated with a specific product (oil/water-repellent) to improve the characteristics of resistance to the absorption. It is recommended to treat the top with protective products at least once a year.

Nettoyage
Nettoyer la surface avec de l'eau et des détergents doux. Les plans sont traités avec un produit spécifique (huile/produit hydrofuge) pour améliorer les caractéristiques de résistance à l'absorption. Il est recommandé de traiter le plan avec des produits de protection au moins une fois par année.

Reinigung
Reinigen Sie die Oberfläche mit Wasser und einem milden Reinigungsmittel. Die Platten werden mit einem bestimmten Produkt (Öl/ Dichtmittel) behandelt, um die Eigenschaften der Beständigkeit gegen die Absorption zu verbessern. Es wird empfohlen, die Platte mit Schutzprodukten mindestens einmal im Jahr zu behandeln.

Limpieza
Limpiar la superficie con agua ydetergentes suaves. Las encimeras son tratadas con un producto específico (aceite/sellante) para mejorar las características de resistencia a la absorción. Se recomienda tratar la encimera con productos de protección al menos una vez al año.

Laccato opaco seta | Silky matt lacquer

Impiegato per la realizzazione delle finiture dei mobili | Used for the realisation of furniture Finishes | Utilisé pour la réalisation de la finition des meubles | Verwendet für die Ausführung der Möbel | Se utiliza para la realización de los acabados de los muebles

Pannello di truciolare idrorepellente, laccato con vernici poliuretatiche, antingiallenti con effetto testurizzato opaco a grana fine. La verniciatura avviene tramite resine poliestere, 120 gr/m2 di colore.

Water-repellent chipboard panel, lacquered with polyurethane varnishes, anti-yellowing with matt textured effect with fine grain. Painting takes place using polyester resins, 120 gr/m. of colour.

Panneau aggloméré hydrofuge, laqué avec des vernis polyuréthanes, anti-jaunissement avec effet texturé mat à grain fin. La peinture s'effectue à l'aide de résines polyester,120 g / m2 de couleur.

Polyurethanischer unvergilblicher Lack mit mattem Gewebemuster Effekt. Die Lackierung enthält Polyesterharz 120 gr/m.

Panel de aglomerado repelente al agua, lacado con barnices de poliuretano, antiamarilleo con efecto de textura mate con grano fino. La pintura se realiza con resinas de poliéster,120 gr/m. de color.

Pulizia
Per la pulizia del laccato opaco seta utilizzare un panno asciutto con normali detergenti neutri.

Cleaning
For the cleaning of matt lacquered use a dry cloth with common neutral detergents.

Popreté
Pour le nettoyage de laque mat, utiliser un chiffon sec avec des détergents neutres communs.

Reinigung
Reinigen Sie die matt Lackierte Oberfläche stets mit einem trockenen Tuch und einem milden Reinigungsmittel.

Limpiadura
Para hacer la limpieza de los lacados mate utilice un trapo seco con normal crema limpiadora neutra.

Prefinito | Wood effect

Impiegato per la realizzazione delle finiture dei mobili | Used for the realisation of furniture Finishes | Utilisé pour la réalisation de la finition des meubles | Verwendet für die Ausführung der Möbel | Se utiliza para la realización de los acabados de los muebles

Materiale di agglomerato di legno ecologico per uso ambiente interno, con certificazione E1 per la bassa emissione di formaldeide, nobilitato in superficie con decorativi melaminici che attraverso un processo di pressatura conferiscono un effetto quasi perfettamente identico a quello del vero legno.

Eco-friendly wood agglomerate material for indoor use, with E1 certification for low formaldehyde emission, ennobled on the surface with decorative melamine which through a pressing process gives an effect almost perfectly identical to that of real wood. Matériau d'aggloméré de bois respectueux de l'environnement pour une utilisation en intérieur, avec la certification E1 pour une faible émission de formaldéhyde, anoblí en surface avec de la mélamine décorative qui, grâce à un processus de pressage, donne un effet presque parfaitement identique à celui du vrai bois.

Polyurethanischer unvergilblicher Lack mit mattem Gewebemuster Effekt. Die Lackierung enthält Polyesterharz 120 gr/m.

Material aglomerado de madera ecológico para uso en interiores, con certificación E1 para baja emisión de formaldehído, ennoblecido en la superficie con melamina decorativa que a través de un proceso de prensado produce un efecto casi perfectamente idéntico al de la madera real.

Pulizia
Per la pulizia utilizzare normali prodotti per l'igiene domestica. Si consiglia di evitare l'uso di prodotti spray direttamente sulla superficie che possono lasciare alonature, meglio applicare il detergente su un panno morbido e umido, pulire, quindi risciacquare. Evitare prodotti abrasivi, candeggina o sostanze fortemente clorate, acidi e basi forti.

Cleaning
For cleaning use normal household hygiene products. It is recommended to avoid the use of spray products directly on the surface and which can leave marks, better to apply the detergent on a soft and damp cloth, clean, then rinse. Avoid abrasive products, bleach or highly chlorinated substances, strong acids and bases.

Nettoyage
Pour le nettoyage, utilisez des produits d'hygiène domestique normaux. Il est recommandé d'éviter l'utilisation de produits en spray directement sur la surface et qui peuvent laisser des traces, mieux appliquer le détergent sur un chiffon doux et humide, nettoyer, puis rincer. Évitez les produits abrasifs, l'eau de Javel ou les substances hautement chlorées, les acides et les bases fortes.

Reinigung
Reinigen Sie die glänzende / matt Lackierte Oberfläche stets mit einem trockenen Tuch und einem milden Reinigungsmittel.

Limpieza
Para la limpieza, use productos normales de higiene del hogar. Se recomienda evitar el uso de productos en aerosol directamente sobre la superficie y que puedan dejar marcas, mejor aplicar el detergente sobre un paño suave y húmedo, limpiar y luego enjuagar. Evite productos abrasivos, lejía o sustancias altamente cloradas, ácidos y bases fuertes.

Sistema di rivestimento innovativo, grazie al quale è possibile ottenere superfici continue, realizzare e produrre oggettistica e complementi d'arredo. Ha un ciclo applicativo completamente manuale, testato, collaudato e certificato. Non contiene cemento, calce e resina epossidica e presenta una buona resistenza alle macchie. Le imperfezioni e le imprecisioni estetiche non costituiscono un difetto, ma sono caratteristiche della lavorazione artigianale.

Innovative covering system, thanks to which you can obtain continuous surfaces, create and produce objects and furnishings. It has a completely manual application cycle, tested and certified. It does not contain cement, lime, epoxy resin and has good resistance to stains. The imperfections and aesthetic inaccuracies do not constitute a defect, but a result of artisanal workmanship.

Système de revêtement innovant, grâce à auquel vous pouvez obtenir des surfaces continues, créer et produire des objets et des meubles. L'argile a un cycle d'application entièrement manuel, testé et certifié. Il ne contient pas de ciment, de chaux et de résine époxy et présente une bonne résistance aux taches. Les imperfections et imprécisions esthétiques ne constituent pas un défaut, mais le résultat d'un système de fabrication artisanal.

Ein innovatives Beschichtungssystem,das zusammenhängende Flächen bei der Herstellung von Objekten und Möbeln im Wohnbereich ermöglicht. Das Auftragen der verschiedenen Anwendungen ist komplett manuell und dementspechend gestestet und zertifiziert. Es enthält kein Zement, Kalk und Epoxidharz und ist sehr beständig gegen Flecken. Die Unvollkommenheiten und visuellen Differenzen sind kein Defekt, sondern ein Ergebnis und Einzigartigkeit der handwerklichen Verarbeitung.

Sistema de revestimiento innovador, gracias a la cual se pueden obtener superficies continuas, crear y producir objetos y muebles. Tiene un ciclo de aplicación completamente manual, probado y certificado. No contiene cemento, cal y resina epoxi y tiene buena resistencia a las manchas. Las imperfecciones estéticas y inexactitudes no constituyen un defecto, sino el resultado de una fabricación artesanal.

Pulizia
Per la pulizia quotidiana si consiglia di usare un panno in microfibra con un detergente neutro multiuso che non contenga ammoniac, non usare spugne abrasive o alcool che potrebbero lasciare aloni dovuti al colorante. **Pulizia straordinaria**
I normali prodotti usati in bagno (dentifricio, sapone, bagnoschiuma, etc.) non danneggiano il piano, ma si consiglia di pulire sempre a macchia fresca. Per rimuovere il calcare usare un prodotto specifico o aceto di vino bianco, spruzzare, lasciare agire per qualche secondo e poi rimuovere con una spugna in microbra. Non usare sul piano prodotti acidi (es. acido muriatico) o altamente basici (es. soda caustica), tinta per capelli. Evitare l'uso di diluenti, solventi, alcool, candeggina o ammoniac, se questo dovesse accadere rimuovere subito il prodotto. Acqua e vapore non danneggiano il piano, si consiglia comunque di non lasciare l'acqua stagnare in prossimità delle giunture – tra piano e muro – e di non concentrare per lungo tempo getti di vapore sul piano (es. Vaporella).

Cleaning
For daily cleaning, we recommend using a microfiber cloth with a multi-purpose neutral detergent that does not contain ammonia, do not use abrasive pads or alcohol that may leave marks due to the dye. **Special cleaning**
The normal products used in the bathroom (toothpaste, soap, shower gel, etc.) will not damage the top, but you should always clean stains rapidly. To remove deposits use a specic product or white wine vinegar, spray, leave for a few seconds and then remove with a microber sponge. Do not use acid products on the top (eg. Hydrochloric acid) or highly basic (eg. Caustic soda), hair color. Avoid using thinners, solvents, alcohol, bleach or ammonia, if this were to happen immediately remove the product. Water and steam will not damage the top, it is advisable not to let water stagnate in the vicinity of joints - between floor and wall - and not use for a long time steam jets on the top.

Nettoyage
Pour le nettoyage quotidien, nous vous recommandons d'utiliser un chiffon en microfibres avec un détergent neutre à usages multiples qui ne contient pas d'ammoniaque, ne pas utiliser de tampons

ou d'alcool abrasifs qui peuvent laisser des marques en raison du colorant. **Nettoyage spécial**
Les produits normaux utilisés dans la salle de bain (dentifrice, savon, gel douche, etc.) n'endommagent pas la surface, mais il est recommandé de toujours nettoyer avec une tache fraîche. Pour éliminer le calcaire, utilisez un produit spécifique ou du vinaigre de vin blanc, vaporisez, laissez agir quelques secondes puis retirez avec une éponge dans une microbra. Ne pas utiliser d'acide (p. Ex. Acide muriatique) ou de teinture capillaire très basique (p. Ex. Soude caustique) en surface. Évitez d'utiliser des diluants, des solvants, de l'alcool, de l'eau de Javel ou l'ammoniac, si cela devait arriver retirer immédiatement le produit. L'eau et la vapeur n'endommagent pas la table de cuisson, mais il est recommandé de ne pas laisser l'eau stagner près des joints - entre la table de cuisson et le mur - et de ne pas concentrer les jets de vapeur sur la table de cuisson pendant une longue période (par exemple Vaporella).

Reinigung
Für die tägliche Reinigung, empfehlen wir ein Mikrofasertuch mit einem mehrzweck und neutralem Reinigungsmittel, das kein Ammoniak enthält. Keine Scheuerschwämme oder Alkohol verwenden; diese können eine Bleichung der Farbstoffe zur Folge haben. **Spezielle Reinigung**
Die normalen Produkte, die im Badezimmer verwendet werden (Zahnpasta, Seife, Duschgel usw.) beschädigen die Abstellfläche nicht. Es wird jedoch empfohlen die frischen Verunreinigungen sofort zu entfernen. Um Kalkablagerungen zu entfernen, ein spezifisches Produkt oder weisser Weinessig aufsprühen, ein paar Sekunden wirken lassen und danach mit einem Mikrofaserschwamm reinigen. Um Kalkspuren zu vermeiden, die Wanne sofort nach dem Gebrauch trockenreiben. Keine säurehaltige- oder stark basische Produkte (zB. Ätznatron), sowie Haarfärbemittel auf der Abstellfläche verwenden. Vermeiden Sie die Verwendung von Verdünnern, Lösungsmittel, Alkohol, Bleichmittel oder Ammoniak. Wenn dies vorkommen sollte, sofort das Produkt entfernen und reinigen. Wasser und Dampf beschädigen die Oberflächen nicht. Jedoch ist es ratsam, kein Wasser im Bereich der Fugen und im Wandbereich liegen und trocknen lassen und kein Dampfstrahler für längere Zeit auf die Flächen richten.

Limpieza
Para la limpieza cotidiana, se recomienda utilizar un paño de microfibra con un detergente neutro polivalente que no contiene amoniac, no utilice productos abrasivos o alcohol que puedan dejar marcas debido al tinte. **Limpieza especial**
Los productos normales utilizados en el baño (pasta de dientes, jabón, gel de ducha, etc.) no dañarán la encimera, pero se debe quitar enseguida la mancha fresca. Para eliminar los depósitos de cal utilizar un producto específico o vinagre de vino blanco, rociar, dejar actuar unos segundos y luego qitar con una esponja de microfibra. No utilice productos de ácido en la encimera (por ejemplo el ácido clorhídrico) o altamente básico (por ejemplo la sosa cáustica), el tinte

para cabellos. Evitar el uso de diluyentes, disolventes, alcohol, lejía o amoniaco, si esto sucede inmediatamente quitar el producto. El agua y el vapor no dañarán la encimera, es recomendable no dejar que se estanque el agua en las proximidades de las juntas - entre la encimera y la pared - y no concentrarse durante mucho tiempo con chorros de vapor en la encimera.

Impiegato per la realizzazione della rubinetteria, degli accessori e dei profili doccia | Used for the production of taps and fittings, accessories and shower profiles | Utilisé pour la fabrication de robinetterie, accessoires et profils de douche | Wird für die Herstellung von Armaturen, Zubehör und Dusche-Profile verwendet | Se utiliza para la producción de grifos y accesorios y perfiles de ducha

L'acciaio appartiene alla famiglia dell'acciaio inox, lega a base di ferro e carbonio che si unisce alle proprietà meccaniche tipiche degli acciai al carbonio e si caratterizza per la resistenza alla corrosione. Tale acciaio garantisce il massimo livello di igienicità, eco-compatibilità e durevolezza, in quanto, per le sue caratteristiche intrinseche, è ridotto ai minimi termini il processo di deterioramento.

The steel belongs to the family of stainless steel, alloy based on iron and carbon which joins the typical mechanical properties of carbon steels, and is characterized by the resistance to corrosion. Such a steel provides the highest level of hygiene, eco-compatibility and durability, as, due to its inherent characteristics, the deterioration process is reduced to its minimal expression.

L'acier appartient à la famille de l'acier inoxydable, un alliage à base de fer et de carbone qui allie les propriétés mécaniques typiques des aciers au carbone, et est caractérisé par sa résistance à la corrosion. Un tel acier offre le plus haut niveau d'hygiène, l'éco-compatibilité et la durabilité, en outre, en raison de ses caractéristiques intrinsèques, le processus de détérioration est réduit à sa basse expression.

Der Stahl gehört zur Familie von rostfreiem Stahl, einer Legierung auf Basis von Eisen und Kohlenstoff, die die typischen mechanischen Eigenschaften von Kohlenstoffstählen verbindet, und ist gegen Korrosion beständig. Ein solcher Stahl bietet ein Höchstmaß an Hygiene, Umweltkompatibilität und Haltbarkeit. Aufgrund seiner inhärenten Eigenschaften ist es absolut langlebig.

El acero pertenece a la familia de acero inoxidable, aleación a base de hierro y carbono que se une a las propiedades mecánicas típicas de los aceros al carbono, y se caracteriza por la resistencia

Impiegato per la realizzazione di sgabelli e panche | Used for the construction of easels, stools and benches | Utilisé pour la construction des chevalets, tabourets et bancs | Wird für die Produktion von Esperanto Staffeleien, Hocker, Bänke und Séparée verwendet | Se utiliza para la construcción de caballetes, taburetes y bancos

resistant

Il frassino appartiene alla categoria delle essenze semidure ed ha un'apprezzabile resistenza meccanica. Panche, sgabelli e cavalletti sono realizzati in frassino massiccio tinto olmo.

Ash belongs to the category of semi-hard wood and has an appreciable mechanical strength. Benches, stools and easels are made of elm stained solid ash.

Le frêne appartient à la catégorie des bois semi-dur et a une résistance mécanique appréciable. Bancs, tabourets, chevalets et paravents sont réalisés en frêne massif teinté orme.

Esche gehört zu der Kategorie von den halbharten Hölzern und hat eine nennenswerte Festigkeit. Bänke, Hocker und Staffeleien sind auf Ulme gefärbte massive Esche.

El fresno pertenece a la categoría de las maderas semiduras y con un grado apreciable de resistencia. Bancos, taburetes y caballetes están realizados de frasno masizo teñida olmo.

Pulizia
Per la pulizia utilizzare regolarmente un panno asciutto o leggermente umido.

Cleaning
For regular cleaning use a dry or slightly damp cloth.

Nettoyage
Pour un nettoyage régulier, utilisez un chiffon sec ou légèrement humide.

Reinigung
Für die regelmäßige Reinigung, ein trockenes oder leicht feuchtes Tuch benutzen.

Limpieza
Para la limpieza regular utilizar un paño seco o ligeramente húmedo.

Pulizia
Per la pulizia utilizzare acqua e sapone neutro o detergenti delicati; da evitare candeggina o disinfettanti che la contengano.

Cleaning
Clean with water and mild soap or mild detergent; avoid bleach or disinfectants that contains it.

Nettoyage
Nettoyer à l'aide d'eau et de savon doux ou un détergent doux ; éviter l'eau de Javel ou des désinfectants qui en contiennent.

Reinigung
Reinigen mit Wasser und einer milden Seife oder einem milden Reinigungsmittel; Desinfektionsmittel die Bleichmittel enthalten, sind zu vermeiden.

Limpieza
Limpiar con agua y jabón o detergente suave; evitar el blanqueo o desinfectantes que lo contienen.

Impiegato per la realizzazione della rubinetteria | Used for the production of taps | Utilisé pour la fabrication de robinetterie | Wird für die Herstellung von Armaturen | Se utiliza para la producción de grifos

Questo trattamento si ottiene attraverso un processo esclusivo chiamato Physical Vapor Deposition, la deposizione fisica da vapore. Un procedimento di qualità superiore che crea un sottilissimo film sulla superficie del prodotto. Il Black Luxury è un trattamento che non causa danni all'ambiente o rischi per la salute delle persone. Inoltre, questa speciale finitura aumenta la resistenza superficiale del prodotto, garantendogli una protezione ulteriore dall'azione aggressiva di cloruri e detergenti domestici, esaltandone la lucentezza e la bellezza.

This treatment is obtained through an exclusive process: the Physical Vapor Deposition. A process of superior quality that creates a very thin film on the surface of the prodct. Black Luxury is a treatment that does not cause damafe to the enviroment and is free of risk for human health. Furthermore, this special finish increases the surface resistance of the product, guaranteeing a superior protection from the aggressive action of chlorides and household detergents, enhancing brightness and beauty.

Ce traitement est obtenu grâce à un procédé exclusif: Physical Vapor Deposition. Un processus de qualité supérieure qui crée un film très mince à la surface du produit. Le Black Luxury est un traitement qui ne cause pas de dommages à l'environnement et ne présente aucun risque pour la santé humaine. De plus, cette finition spéciale augmente la résistance de surface du produit, garantissant une protection supérieure contre l'action agressive des chlorures et des détergents ménagers, améliorant la luminosité et la beauté.

Diese Oberflaechebehandlung wird exklusiv durch ein Prozess erreicht, das man Physical Vapor Deposition nennt. Eine Ablagerung von Dampf.Mit diesem qualitativ hochwertigem

Prozess, ergibt sich auf dem Produkt einen hauchduennen Film. Die Black Luxury Behandlung ist sehr umweltfreundlich und hat keine Gesundheitsschaedigende Nebeneffekte. Es verleiht dem Produkt einen zusätzlichen Schutz gegen aggressive Haushaltsmittel.

Este tratamiento se obtiene a través de un proceso exclusivo: Physical Vapor Deposition. Un proceso de calidad superior que crea una película muy delgada en la superficie del producto. Black Luxury es un tratamiento que no causa daños al medio ambiente y está libre de riesgos para la salud humana. Además, este acabado especial aumenta la resistencia superficial del producto, garantizando una protección superior contra la acción agresiva de los cloruros y detergentes domésticos, mejorando el brillo y la belleza.

Pulizia
Per la pulizia quotidiana si consiglia di usare un panno in microfibra con un detergente neutro multiuso che non contenga ammoniac.

Cleaning
For daily cleaning, we recommend using a microfiber cloth with a multi-purpose neutral detergent that does not contain ammonia.

Reinigung
Fuer die regelmaessige Reinigung ein Mikrofasertuch benutzen. Gebrauch nur von neutralen Putzmitteln ohne Amoniak.

Nettoyage
Pour le nettoyage quotidien, nous vous recommandons d'utiliser un chiffon en microfibres avec un détergent neutre à usages multiples qui ne contient pas d'ammoniaque.

Utilizziamo esclusivamente vernici acriliche ad acqua e a basso impatto ambientale, in linea con la filosofia di ecosostenibilità del marchio. Il prodotto da verniciare viene trattato attraverso un procedimento di sabbatura, a cui segue l'applicazione di un primer epossidico e di un doppio strato di verniciatura. La vernice viene ricoperta da un protettivo trasparente opaco e, infine, fatta essicare in forno.

We use only water-based acrylic paints with a low enviromental impact, in line with the philosophy of eco-sustainability of the brand. The product to be painted is treated with a sand-blasting process, followed by the application of an epoxy primer and a double layer of paint. The varnish is then covered with a transparent opaque protective layer and finally dried in the oven.

Nous n'utilisons que des peintures acryliques à base d'eau à faible impact environnemental, conformément à la philosophie d'éco-durabilité de la marque. Le produit à peindre est traité par un procédé de sablage, suivi de l'application d'un primaire époxy et d'une double couche de peinture. Le vernis est ensuite recouvert d'une couche de protection transparente opaque et enfin séché au four.

Die verwendeten lacke sind auf wasserbasis und umweltfreundlich. Das Produkt wird zuerst einer Sandstrahlung unterzogen. Danach wird ein primer aufgetragen und schlussendlich zwei mal lackiert. Nach einer letzten matten Schutzschicht wird es im Ofen gebrannt.

Utilizamos solo pinturas acrílicas a base de agua con un bajo impacto ambiental, en línea con la filosofía de eco-sostenibilidad de la marca. El producto a pintar se trata con un proceso de chorro de arena, seguido de la aplicación de una imprimación epoxi y una doble capa de pintura. Luego se cubre el

barniz con una capa protectora opaca transparente y finalmente se seca en el horno.

Impiegato per la realizzazione di vaschette, basi a giorno e accessori | Used for the production of trays, open units and accessories | Utilisé pour la fabrication de bacs, meuble à jour et accessoires | Wird für die Herstellung von Armaturen, Zubehör und Dusche-Profilen verwendet | Se utiliza para la producción de bandejas, elementos abiertos y accesorios

In base alla finitura che si vuole ottenere la lamiera subisce trattamenti differenti. In entrambi i casi si parte da una base in acciaio. Per la lamiera materica la superficie viene trattata galvanicamente, ovvero viene eseguita un'ossidazione manuale dell'acciaio in grado di conferire particolari effetti cromatici grazie alla formazione di “nuvolature” dalla diverse tonalità. Qualsiasi differenza rispetto al campione in visione è da considerarsi come caratteristica della lavorazione che può essere suscettibile a variazioni di tonalità e omogeneità. La lamiera con verniciatura opaca a polvere invece, si avvale di un sistema elettrostatico in cui l'oggetto passa in un forno di cottura apposito ad una temperatura media di 180°, dove la polvere prima si fonde e poi si polimerizza, ricoprendo l'oggetto di un sottile ma resistente e omogeneo strato di vernice.

Depending on the finish to be obtained, the metal undergoes different treatments. In both cases it starts from a steel base. For the rough metal, the surface is galvanically treated, that is, a manual oxidation of the steel is performed which is able to impart particular chromatic effects thanks to the formation of “clouds” of different shades. Any difference compared to the sample in view is to be considered as a characteristic of the processing that can be susceptible to variations in hue and homogeneity. The metal with matte powder coating instead, uses an electrostatic system in which the object passes into a special cooking oven at an average temperature of 180 °, where the powder first melts and then polymerizes, covering the object of a thin but resistant and homogeneous layer of paint.

Selon la finition à obtenir, le metal subit différents traitements. Dans tous les cas, il part d'une base en acier. Pour le métal brut, la surface est traitée galvaniquement, c'est-à-dire qu'une oxydation manuelle de l'acier est effectuée qui est capable de conférer des

effets chromatiques particuliers grâce à la formation de “nuages” de différentes nuances. Toute différence par rapport à l'échantillon considéré doit être considérée comme une caractéristique du traitement susceptible d'être sensible aux variations de teinte et d'homogénéité. Le metal avec un revêtement en poudre mat utilise à la place un système électrostatique dans lequel l'objet passe dans un four de cuisson spécial à une température moyenne de 180 °, où la poudre fond d'abord, puis polymérise, couvrant l'objet en couche mince mais résistante et homogène de peinture.

Je nach dem was fuer eine Ausfuehrung der Oberflaeche man wuenscht geht man von verschiedenen Arbeitsbehandlungen aus. Das Basismaterial ist jedoch immer Edelstahl. Bei der Oberflaeche Materica (Rofeffekt) wird eine galvanische Behandlung, sprich eine manuelle Oxidierung des Stahls gemacht, das wiederum diese unregelmaessige wolkige Struktur erzeugt. Jedes Element in dieser Ausfuehrung ist einzigartig und ist mit dem Muster nicht identisch in den Strukturen. Hingegen die lackierte weiss/schwarz Version ist eine Pulverbeschichtung und matte Lackierung, die im Ofen eingebrannt wird und so sehr resistent wird.

Dependiendo del acabado a obtener, la lámina metálica se somete a diferentes tratamientos. En cualquier caso parte de una base de acero. Para el metal en bruto, la superficie está tratada galvánicamente, es decir, se realiza una oxidación manual del acero que puede impartir efectos cromáticos particulares gracias a la formación de “nubes” de diferentes tonos. Cualquier diferencia en comparación con la muestra a la vista debe considerarse como una característica del procesamiento que puede ser susceptible a variaciones en el tono y la homogeneidad. La lámina con

recubrimiento de polvo mate, en cambio, utiliza un sistema electrostático en el que el objeto pasa a un horno de cocción especial a una temperatura promedio de 180 °, donde el polvo primero se derrite y luego se polimeriza, cubriendo el objeto en una capa delgada pero resistente y homogénea de pintura

Condizioni di vendita

PREZZI

I prezzi del seguente listino sono espressi in unità di Euro. I prezzi sono al pubblico, IVA esclusa. Qualsiasi altra tassa o costo aggiuntivo, non espressamente indicato nel listino prezzi, deve essere calcolato separatamente. I prezzi non costituiscono offerta e sono suscettibili di variazione senza alcun preavviso. I prezzi s'intendono franco sede REXA DESIGN SRL, salvo diverso patto espresso.

ORDINI

Gli ordini sono accettati con la clausola "salvo approvazione della casa". Gli ordini anticipati telefonicamente devono essere seguiti da conferma scritta; contrariamente REXA DESIGN SRL non si assumerà la responsabilità per eventuali errori di consegna. Gli ordini confermati a REXA DESIGN SRL non possono più essere modificati salvo richiesta scritta e approvazione della venditrice.

TERMINI DI CONSEGNA

I termini di consegna vengono calcolati dal ricevimento della conferma d'ordine e in accordo con il nostro ufficio vendite. La mancata o ritardata consegna, anche se pattuita, o per causa di forza maggiore non costituisce alcun diritto per il cliente a risarcimento danni, annullamento ordine, ritardo nei pagamenti o reso del materiale. Il venditore non ha responsabilità e non può essere fatto carico per ritardi e costi aggiuntivi causati da sdoganamenti, trasporti, tasse e ispezioni. Per gli ordini con resa Franco Fabbrica (EXW), REXA DESIGN SRL si riserva il diritto di addebitare un supplemento giornaliero di magazzinaggio alla merce non ritirata entro 15 giorni dalla data di approntamento prevista.

RESA

Nel territorio Italiano ed Europeo la resa è Franco destino (CPT) salvo diverse condizioni concordate e indicate nella conferma d'ordine / proforma. Per consegne di ordini con importo netto inferiore a € 600,00, viene applicato un contributo forfettario per il trasporto come segue: - Italia e Paesi UE: € 50,00. - Paesi Extra UE: € 150,00 Salvo diversa indicazione in conferma d'ordine/proforma. Nel caso di resa EXW/FCA San Quirino (PN), secondo Incoterms 2010, la merce viaggia sotto la piena responsabilità del compratore. Le consegne richieste con spedizione a mezzo corriere espresso viaggiano in porto assegnato salvo accordi diversi. Non si effettuano consegne a privati.

TOLLERANZA

Tutti gli articoli possono avere una tolleranza del +/- 1% rispetto alla misura ordinata. In caso di completamenti, sostituzioni o riparazioni, eventuali lievi differenze di tonalità non possono in nessun caso costituire oggetto di contestazione.

RECLAMI e RESI

Le contestazioni per danni derivanti dal trasporto devono essere fatte al momento dello scarico; eventuali rotture o ammanchi devono essere avanzati direttamente al vettore e annotati sui documenti di trasporto. La venditrice risponde solo dei difetti di fabbricazione della merce, secondo la legge italiana in vigore, purché vengano segnalati entro 8 giorni dal ricevimento della merce. I resi per difetto di fabbricazione dovranno essere preventivamente autorizzati per iscritto e dovranno pervenirci perfettamente imballati. La sostituzione della merce non significa l'automatica accettazione della contestazione. L'accredito al committente verrà fatto solo dopo la restituzione della merce difettata ed a condizione di effettiva responsabilità da parte della venditrice. Viene declinata ogni responsabilità per errori o anomalie riscontrate nel montaggio di nostri modelli, salvo non siano stati effettuati da nostro personale specializzato.

PAGAMENTI

Non sono validi i pagamenti se non fatti direttamente alla nostra sede nei termini e modi pattuiti. Nessuna spesa bancaria è a carico o per conto di REXA DESIGN SRL. In caso di ritardato pagamento decorreranno gli interessi commerciali nella misura del tasso ufficiale di sconto aumentato di 7 punti (DL 231 del 09/10/02). Il mancato pagamento del corrispettivo delle forniture alla loro scadenza comporta automaticamente la sospensione delle consegne relative agli ordini in corso di evasione. Clausola di riserva di proprietà: la merce rimane di proprietà di REXA DESIGN SRL fino a completo pagamento della fattura di riferimento.

FORO COMPETENTE

Per ogni controversia il foro competente è eletto a Pordenone (PN).

GARANZIA

I prodotti hanno la garanzia di 2 anni dalla data di fatturazione, solo se installati come da istruzioni di REXA DESIGN SRL e se effettuate correttamente le operazioni di manutenzione ed utilizzo riportate nel nostro manuale. REXA DESIGN SRL non potrà essere ritenuta responsabile per il naturale logoramento o per cause imputabili a negligenza o imperizia del compratore. Eventuali vizi del materiale purché tempestivamente contestati, obbligheranno REXA DESIGN SRL soltanto alla loro riparazione, ove possibile o alla loro sostituzione, esclusa ogni richiesta di risarcimento danni cui il committente comunque fin d'ora rinunzia.

Le descrizioni e le caratteristiche tecniche dei prodotti richiamati nel presente listino sono puramente indicativi e non vincolanti. REXA DESIGN SRL si riserva il diritto di modificare, senza alcun preavviso, i materiali e le caratteristiche tecniche dei prodotti per motivi tecnici e/o produttivi. Rinunziata fin d'ora da parte del committente ogni conseguente richiesta risarcitoria. Il presente listino annulla e sostituisce il precedente e potrà essere modificato senza preavviso alcuno in ragione degli aumenti delle materie prime, del costo della manodopera e quant'altro potrà verificarsi in maniera imprevedibile. Per le altre condizioni Generali di Vendita consultare la relativa documentazione commerciale. Si declina ogni responsabilità relativa a eventuali inesattezze contenute su cataloghi, dépliant, nel manuale d'installazione e manutenzione e nel listino prezzi, se dovuti ad errori di stampa o trascrizioni.

PRICES

Prices in the following pricelist are expressed in Euros. Prices indicated are retail prices, excluding VAT. Any other tax or fee, not mentioned in the price list, must be calculated separately. The prices do not constitute an offer and are subject to change without notice. Prices are ex-factory REXA DESIGN SRL, unless otherwise agreed.

ORDERS

Orders are accepted with the proviso "subject to the company approval." Orders anticipated on the phone must be followed by written confirmation; otherwise REXA DESIGN SRL will not accept responsibility for any delivery errors. Orders confirmed by REXA DESIGN SRL cannot be amended except by written request and approval of the seller.

DELIVERY TERMS

The delivery times are calculated from receipt of the order confirmation and in accordance with our sales department. The failure or delay in delivery, even if agreed, or because of force majeure does not constitute any right for the customer to ask for compensation, cancellation, delaying payment or returning goods. The seller has no responsibility and cannot be taken charge for delays and additional costs caused by custom clearance, transportation, taxes and inspections. For orders delivered with ex-works (EXW) conditions, REXA DESIGN SRL reserves the right to charge a daily warehousing fee for orders not collected within 15 days from the production date.

DELIVERY

In the Italian and European territories, delivery is free destination (CPT) unless otherwise agreed and indicated in the order confirmation / proforma. For deliveries of orders where the net total amount is less than € 600.00, a lump sum is applied to transport as follows: - Italy and EU countries: € 50,00. - non-EU countries: € 150,00 Unless otherwise stated in the order confirmation / proforma. In case of EXW / FCA San Quirino (PN), according to Incoterms 2010, the goods travel under the full responsibility of the buyer. Requests for deliveries by courier travel with carriage forward conditions unless otherwise agreed. Deliveries to retail clients are not made.

TOLERANCE

All items can have a tolerance of +/- 1% from the ordered measure. In case of additional order, replacement or repair, any slight differences can under no circumstance be subject to dispute.

CLAIMS and RETURNS

Claims for damage caused by transport must be made when goods are offloaded; any damage or missing item must be communicated directly to the carrier and noted on the transport documents. The seller is only liable for defects in the goods manufacturing, according to Italian law, provided they are reported within eight days of receipt of goods. The returns for manufacturing defect must first be authorized in writing and received perfectly packed. The replacement of the goods does not mean automatic acceptance of the complaint. A credit note to the customer shall be made only after the return of faulty merchandise and after the responsibility of the seller has been confirmed. Responsibility for errors or anomalies encountered in the assembly of our models is declined, unless it has been carried out by our own staff.

PAYMENTS

Are not valid unless made directly to our company in the terms and agreed ways. No bank charges shall be borne by or on behalf of REXA DESIGN SRL. In case of delayed payment, commercial interests at the official discount rate increased by 7 points (DL 231 of 09/10/02) shall be applied. The failure to pay the amount of supplies before it expires, automatically involves the suspension of deliveries in relation to the pending orders. Retention of title clause: The goods remain property of REXA DESIGN SRL until full payment of the relevant invoice.

JURISDICTION

For any dispute the jurisdiction is elected in Pordenone (PN).

WARRANTY

The products have a warranty of 2 years from the date of invoice, if installed according to the instructions of REXA DESIGN SRL and provided the maintenance and use indicated in our manual are respected. REXA DESIGN SRL cannot be held responsible for natural wear or for reasons attributable to the negligence or fault of the buyer.

Any defects of the goods promptly notified, will force REXA DESIGN SRL only to their repair (where possible) or replacement, the buyer renounces as of now to any compensation for damages. The descriptions and the technical characteristics of the products specified in this pricelist are purely indicative and not binding.

PREISE

Alle Preise dieser Preisliste sind in Euro. Brutto Publikumspreise exklusive MwSt. Jegliche Zusatzkosten oder Mehrpreise, die nicht explizit erwähnt werden, sind separat zu berechnen. Die Preise können ohne Vorhersage mittels Offerte variieren. Die Presie verstehen sich franko REXA DESIGN SRL, ausgenommen Abmachungen für spezielle Fälle.

BESTELLUNGEN

Die Bestellungen werden erst nach Überprüfung und Machbarkeit akzeptiert. Mündliche Bestellungen mittels Telefon müssen zwingend schriftlich betstätigt werden; allenfalls REXA DESIGN SRL keine Verantwortung für eventuelle Fehler bei per Lieferung übernimmt. Schriftlich bestätigte Bestellungen können nicht mehr geändert werden, ausser mit schriftlicher Anfrage und Akzeptanz von REXA DESIGN SRL.

LIEFERFRISTEN

Die Lieferzeiten werden nach Erhalt der akzeptierten Auftragsbestätigung, sowie nach Absprache mit unserem Verkaufsbüro ermittelt. Die verspätete oder fehlende Lieferung, auch wenn vereinbart, die auf höhere Gewalt zurückzuführen ist, berechtigt den Kunden nicht auf Schadenersatz, Annulation, Zahlungsverzug, sowie Rückgabe des Materials. Die Verkaufsfirma kann für entstandene Zusatzkosten und Umtriebe im Zusammenhang mit dem Transport, Zollabwicklungen, Steuern und Inspektionen nicht haftbar gemacht werden. Für Aufträge ab Fabrik (EXW) behält sich REXA DESIGN SRL das Recht vor, bei Nichtabholung der bereitgestellten Ware nach Ablauf von 15 Tagen nach Mitteilung der Fertigung, einen täglichen Kostenanteil für die Lagerung zu verrechnen.

LIEFERUNG/FRACHTKOSTEN

In Italien und im Europäischen Raum ist die Lieferung franko Haus (CPT), ausgenommen bei Abweichungen in der Auftragsbestätigung/Proforma. Für Bestellungen unter € 600,00 Netto, betragen die Transportkosten: - Italien und EU Länder UE: € 50,00. - Nicht EU-Länder/ Schweiz: € 150,00 Ausgenommen bei Abweichungen in der Auftragsbestätigung/Proforma. Bei Abholung der Ware im Werk EXW/FCA in San Quirino (PN) vom Kunden, trägt per Käufer die volle Verantwortung für den Transport. Bei Expresslieferungen zahlt der Käufer die Effektiven Kosten der Sendung, ausser anderst vereinbart. Es werden keine Lieferungen direkt an den Privatkunden ausgeführt.

TOLLERANZ

Alle Artikel können eine Abweichung von +/- 1% gegenüber dem Bestellten betragen. Bei späterem Zusatzkauf, Austausch oder Reparaturen, können eventuelle Differenzen von Tonalitäten nicht beanstandet werden.

REKLAMATIONEN UND RÜCKGABE

Reklamationen betreffend Transport müssen sofort bei Entgegennahme der Ware erfolgen; eventuelle Beschädigungen oder Fehlendes sollten direkt dem Transporteur auf den Lieferdokumenten vermerkt werden. Die Verkaufsfirma antwortet nur auf Produktionsfehler, gemäss Ital. Recht, innert 8 Tagen nach Erhalt der Ware. Die Rücknahme der defekten Ware, die auf die Produktion zurückweist, müssen schriftlich autorisiert werden und einwandfrei für den Rücktransport eingepackt werden. Eine Ersatzlieferung heisst nicht automatisch die Akzeptierung der Reklamation. Die Gutschrift wird erst nach Erhalt per defekten Ware und nach den Konditionen der Verkaufsfirma erstellt. Schäden, die auf die Montage zurückzuführen sind, werden nicht akzeptiert, ausser wenn diese durch unser Personal ausgeführt wurden.

ZAHLUNG

Es sind nur Zahlungen ausschliesslich an uns gültig. Sämtliche Bankspesen gehen nicht zu Lasten REXA DESIGN SRL. Bei verspäteter Zahlung werden die kommerziellen Verzugszinsen von 7% verrechnet. (DL 231 vom 09/10/02). Falls eine Zahlung nicht fristgerecht ausgeführt wird, erfolgt automatisch eine Sperrung für eventuelle nächste Lieferungen. Eigentumvorbehalt: Die Ware bleibt im Besitze von REXA DESIGN SRL., bis die entsprechende Rechnung vollständig beglichen wird.

GERICHTSSTAND

Gerichtsstand ist per Sitz der Verkaufsfirma in Podernone (PN).

GARANTIE

Die Produkte haben eine Garntiezeit von 2 Jahren ab Rechnungsdatum, jedoch nur wenn ordnungsgemäss nach Montageanleitung von REXA DESIGN SRL installiert wurde und die Pflege- und Unterhaltsrichtlinien gemäss unserem Handbuch eingehalten wurden. REXA DESIGN SRL ist nicht Verantwortlich für eine natürliche Alterung des Materials und nicht korrekter Handhabung des Käufers. Bei eventuellen Materialfehlern, die sofort gemeldet werden, verpflichtet sich REXA DESIGN SRL an eine Reparatur oder wo notwendig, an eine Ersatzlieferung. Sämtliche daraus entstehenden Kosten und Umtriebe für den Käufer, gehen nicht zu Lasten von REXA DESIGN SRL.

Die technischen Beschriebe der jeweiligen Produkte, die in dieser Preisliste aufgeführt, sind rein indikativ und nicht bindend. REXA DESIGN SRL behält sich vor, ohne Vorankündigung, die Materialien und technischen Eigenschaften zu ändern, zwecks technische Machbarkeit und/oder produktionsbedingt. Diese Preisliste ersetzt und annulliert alle Vorhergehenden und kann jederzeit ohne Vorankündigung geändert werden, falls wegen unvorhergesehene Erhöhung der Rohstoffe oder Kosten der Handarbeit eine Veränderung eintrifft. Es gelten auch die Verkaufsbedingungen, die in jeglichen Verkaufsunterlagen von REXA DESIGN SRL erwähnt werden. Es kann nicht haftbar gemacht werden, falls Fehler oder Ungenauigkeiten in den Katalogen, Dépliant, Preisliste und Montage-/ Pflegeanleitungen auftreten, die auf Schreib- oder Druckfehler zurückzuführen sind.

PRIX

Les prix du présent tarif sont exprimés en euros. Les prix sont des prix publics, hors TVA. Toute autre taxe ou redevance, non mentionné dans la liste des prix, doit être calculée séparément. Les prix ne constituent pas une offre et sont sujets à changement sans préavis. Les prix sont départ-usine REXA DESIGN SRL, sauf autre accord.

COMMANDES

Les commandes sont acceptées « sous réserve de l'approbation de l'usine ». Les commandes anticipées verbalement au téléphone doivent être suivies par une confirmation écrite, faute de quoi REXA DESIGN SRL décline toute responsabilité en cas d'erreur de livraison. Les commandes confirmées à REXA DESIGN SRL ne peuvent être modifiées que sur demande écrite et avec l'approbation du vendeur.

DELAIS DE LIVRAISON

Les délais de livraison sont calculés à partir de la réception de la confirmation de commande et en accord avec notre service commercial. Tout retard ou décalage de la livraison, même si approuvé, ou pour cause de force majeure, ne constitue pas pour le client à un droit de dédommagement, annulation, retard de paiement ou retour de la marchandise. Le vendeur n'a aucune responsabilité et ne peut prendre en charge des frais supplémentaires occasionnés par des retards, le dédouanement, le transport, les taxes et les inspections. Pour les commandes avec condition de livraison départ usine (EXW), REXA DESIGN SRL se réserve le droit de facturer des frais de stockage quotidiens pour les marchandises non enlevées dans les 15 jours qui suivent la date de fabrication.

LIVRAISON

Sur le territoire italien et européen, la livraison est franco destination (CPT), sauf autre accord indiqué dans la confirmation de commande / proforma. Pour les livraisons de commandes d'un montant total net inférieur à 600,00 €, une contribution pour le transport est appliquée selon le schéma suivant: - Italie et autres pays de l'UE: € 50,00. - Pays hors-UE: € 150,00 Sauf indication différente dans la confirmation de commande / proforma. En cas de livraison EXW / FCA San Quirino (PN), selon Incoterms 2010, les marchandises voyagent sous l'entière responsabilité de l'acheteur. Les demandes de livraison par courrier express voyagent avec condition port du, sauf accord différent. Les livraisons aux clients particuliers ne sont pas effectuées.

TOLÉRANCE

Tous les articles peuvent avoir une tolérance de +/- 1% par rapport à la mesure commandée. En cas de compléments, remplacements ou réparations, les légères variations ne peuvent en aucun cas faire l'objet d'un litige.

SAV et RETOURS

Les réclamations pour les dommages causés par le transport doivent être effectuées au moment du déchargement; tout dégât ou marchandise manquante doivent être directement déclarés au transporteur et reportés sur les documents de transport. Le vendeur est responsable pour les défauts dans la fabrication des produits, conformément à la loi italienne, à condition qu'ils soient signalés dans les huit jours qui suivent la réception de la marchandise. Les restitutions pour défaut de fabrication doivent être préalablement autorisées par écrit et doivent nous parvenir parfaitement emballés. Le remplacement des marchandises ne signifie pas l'acceptation automatique de la réclamation. La note de crédit est effectuée après le retour de la marchandise défectueuse et une fois que la responsabilité du vendeur a été reconnue. Nous déclinons toute responsabilité pour les erreurs ou anomalies rencontrées lors de l'assemblage de nos produits, à moins que le montage n'ait été effectué par notre personnel spécialisé.

PAIEMENTS

Seuls les paiements effectués directement à notre société aux conditions et modalités convenues sont valables. Aucuns frais bancaires sont à la charge ou au nom de REXA DESIGN SRL. En cas de retard de paiement, des intérêts commerciaux au taux d'escompte officiel augmenté de 7 points (DL 231 de 09/10/02) seront appliqués. Le défaut de paiement du montant des fournitures à échéance entraîne automatiquement la suspension des livraisons des commandes en cours. Clause de propriété: Les marchandises restent la propriété de REXA DESIGN SRL jusqu'au paiement intégral de la facture.

JURIDICITION

Pour tout litige, la juridiction est éeue à Pordenone (PN).

GARANTIE

Les produits ont une garantie de 2 ans à compter de la date de la facture, si elle est installée conformément aux instructions REXA DESIGN SRL et si l'entretien et l'utilisation indiqué dans notre manuel sont faits correctement. REXA DESIGN SRL ne peut être tenue responsable de l'usure naturelle ou pour des raisons imputables à la négligence ou faute de l'acheteur.

Les défauts du matériel fourni, si contesté rapidement, obligeront REXA DESIGN SRL uniquement à leur réparation (si possible) ou à son remplacement, l'acheteur renonçant dès à présent à toute demande de dommages et intérêts. Les descriptions et les caractéristiques techniques des produits mentionnés dans cette liste sont à titre purement indicatif et non contraignant.

PRECIOS

Los precios en la siguiente lista de precios se expresan en Euros. Los precios son al público, IVA excluido. Cualquier otro impuesto o tasa, no mencionados en la lista de precios, deben calcularse por separado. Los precios no constituyen una oferta y están sujetos a cambios sin previo aviso. Los precios se entienden franco fábrica Rexa Design SRL, a menos de un acuerdo distinto.

PEDIDOS

Los pedidos son aceptados con la condición de “sujeto a la aprobación de la empresa.” Los pedidos anticipados por teléfono deben ser confirmados por escrito; en caso contrario, Rexa Design SRL no aceptará responsabilidad alguna por errores de entrega. Los pedidos confirmados en Rexa Design Srl no se pueden cambiar, salvo por solicitud escrita y con la aprobación del vendedor.

CONDICIONES DE ENTREGA

Los plazos de entrega se calculan a partir de la recepción de la confirmación del pedido y de acuerdo con nuestro departamento de ventas. El incumplimiento o demora en la entrega, aunque acordada, o debido a fuerza mayor no constituye ningún derecho para el cliente a compensacion, cancelación, retraso en el pago o devolución de mercancías. El vendedor no tiene ninguna responsabilidad y no puede hacerse cargo de los retrasos y costes adicionales causados por el despacho de aduanas, transporte, impuestos e inspecciones. Para los pedidos entregados franco fábrica (EXW), Rexa Design SRL se reserva el derecho a cobrar una tarifa diaria de almacenamiento por productos no recogidos dentro de los 15 días siguientes a la fecha de produccion.

ENTREGA

En el territorio italiano y europeo, la condicion de entrega es franco destino (CPT) salvo que se acuerde otras condiciones y que se indique en la confirmación de pedido / proforma. Para las entregas de pedidos en los que el total neto es menos de € 600,00, se aplica un importe fijo para el transporte de la siguiente manera:
- Italia y países de la UE: € 50,00.
- países fuera de la UE: € 150,00
Salvo que se indique lo contrario en la confirmación de pedido / proforma.
En el caso de EXW / FCA San Quirino (PN), de acuerdo con los Incoterms 2010, las mercancías viajan bajo la plena responsabilidad del comprador.
Las entregas por servicio de mensajería viajan con porte debido a menos que se acuerde otra cosa. No se hacen entregas a los clientes particulares.

TOLERANCIA

Todos los artículos pueden tener una tolerancia de +/- 1% de la medida pedida. En caso de complementos, replazos o reparaciones, las pequeñas diferencias no pueden en ningún caso ser objeto de controversia.

QUEJAS y DEVOLUCIONES

Las quejas de los daños causados por el transporte deben hacerse en el momento de la descarga; cualquier rotura o mercancía mancante tienen que ser avanzada directamente al transportista y registradas en los documentos de transporte. El vendedor sólo es responsable de los defectos en la fabricación, de acuerdo con la ley italiana, siempre que se reportan dentro de los ocho días siguientes a la recepción de la mercancía. Las devoluciones por defecto de fabricación deben ser autorizadas por escrito y deben ser recibidas perfectamente embaladas. La sustitución de la mercancía no significa la aceptación automática de la queja. El acreditado al cliente deberá hacerse sólo después de la devolución de la mercancía defectuosa y a condición que la responsabilidad sea reconocida por parte del vendedor. Se declina toda responsabilidad por los errores o anomalías encontradas en el montaje de nuestros productos, a menos que no hayan sido montados por de nuestro personal especializado.

PAGOS

No son válidos los pagos si no han sido hechos directamente a nuestra oficina en los términos y formas acordados. Ningunos gastos bancarios serán a cargo o en nombre de Rexa Design SRL. En caso de retraso en el pago, se aplicarán los intereses comerciales en la tasa de descuento oficial aumentados de 7 puntos (DL 231 del 10.09.02). La falta de pago de la cantidad de suministros dentro de la fecha de vencimiento, implica automáticamente la suspensión de las entregas en relación con los pedidos pendientes. Cláusula de reserva de propiedad: la mercancía es propiedad intelectual de Rexa Design Srl hasta el pago total de la factura correspondiente.

JURIDICCION

Para cualquier controversia la jurisdicción es elegida en Pordenone (PN).

GARANTÍA

Los productos tienen una garantía de 2 años a partir de la fecha de facturación, si se instala de acuerdo con las instrucciones Rexa Design Srl y si se hace correctamente el mantenimiento y el uso que se da en nuestro manual.

Rexa Design Srl no se hace responsable por el desgaste natural o por causas atribuibles a la negligencia o culpa del comprador. Cualquier defecto del material proporcionado y notificado con prontitud, obligán a Rexa Design SRL sólo a su reparación, siempre que sea posible o a su replazo; el comprador todavía renuncia a partir de ahora a cualquier compensacion por daños y perjuicios. Las descripciones y las características técnicas de los productos mencionados en esta lista de precios son meramente indicativos y no vinculantes.
