

QUANDO LAVORIAMO
CI PIACE CERCARE
L'ISPIRAZIONE
NELLE COSE
CHE CI CIRCONDANO:
I NOSTRI PRODOTTI
RACCONTANO
QUELLO CHE SIAMO
E QUELLO A CUI DIAMO
VALORE.

Scegliere di lavorare immersi
nella natura, in ambienti
di lavoro sereni e piacevoli.
Rexa Design è il luogo ideale
dove condividere idee
e collaborare alla realizzazione
di progetti nuovi e accurati;
in cui tutti, secondo le proprie
inclinazioni e competenze,
contribuiscono a diffondere
e applicare quella cultura
del fare che è alla base del modo
di lavorare dell'azienda.
Decidere di progettare e realizzare
arredo bagno di design, utilizzando
materiali tecnici con un approccio
responsabile ed ecosostenibile.
L'impianto fotovoltaico di 1.300 m²
produce ogni anno 206.000 Kwh
coprendo l'intero fabbisogno:
dalla produzione all'illuminazione
e climatizzazione. Circa 9.000 m²
dove trovano posto gli uffici,
il magazzino, la sala prototipi,
la produzione, lo showroom
e l'area dedicata alle spedizioni.

We have chosen to work
surrounded by the nature,
in calm and pleasant settings.
Rexa is the ideal location where
to share ideas and collaborate
together for the realization
of new and accurate projects,
where everybody, following their
own aptitude and competence,
contribute to spread and apply
the culture of doing that is our
way to work. We decide to project
and to realize design bathroom
furniture, using technical materials
with a responsible and eco-friendly
approach. The photovoltaic
system of 1.300 m² produces
206.000 Kwh every year,
covering the whole requirement:
from the manufacturing to the
enlightenment and air-conditioning.
About 9.000 m² where offices,
warehouse, prototype area,
production area, showroom
and dispatch area have placed.

Nous avons choisi de travailler
entourés par la nature, dans
des lieux de travail sereins
et agréables. Rexa est l'endroit
idéal pour partager des idées
et collaborer ensemble pour
la réalisation de nouveaux projets,
dans lequel chacun, en fonction
de leurs goûts et compétences,
peut contribuer à la diffusion
et appliquer la culture de l'action
qui est la base de la méthode
de travail de l'entreprise.
Conception et création de mobilier
design de salle de bains, en
utilisant des matériaux techniques
avec une approche responsable
et respectueux de l'environnement.
La centrale photovoltaïque
de 1.300 m² produit annuellement
206.000 kWh couvrant tous
les besoins: de la production
à l'éclairage et de la climatisation.
Environ 9.000 m² où les bureaux,
l'entrepôt, la zone de prototype,
la zone de production, d'exposition
et la zone d'expédition ont placé.

In der Natur, in ein heiteres
und angenehmes Arbeitsklima
arbeiten ...das ist unsere Wahl.
Rexa – der Idealort wo Ideen
mitgeteilt werden und wo man
zusammen an neuen Entwürfe
mitarbeitet; wo alle, nach eigenen
Geneigtheiten und Kennerschaften,
zusammenarbeiten um die Kultur
des Machen zu verbreiten und
anzuwenden, das ist die Grundlage
der Arbeitsweise der Firma.
Design Badezimmer entwerfen
und verwirklichen, mit
umweltfreundliches technisches
Material. Die 1.300 m²
Fotovoltaikanlage generiert
206.000 kWh, es deckt den
Gesamtbedarf: die Ausleuchtung
und Klimanalage. Büros, Lager,
Prototypraum, Herstellung,
Ausstellung und Abfertigungsstelle
sind auf 9.000 m² verteilt.

Elegir de trabajar inmersos
en la naturaleza, en ambientes
de trabajo serenos y agradables.
Rexa es el lugar ideal donde
compartir ideas y colaborar
a la realización de proyectos
nuevos y esmerados; donde todos,
segundo sus predisposiciones
y competencias, colaboran
a difundir y aplicar la cultura del
hacer que està a la base de la
manera de trabajar en la empresa.
Proyectar y realizar mobiliario
por cuarto de baño de design,
utilizando materiales tecnicos
en una manera responsable y
eco-sostenible. La instalación de
fotovoltaico de 1.300 m² produce
cada año 206.000 Kwq cubriendo
todas las necesidades: desde
la producción hasta la iluminación
y climatización. Casi 9.000 m²
donde hay oficinas, almacen,
sala prototipicos, producción,
showroom y expedición.

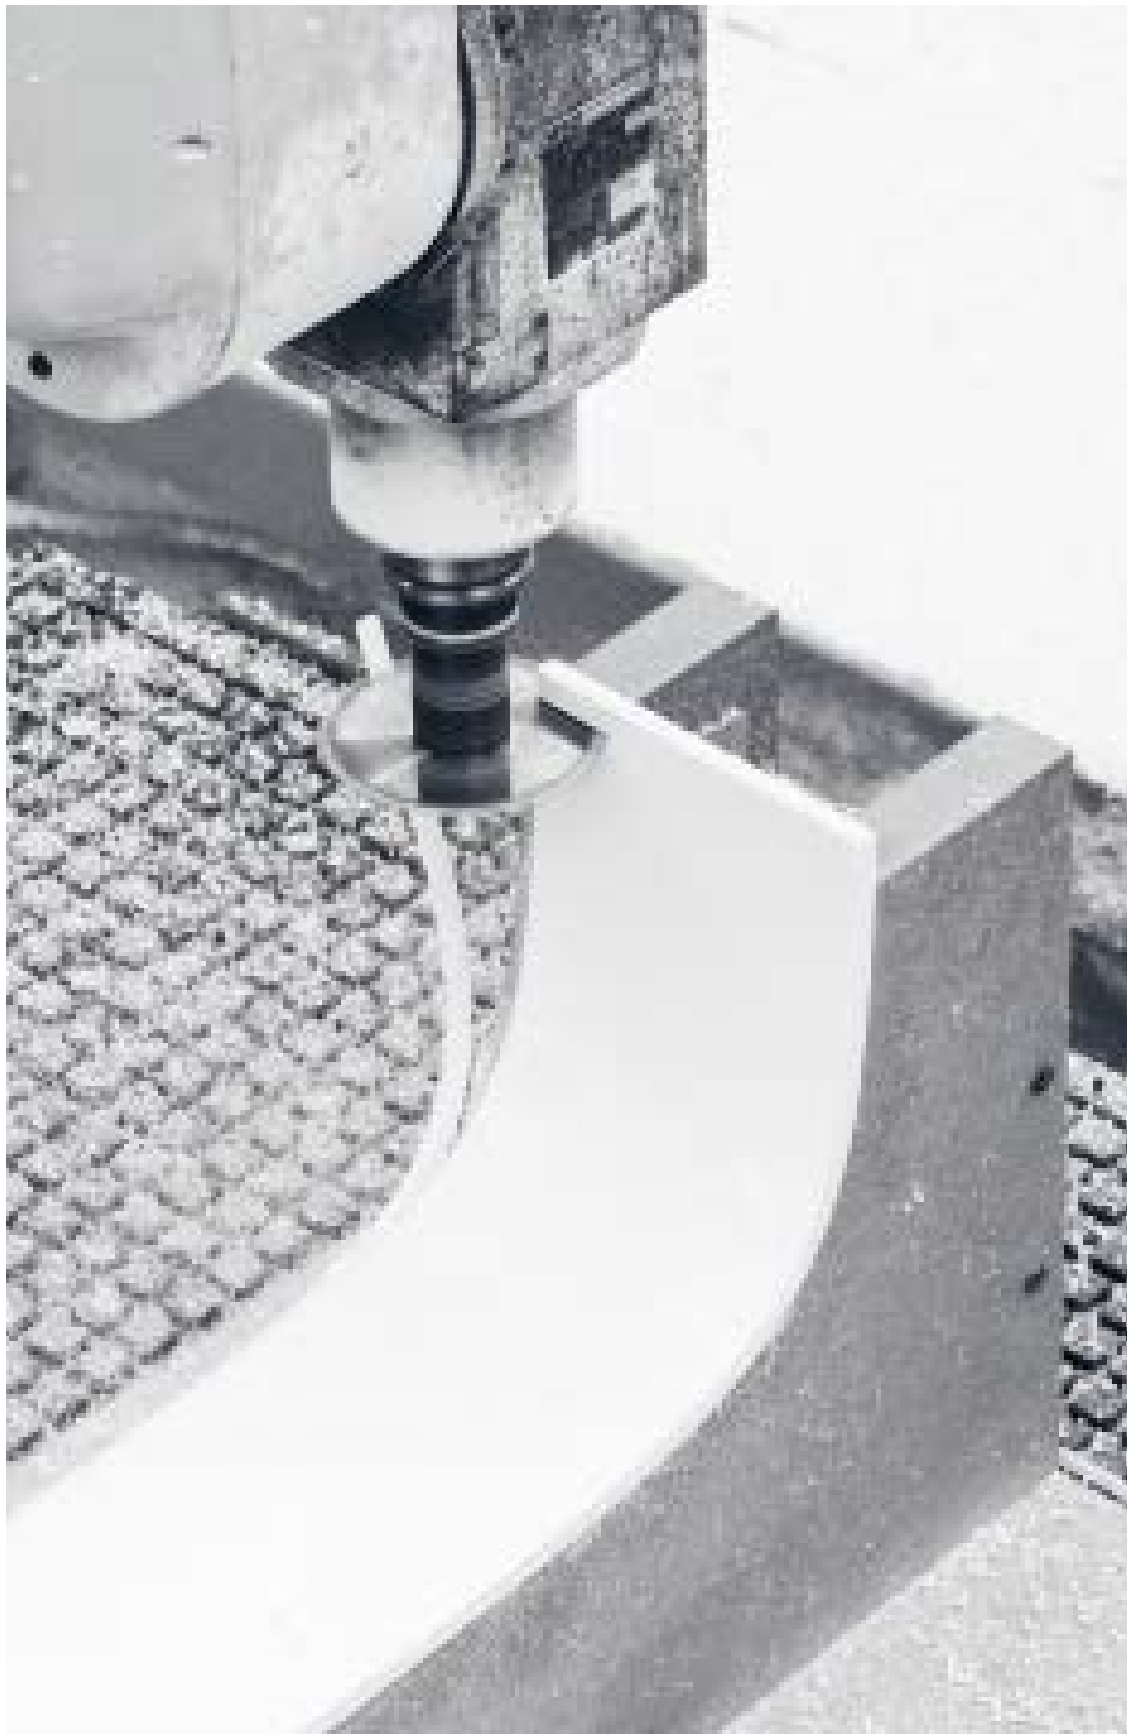

METTIAMO PASSIONE
NELLE COSE CHE FACCIAMO
E NIENTE È LASCIATO
AL CASO: DEDICHIAMO
ATTENZIONE ALLA SCELTA
DEI MATERIALI E ALLA CURA
DEI DETTAGLI, PERCHÉ
TUTTO CONTRIBUISCE
A CREARE UN PRODOTTO
DI QUALITÀ.

La profonda conoscenza dei materiali e l'esperienza maturata nel corso degli anni consente di applicare nuove tecnologie all'ambiente bagno, declinando idee e soluzioni tecniche in progetti di design, completi e aperti alla personalizzazione. Intraprendere un percorso fatto di confronti, incontri con professionisti e condivisioni di competenze, ha permesso di superare tutti i limiti e di aprirsi ad altre proposte, offrendo la possibilità di modificare dimensioni, proporzioni, forme e composizioni, per interpretare progetti ed esigenze personali.

We do what we make with passion and we do not leave anything to chance: we give attention to the choice of raw materials and to details, because everything contributes to make top quality products. Thanks to materials know how and experience gained through years, new technologies can be applied to the bathroom area, generating a wide range of ideas and technical solutions for the design projects, complete and open to customisation. An Artisan approach to the project allows combining the prestige provided by manual processing with an innovative industrial production system, in which dimensions, proportions, shape and composition can be modified, or different elements can be joint to create new projects for personal needs.

Nous aimons mettre de la passion dans notre travail et rien n'est laissé au hasard : nous consacrons notre attention au choix des matériaux et au soin du détail, pour créer un produit de qualité. La profonde connaissance des matériaux et les années d'expérience permettent d'appliquer des nouvelles technologies dans la salle de bain, en générant de nouvelles idées et solutions techniques du design, pour des projets faciles à personnaliser. Une approche artisanale et flexible du concept, permet l'intégration du prestige des finitions manuelles à un système de production industriel innovant, développant les possibilités de personnalisation des dimensions, formes et compositions en permettant l'union des éléments dans des nouvelles figures, capables d'interpréter chaque projet et exigences personnelles.

Wir investieren viel Leidenschaft in was wir tun und nichts wird dem Zufall überlassen: wir bestimmen mit Aufmerksamkeit die Wahl der Materialien und pflegen die Details, damit ein Qualitätsprodukt entsteht. Dank unserer langjährigen Erfahrung und tiefen Kenntnissen der Materialien, erlaubt es uns, neue Technologien im Bad einzusetzen und mit Erfahrungswerte entstehen Ideen und technische Lösungen für unsere Designprojekte, die

komplett und personalisiert sind. Das handwerkliche und flexible Angehen an ein Projekt, erlaubt es uns nebst der industriellen und innovativen Produktion auch die Handarbeit zu integrieren und damit die Möglichkeit haben, Masse, Formen und Proportionen zu ändern und somit im Zusammenfügen dieser neuen Elemente ein Projekt ganz nach den Kundenwünschen auf Maß zu realisieren.

Ponemos pasión en lo que hacemos y nada se deja al azar: dedicamos atención a la elección de los materiales y la atención al detalle, porque todo contribuye a crear un producto de calidad. El profundo conocimiento de los materiales y la experiencia adquirida a lo largo de los años, permite aplicar nuevas tecnologías al baño, generando nuevas ideas y soluciones técnicas de diseño, para proyectos abiertos a la personalización. Un enfoque artesanal y flexible del proyecto permite la integración del prestigio de los procesos manuales a un sistema de producción industrial innovador, desarrollando la capacidad de cambiar el tamaño, proporciones, forma y composición, y permitiendo la unión de los elementos en las nuevas formas, capaz de interpretar proyectos y exigencias personales.

Approccio artigianale

Un approccio artigianale al progetto permette di integrare il prestigio delle lavorazioni manuali ad un sistema produttivo industriale innovativo.

Artisan approach

An artisan approach to the project allows combining the prestige provided by manual processing with an innovative industrial production system.

Approche artisanale

Une approche artisanale au projet permet l'intégration du prestige des finitions manuelles à un système de production industriel innovant.

Handarbeit

Das handwerkliche und flexible Angehen an ein Projekt, erlaubt es uns nebst der industriellen und innovativen Produktion auch die Handarbeit zu integrieren.

Enfoque artesanal

Un enfoque artesanal al proyecto permite la integración del prestigio de los procesos manuales a un sistema de producción industrial innovador.

Modello presente a catalogo

Le collezioni sono complete di tutti gli elementi utili per la stanza da bagno, intercambiabili grazie alla possibilità di scegliere e coordinare materiali, colori e finiture.

Model shown in the catalogue

Collections are complete with all useful items for the bathroom area, interchangeable thanks to the possibility of selecting and coordinating materials, colors and finishes.

Modèle présent au catalogue

Les collections sont complètes de tous les éléments nécessaires pour la salle de bain, interchangeables grâce à la possibilité de choisir et de coordonner les matériaux, les coloris et les finitions.

Model im Katalog zu sehen

Die Kollektionen sind komplett mit allen nützlichen Utensilien fürs Badezimmer, austauschbar Dank der Wahl und Koordination der Materialien, Farben und Oberflächen.

Modelo presente en el catálogo

Las colecciones están equipadas con todos los elementos del baño, intercambiables con la capacidad de elegir y coordinar materiales, colores y acabados.

Personalizzazione su modello esistente

La produzione integrale interna dei prodotti permette la massima personalizzazione degli elementi lineari mentre per quelli caratterizzati da linee curve è possibile creare delle sagome ad hoc.

Existing models can be customised

The in-house manufacturing process allows us to fully customize linear elements and create tailor-made shapes for items featuring curvy lines.

Personnalisation sur un modèle existant

Le processus de fabrication interne des produits nous permet de personnaliser entièrement les éléments linéaires et de créer des formes sur mesure pour les articles aux formes courbes en créant des gabarits spécifiques.

Anpassung des bestehenden Modells

Die hausinterne Produktion der Produkte erlaubt die maximale Anpassung und Personalisierung von allen linearen Produkten, während die runden Elemente mittels neu erstellten Druckformen erstellt werden können.

Personalización del modelo existente

La producción integral interna de los productos permite la máxima personalización de elementos lineales mientras para aquellos caracterizados por líneas curvas se pueden crear moldes ad hoc.

Modello realizzato su disegno del cliente

Creare composizioni, incollare elementi diversi e comporre nuove figure permette ad architetti e designer di non avere limitazioni nella configurazione degli spazi.

Model made upon customer's drawing

Creating new combinations and shapes and gluing different elements enables architects and designers to go beyond limits when configuring new spaces.

Modèle réalisé sur dessin du client

La création de nouvelles combinaisons, de formes et le collage des éléments différents permet aux architectes et designer de ne pas avoir de limitations lors de la configuration de nouveaux espaces.

Auf Kundenzeichnung hergestelltes Modell

Schaffen von Kombinationen, verschiedene Elemente zusammenführen und neue Figuren kreieren, erlauben dem Architekten und Designer ohne Einschränkungen neue Räume zu realisieren.

Modelo realizado sobre diseño del cliente

Crear composiciones, pegando distintos elementos y componer nuevas formas permite a los arquitectos y diseñadores de no tener limitaciones en la configuración del espacio.

Esempio di top con cassetti,
modificato per le singole esigenze.
La realizzazione su misura
ha una bassa incidenza economica
rispetto agli elementi di serie,
i tempi di consegna non variano
rispetto a quelli standard.

Example of top with drawers,
customized for every single need.
The customization has a low
economic impact compared to
the standard units, the delivery
lead time does not change from
the standard lead times.

Exemple de plan avec tiroirs,
modifié pour les besoins individuels.
La réalisation sur mesure
a un impact économique faible
par rapport aux éléments standard,
les délais de livraison ne sont
pas différents de ceux standards.

Beispiel von einem Waschtisch
mit Schubladen, für individuelle
Bedürfnisse angepasst.
Die Sonderanfertigung hat eine
geringe finanzielle Auswirkung als
die Standard-Elemente, und auch
die Lieferzeit verlängert sich nicht.

Ejemplo de encimera con
cajones, personalizado para
las necesidades personales.
La realización sobre medida
tiene un impacto económico bajo
respecto a las unidades de medida
estándar, los plazos de entrega
no varían de los habituales.

Realizzazioni sartoriali
che si adattano alle esigenze
del singolo individuo rientrano
nel normale standard operativo.

Sartorial realizations able to fit the
needs of each individual are part
of the normal operating standard.

Créations personnalisées
qui correspondent aux besoins
de chaque individu et qui
rentrent dans les normes
du fonctionnement opératif.

Individuelle Kreationen,
die sich auf die Bedürfnisse jedes
Einzelnen anpassen sind Teil
des normalen Betriebsstandards.

Como un traje hecho a
medida para que se adapte
a las necesidades de cada
persona son los estándares
normales de operación.

Top con lavabo integrato

Integrated washbasin top

I top con lavabo integrato in Corian® sono opachi e setosi al tatto e vengono realizzati a mano partendo dalla lastra. Questa particolare lavorazione consente di poter modificare tutte le dimensioni e angoli rispetto alle versioni standard, senza che i tempi di consegna subiscano delle variazioni. Sono disponibili sei tipologie di lavabo – Rettangolare, Scivolo e D_taglio – create artigianalmente e quindi con misure totalmente modificabili. Solo il lavabo Termoformato viene realizzato scaldando e pressando la lastra di Corian®, per cui non è possibile modificarne le dimensioni ma solo la sua posizione all'interno del top. I lavabi Stampati hanno le stesse peculiarità del Termoformato.

I top con lavabo integrato in Korakril™ sono opachi e setosi al tatto e vengono realizzati per colatura dentro degli appositi stampi. Questa particolare lavorazione consente di modificare limitatamente le dimensioni del top. Sono disponibili sette tipologie di lavabo in diverse misure; non si possono apportare modifiche dimensionali oltre a quelle proposte a catalogo.

I top con lavabo integrato in Korakril™ Stone, ripropongono l'effetto pietra fiammata e spazzolata, vengono realizzati per colatura dentro degli appositi stampi. Questo processo consente di poter modificare limitatamente le dimensioni del top. Sono disponibili due tipologie di lavabo in varie misure; non si possono apportare modifiche dimensionali oltre a quelle inserite a catalogo.

I top con lavabo integrato in Gelcoat sono lucidi come la ceramica oppure opachi e setosi al tatto come il Corian® e il Korakril™. Vengono realizzati per colatura dentro degli appositi calchi. Il Gelcoat – vernice densa con spessore oltre 1 mm – è lo strato di finitura esterna che viene applicata sullo stampo prima della colatura, rimanendo poi fissato al top una volta che lo stampo viene aperto. Questo processo permette di poter modificare solo limitatamente le dimensioni del piano. Sono disponibili sette tipologie di lavabo, in diverse misure; non si possono apportare modifiche dimensionali oltre a quelle proposte a catalogo.

I top con lavabo integrato in marmo sono disponibili con superficie lucida oppure opaca, come specificato sul listino. Sono disponibili tre tipologie di lavabo, tutti realizzabili su misura.

I top con lavabo integrato in Ecomalta sono disponibili solo con spessore 12 cm; il lavabo, diversamente dal top, non è realizzabile su misura. Il top in multistrato e il lavabo in acciaio vengono assemblati e ricoperti con Ecomalta addizionata di polvere di quarzo, che ne garantisce l'impermeabilità.

I top in vetro retro laccato, lucidi o satinati, vengono realizzati su stampo che viene poi laccato sul retro con apposita vernice. Il lavabo è disponibile in sei colori e, diversamente dal top, non è realizzabile su misura ma può essere posizionato a piacere all'interno del piano.

Integrate washbasins in Corian® are matt and soft to the touch, they are handmade starting from the Corian® sheet, this manufacturing system allow us to modify measures and corners without extending delivery terms. There are several dimensions and type available: Rettangolare (rectangular), Scivolo (with slope) and D_taglio, they are all handmade and completely modifiable. Thermoformed once are realized by heating and pressing Corian® sheets, so the shape of the basin is not modifiable, meanwhile its position can be changed. Moulded washbasins have the same characteristics of thermoformed.

Integrated washbasins made in Korakril™ are matt and soft to the touch, they are realized by dripping the material into moulds. This particular manufacturing doesn't allow dimensions modify then those proposed in the catalogue. There are seven type of integrated washbasin available.

The integrated washbasins in Korakril™ stone give to the top a stone effect, they are realize by dripping the material into moulds. This manufacturing doesn't allow dimensions modify then those proposed in the catalogue. There are two type of integrated washbasin available.

The integrated washbasins made in Gelcoat can be glossy like ceramic or matt like Corian® or Korakril™. They are realized by dripping into moulds, Gelcoat is the external coating, a dense and thick varnish (over then 1 mm) which is apply in the mould before dripping. This particular manufacturing doesn't allow dimensions modify then those proposed in the catalogue, there are seven type of washbasins.

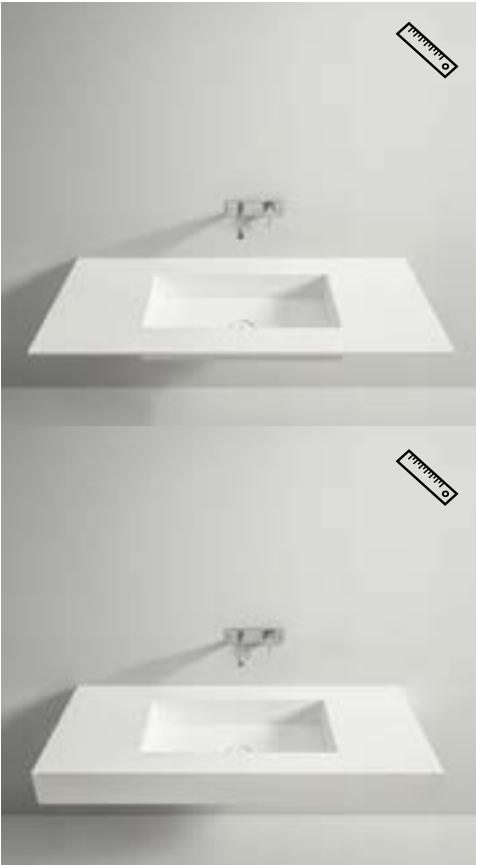

The integrated washbasins in marble are available with glossy or matt Finishes as it is specify into the price list. There are three customizable type of basins available.

The integrated top, made in Ecomalta are available only with 12 cm thickness, the basin can't be modify and meanwhile the top can be. The top, realized in multiply wood, and the basin, realized in stainless steel are assembled and coated with Ecomalta and quartz powder to guarantee waterpfroof.

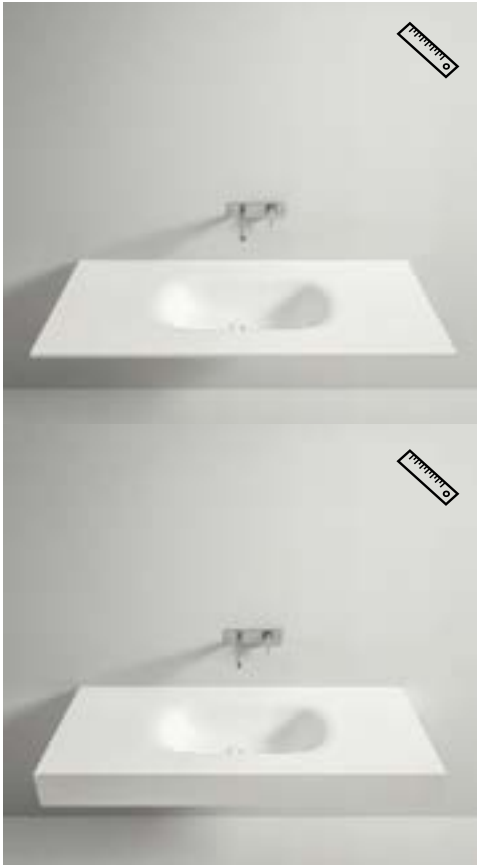

The integrated washbasin made in glass, with lacquered back side, are available both glossy and matt. They are realized with a mould and lacquered on the back with a special varnish. The integrated basins are available in six colours. The dimensions of the top can be modify, for what concern the integrated basin, its shape and dimensions are not modifiable, meanwhile its position can be changed.

Vasche

Bathtubs

Le vasche da bagno in Corian® – primo Solid Surface al mondo, presente sul mercato da oltre 50 anni – sono opache e setose al tatto. Vengono realizzate a mano partendo dalla lastra; questa lavorazione permette di poter modificare misure e angoli rispetto alla versione standard senza che i tempi di consegna subiscano delle variazioni. I modelli di grandi dimensioni, nel caso in cui ci siano delle difficoltà di accesso in abitazione, possono essere realizzati in più segmenti che vengono saldati in loco dai tecnici di Rexa Design. Le vasche possono essere opzionate di impianti airpool, idromassaggio e cromoterapia.

Le vasche da bagno in Korakril™ e Korakril™ Blend – il Korakril™ è un Solid Surface acrilico puro al 100%, la versione Blend contiene una bassissima percentuale di poliestere – sono opache e setose al tatto, vengono realizzate per colatura dentro degli appositi stampi utilizzati solitamente per ottenere forme morbide e ovoidali con spessori sottili. Non è possibile modificarne il profilo e le dimensioni a catalogo, ad eccezione della realizzazione di stampi ad hoc. Le vasche che hanno sagome morbide possono essere verniciate esternamente con laccatura Soft Touch, speciale trattamento che segue le dilatazioni del volume quando vengono riempite di acqua calda, o con argilla stesa a mano. Le vasche possono essere opzionate di impianti airpool, idromassaggio e cromoterapia.

Le vasche in Gelcoat si presentano lucide come il materiale ceramico, su richiesta è possibile ottenere la superficie opaca, e vengono realizzate per colatura dentro appositi stampi. Il Gelcoat è lo strato di finitura esterna, una vernice densa con spessore di oltre 1 mm che viene applicata sullo stampo prima della colatura, rimanendo poi fissata alla vasca una volta aperto lo stampo. Forme e dimensioni differenti dallo standard possono essere realizzate costruendo uno stampo su misura.

The bathtubs made in Corian® – first Solid Surface material ever, present on the market since 50 years – are matt and soft to the touch. They are handmade, starting from Corian® sheets, this manufacturing system allow us to modify measures and corners without extending delivery terms. The big bespoke bathtubs can be also realized in several parts to avoid problem of delivery and access to customer's house and assembled by Rexa Design specialist. The bathtubs are available with airpool, whirlpool and chrome therapy system.

The bathtubs made in Korakril™ and Korakril™ Blend, are matt and soft to the touch, they are realized dripping the material into moulds to obtain mainly rounded edge and ovoid shapes with thin thickness. In this case, dimensions and aspect can't be modified expect by the realization of a bespoke mould. The bathtubs with rounded edges can be externally lacquered with Soft Touch paint, special treatment that follows the bathtubs dilatation when filled with warm water, or coated with clay. Some bathtubs are available with airpool, whirlpool and chrome therapy system.

The bathtubs made in Gelcoat are glossy like ceramic, the matt version only on demand and they are realized with a mould. Gelcoat is the external coating, a dense and thick varnish (over then 1 mm) which is apply in the mould before dripping. Other shapes and dimensions can be realized only with bespoke mould.

Optional benessere per vasca Wellness systems for bathtubs

La ricerca del benessere psicofisico che Rexa Design persegue nella realizzazione delle sue collezioni, si declina nei sistemi dedicati al relax, installabili sulle vasche da bagno. Rexa Design propone tre sistemi idroterapeutici all'avanguardia e combinabili tra loro:

- airpool: aria dal fondo per un massaggio rigenerante;
- idromassaggio: aria e acqua dai lati per un massaggio stimolante;
- cromoterapia: combinazione di colori per un completo relax.

I sistemi possono essere installati singolarmente o abbinati tra loro per un maggiore effetto benessere:

- airpool + idromassaggio + cromoterapia;
- airpool + cromoterapia;
- idromassaggio + cromoterapia;
- airpool + idromassaggio.

L'unione dei tre sistemi consente di combinare alla perfezione relax, attività tonificante e rimodellante e benessere psico-fisico.

Airpool

Il sistema airpool si basa sull'erogazione di bollicine d'aria all'interno della vasca per un massaggio rigenerante volto alla rigenerazione, alla compattezza e alla tonicità dei tessuti. L'aria viene soffiata nella vasca tramite dei microfori posti fondo, secondo uno schema studiato e specifico, dedito all'erogazione precisa dell'aria per un massaggio rinvigorente. Tale sistema prende ispirazione dalle vasche termali dove, per via naturale il vapore gorgoglia dal fondo. Grazie al sistema ad aria, le condutture dei microfori vengono asciugate automaticamente al termine dell'utilizzo.

Sistema idromassaggio

Il sistema idromassaggio si basa sull'erogazione di acqua calda mescolata ad aria per un massaggio energico, il quale consente di combattere la cellulite, migliorare la circolazione e l'ossigenazione dei tessuti. Il sistema si compone di bocchette, disposte sui lati della vasca, secondo uno schema preciso volto all'ottimizzazione dei risultati, che erogano acqua calda miscelata ad aria. Grazie a una pompa che compone il meccanismo dell'idromassaggio, l'acqua contenuta nella vasca viene aspirata all'interno del circuito, scaldata, miscelata all'aria e poi reimpressa attraverso i diffusori.

Per ottenere risultati ottimali si consiglia di mantenere la temperatura dell'acqua compresa tra 33° e 37°C (33°C – massaggio energizzante; 37°C – massaggio rilassante). Durante l'utilizzo del sistema idromassaggio è sconsigliato l'utilizzo di bagnoschiuma e sali minerali poiché potrebbero danneggiare l'impianto. Per trarre il massimo beneficio dal bagno in una vasca idromassaggio si consiglia una durata di 20-30 minuti al massimo, al termine del quale è bene distendersi avvolti nella spugna per circa 10 minuti in modo da ripristinare i valori della pressione.

Cromoterapia

Il sistema cromoterapia si basa sui principi della cromoterapia secondo la quale l'utilizzo dei colori, normalmente regolato da principi comuni, aiuta il corpo e la psiche a ritrovare il naturale equilibrio stimolando mente e corpo e calmando certi sintomi. Il sistema funziona grazie all'inserimento di un impianto d'illuminazione a tre colori all'interno della vasca (impianto sicuro e isolato) che permette di “colorare” l'acqua secondo tre cicli cromatici studiati appositamente per ottenere il massimo beneficio psico-fisico: Tonic, Relax e Energy.

The research of psychophysical wellness that Rexa Design pursues during the creation of its collections, is implemented in the systems dedicated to relax that can be installed on bathtubs. Rexa Design offers three innovative hydrotherapy systems that can be combined with each other:

- airpool: air from the bottom for a restoring massage;
- whirlpool: air and water mixed up from the sides for a stimulating massage;
- chrome therapy: color combination for a complete relax.

The systems can be individually installed or combined with each other for a greater wellness effect:

- airpool + whirlpool + chrome therapy;
- airpool + chrome therapy;
- whirlpool + chrome therapy;
- airpool + whirlpool.

The combination of the three systems allows a perfect match between relax, toning up and remodelling activity and psychophysical wellness.

Airpool

The airpool system is based on the distribution of air bubbles inside the bathtub for a regenerating massage aimed at the regeneration and toning up of tissue. The air is blown into the bathtub through micro holes placed on the bottom, according to a rehearsed and specific method, intended to the precise distribution of air for a reinvigorating massage. This system takes inspiration from thermal baths where, in a natural way, the steam gurgles from the bottom. Thanks to the air system the ducts of micro holes are automatically dried after use.

Whirlpool

The whirlpool system is based on the distribution of hot water mixed up with air for a vigorous massage, which helps reducing cellulite, improve flow of blood and oxygenation of tissues. The system consist of nozzle, arranged on the sides of the bathtub, following a precise methods aimed to results optimization, that distribute hot water mixed up with air. Thanks to a pump, that compose the mechanism of the whirlpool system, the water contained in the bathtub is loaded in the circuit, heated, mixed up with air and reintroduced through the nozzle.

For an optimal result, it is suggested to maintain the water temperature between 33° and 37°C (33°C – energizing massage, 37°C – relaxing massage). While using the whirlpool, use of shower gel and minerals is avoided, they can damage the system. To gain maximum benefit from the whirlpool bath, is recommended a duration of 20-30 minutes, and a relaxing time wrapped in the sponge for about 10 minutes to restore blood flow.

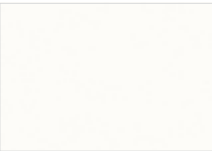

Chrome system

The chrome system is based on the principles of color therapy, according to which the use of colors, usually regulated by common principles, helps the psychophysical restoration by stimulating mind and body and calming certain symptoms. The system is composed of a three colors lighting system installed inside the bathtub (isolated and non-dangerous) that “paint” the water according to three chromatic loops, specifically set up to gain the maximum psychophysical benefit: Tonic, Relax and Energy.

Mae

Rubinetteria

Faucet

Mae in acciaio inox Aisi 316l ha durata eterna garantita dalla resistenza all'azione corrosiva di ruggine ed agenti esterni. L'acciaio è inoltre un materiale ecologico, che non produce residui nocivi per l'uomo e per l'ambiente sia in fase di lavorazione che nel prodotto finito.

I miscelatori Mae garantisce un consumo intelligente dell'acqua grazie a:

- cartucce con dischi in ceramica a portata d'acqua ridotta;
- aeratori che, introducendo aria nel getto d'acqua, permettono un flusso diffuso e abbondante con un minore utilizzo di acqua;
- materiali riciclabili e a ridotto impatto ambientale.

Mae collection's items are realized in stainless Aisi 316l steel that has unlimited life guaranteed by the resistance to the corrosive action of rust and external agents. The steel is also an eco-friendly material, which doesn't produce any produces harmful remains to man and the environment, both during processing and in the final product.

Mae mixers ensures an intelligent water consumption thanks to:

- cartridges with low-flow cermic discs;
- aerators that, despite the reduced flow rate of the cartridges used, manage to produce a full stream with a good flow pattern by introducing air into the jet of water;
- low environmental impact and recyclable materials.

Monica Graffeo

Hammam R1
Esperanto Moode Fonte

Nei diversi progetti per Rexa design ho cercato di raccontare i tanti significati che la stanza da bagno può assumere: da quello più intimista di Esperanto – nascono così le console-toilette – a quello più socievole di Fonte, ispirato all’Ofuro e Onsen giapponese e legato alla condivisione dello stesso spazio dove si svolgono contemporaneamente le medesime azioni. Con Hammam invece ho voluto rappresentare il desiderio di riscoprire ed entrare nuovamente in contatto con la propria ancestralità, l’amore per la materia, l’acqua, la luce e il calore... Ogni collezione interpreta il mondo delle attività possibili in questo ambiente, con un taglio sensoriale ed emozionale, perché oltre ad essere la stanza delle funzioni dedicate alla cura personale, il bagno è anche il luogo di incontro con il sé e con l’altro.

Biografia
Monica Graffeo vive e lavora a Pordenone. Dal 1998 si occupa di progettazione, art direction e design strategico. Per Rexa ha progettato la collezione Fonte ed è art director dell’azienda dal 2014. Ha ricevuto alcuni importanti riconoscimenti: il premio Young & Design 2003 e 2004, il Good Design Award del Chicago Atheneum Museum of Architecture 2005, entra nell’ADI Design Index del 2009 e del 2011.

Susanna Mandelli

Hole

Per Hole mi sono ispirata all’immagine di un pozzo interpretando in chiave contemporanea un sistema che per secoli ha permesso all’uomo di poter disporre dell’acqua. Il lavabo diventa un moderno pozzo di forma morbida e pura. Il bacino nero e i contenitori circolari evocano i mastelli con cui si riempivano le antiche tinozze.

Biografia
Susanna Mandelli, industrial e interior designer, vive e lavora a Bologna. Diplomata presso l’International School of Design ha collaborato con diversi negozi di arredamento e studi di architettura in Italia. Nel 2010 intraprende la libera professione ed inizia la sua collaborazione con importanti aziende nel settore dell’illuminazione. Successivamente assume la direzione artistica dello studio ID Insidesign.

For Hole, I was inspired by the image of a well interpreting in a contemporary key a system that for centuries has allowed man to be able to have water. Therefore, the washbasin becomes a modern well with a soft, pure shape. The black basin and round containers evoke the troughs with which old tubs were filled.

Biography
An industrial and interior designer, Susanna Mandelli lives and works in Bologna (Italy). She graduated at the International School of Design and cooperated with several furniture shops and architectural firms in Italy. In 2010, she started her career as a freelancer, starting to cooperate with major companies in the lighting industry. Later, she became artistic director of the ID Insidesign firm.

Giulio Gianturco

Ergo_nomic

L’ergonomia è il fulcro del progetto: i vari elementi sono studiati per consentire il più semplice utilizzo e per creare un accesso facile a tutte le funzioni; nel disegnare Ergo_nomic ho voluto rendere semplici e rilassanti i gesti quotidiani nella zona bagno evocando un concetto di benessere pratico e funzionale.

Biografia
Nato nel 1953, laureato in medicina e chirurgia, appassionato di regate, mondo che gli permette di conoscere e approfondire alcuni materiali tecnici. Questo è stato il punto di partenza per progettare, inizialmente oggetti solo per sé stesso e successivamente piccole serie dedicate al pubblico. Negli anni numerosi progetti hanno vinto gli International Awards. Dal 2008 si dedica completamente alla progettazione.

Ergonomics is the core of the project: the various elements have been designed to ensure ease of use and to facilitate access to all functions. In designing Ergo_nomic, I wanted to make everyday gestures in the bathroom area simple and relaxing, evoking a practical and functional lling a practical and functional concept of well-being.

Biography
Born in 1953, he graduated in medicine and surgery. His passion for regattas allowed him to understand and investigate various technical materials. This was the starting point for designing objects initially only for himself, and later small series dedicated to the public. Over the years, several of his projects have won International Awards. Since 2008, he has devoted himself entirely to design.

Imago Design

Unico

Nel progetto Boma si riconoscono linee morbide, curve sinuose che definiscono lo spazio con rimandi alle onde del mare e all’archetipo della barca, ricostruita idealmente nella vasca da bagno. Per il piatto Unico con doghe, i lavabi con cassetto, la vasca pannellabile e la vasca Unico a Giorno le geometrie semplici giocano con volumi primari alternando pieni, vuoti e inserti di vari materiali. Punto di partenza sono il Corian® è il Korakril™ materiali che possono essere assemblati, termoformati e nel caso del Korakril™ anche stampati. Tutti gli altri elementi del modello Unico compresa la vascadoccia sono di Rexa Design studio.

Biografia
Imago Design è il laboratorio creativo fondato nel 1993 e coordinato dall’Architetto Gian Luca Perissinotto e l’Architetto Paolo Zanetti. Lo Studio riunisce architetti, designer e art director che elaborano strategie integrate di comunicazione aziendale operando in tutti i settori della progettazione (industrial design, interior design, retail e graphic design).

The Boma project features soft lines and smooth curves that define the space, with references to the sea waves and the boat archetype, ideally rebuilt in the bathtub. The simple geometries of shower tray with slats, washbasins with drawers, panelling bathtub en Unico bathtube Giorno, play with primary volumes, alternating full and empty spaces with inserts of various materials. Everything stard from Corian® and Korakril™, materials that can be assembled, thermoformed and, in the case of Korakril™, moulded Every element of the Unico model, bathtub/shower too, are designed by RDS (Rexadesign studio).

Biography
Imago Design is a creative laboratory, founded in 1993 and coordinated by architects Gian Luca Perissinotto and Paolo Zanetti. The firm gathers architects, designers and art directors, who develop integrated company communication strategies operating in all areas of design (industrial design, interior design, retail and graphic design).

Materials

Corian®

Corian® è un materiale non poroso e omogeneo, composto da ±1/3 di resina acrilica (polimetilmetacrilato o PMMA) e da ±2/3 di sostanze minerali. Il componente principale è il tri-idrato di alluminio (ATH), minerale derivato dalla bauxite, da cui si ricava l'alluminio. Dal 1967, anno della sua produzione, a oggi il Corian® ha dimostrato di essere un materiale resistente, versatile e igienico. Non essendo poroso, muffe e batteri non trovano appigli e non possono diffondersi nelle giunture o sotto la superficie. Inerte e non tossico, in condizioni normali di temperature non emette gas. Quando viene bruciato rilascia ossidi di carbonio, il fumo è leggero e non contiene gas alogeni tossici. Per ulteriori informazioni consultare il sito internet: www.dupont.it

Corian® is a solid, non-porous, homogeneous surfacing material, composed of ±1/3 acrylic resin (also known as Polymethyl Methacrylate or PMMA), and ±2/3 of natural minerals. These minerals are composed of Aluminium Trihydrate (ATH) derived from bauxite, an ore from which aluminium is extracted. Since its birth in 1967 Corian® has proved to be really resistant, versatile and hygienic. Being a non-porous material, mold and bacteria cannot root nor spread themselves in the joints or under the surface. Corian® is non-toxic and inert. In normal temperature conditions is not emitting gas. If burnt releases mostly carbon monoxide and the light smoke does not have any halogen toxic gas. For further information on its composition, consult the website: www.corian.uk

Corian® est un matériel de revêtement homogène massif et non poreux, composé de ±1/3 de résine acrylique (également connue sous le nom de Polyméthyle Méthacrylate ou PMMA), et de ±2/3 de minéraux naturels. Son composant principal est le Trihydrate de la bauxite (ATH), un minéral dérivé de la bauxite, le minéral dont on extrait l'aluminium. Depuis sa naissance en 1967, Corian® a démontré d'être vraiment résistant, versatile et hygiénique. Etant aussi un matériel homogène et non-poreux, moisissures et bactéries ne se déposent pas ni dans les joint et ni en dessous de la surface. Corian® est inerte et non-toxique. En condition de température normale, il génère aucune émission de gaz. Si il brule émet surtout des oxydes de carbone et le fume est léger et contient pas des gaz halogènes toxiques. Pour plus d'information, consultez le site : www.dupontdenemours.fr

Corian® ist ein massives, nicht poröses und homogenes Oberflächenmaterial aus ±1/3 Acrylharz (auch als Polymethylmetacrylat oder PMMA bekannt) und ±2/3 natürlichen Mineralien. Der Hauptbestandteil ist das Mineral Aluminiumhydroxid (ATH), das aus Bauxit (Aluminiumerz) gewonnen wird. Seit der Markteinführung im Jahr 1967 hat sich Corian® als langlebiges und nutzerfreundliches Material bewährt. Das porenlose, massive Corian® kann optisch fugenlos verarbeitet werden und verfügt deshalb über eine besonderes hygienische Oberfläche. Diese verhindert das Wachstum von Bakterien oder Schimmelpilzen. Corian® ist ein

Impiegato per la realizzazione di top, lavabi, piatti doccia e vasche.

Used for the realisation of tops, washbasins, shower trays and bathtubs.

Employé pour plans, vasques, receveurs de douche, baignoire.

Es wurde für die Herstellung von Platten, Waschbecken, Duschtassen und Badewannen entwickelt.

Es empleado para la realización de encimeras, lavabos, platos de ducha y bañeras.

inaktives, nicht toxisches Material. Bei Normaltemperatur kommt es zu keiner Gasentwicklung. Wird es verbrannt, setzt der Werkstoff hauptsächlich Kohlendioxid frei. Der Rauch ist optisch hell und enthält keine toxischen halogenierten Gase. Informationen zur Materialzusammensetzung entnehmen Sie bitte dem Corian® auf: www.dupont.de

Corian® es un material para superficies sólido, sin poros y homogéneo, compuesto de ±1/3 de resina acrílica (también conocida como Polimetil-Metacrilato o PMMA) y ±2/3 de minerales naturales. Su principal ingrediente es el mineral trihidrato de aluminio (ATH), un derivado de la bauxita que sirve de base para la producción de aluminio. Desde su introducción en 1967, Corian® se ha mostrado como un material excepcionalmente duradero con el que es fácil convivir. Corian® es un material sin poros. Es sólido en todo su grosor y puede ser fabricado con imperceptibles juntas manteniendo una superficie higiénica. Las superficies Corian® son resistentes a bacterias y hongos. Corian® es un material inerte y no tóxico. Bajo condiciones normales de temperatura, no emite gases. Cuando se quema, principalmente desprende gas carbónico, el humo que genera es liviano y no contiene gases halogenados tóxicos. Para tener más información sobre la composición del material, consulte Corian® la página: www.dupont.es

Korakril™

Impiegato per la realizzazione di top, lavabi, piatti doccia e vasche.

Used for the production of tops, washbasins, shower trays and bathtubs.

Employé pour plans, vasques, receveurs de douche et baignoires.

Wird für die Herstellung von Platten, Waschbecken, Duschtassen und Badewannen verwendet.

Empleado para la realización de encimeras, lavabos, platos de ducha y bañeras.

Materiale realizzato con una miscela di resine acriliche e minerali naturali, il Korakril™ è resistente, igienico, antistatico, inalterabile alla luce, resistente alle macchie e termoformabile: le lastre scaldate possono essere modellate con stampi di legno o metallo, creando forme bi e tridimensionali. La sua particolare composizione permette di realizzare top in totale assenza di giunzioni percettibili con il vantaggio di una continuità estetica all'interno delle composizioni. L'uniformità del materiale impedisce che si possano verificare punti critici per lo sporco o il deposito di batteri e muffe. Inerte e non tossico, può essere utilizzato in luoghi pubblici in quanto non emette gas. La produzione del Korakril™ utilizza impianti studiati per ridurre al minimo gli scarti di lavorazione che vengono comunque reintrodotti nel processo produttivo, un iter ottimizzato, volto al massimo risparmio energetico.

Material realised with a mixture of acrylic resins and natural minerals. Korakril™ is resistant, hygienic, anti-static, inalterable to light, stain resistant and can be thermoformed: the heated slabs can be moulded with wooden or metal moulds, creating bi and three-dimensional shapes. The particular composition of Korakril™ enables the manufacture of tops without visible joints that make the composition continuative. With its uniformity, you will not find critical point for the deposit of dust and neither for bacteria. Inert and non-toxic, it can be used in public places because it does not emit gases. The production of Korakril™ uses systems designed to minimize the

waste that is however reintroduced in the production process, an optimized process, which aims to maximise energy savings.

C'est un matériel réalisé avec un mélange des résines acryliques. Korakril™ est résistant, hygiénique, antistatique, inaltérable à la lumière, résistant aux taches et thermoformable : les dalles chauffées peuvent être modelisées avec des moules en bois ou en métal, en créant des formes bi et en trois dimensions. Sa particulière composition permet de réaliser des plans tops sans joints visibles avec l'avantage d'avoir une continuité esthétique à l'intérieur des compositions. L'uniformité de ce matériel empêche la formation des points critiques pour la poussière ou l'accumulation des bactéries. Inertes et non toxiques, il peut être utilisé dans les lieux publics, car il ne dégage pas de gaz. La production du Korakril™ est réalisée à l'aide de systèmes conçus pour minimiser les déchets de productions qui sont cependant réintroduits dans le processus de production, un processus optimisé, qui a pour objectif à un maximum d'économies d'énergie.

Ist eine Mischung von Acrylherzen und natürlichen Mineralien. Korakril™ ist fest, hygienisch, antistatisch, lichtecht, fleckbeständig und man kann es Thermoformen: die beheizten Platten können mit Holz- oder Metallformen modelliert werden, um bi oder dreidimensionale Formen zu schaffen. Mit dieser speziellen Zusammensetzung, kann man mit Korakril™ Platten ohne Verbindungen realisieren, die den Kompositionen eine schöne ästhetische Kontinuität

bieten. Die Gleichmäßigkeit des Material gibt die Möglichkeit eine andauernde saubere Oberfläche ohne kritische Punkte für Schmutz zu haben. Inert und ungiftig, es kann an öffentlichen Plätzen verwendet werden, da es keinerlei Gas ausströmt. Die Herstellung von Korakril™ entsteht mit Systemen, die den Abfall minimieren, der jedoch auch in den Produktionsprozess zurückgeführt wird, ein optimiertes Verfahren, das auf die maximale Energieeinsparung führt.

Es un material realizado por una mezcla de resinas acrílicas y minerales naturales. Korakril™ es resistente, higiénico, antiestático, inalterable a la luz, resistentes a las manchas y puede ser termoformado: las losas calentadas pueden ser modeladas con moldes de madera o de metal, creando bi y tres Dimensioni formas. La composición particular de Korakril™ permite realizar encimeras en total ausencia de uniones perceptibles donando continuidad estética a las composiciones. La uniformidad del material no permite el depósito de mugre y bacterias. Inerte y no tóxico, se puede utilizar en lugares públicos, ya que no emite gases. La producción de Korakril™ usa sistemas diseñados para reducir al mínimo los residuos que se reintrodujo sin embargo, en el proceso de producción, un proceso optimizado para el máximo ahorro energético.

Uso e manutenzione Corian® e Korakril™ (Stone)

Manutenzione giornaliera A – B – C

Acqua ricca di calcare, sapone, minerali A – B – F – I

Graffio significativo, bruciatura di sigaretta, inchiostro, segni di penna A – B – C – E – I

Mercurocromo, sangue, profumo A – B – C – D – E – I

Smalto per unghie A – B – C – G – I

Ferro o ruggine A – B – C – H – I

Muffa, iodio A – B – C – E – I

*Agire sempre con movimenti circolari
** Se non viene rimossa completamente risciacquando con acqua, la candeggina può scolorire il Corian®.

Metodi di pulizia

A. Rimuovere il residuo con un panno.

B. Sciacquare la superficie con acqua calda e asciugare con un panno morbido.

C. Usare un panno umido e una crema abrasiva leggera (es. Cif).

D. Usare una spugna, strofinare sulla macchia con un prodotto detergente a base di ammoniaca.

E. Usare una spugna, strofinare sulla macchia con candeggina, sciacquare più volte con acqua calda e asciugare con un panno morbido.

F. Usare una spugna e strofinare sulla macchia con un prodotto di pulizia anticalcare (tipo Viakal®) o aceto. Sciacquare più volte con acqua calda ed asciugare con un panno morbido.

G. Usare una spugna e strofinare sulla macchia con un prodotto privo di acetone. Sciacquare più volte con acqua calda ed asciugare con un panno morbido.

H. Usare una spugna e strofinare sulla macchia con una paglietta e rimuovere la ruggine. Sciacquare più volte con acqua calda ed asciugare con un panno morbido.

I. Se le macchie di ferro persistono, contattare Rexa Design (tel: 0434 593182).

Corian® colorato: dopo aver eseguito i passaggi sopra elencati, bagnare con acqua e passare con una spugna tipo Scotch Brite® con movimenti circolari. Per quanto riguarda la finitura Deep Nocturne richiedere l'intervento di personale specializzato.

Molti danni dovuti a urti, calore o prodotti chimici possono essere riparati solitamente sul luogo ridando integralmente alla superficie il suo aspetto originale, regolare, igienico.

Corian® and Korakril™ (Stone) use and maintainance

For everyday cleaning A – B – C

Water rich of limestone, soaps, minerals A – B – F – I

Light scratch, cigarette burns, ink, marker pen A – B – C – E – I

Mercurochrome, blood, perfume A – B – C – D – E – I

Nail varnish spills A – B – C – G – I

Iron or rust A – B – C – H – I

Iodine, mildew A – B – C – E – I

*Always clean using circular motion.
**Bleach can discolour Corian® if not removed completely by rinsing with water afterwards.

Cleaning methods

A. Remove excess with a soft cloth.

B. Rinse surface with warm water and dry with a soft cloth.

C. Use a damp microfiber cloth and a small amount of Bar Keepers Friend.

D. Use a microfiber cloth and rub over the stain with a detergent or a standard household kitchen spray (e.g. Flash, Mr Muscle, Cif).

E. Use a microfiber cloth and rub over the stain with some diluted bleach**.

Rinse several times with warm water and dry with a soft cloth.

F. Use a microfiber cloth and rub over the stain with a standard household

lime-scale remover or vinegar (Viakal®, Lime-lite). Rinse several times with warm water and dry with a soft cloth.

G. Use a microfiber cloth and rub over the stain with a non-acetone based Nail varnish remover. Rinse several times with warm water and dry with a soft cloth.

H. Use a microfiber cloth and rub over the stain with a metal cleaner or rust remover. Rinse several rimes with warm water and dry with a soft cloth.

I. If the stains persist, contact Rexa Design (tel: +39 0434 593182).

For what concern coloured Corian®: after performing the steps above, moisten with water and clean with a Scotch Brite® sponge using circular motions. The Deep Nocturne Finishes require the intervention of specialized staff.

Most damages, including sever impact, heat or chemical damage, can usually be repaired on site to restore the original, smooth, hygienic solid surface integrity.

Corian® et Korakril™ (Stone) utilisation et maintenance

Nettoyage quotidien A – B – C

Dépôt calcaire, savons, minéraux A – B – F – I

Pollen de lys, safran, rayures légères, brulure de cigarette, cirage, encre, feutre A – B – C – E – I

Mercurochrome, sang, parfum A – B – C – D – E – I

Vernis à angle A – B – C – G – I

Fer ou rouille A – B – C – H – I

Iode, moisissures A – B – C – E – I

*Nettoyez toujours en effectuant un mouvement circulaire
**L'eau de javel risque de décolorer le Corian® si elle n'est pas ensuite rincée complètement à l'eau.

Methodes de nettoyage

A. Épongez avec un chiffon doux.

B. Rincez à l'eau chaude et séchez avec un chiffon doux.

C. Utilisez un chiffon humide et un détergent doux en crème (type Cif). Rincez plusieurs fois à l'eau chaude, puis séchez avec un chiffon doux.

D. Utilisez un tampon à récurer (type Scotch Brite®) et frottez la tâche avec un détergent ou un nettoyant pour surface dure à l'ammoniaque (type Ajax ou Monsieur Propre). Rincez plusieurs fois à l'eau chaude, puis séchez avec un chiffon doux.

E. Utilisez un tampon à récurer (type Scotch Brite®) et frottez la tâche avec un peu d'eau de javel**. Rincez plusieurs fois à l'eau chaude, puis séchez avec un chiffon doux.

F. Utilisez un tampon à récurer (type Scotch Brite®) et frotter la tâche avec un produit

anti-calcaire (type Viakal®) ou de vinaigre. Rincez plusieurs fois à l'eau chaude, puis séchez avec un chiffon doux.

G. Utilisez un tampon à récurer (type Scotch Brite®) et frottez la tâche avec un dissolvant à ongles sans acétone. Rincez plusieurs fois à l'eau chaude, puis séchez avec un chiffon doux.

H. Utilisez tampon à récurer (type Scotch Brite®) et frottez avec un nettoyant à métaux ou une antirouille. Rincez plusieurs fois à l'eau chaude, puis séchez avec un chiffon doux.

I. Si la tache persiste, contactez Rexa Design (tel: +39 0434 593182).

Pour ce qui concerne Corian® coloré: après avoir effectué les étapes ci-dessus, humidifier avec de l'eau et nettoyer avec une éponge Scotch Brite® à l'aide de mouvements circulaires. La finition Deep Nocturne nécessite l'intervention de personnel spécialisé.

La plupart des dégâts, y compris les dommages importants dus à un choc, à la chaleur ou à des produits chimiques, sont habituellement réparables sur place pour redonner aux surfaces leur fini et leur hygiène d'origine.

Corian® et Korakril™ (Stone) gebrauch und wartung

Tägliche Reinigung A – B – C

Kalk-, Seifen- Mineralablagerungen A – B – F – I

Lilienpollen, Safran, leichte Kratzer, Zigarettenbrandflecke Tinte, Filzstift A – B – C – E – I

Mercurochrom, Blut, Rotwein, Parfum A – B – C – D – E – I

Nagellack A – B – C – G – I

Eisen oder Rost A – B – C – H – I

Jod, Schimmelpilze A – B – C – E – I

*Reinigen Sie die Oberfläche immer mit kreisenden Bewegungen
**Bleiche sofort mit Wasser vollständig abspülen, andernfalls kann sich die Corian® Oberfläche verfärben.

Reinigungsmethode

A. Rückstände mit einem weichen Tuch entfernen.

B. Oberfläche mit warmen Wasser abspülen und mit einem weichen Tuch trockenwischen.

C. Ein feuchtes Tuch und eine milde Scheuermilch verwenden (z.B. Viss, Frosch Scheuermilch).

D. Mit einem abrasiven Scheuerschwamm (z.B. Scotch Brite®) und einem Reinigungsmittel oder Reiniger für Massivoberflächen auf Ammoniakbasis (z.B. Ajax, Meister Proper, General) über den Fleck reiben.

E. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und Haushaltsbleiche. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.

F. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und einem standardmäßigen Haushaltsmittel zur

Entfernung von Kalkablagerungen (Sidol) oder Essig über den Fleck reiben. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.

G. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und einem acetonfreien Nagellackentferner über den Fleck reiben. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.

H. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und einem Metallreiniger oder Rostentferner über den Fleck reiben. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.

I. Wenn Flecken nicht entfernt werden können, setzen Sie sich mit Rexa Design (tel: +39 0434 593182) in Verbindung.

Für die farbing Corian®: nachdem Sie die oben aufgeführten Schritte, mit Wasser anfeuchten und mit einem Scotch-Brite-Schwamm in kreisenden Bewegungen gehen. Die Deep Nocturne Veredelung erfordert den Eingriff von spezialisiertem Personal.

Die meisten Schäden, einschließlich Schäden, die durch starke Schläge, Hitze oder Chemikalien verursacht wurden, können in der Regel vor Ort beseitigt werden. Die Oberfläche erhält dadurch ihre ursprüngliche, glatte, hygienische und massive Oberflächenbeschaffenheit zurück.

Corian® y Korakril™ (Stone) uso y mantenimiento

Para la limpieza cotidiana A – B – C

Cal de agua dura, jabon, minerales A – B – F – I

Polen de lirio, azafran, un arañazo superficial, quemaduras de cigarrillos, crema para zapatos, tinta A – B – C – E – I

Sangre, vino, perfume A – B – C – D – E – I

Manchas de esmalte de uñas A – B – C – G – I

Hierro u oxidacion A – B – C – H – I

Yodo, hongos A – B – C – E – I

*Siempre limpie con movimientos circulares.
**La Lejia puede dejar manchas blancas en la superficie de Corian® si no se aclare con agua abundante.

Metodos de limpieza

A. Elimine manchas con un trapo suave.

B. Aclare la superficie con agua caliente y segue con un trapo suave.

C. aplique una crema ligeramente abrasiva (como Cif) con un paño mojado.

D. Con un estropajo que esté gastado (del tipo Scotch Brite®) frote la mancha con un detergente o con un producto para limpiar superficies sólidas a base de amoniaco.

E. Con un estropajo que esté gastado (del tipo Scotch Brite®) frote la mancha con un poco de lejia. Aclare varias veces con agua caliente y seque con un trapo suave.

F. Con un estropajo que esté gastado (del tipo Scotch Brite®) frote la mancha con un producto doméstico para eliminar los residuos de cal (Viakal® o vinagre). Aclare varias veces con agua caliente y seque con un trapo suave.

G. Con un estropajo que esté gastado (del tipo Scotch Brite®) frote la mancha con un detergente sin acetona. Aclare varias veces con agua caliente y seque con un trapo suave.

H. Con un estropajo que esté gastado (del tipo v frote la mancha con un producto para limpiar metales o para eliminar la oxidación. Aclare varias veces con agua caliente y seque con un trapo suave.

I. Si la mancha persiste, contacte Rexa Design (tel: +39 0434 593182).

Para el Corian® colorado: después de realizar los pasos anteriores, humedezca con agua y limpie con una esponja Scotch Brite® usando movimientos circulares. El acabado Deep Nocturne requiere la intervención de personal especializado.

La mayoría de los daños, incluso los causados por un golpe, el calor y productos químicos, se pueden reparar en el sitio de instalación.

Materiale composito realizzato con 2/3 di idrati di alluminio, mescolati con resine poliestere modificate con monomeri acrilici dalle alte prestazioni chimiche e meccaniche, che garantiscono omogeneità e uniformità in tutto lo spessore. Compattezza, resistenza agli agenti chimici e/o solventi e resistenza al graffio sono le principali caratteristiche del Korakril™ Blend. Eventuali danneggiamenti possono essere facilmente rimossi utilizzando una spugnetta abrasiva che contribuisce a rinnovare la superficie.

Composite material made with 2/3 of aluminium hydrates, mixed with polyester resins modified with acrylic monomers with high chemical and mechanical performance, which ensure homogeneity and uniformity throughout the thickness. Compactness, resistance to chemicals and/or solvents and scratch resistance are the main features of Korakril™ Blend. Any damage can be easily removed using an abrasive pad which helps to renew the surface.

Matériau composite réalisé avec 2/3 d'hydrates d'aluminium, mélangées à des résines de polyester modifiées par des monomères acryliques à hautes performances mécaniques et chimiques, qui assurent l'homogénéité et l'uniformité dans toute l'épaisseur. Compacité, résistance aux produits chimiques et/ou des solvants et la résistance aux rayures sont les principales caractéristiques de Korakril™ Blend. Tout dommage peut être facilement éliminé à l'aide d'un tampon abrasif qui aide à renouveler la surface.

Verbundwerkstoff mit 2/3 Aluminiumhydrate, gemischt mit Polyesterharzen, modifiziert mit Acrylmonomeren mit hohen chemischen und mechanischen Leistungen gemacht, um die Homogenität und die

Impiegato per la realizzazione di vasche stampate.

Used for the realization of injected basins.

Utilisé pour la réalisation de vasque injectées.

Verwendet für die Realisierung von gegossenen Waschbecken.

Se utiliza para la realización de los lavabos inyectados.

Gleichförmigkeit durch die Dicke zu gewährleisten. Kompakte Bauweise, Beständigkeit gegenüber Chemikalien und / oder Lösungsmittel und Kratzfestigkeit sind die Hauptmerkmale von Korakril™ Mischung. Beschädigungen können leicht entfernt werden, die Verwendung eines Schleifkissens hilft die Oberfläche wieder zu erneuern.

Material compuesto hecho con 2/3 de hidratos de aluminio, mezclado con resinas de poliéster modificados con monómeros acrílicos con altas prestaciones químicas y mecánicas, que garantizan la homogeneidad y uniformidad en todo el espesor. Compacidad, resistencia a los productos químicos y/o disolventes y resistencia al rayado son las principales características de Korakril™ Blend. Cualquier daño se puede quitar fácilmente usando una almohadilla abrasiva que ayuda a renovar la superficie.

Pulizia
Pulire con spugna e normali detergenti per la pulizia del bagno disponibili in commercio. Al termine risciacquare abbondantemente. Si consiglia di testare preventivamente la compatibilità del detergente impiegato su una superficie nascosta del mobile per evitare eventuali danneggiamenti. Per eliminare depositi di calcare e rimuovere macchie persistenti (cosmetici, tinte, etc.), pulire con spugna e detergente abrasivi (ad esempio Cif) con movimenti ampi e circolari fino alla rimozione del difetto, risciacquare con cura. Per eliminare graffi e piccole scheggiature, o nel caso di macchie persistenti, levigare la superficie con carta abrasiva P320. Per rinnovare e rendere uniforme la superficie del Korakril™ Blend usare la stessa carta abrasiva con movimenti ampi e circolari, al fine di ottenere una finitura omogenea. Si consiglia di procedere alla rimozione delle macchie persistenti, dapprima con spugna e detergente abrasivo e, solo se necessario, impiegare la carta abrasiva P320.

Cleaning
Clean with a sponge and ordinary household cleaners available on the market. At the end rinse thoroughly. It is recommended to test the compatibility of the detergent used on a hidden surface of the element to avoid damage. To remove lime deposits and remove stains (cosmetics, dyes, etc.), wipe with sponge and abrasive cleaner (for example Cif) with wide circular movements until the removal of the defect, rinse thoroughly. To remove scratches and small chips, or in case of persistent stains, rub with P320 sandpaper. To renew and make uniform the surface Korakril™ Blend use the same abrasive paper with wide, circular motions to get a smooth finish. It is advisable to proceed with the removal of persistent stains, first with sponge and mild detergent and, if necessary, use P320 sandpaper.

Nettoyage
Nettoyer avec une éponge et un détergent ordinaire pour salle de bain disponible dans le commerce. A la fin rincer abondamment. Il est recommandé de vérifier la compatibilité du détergent utilisé sur une surface cachée de de l'élément pour éviter tout dommage. Pour enlever les dépôts de calcaire et enlever les taches (produits cosmétiques, colorants, etc.), essuyez avec une éponge et un nettoyant abrasif (par exemple Cif) avec de larges mouvements circulaires jusqu'à l'élimination du défaut, rincer abondamment. Pour enlever les rayures et les petits éclats, ou dans le cas de taches persistantes, frotter avec du papier de verre P320. Pour renouveler et uniformiser la surface Korakril™ Blend utiliser le même papier abrasif avec de larges mouvements circulaires pour obtenir une finition lisse. Il est conseillé de procéder à l'élimination des taches tenaces, d'abord avec une éponge et un détergent doux et, si nécessaire, utiliser du papier de verre P320.

Recycling

Reinigung
Reinigen Sie mit einem Schwamm und einem normalen Haushaltsreiniger für Bäder der im Handel erhältlich ist. Am Ende gründlich ausspülen. Es wird empfohlen, die Verträglichkeit des Waschmittels auf einer versteckten Oberfläche des Elements zu verwenden, um Beschädigungen zu vermeiden. Um Kalkablagerungen und Flecken (Kosmetika, Farben, etc.) zu entfernen, wischen Sie mit einem Schwamm und Scheuermittel (zum Beispiele Cif) mit breiten kreisenden Bewegungen bis zur Beseitigung des Mangels, danach gründlich abspülen. Um Kratzer, oder kleine Absplitterungen zu beseitigen, oder im Falle von hartnäckigen Flecken, schleifen mit P320 Sandpapier. Zur Erneuerung einer gleichmäßigen Oberfläche Korakril™ Blend dasselbe Schleifpapier mit breiten, kreisenden Bewegungen verwenden um wieder eine glatte Oberfläche zu bekommen. Bevor man P320 Sandpapier zum Entfernen von hartnäckigen Flecken verwendet wird empfohlen es zunächst mit Schwamm und einem milden Reinigungsmittel zu versuchen.

Limpieza
Limpiar con una esponja y detergente doméstico para limpiar el baño disponible en el mercado. Al final enjuagar bien. Se recomienda probar la compatibilidad del detergente usandolo en una superficie oculta del elemento para evitar daños. Para eliminar los depósitos de cal y eliminar las manchas (cosméticos, tintes, etc.), limpie con una esponja y limpiador abrasivo (por ejemplo Cif) con amplios movimientos circulares hasta la eliminación del defecto, enjuagar bien. Para eliminar arañazos y pequeñas astillas, o en el caso de las manchas persistentes, frotar con P320 papel de lija. Para renovar y hacer uniforme la superficie Korakril™ Blend utilizan el mismo papel abrasivo con amplios movimientos circulares, para conseguir un acabado liso. Es aconsejable proceder con la eliminación de manchas difíciles, primero con esponja y detergente suave y, si es necesario, utilice el papel de lija P320.

Impiegato per la realizzazione di piani

Used for the realization of tops.

Utilisé pour la réalisation de plans.

Verwendet für die Realisierung von Tops.

Se utiliza para la realización de las encimeras.

Korakril™ Stone è un materiale che fa parte della famiglia delle superfici solide (Solid Surface), costituito dalla combinazione di più minerali naturali e resina polimerica prestazionale. Compatto, non rivestito o laminato, il Korakril™ Stone consente di ottenere installazioni eleganti e di alto rendimento. La superficie igienica, ignifuga e non porosa, è durevole e facile da pulire con i comuni prodotti di pulizia domestica. La composizione e il colore del Korakril™ Stone, disponibile in diverse tonalità lo rendono omogeneo per tutto il suo spessore: grazie a queste particolari caratteristiche, i piccoli tagli e graffi, (nella superficie liscia) possono essere facilmente rimossi per restituire al prodotto la sua bellezza originale.

Korakril™ Stone is part of the family of Solid Surface materials, consisting of the combination of several natural minerals and performing polymer resin. The Korakril™ Stone is compact, not coated or laminated, and allows elegant and high-performance installations. The hygienic surface, flame retardant, non-porous, is durable and easy to clean with common cleaning products. The composition and the colour of Korakril™ Stone, available in shades, make it homogeneous throughout its thickness: due to these particular features, small cuts and scratches, (on the smooth surface) can be easily removed and restore the product its original beauty.

Korakril™ Stone est un matériau qui fait partie de la famille des Solid Surface, formé par la combinaison de plusieurs minéraux naturels et de résine de polymère performante. Compact, non revêtu ou stratifié, le Korakril™ Stone permet des installations élégantes et à rendement élevé. La surface hygiénique, ignifuge et non poreuse, est durable et facile à nettoyer avec les produits de nettoyage communs. La composition et la couleur du Korakril™ Stone, disponible dans différentes nuances, le rendent homogène sur toute son épaisseur: grâce à ces caractéristiques particulières, les petites coupes et éraflures (sur la surface lisse) peuvent être facilement éliminées pour redonner au produit sa beauté originale.

Korakril™ Stone ist Teil der Familie der Solid Surface Materialien, bestehend aus der Kombination von mehreren natürlichen Mineralien und Polymer-Harz. Der Korakril™ Stone ist kompakt, nicht beschichtet oder laminiert und ermöglicht eine elegante Ausführung und hoher Leistung. Die hygienische Oberfläche, flammwidrig, nicht porös, ist langlebig und leicht zu reinigen mit gängigen Reinigungsmitteln. Die Zusammensetzung und die Farbe von Korakril™ Stone, die in verschiedenen Farbtönen erhältlich sind, machen sie homogen in ihrer gesamten Stärke: Aufgrund dieser besonderen Merkmale können kleine Schnitte und Kratzer (in der glatten Oberfläche) leicht entfernt werden und das Produkt seine originale Schönheit zurückbringen.

Korakril™ Stone es parte de la familia de materiales Solid Surface, consiste en la combinación de varios minerales naturales y resina polimérica performante. El Korakril™ Stone es compacto, no recubierto ni laminado, y permite unas instalaciones elegantes y con alto rendimiento. La superficie higiénica, ignífuga, no porosa, es duradera y fácil de limpiar con productos de limpieza comunes. La composición y el color de el Korakril™ Stone, disponible en diferentes tonos, la hacen homogénea en todo su espesor: debido a estas características particulares, se pueden quitar fácilmente pequeños cortes y rasguños (en la superficie lisa) y devolver al producto a su belleza original.

Impiegato per la realizzazione del lavabo Murano.

Used for the realisation of Murano over counter basin.

Employé pour vasque en verre du Murano.

Murano wird für Waschbecken verwendet.

Es empleado para la realización de Lavabo Murano en vidrio.

100% vetro. Soffiati dai mastri vetrai di Murano, i lavabi in vetro di Murano prendono forma in stampi di legno creati appositamente per Rexa Design. La loro particolarità è quella di presentare bolle d'aria, imperfezioni e variazioni di spessore dovute alla lavorazione manuale, elementi che non sono mai considerabili difetti.

100% glass. Blown glass from Murano, over counter top in Murano glass takes its shape from a wooden mould, specifically created for Rexa Design. Its peculiarity is to have air bubble inside, imperfections on the surface and its thickness changes due to the artisanal works that can't never be considered as defects.

100% verre. Verre soufflé de Murano, prendre formé dans del moules en bois créés spécifiquement pour Rexa Design. Sa particularité est d'avoir des bulles d'air à l'intérieur et des imperfections sur la surface, et des changements d'épaisseur dus aux travaux artisanaux qui ne peuvent jamais être considérés comme des défauts.

100% Glas. Das Muranoglas wird handgeblasen, und nimmt seine Form aus einer Holzform, die speziell für Rexa Design geschaffen wurde. Es kann Luftblasen oder andere Mängel haben, das ist aber die Eigenschaft von Muranoglas.

100% vidrio. Vidrio de Murano soplado a mano, los lavabos de murano son moldeados en moldes de madera creados específicamente para Rexa Design. Su particularidad es la introducción de burbujas de aire y las imperfecciones de la superficie y las variaciones en el espesor debido al procesamiento manual que nunca son fallas considerables.

Cocciopesto

Impiegato per la realizzazione di lavabi.

Used for the construction of washbasins.

Utilisé pour la construction de vasques.

Verwendet für den Bau von Waschbecken.

Se utiliza para la construcción de los lavabos.

Laterizi frantumati e malta di calce. Apprezzato dai romani per la bassissima permeabilità all'acqua, il Cocciopesto è un materiale naturale tradizionale. Lavorato artigianalmente, è reinterpretato in chiave contemporanea da Rexa Design e colorato in massa con trattamento poliuretanico superficiale per garantire inassorbienza e semplicità di pulizia.

Broken bricks and lime mortar. Appreciated by the Romans for the very low permeability to water, Cocciopesto is a traditional natural material. Handcrafted, it is reinterpreted in a contemporary way by Rexa Design and dyed with polyurethane surface treatment to ensure water resistance and ease of cleaning.

Briques brisées et mortier de chaux. Apprécié par les Romains pour la très faible perméabilité à l'eau, Cocciopesto est un matériau naturel traditionnel. Fabriqué de façon artisanale, il est réinterprété de façon contemporaile par Rexa Design et teint au moyen d'un traitement de surface polyuréthane pour assurer la résistance à l'eau et la facilité de nettoyage.

Ziegelbruch und Kalkmörtel. Cocciopesto ist ein traditionelles Naturmaterial das schon von den Römern für die sehr geringe Wasserdurchlässigkeit geschätzt wurde. Cocciopesto ist ein traditionelles Naturmaterial. Handgefertigt, es wird in einer zeitgenössischen Art und Weise von Rexa Design neu interpretiert und mit Polyurethan-Oberflächenbehandlung gefärbt mit einer wasserfesten Behandlung zur Erleichterung der Reinigung.

Ladrillos rotos y mortero de cal. Apreciado por los romanos por la muy baja permeabilidad al agua, Cocciopesto es un material natural tradicional. Producida de manera artisanal, se reinterpreta de manera contemporánea por Rexa Design y teñida con tratamiento superficial de poliuretano para garantizar la resistencia al agua y facilidad de limpieza.

Pulizia
Per la pulizia utilizzare solo detersivi neutri e non anticalcare aggressivi.

Cleaning
For cleaning use only neutral detergents and non-strong descaler.

Nettoyage
Pour le nettoyage, utilisez uniquement des détergents neutres et pas d'anticalcaire agressif.

Reinigung
Zur Reinigung nur neutrale Reinigungsmittel und keinen aggressiven Entkalker verwenden.

Limpieza
Para la limpieza usar sólo detergentes neutros y desincrustantes no agresivos.

Laminam

Impiegato per la realizzazione delle finiture dei mobili.

Used for realization of furniture Finishes.

Utilisé pour la réalisation de finition des meubles.

Verwendet für die Produktion von Ausführung der Möbel.

Utilizado para la realizacion del acabado de los muebles.

È una miscela di materie prime naturali che viene macinata a umido, trasformata in granulato, compattata prima di essere sintetizzata a 1200°C in forni ibridi e rifilata. Ha un'elevata resistenza alle sollecitazioni meccaniche, agli attacchi chimici, ai graffi, all'abrasione profonda e alla flessione. Resiste ai solventi organici, inorganici, disinfettanti e detergenti.

It's a mixture of natural raw materials that is wet milled, it becomes granulated and then made compact before to be synthesize at 1200°C. It has a high resistance to the mechanical stress, to the chemical attacks, to the scratches, to the deep scrape and to the bend. It is resistant also with organic and inorganic solvents, disinfectants and detergents.

C'est un mélange de matières premières naturelles qui sont broyé en humide, il devient granulé et ensuite il est compacté avant d'être synthétiser à 1200°C. Il a une haute résistance à le stress mécanique, aux attaques chimiques, aux rayures, à l'éraflure profonde et au courbure. Il est également résistant aux solvants organiques et inorganiques, aux désinfectants et aux détergents.

Das natürliche Rohrmaterial wird feucht gemahlen und das Granular wird zuerst verdichtet und dann auf 1200°C erhitzt. Es ist ein sehr festes Material.

Es una mezcla de materias primas naturales que se tritura, se transforma en granos y se prensa antes que ser sintetizada a 1200°C. Tiene una gran resistencia a los esfuerzos mecánicos, a las corrosiones químicas, a los rasguños, a las abrasiones profundas y a la flexión. Resiste a los solventes orgánicos y inorgánicos, a los desifectantes y detergentes.

Pulizia
Per la pulizia ordinaria utilizzare acqua e detergenti neutri, può essere utilizzato alcool per uso domestico o detergenti basici (tipo candeggina) per sporczia più ostinata, avendo cura di risciacquare con abbondante acqua. Facile da pulire: gli unici prodotti che ne possono danneggiare la superficie sono quelli a base acida e gli idro fluoruri.

Cleaning
For daily cleaning use water and neutral soaps; it could be used also alcohol for domestic use or basic cleansers (like bleach) for stubborn stain, taking care to rinse out with water afterwards. Easy to clean: the only products that can damage the surface are the hydrofluoric acid and general acid base.

Popreté
Pour le nettoyage quotidien, utilisez uniquement des détergents neutres, pour la saleté plus tenaces peut être utilisé l'alcool pour les agents de nettoyage domestiques ou de base (tels que l'eau de Javel), rincer abondamment à l'eau. Facile à nettoyer: le seul produit qui peut endommager la surface est l'acide fluorhydrique et d'autres acides général.

Reinigung
Reinigen Sie mit Wasser und gewöhnlichem Reinigungsmittel; für hartnäckigen Schmutz kann man Alkohol oder Bleichmittel benutzen, danach muß man reichlich mit Wasser auswaschen. Es ist sehr einfach zu reinigen. Benutzen Sie milde Reinigungsmittel. Man darf keine säurehaltigen Reinigungsmittel verwenden.

Limpiadura
Para la limpieza cotidiana utilize agua y sabon neutral; se puede utilizar también alcohol de utilización doméstico o detergentes basicos (como lejia) por manchas difíciles, aclarando con agua. Fácil de limpiar: los únicos productos que pueden dañar la superficie son aquellos a base de ácido hidro y fluoruro.

Prodotto rivoluzionario, caldo e morbido al tatto, altamente resistente al graffio e al calore, è anti-impronta. La particolare durata del materiale e l'effetto vellutato, lo rende una superficie dall'appeal futuribile, perfetta per i progetti contemporanei, proponendo un prodotto piacevole e unico. Gli stratificati sono materiali di eccellente qualità per potenzialità funzionali ed estetiche: non ingialliscono, non aggregano muffe, sono resistenti all'umidità e al vapore acqueo, sono antistatici, autoestinguenti e ignifughi; sono inoltre idonei al contatto alimentare (D.M. 4/4/85 — G.U. n. 120 Cee 123, 11/05/1993).

Hpl Polaris is smooth and velvety to the touch, and its surface features are truly extraordinary: it is highly resistant to scratches and heat, as well as being anti-fingerprint. The curious combination of durability and velvet smoothness gives Hpl Polaris a futuristic appeal, making it the ideal choice for ultra-contemporary projects, delighting the senses with a pleasant and unique effect. Hpl Polaris is a top quality material for its functional and aesthetic peculiarities: it does not turn yellow, does not aggregate molds, it is resistant to moisture and water vapor, antistatic, flame retardant and fire resistant; it is also suitable for food contact (Ministerial Decree 04/04/85 — Official Gazette no. 120 Cee 123, 11.05.1993).

Hpl Polaris est un produit révolutionnaire, chaud et doux au toucher. Doté de caractéristiques de surface extraordinaires, il est hautement résistant aux rayures et à la chaleur, il est aussi anti-traces de doigts. La curieuse combinaison de sa durabilité et de son aspect velouté donne un attrait futuriste à Hpl Polaris ce qui en fait le choix idéal pour les projets ultra contemporains,

Impiegato per la realizzazione delle doghe di piatti e vasche doccia e dei frontali cassetto Unico.

Used for the construction of shower tray and shower-bathtub slats and Unico front drawers.

Utilisé pour la construction des lattes pour receveur, baignoire-douche et façades des tiroirs Unico.

Wird für die Konstruktion der Latten für Duschtasse und Dusch-Badewanne sowie für die Schubladenfronten von Unico verwendet.

Se utiliza para la construcción de los listones para el plato de ducha, bañera-duche y frentes de cajones Unico.

satisfaisant les sens par ses effets agréable et unique. Le stratifié Hpl Polaris est un matériau d'excellente qualité, fonctionnel et esthétique: il ne jaunit pas, empêche le développement de moisissures, il est résistants à l'humidité, à la vapeur d'eau, antistatique, ignifugé et résistant au feu; Il est également approprié pour le contact alimentaire (décret ministériel 04.04.85 — Journal officiel n. 120 Cee 123, 11.05.1993).

Hpl Polaris ist ein revolutionäres Produkt, warm mit angenehmer Oberfläche. Mit erstaunlicher Oberflächenmerkmalen, es ist sehr beständig gegen Kratzer und Hitze, auch gegen Fingerabdrücke. Die besondere Kombination seiner Haltbarkeit und seiner samtigen Oberfläche verleiht Hpl Polaris einen futuristischen Appell; es wird die ideale Wahl für ultramoderne Projekte, die Befriedigung der Sinne mit seinen schönen und einzigartigen Effekten. Hpl Polaris ist ein qualitativ hochwertiges, funktionales und ästhetisches Material: es vergilbt nicht, verhindert Schimmelwachstum, es ist resistent gegen Feuchtigkeit, Wasserdampf, antistatisch, flammhemmend und feuerbeständig; Es eignet sich auch für den Lebensmittelkontakt (Ministerialerlass vom 04.04.85 — Amtsblatt Cee 120 123, 11.05.1993).

Hpl Polaris es un producto revolucionario, cálido y suave al tacto, con características extraordinarias: es antihuella y altamente resistente a las rayas y al calor. La curiosa combinación de durabilidad y suavidad convierte a Hpl Polaris en una superficie de atractivo futurible, ideal para proyectos ultracontemporáneos, que colma los sentidos con un efecto agradable y único. Estratificado fenolico es un material de excelente calidad y con grandes potencialidades funcionales y estéticas. El Hpl

Polaris es un material de alta calidad, funcional y estético: no lo hace amarillo, impide el crecimiento de moho, es resistente a la humedad, el vapor de agua, ignífugo y antiestático resistente al fuego; también es adecuado para el contacto con alimentos (Decreto Ministerial 04/04/85 — Diario Oficial Cee 120 123, 05.11.1993).

Pulizia
Materiale compatto e non poroso, straordinariamente igienico, facilmente pulibile, resistente allo sviluppo di virus e batteri.

Cleaning
Compact and non-porous, exceedingly hygienic, easy to clean, resistant to the development of viruses and bacteria.

Nettoyage
Compact et non poreux, extrêmement hygiénique, facile à nettoyer, résistant au développement des virus et des bactéries.

Reinigung
Kompakt und porenfrei, sehr hygienisch, leicht zu reinigen, resistent gegenüber der Entwicklung von Viren und Bakterien.

Limpieza
Compacto y no poroso, muy higiénico, fácil de limpiar, resistente al desarrollo de virus y bacterias.

L'acciaio appartiene alla famiglia dell'acciaio inox, lega a base di ferro e carbonio che si unisce alle proprietà meccaniche tipiche degli acciai al carbonio e si caratterizza per la resistenza alla corrosione. Tale acciaio garantisce il massimo livello di igienicità, eco-compatibilità e durevolezza, in quanto, per le sue caratteristiche intrinseche, è ridotto ai minimi termini il processo di deterioramento.

The steel belongs to the family of stainless steel, alloy based on iron and carbon which joins the typical mechanical properties of carbon steels, and is characterized by the resistance to corrosion. Such a steel provides the highest level of hygiene, eco-compatibility and durability, as, due to its inherent characteristics, the deterioration process is reduced to its minimal expression.

L'acier appartient à la famille de l'acier inoxydable, un alliage à base de fer et de carbone qui allie les propriétés mécaniques typiques des aciers au carbone, et est caractérisé par sa résistance à la corrosion. Un tel acier offre le plus haut niveau d'hygiène, l'éco-compatibilité et la durabilité, en outre, en raison de ses caractéristiques intrinsèques, le processus de détérioration est réduit à sa basse expression.

Der Stahl gehört zur Familie von rostfreiem Stahl, einer Legierung auf Basis von Eisen und Kohlenstoff, die die typischen mechanischen Eigenschaften von Kohlenstoffstählen verbindet, und ist gegen Korrosion beständig. Ein solcher Stahl bietet ein Höchstmaß an Hygiene, Umweltkompatibilität und Haltbarkeit. Aufgrund seiner inhärenten Eigenschaften ist es absolut langlebig.

Impiegato per la realizzazione della rubinetteria, degli accessori e dei profili doccia.

Used for the production of taps and fittings, accessories and shower profiles.

Utilisé pour la fabrication de robinetterie, accessoires et profils de douche.

Wird für die Herstellung von Armaturen, Zubehör und Dusche-Profile verwendet.

Se utiliza para la producción de grifos y accesorios y perfiles de ducha.

El acero pertenece a la familia de acero inoxidable, aleación a base de hierro y carbono que se une a las propiedades mecánicas típicas de los aceros al carbono, y se caracteriza por la resistencia a la corrosión. Un acero de este tipo proporciona el más alto nivel de higiene, eco-compatibilidad y durabilidad, y a que, debido a sus características inherentes, se reduce a un mínimo el proceso de deterioro.

Pulizia
Per la pulizia utilizzare acqua e sapone neutro o detergenti blandi; da evitare candeggina o disinfettanti che la contengano.

Cleaning
Clean with water and mild soap or mild detergent; avoid bleach or disinfectants that contains it.

Nettoyage
Nettoyer à l'aide d'eau et de savon doux ou un détergent doux ; éviter l'eau de Javel ou des désinfectants qui en contiennent.

Reinigung
Reinigen mit Wasser und einer milden Seife oder einem milden Reinigungsmittel; Desinfektionsmittel die Bleichmittel enthalten, sind zu vermeiden.

Limpieza
Limpiar con agua y jabón o detergente suave; evitar el blanqueo o desinfectantes que lo contienen.

Impiegato per la realizzazione
dei top integrati e lavabi.

Used for the realization of integrated
top and washbasins.

Utilisé pour la réalisation
de plans intégrés et vasques.

Wird für die Produktion von integrierten
Waschbecken und Waschbecken verwendet.

Se utiliza para la realización
de la lavabo integrados y lavabos.

I Marmi e i Graniti selezionati
offrono la possibilità di inserire
in casa materiali naturali con toni
abbinabili alle collezioni bagno.
Il Marmo bianco di Carrara lascia
trasparire un leggero grigio chiaro
che si scurisce nelle venature.
I marmi: Carrara, Grigio Veneto
opaco, Grigio Carnico opaco
ed Emperador sono caratterizzati
da venature. Sulla superficie
dei marmi sono presenti delle
porosità. Il Nero Assoluto è un
Granito naturale nero, resistente,
con un bassissimo assorbimento
e una texture uniforme contenente
piccoli elementi in avorio.

Marbles and Granites selected
offer the opportunity to incorporate
natural materials at home with
tones matching the bathroom
collections. The white Carrara
marble reveals a light gray which
darkens in the grail. The marbles:
Carrara, Grigio Veneto mat, Grigio
Carnico mat and Emperador
are characterized by their veins.
Porosity can be seen on the
surface of marbles. The Nero
Assoluto is a natural black granite,
resistant, with very low absorption
and a uniform texture containing
small items made of ivory.

Marbres et granits sélectionnés
offrent la possibilité d'insérer
chez soi des matériaux naturels
avec des tons correspondants
aux collections de salle de bains.
Le marbre blanc de Carrare
révèle un gris clair qui obscurcit
dans le veinage : Le marbre :
Carrara, Grigio Veneto mat, Grigio
Carnico mat et Emperador se
caractérisent par leurs veines.
Sur la surface des marbres il est
possible de percevoir la porosité.
Le granit Nero Assoluto noir est
un produit naturel, durable, avec
une très faible absorption et
une texture uniforme contenant
de petites parties en ivoire.

Recycling

Pulizia

Pulire la superficie con acqua e detergenti
neutri. I piani vengono trattati con un prodotto
specifico (olio/idrorepellente) per migliorare le
caratteristiche di resistenza all'assorbimento.
È consigliabile trattare il piano con prodotti
protettivi almeno una volta all'anno.

Cleaning

Clean the surface with water and mild
detergents. The plans are treated
with a specific product (oil/water-
repellent) to improve the characteristics
of resistance to the absorption. It is
recommended to treat the top with
protective products at least once a year.

Nettoyage

Nettoyer la surface avec de l'eau et des
détergents doux. Les plans sont traités avec
un produit spécifique (huile/produit hydrofuge)
pour améliorer les caractéristiques de
résistance à l'absorption. Il est recommandé
de traiter le plan avec des produits de
protection au moins une fois par année.

Reinigung

Reinigen Sie die Oberfläche mit Wasser
und einem milden Reinigungsmittel.
Die Platten werden mit einem bestimmten
Produkt (Öl/Dichtmittel) behandelt, um
die Eigenschaften der Beständigkeit gegen
die Absorption zu verbessern. Es wird
empfohlen, die Platte mit Schutzprodukten
mindestens einmal im Jahr zu behandeln.

Limpieza

Limpiar la superficie con agua y detergentes
suaves. Las encimeras son tratadas con
un producto específico (aceite/sellante)
para mejorar las características de
resistencia a la absorción. Se recomienda
tratar la encimera con productos de
protección al menos una vez al año.

Impiegato per la realizzazione dei cavalletti
Esperanto, sgabelli, panche, separé.

Used for the construction of Esperanto
easels, stools, benches, screens.

Utilisé pour la construction des chevalets,
tabourets, bancs et paravents Esperanto.

Wird für die Produktion von
Esperanto Staffeleien, Hocker,
Bänke und Séparée verwendet.

Se utiliza para la construcción de Esperanto
caballetes, taburetes, bancos, cabinas.

Il frassino appartiene alla categoria
delle essenze semidure
ed ha un'apprezzabile resistenza
meccanica. Panche, sgabelli
e cavalletti sono realizzati
in frassino massiccio tinto olmo.

Ash belongs to the category
of semi-hard wood and has an
appreciable mechanical strength.
Benches, stools and easels are
made of elm stained solid ash.

Le frêne appartient à la catégorie
des bois semi-dur et a une
résistance mécanique appréciable.
Bancs, tabourets, chevalets
et paravents sont réalisés en
frêne massif teinté orme.

Esche gehört zu der Kategorie
von den halbharten Hölzern und
hat eine nennenswerte Festigkeit.
Bänke, Hocker und Staffeleien sind
auf Ulme gefärbte massive Esche.

El fresno pertenece a la categoría
de las maderas semiduras y
con un grado apreciable de
resistencia. Bancos, taburetes
y caballetes están realizados
de frasno masizo teñida olmo.

Pulizia

Per la pulizia utilizzare regolarmente
un panno asciutto o leggermente umido.

Cleaning

For regular cleaning use a dry
or slightly damp cloth.

Nettoyage

Pour un nettoyage régulier, utilisez
un chiffon sec ou légèrement humide.

Reinigung

Für die regelmäßige Reinigung, ein trockenes
oder leicht feuchtes Tuch benutzen.

Limpieza

Para la limpieza regular utilizar un
pañó seco o ligeramente húmedo.

Impiegato per la realizzazione dei rivestimenti
delle pareti, non ha funzione portante.

Used for the realization of walls paneling,
it does not have a carrying capacity.

Utilisé pour la réalisation de revêtements
de parois, sans fonction portante.

Verwendet für die Produktion von
Wandverkleidung, es hat keine tragende Funktion.

Se utiliza para la realización de revestimientos
de paredes y no tiene una función portante.

Mattoni di terra cruda stampati
a mano ed essiccati ad umidità
e temperatura controllata
costituiti da argilla, limo,
sabbia e fibre vegetali.

Hand made clay bricks and dried
out with controlled moisture
and temperature made of clay,
silt, sand and vegetal fibers.

Briques en argile réalisée à la
main et séchées à humidité et
température contrôlées constitué
de fibres d'argile, de limon, de
sable et de fibres végétales.

Handgefertigte Lehmziegeln
getrocknet mit gesteuerter
Feuchtigkeit und Temperatur,
bestehend aus Ton, Schluff,
Sand und Pflanzenfasern.

Ladrillos de Arcilla acabado
a mano y secado a humedad
y temperatura controlada que
consiste en fibras de arcilla,
limo, arena y fibras vegetales.

Pulizia

Per la pulizia ordinaria consigliamo
un detergente universale multiuso.
Per eliminare il calcare si consiglia
un detergente spray anticalcare
multisuperficie.

Cleaning

For routine cleaning we recommend
a multi-purpose cleaner. For descaling
we recommend a multisurface descaler-spray.

Nettoyage

Pour le nettoyage de routine, nous
recommandons un nettoyeur multi-usage.
Pour le détartrage, nous recommandons
un spray anticalcaire multi-surfaces.

Reinigung

Für die Routinereinigung empfehlen
wir einen mehrzweck -Allzweckreiniger.
Zur Entkalkung empfehlen wir einen
mehrzweck Entkalker-Spray.

Limpieza

Para la limpieza de rutina se recomienda
un limpiador multiuso.
Para la descalcificación se recomienda
un desincrustante para múltiples superficies.

Impiegato per la realizzazione di top e vasche.

Used for the construction
of tops and bathtubs.

Utilisé pour la construction
des plans et baignoires.

Verwendet für die Konstruktion
der Tops und Waschbecken.

Se utiliza para la construcción
de la parte encimeras y bañeras.

Materiale composito, in cui la massa interna, costituita dalla combinazione tra un minerale naturale e una resina poliestere, viene rivestita da un film superficiale di resina acrilica/ poliestere di altissima qualità, che gli conferisce un’ottima resistenza chimico-fisica durevole nel tempo, un’assoluta impermeabilità e igiene nell’uso quotidiano, delle proprietà antibatteriche, ignifughe e di autoestinguenza. Nel Gelcoat opaco il film di rivestimento dona una finitura superficiale che lo rende elegante e piacevole al tatto, mentre nel Gelocat lucido gli conferisce una lucentezza superficiale che lo rende molto simile al materiale ceramico.

Composite material, in which the internal mass, formed by the combination of a natural mineral and a polyester resin, is coated with a surface film of acrylic resin/high-quality polyester, which provides an excellent durable physical chemical resistance over time, water resistance and hygiene in daily use, antibacterial properties, flame retardant and self-extinguishing. In the mat Gelcoat, film coating gives a surface finish that makes it elegant and pleasant to the touch, while the glossy Gelocat has a surface sheen that makes it very similar to the ceramic material.

Matériau composite dans lequel la masse interne, constitué d'une combinaison de minéral naturel et d'une résine de polyester, est revêtue d'une couche superficielle de résine acrylique/polyester de haute qualité, qui lui confère une excellente résistance physique et chimique durable avec le temps, étanchéité et l'hygiène dans l'utilisation quotidienne, propriétés antibactériennes, ignifugées et d'auto-extinction. Le revêtement en film Gelcoat mat donne une finition qui le rend élégant et agréable au toucher, tandis que le Gelocat brillant lui donne un éclat de surface qui le rend très similaire à la céramique.

Verbundmaterial, in dem die Brennmasse, gebildet durch eine Mischung von einem natürlichen Mineral und einem Polyesterharz mit einer Oberflächenschicht aus Acrylharz/hochwertigem Polyester beschichtet, daß es eine ausgezeichnete haltbare physikalische chemische Beständigkeit über die Zeit verleiht, eine Wasserfestigkeit und Hygiene im täglichen Gebrauch, antibakterielle Eigenschaften, schwer entflammbar und selbstverlöschend. In der Gelcoat mat die Folienbeschichtung ergibt eine Oberfläche, die es elegant und angenehm zu berühren ist, während die glänzende Gelocat es eine Oberfläche Glanz verleiht, dass es sehr ähnlich mit der Keramik macht.

Material compuesto, en el que la masa interna, formada por la combinación de un mineral natural y una resina de poliéster, se recubre con una película superficial de resina de acrílico/ poliéster de alta calidad, lo que le da una excelente resistencia química física durable en el tiempo, una impermeabilidad y higiene en el uso diario, propiedades antibacterianas, ignifugo y autoextinguible. El recubrimiento de película gelcoat mate le da un acabado de superficie elegante y agradable al tacto, mientras el Gelocat brillante le da un brillo de la superficie que lo hace muy similar a la cerámica.

Pulizia

Per una facile manutenzione e un duraturo utilizzo di un lavabo o di un piano, pulire la superficie con acqua tiepida e detergente delicato, usando un panno o una spugna morbidi, umidi. Risciacquare bene la superficie e asciugate quindi con un panno morbido. Per il Gelcoat lucido si raccomanda di evitare l'uso di detergenti e spugne abrasive. — Nel caso di macchie causate da acqua ricca di calcare, da saponi o da prodotti minerali, pulire con un detergente anticalcare (es.: aceto, Cif anticalcare). Terminare la pulizia risciacquando con acqua tiepida e asciugare con un panno morbido. — Nel caso di macchie di altra natura (pennarello, rossetto, grassi, residui di cibo, etc.) pulire con un detergente a base di ammoniaca (es.: Cif). Terminare la pulizia risciacquando con acqua tiepida e asciugare con un panno morbido.

Cleaning

For easy maintenance and long-term use of a sink or top, clean the surface with warm water and mild detergent, using a wet soft cloth or sponge. Rinse the surface and then dry with a soft cloth. For the glossy gelcoat it is recommended to avoid the use of cleaning agents and abrasive sponges. — In case of stains caused by water that contains limestone, soaps or mineral products, clean with a descaling detergent (eg: vinegar, Cif, descaler). Finish cleaning by rinsing with warm water and dry with a soft cloth. — In the case of other types of stains (felt pen, lipstick, grease, food residues, etc.) clean with ammoniac-based cleaning agent (eg: Cif). Finish cleaning by rinsing with warm water and dry with a soft cloth.

Nettoyage

Pour faciliter l'entretien et l'utilisation à long terme d'un lavabo et d'un plan, nettoyer la surface avec de l'eau chaude et un détergent doux, en utilisant un chiffon doux ou une éponge humide. Rincer la surface, puis sécher avec un chiffon doux. Pour le Gelcoat brillant nous recommandons d'éviter l'utilisation d'agents de nettoyage et d'éponges abrasives. — Dans le cas de taches causées par l'eau riche en calcaire, de savons ou de produits minéraux, nettoyer avec un détergent détartrant (par exemple: le vinaigre, Cif anticalcaire). Terminer le nettoyage par un rinçage à l'eau tiède et séchez avec un chiffon doux. — Dans le cas des autres types de taches (feutre, rouge à lèvres, graisse, résidus alimentaires, etc.) nettoyer avec un agent de nettoyage à base d'ammoniac (par exemple: Cif). Terminer le nettoyage par un rinçage à l'eau tiède et séchez avec un chiffon doux.

Reinigung

Für eine einfache Wartung und langfristige Nutzung eines Waschbeckens oder einem Top, reinigen Sie die Oberfläche mit warmem Wasser und einem milden Reinigungsmittel mit einem weichen nassem Tuch oder Schwamm. Spülen Sie die Oberfläche und dann mit einem weichen Tuch trocknen. Für die glänzende Gelcoat wird es empfohlen, die Verwendung von Reinigungsmitteln und Scheuerschwämme zu vermeiden. — Im Falle Flecken, die von Wasser reich an Kalkstein, Seifen oder Mineralprodukte verursacht werden, reinigen mit einer Entkalkungsmittel (zB: Essig, Cif Entkalker). Beenden der Reinigung mit warmem Wasser und trocknen mit einem weichen Tuch. — Im Fall von anderen Arten von Flecken (Filzstift, Lippenstift, Fett, Speisereste, etc.) mit ammoniakhaltigen Reinigungsmittel reinigen (zB: Cif). Beenden der Reinigung mit warmem Wasser und trocken mit einem weichen Tuch.

Limpieza

Para facilitar el mantenimiento y el uso a largo plazo de un fregadero o un encimera, limpiar la superficie con agua tibia y un detergente suave, usando un paño suave o una esponja húmeda. Enjuague la superficie y después secarla con un paño suave. Para la capa de gel brillante se recomienda evitar el uso de productos de limpieza y esponjas abrasivas. — En el caso de las manchas causadas por el agua rica en piedra caliza, jabones o productos minerales, limpiar con un detergente desincrustante (por ejemplo: vinagre, Cif desincrustante). Terminar la limpieza con agua tibia y seque con un paño suave. — En el caso de otros tipos de manchas (rotulador, lápiz de labios, grasa, restos de comida, etc.) limpiar con productos de limpieza a base de amoniaco (por ejemplo: Cif). Terminar la limpieza con agua tibia y seque con un paño suave.

Impiegato per la realizzazione di mobili e top.

Used for the realization of furniture and tops.

Utilisé pour la réalisation des
meubles et des plans.

Wird für die Produktion von Möbeln und Top.

Se utiliza para la realización de los
muebles y de la encimeras.

Materiale esclusivamente in finitura Extralight disponibile nello spessore 10 mm nelle finiture superficiali lucida o opaca. Può fungere da semplice top, oppure essere dotato di una vasca termoformata direttamente nello spessore del top. Duro e resistente, ma allo stesso tempo fragile, può essere danneggiato da forti colpi o da cadute di oggetti su di esso. In generale la superficie del top è molto resistente agli acidi, ma la vernice potrebbe essere attaccata da un prolungato contatto con sostanze acide e basiche: pertanto si sconsiglia la pulizia della parte verniciata, si raccomanda inoltre di evitare bruschi cambiamenti di temperatura e di non superare mai la temperatura di utilizzo di 60°C.

Only Extralight material finish available in 10 mm thickness, surface finish gloss or mat. It can be used as a simple top or be equipped with a thermoformed washbasin directly in the thickness of the top. Hard and tough, but at the same time fragile, it can be damaged by strong hits or falling objects. In general, the top surface is very resistant to acids, but the paint could be attacked by prolonged contact with acid and basic substances: therefore, we do not recommend cleaning the lacquered surface, it is also recommended to avoid abrupt changes in temperature and temperatures exceeding 60°C.

Finition Extralight disponible en 10 mm d'épaisseur, finition de surface brillante ou mate. Disponible comme plan simple, ou équipé d'un lavabo thermoformé directement dans l'épaisseur du plan. Dur et résistant, mais en même temps fragile, il peut être endommagé par des coups ou la chute d'objets. En général, la surface supérieure est très résistante aux acides, mais la peinture pourrait être attaqué par un contact prolongé avec des produits acides ou basics : nous ne conseillons pas le nettoyage de la surface laquée, il est également recommandé d'éviter les changements brusques de température et ne jamais pas dépasser la température d'utilisation de 60°C.

Erhältlich mit Extralight Oberfläche in 10 mm Stärke, Oberfläche glänzend oder matt. Es kann als einfache Platte verwendet werden, oder mit einem tiefgezogenen Waschbecken direkt in der Stärke der Platte ausgestattet werden. Hart und zäh, aber zugleich zerbrechlich, kann es durch starke Schläge oder fallende Gegenstände beschädigt werden. Im Allgemeinen ist die Oberfläche sehr beständig gegen Säuren, aber die Farbe könnte durch einen längeren Kontakt mit sauren und basischen Substanzen angegriffen werden: daher es ist nicht empfohlen die lackierte Oberfläche zu reinigen. Es wird auch empfohlen abrupte Temperaturänderungen zu vermeiden und nie die Gebrauchstemperatur von 60°C. zu übersteigen.

Acabado Extralight disponible en 10 mm de espesor, acabado de superficie brillante o mate. Disponible como encimera o equipado con un lavabo termoformado directamente en el espesor de la encimera. Duro y resistente, pero al mismo tiempo frágil, puede resultar dañado por golpes fuertes o caída de objetos. En general, la superficie superior es muy resistente a los ácidos, pero la pintura podría ser atacada por el contacto prolongado con productos ácidos y basicos: por lo tanto, no recomendamos la limpieza de la superficie pintada, también se recomienda evitar los cambios bruscos de temperatura y no exceder nunca la temperatura de uso de 60°C.

Pulizia

Per la pulizia non usare prodotti acidi (anticalcare) o basici (candeggina, soda caustica). Impiegare normali prodotti per la pulizia del vetro (Glassex, Vetril o altro) o detergenti a pH neutro. Non sono indicate creme abrasive o prodotti per la pulizia contenenti sostanze acide: eccezionalmente possono essere impiegati prodotti anticalcare applicandoli esclusivamente alla superficie del vetro facendo attenzione a non farli venire in contatto con la laccatura.

Cleaning

For cleaning do not use acid (descaler) or basic (bleach, caustic soda) products. Use normal products for cleaning glass (Glassex, Windex or other) or neutral pH detergent. Do not use abrasive creams or cleaning products containing acidic substances, decalcifiers may exceptionally be used applying them only to the glass surface being careful not to let them come in contact with the lacquer.

Nettoyage

Pour le nettoyage ne pas utiliser de produits acides (anticalcaire) ou basiques (eau de javel, soude caustique). Utilisez des produits normaux pour le verre (Glassex, Windex ou autre) ou détergent à pH neutre. Eviter les crèmes abrasives ou les produits de nettoyage contenant des substances acides ; les détartrants peuvent exceptionnellement être utilisés. A condition qu'ils soient appliqués uniquement sur la surface du verre en faisant attention de ne pas les laisser entrer en contact avec la laque.

Reinigung

Zur Reinigung keine Säureprodukte (Entkalker) verwenden oder einfach (Bleiche, Natronlauge). Normale Produkte zur Reinigung von Glas (Glassex, Windex oder andere) oder neutralen pH-Reinigungsmittel benutzen. Schleif Cremes oder Reinigungsmittel, die sauren Substanzen enthalten sind nicht geeignet, ausnahmsweise können Entkalker nur auf die Glasoberfläche verwendet werden. Bitte aufpassen dass er nicht mit dem lackierten Rückseite in Berührung kommt.

Limpieza

Para la limpieza no utilizar productos ácidos (desincrustante) o básicos (lejía, sosa cáustica). Utilizar productos de limpieza para el cristal (Glassex, Windex u otro) o detergente de pH neutro. No son adecuadas cremas abrasivas o productos de limpieza que contengan sustancias ácidas; puede utilizarse excepcionalmente descalcificadores aplicandolos sólo a la superficie de vidrio con cuidado de no dejar que entren en contacto con la laca.

Recycling

Glass

Impiegato per la realizzazione delle chiusure doccia.

Used for the construction of shower enclosures.

Utilisé pour la construction de cabines de douche.

Wird für den Bau von Duschabtrennungen verwendet.

Se utiliza para la construcción de box de ducha.

Vetro per chiusure doccia si ottiene tramite la solidificazione di un liquido viscoso, ottenuto per fusione di minerali cristallini. Il vetro per le chiusure è temperato e trattato con anticalcare. Disponibile nei colori: — Float, con la sua caratteristica colorazione verde; — Colorato in pasta, l'aggiunta di elementi naturali ne caratterizzano il colore; — Extralight, incolore poiché nel processo di produzione vengono ridotte le percentuali di ferro che conferiscono il tipico colore verde al vetro Float.

Glass for shower enclosures; it is obtained through the solidification of a viscous liquid, obtained by melting of crystalline minerals. The glass is tempered for enclosures and treated with a descaler. Available in the colors: — Float, with its distinctive green coloring; — Paste colored, the addition of natural elements characterizes the color; — Extralight, colorless as in the production process the iron percentages that give the typical green color to Float glass are reduced.

Verre pour cabines de douche obtenu par la solidification d'un liquide visqueux et par fusion des minéraux cristallins. Le verre est trempé pour les cloisons et traité avec des anticalcaires. Disponible dans les coulors: — Float, avec sa couleur verte distinctive ; — Coloré en pate, l'ajout d'éléments naturels caractérisent la couleur; — Extralight, incolore car dans le processus de production, les pourcentages de fer typique du verre Float sont réduits.

Glas für Duschkabinen wird durch die Verfestigung einer viskosen Flüssigkeit und Schmelzen von kristallinen Mineralien erhalten.

Das Glas ist für Abtrennungen temperiert und mit einem Entkalker behandelt. Erhältlich in den Farben: — Float, mit seiner unverwechselbaren grünen Färbung; — Paste gefärbt, die Zugabe von natürlichen Elementen charakterisieren die Farbe; — Extralight, farblos, im Produktionsprozess werden die Anteile von Eisen des Floatglases reduziert.

El cristal para mamparas de ducha se obtiene a través de la solidificación de un líquido viscoso, obtenido por fusión de los minerales cristalinós. El vidrio se temple para mamparas y esta tratado con desincrustante. Disponible en los colores: — Float, con su color verde característico; — Colororado en pasta, con la adición de elementos naturales que caracterizan el color; — Extralight, incolora; en el proceso de producción se reducen de los porcentajes típicos del cristal flotado.

Pulizia

Per la pulizia utilizzare i comuni detergenti per il vetro; scegliere dei panni in microfibra per l'asciugatura, in quanto garantiscono una pulizia accurata e senza aloni.

Cleaning

To clean, use common glass cleaners; microfiber cloths for drying, as they ensure a thorough cleaning without streaks.

Nettoyage

Pour nettoyer, utiliser des nettoyeurs pour vitres ; choisir des chiffons en microfibres pour le séchage, car ils assurent un nettoyage en profondeur sans laisser de traces.

Reinigung

Verwenden Sie zum Reinigen übliche Glasreiniger; zum Trocknen wählen Sie ein Baumwolltuch, das eine gründliche Reinigung und ohne Streifen gewährleistet.

Limpeza

Para limpar, use limpiadores de vidrios comunes; elejir paños de microfibra para secar que aseguran una limpieza a fondo.

Impiegato per la realizzazione delle finiture dei mobili.

Used for the realization of the finish of furniture.

Utilisé pour la réalisation de la finition des meubles.

Verwendet für die Ausführung der Möbel.

Se utiliza para la realización de los acabados de los muebles.

Pannello di fibra di legno, colorata in massa. Le fibre sono impregnate di coloranti organici e chimicamente legate tra loro da una resina speciale che conferisce all'HDF caratteristiche fisiche e meccaniche uniche. La verniciatura avviene tramite resine poliesteri: 100 gr/m² di opaco.

Wood fiber panel colored in mass. The fibers are impregnated with organic dyes and chemically bound to each other by a special resin which confers the HDF unique physical and mechanical characteristics. The varnishing is done with polyester resins: 100 gr/m² opaque.

Panneau de fibres de bois coloré dans la masse. Les fibres sont imprégnées avec des colorants organiques et chimiquement liés les uns aux autres par une résine particulière, qui confère les caractéristiques physiques et mécaniques uniques au HDF. La laquage se fait par le biais de résines polyester : 100 gr/m² opaque.

Holzfaserplatte in der Masse gefärbt. Die Fasern werden mit organischen Farbstoffen imprägniert und chemisch durch ein spezielles Harz aneinandergebunden, die dem HDF einzigartige physikalischen und mechanischen Eigenschaften verleiht. Die Lackierung wird mit Polyesterharze getan: 100 gr/m² undurchsichtig.

Panel de fibra de madera coloreado en masa. Las fibras se impregnan con tintes orgánicos y químicamente unidos entre ellos por una resina especial que confiere las características físicas y mecánicas únicas HDF. La pintura se hace con resinas de poliéster: 100 gr/m² opaco.

Pulizia

Per la pulizia dell'HDF utilizzare un panno asciutto con normali detergenti neutri.

Cleaning

Clean the HDF using a dry cloth with neutral detergent.

Nettoyage

Nettoyer le HDF avec un chiffon sec et un détergent neutre.

Reinigung

Reinigen die HDF mi einem trockenen Tuch und einem neutralen Reinigungsmittel.

Limpeza

Limpiar del HDF con un paño seco y con un detergente neutro.

Impiegato per il rivestimento di pareti.

Used for the realisation of wall coating.

Utilisé pour la réalisation de revêtements de parois.

Verwendet für die Produktion von Wandverkleidung.

Se utiliza para la realización de revestimientos de paredes.

Fibra è il rivestimento per pavimenti e pareti, adatto anche alle zone doccia. Realizzato da una stuoia in fibra di vetro, materiale impiegato nell'edilizia antisismica è stampato con decori Rexa Design incollati con adesivo monocomponente all'acqua e protettivo superficiale. Fibra migliora le prestazioni strutturali, permette di minimizzare il rischio di distacco di componenti delle pareti in caso di sismi e di prolungare il tempo di evacuazione dagli edifici.

Fibra is realized with fiberglass paper; material normally used for anti-seismic building industries, is printed with Rexa Design decorations, then glued with adhesive stick and finished with a protection coat. Fibra permits to minimize the risk of the detachments of the elements that compose the wall in case of earthquakes and to have more time for the evacuation from the buildings.

Il est réalisé par une feuille d'osier en fibre de verre, il est un matériau utilisé pour les industries de construction anti-sismiques et il est imprimé avec des décorations Rexa Design, collé avec de la colle adhésive mono-composant à l'eau et une protection de surface. Fibra qui allie les performances structurelles lesquelles permettent de réduire au minimum le risque de décollement des composants des parois dans le cas des tremblements de terre et par conséquent de prolonger la durée de l'évacuation de bâtiments.

Es ist durch eine Glasfadenmatte hergestellt. Dieses Material wird auch in der Erdbbensicherung benutzt. Es ist mit Rexa Design Dekorationen gedruckt und mit Wasserklebstoff angelegt. Fibra verbässert die Bauteile und es verniedlicht die Loslösung der Elemente im Erdbebenfall.

Producido por una estera de fibra de vidrio, un material utilizado por construcciones antisismica, tiene imprimidas decoraciones Rexa Design, y está encolada con adhesivo a base de agua y un protector de superficie. La fibra mejora el rendimiento estructural, permite minimizar el riesgo de desprendimiento de los componentes de las paredes en el caso de terremotos y para prolongar el tiempo de evacuación de los edificios.

Pulizia

Per la pulizia utilizzare normali detergenti neutri senza solventi.

Cleaning

For a daily cleaning use a damp cloth with neutral soap.

Popreté

Pour le nettoyage quotidien utiliser un chiffon humide avec savon neutre.

Reinigung

Reinigen Sie mit einem feuchten Tuch und verwenden Sie ein mildes Reinigungsmittel.

Limpiadura

Para la limpieza diaria con un paño húmedo con jabón suave.

Realizzati in pannelli di particelle di legno medium-density laccato con tecniche diverse in funzione della finitura. La laccatura è realizzata artigianalmente, quindi eventuali sfumature, punti o differenze di tonalità rispetto ai campioni non sono contestabili.

Realized from panels made of medium-density wood particles and lacquered with different methods depending on the finishes. Laquering is handmade so eventual shading, spots or tone differences compared to sample provided by us cannot give rise to disputes.

Réalisés avec de panneaux en particules de bois de moyenne densité et laqués avec des méthodes différentes qui dépendent des finitions. Le laquage est réalisé à la main, par conséquent toutes ombres, petits points ou différence dans la tonalité de la couleur par rapport à l'échantillon ne peut donner lieu à aucune réclamation.

Die Lackarbeit wird mit medium-density HolbBretter hergestellt, mit veschiedenen Techniken. Die Lackierung wird händisch ausgeführt, daher kann es zu Schattierungen oder Tondifferenzen im Vergleich zum Muster Kommen. Dies kann keine Begründung für Reklamationen sein.

Realizados en panelos de partículas de madera medium-density lacada con técnicas diferentes segundo el acabado. El lacado se hace artesanalmente, por lo que, posibles ombras, puntos o diferencias de tonalidad respecto al muestrario suministrado no podrán ser motivo de reclamaciòn.

Pannello di fibra di legno a media densità, laccato con vernici poliuretaniche, antingiallenti con effetto testurizzato opaco a grana fine. La verniciatura avviene tramite resine poliesteri, 120 gr/m² di colore.

Polyurethane anti-yellow varnishes with mat fine-grailed texture effect. The lacquer is made by polyester resins, 120 gr/m².

Polyuréthane vernis anti-jaune avec un effet texture mat à grail fin. La laque est effectuée par des résines de polyester, 120 gr/m².

Polyurethanischer unvergilblicher Lack mit mattem Gewebemuster Effekt. Die Lackierung enthält Polyesterharz 120 gr/m².

Bernizes poliuretánicas anti-amarillo con efecto textura mate con grano fino. La laca está fabricada con resinas de poliéster, 120 gr/m².

Impiegato per la realizzazione delle finiture dei mobili.

Used for the realisation of furniture Finishes.

Utilisé pour la réalisation de la finition des meubles.

Verwendet für die Ausführung der Möbel.

Se utiliza para la realización de los acabados de los muebles.

Pulizia
Per la pulizia del laccato opaco seta utilizzare un panno asciutto con normali detergenti neutri.

Cleaning
For the cleaning of matt lacquered use common neutral detergents.

Popreté
Pour le nettoyage de laque mat et brillant, utiliser un chiffon sec avec des détergents neutres communs.

Reinigung
Reinigen Sie die glänzende / matt Lackierte Oberfläche stets mit einem trockenen Tuch und einem milden Reinigungsmittel.

Limpiadura
Para hacer la limpieza de los lacados mate o billo utilice un trapo seco con normal crema limpiadora neutra.

Impiegato per la realizzazione delle finiture dei mobili.

Used for the realisation of furniture Finishes.

Utilisé pour la réalisation de la finition des meubles.

Verwendet für die Ausführung der Möbel.

Se utiliza para la realización de los acabados de los muebles.

Pannello di fibra di legno a media densità laccato con vernici poliuretaniche, antingiallenti con effetto lucido ottenuto da spazzolatura normale. La verniciatura avviene tramite resine poliesteri 400 gr/m² di colore, che poi vengono levigate, lucidate e brillantate.

Polyurethane varnishes, anti-yellow with a glossy effect obtained polishing it with apposite waxes. The varnishing is done by polyester resins: 400gr/m² polished, burnished and made it bright.

Vernis polyuréthane, anti-jaune avec un effet brillant obtenus par polissage avec des cires appropriée. Le vernissage se fait par des résines de polyester: 400 gr/m², poli, lissé et fait brillante.

Polyurethanischer unvergilblicher Lack mit glänzendem Effekt. Man erhält es durch Bürsten und den geeigneten Wachsen. Die Oberfläche wird mit Polyesterharz lackiert: drei 400 gr/m² Beschichtungen, glätten, aufpolieren und glänzend.

Bernizes poliuretánicas anti-amarillo con efecto brillo obtenido cepillando con ceras especiales. El barnizado se hace con resinas poliéster: 400 gr/m², cepilladas, dato el brillo y lustradas.

Pulizia
Per la pulizia del laccato lucido seta utilizzare un panno asciutto con normali detergenti neutri.

Cleaning
For the cleaning of glossy lacquered use common neutral detergents.

Popreté
Pour le nettoyage de laque mat et brillant, utiliser un chiffon sec avec des détergents neutres communs.

Reinigung
Reinigen Sie die glänzende / matt Lackierte Oberfläche stetst mit einem trockenen Tuch und einem milden Reinigungsmittel.

Limpiadura
Para hacer la limpieza de los lacados mate o billo utilice un trapo seco con normal crema limpiadora neutra.

Lacquered

Lacquered

Pannello classe E1 a bassissima emissione di formaldeide, fondo in poliestere. Laccatura Soft Touch, opaca, morbida al tatto, elastica e antiurto. La laccatura viene eseguita solo nel nelle superfici esterne di ante o vasche e lavabi realizzati in Korakril™ e Corian® con forme non squadrate, il lato interno è in laccato opaco liscio.

E1 Panel class with low formaldehyde emission, polyester primer. Soft Touch lacquer, mat, soft to the touch, elastic and impact resistant. The lacquering is performed only in the outer surfaces of the doors or tubs and washbasins made of Korakril™ and Corian® with no square shapes, the inner side is matt smooth.

Panneau classe E1 à faible émission de formaldéhyde, fond en polyester. Laque Soft Touch, mat, douce au toucher, élastique et résistante aux chocs. Le laquage est effectué uniquement sur les surfaces extérieures des portes, des baignoires et des lavabos en Korakril™ Corian® et sans arrêtes, la face intérieure est lisse et mate.

E1-Klasse Paneel mit niedriger Formaldehyd-Emission, Grundierung aus Polyester. Lackierung Soft Touch, matt, weichim Tastgefühl, elastisch und schlagfest. Die Lackierung erfolgt nur auf den Aussenflächen der Möbelfronten oder auf der Aussenseite der Badewannen und Waschtischen aus Korakril™ und Corian®. Die Innenseite ist matt glatt.

Panel de clase E1 con baja emisión de formaldehído, fondo en poliéster. Laca Soft Touch suave, mate, suave al tacto, elástica y resistente al impacto. El lacado se realiza sólo en las superficies exteriores de las puertas, bañeras y lavabos hechos de Korakril™ y Corian® sin formas cuadradas, el lado interior es mate liso.

Lacquered

Materiale innovativo, composto di resine e minerali naturali per superfici solide di pregio. Si applica a spruzzo sulle superfici, è un materiale atossico, omogeneo con elevata resistenza ai graffi.

It's a composite innovative material, made with resins and natural minerals in order to obtain a precious solid surface. It is paint-spraying on the surfaces, it's a non-toxic and uniform material, with an high resistance to the scratches.

C'est un matériau composite, innovante, à base de résines et de minéraux naturels afin d'obtenir une surface solide précieux. Il est un pulvérisation de peinture sur les surfaces, c'est un matériau non toxique et uniforme, avec une haute résistance aux rayures.

Es ist ein erneuertes Mischungsmaterial mit Harz und natürliche Mineralien. Dadurch erhält man eine feste und wertige Oberfläche. Es wird mit Spritzlack auf den Oberflächen angebracht. Es ist ein ungiftiges, gleichartiges und kratzfestes Material.

Es un material nuevo, compuesto de resinas y minerales naturales que permiten de obtener una supercicie sólida preciosa. Se aplica a pistola, no es toxico, es un material homogéneo con gran resistencia a los rasguños.

Lacquered

Impiegato per la realizzazione delle finiture dei mobili, di lavabi e vasche.

Used for the realisation of furniture Finishes.

Utilisé pour la réalisation de la finition des meubles.

Verwendet für die Ausführung der Möbel.

Se utiliza para la realización de los acabados de los muebles.

Pulizia

Per la pulizia dell'acrilico liquido utilizzare normali detergenti neutri, per sporco intenso utilizzare Kleany acquistabile da Rexa Design.

Cleaning
Use common neutral detergents, for resistant stains use Kleany, a product that you can buy from Rexa Design.

Popreté

Pour le nettoyage acrylique liquide, utiliser de détergents neutres communs, pour le taches résistantes utilisent Kleany, un produit que vous pouvez acheter chez Rexa Design.

Reinigung

Reinigen Sie die Acrylfinish Oberflächen mit milden Reinigungsmitteln, für Starkschmutz benutzen Sie Kleany in Rexa Design kaufbar.

Limpiadura

Liquido utilice cremas limpiadoras neutras, por machas más tenaces utilice Kleany, un producto que se puede comprar de Rexa Design.

Impiegato per la realizzazione delle finiture dei mobili.

Used for the realization of the furniture finish.

Utilisé pour la réalisation de la finition du meuble

Verwendet für die Oberflächenrealisierung der Möbel.

Se utiliza para la realización de los acabados de los muebles

Sistema di rivestimento innovativo, grazie al quale è possibile ottenere superfici continue, realizzare e produrre oggettistica e complementi d'arredo. Ha un ciclo applicativo completamente manuale, testato, collaudato e certificato. Non contiene cemento, calce e resina epossidica e presenta una buona resistenza alle macchie. Le imperfezioni e le imprecisioni estetiche non costituiscono un difetto, ma sono caratteristiche della lavorazione artigianale.

Innovative covering system, thanks to which you can obtain continuous surfaces, create and produce objects and furnishings. It has a completely manual application cycle, tested and certified. It does not contain cement, lime, epoxy resin and has good resistance to stains. The imperfections and aesthetic inaccuracies do not constitute a defect, but a result of artisanal workmanship.

Système de revêtement innovant, grâce à auquel vous pouvez obtenir des surfaces continues, créer et produire des objets et des meubles. L'argile a un cycle d'application entièrement manuel, testé et certifié. Il ne contient pas de ciment, de chaux et de résine époxy et présente une bonne résistance aux taches. Les imperfections et imprécisions esthétiques ne constituent pas un défaut, mais le résultat d'un système de fabrication artisanal.

Ein innovatives Beschichtungssystem, das zusammenhängende Flächen bei der Herstellung von Objekten und Möbeln im Wohnbereich ermöglicht. Das Auftragen der verschiedenen Anwendungen ist komplett manuell und dementsprechend getestet und zertifiziert. Es enthält kein Zement, Kalk und Epoxidharz und ist sehr beständig gegen Flecken. Die Unvollkommenheiten und visuellen Differenzen sind kein Defekt, sondern ein Ergebnis und Einzigartigkeit der handwerklichen Verarbeitung.

Sistema de revestimiento innovador, gracias a la cual se pueden obtener superficies continuas, crear y producir objetos y muebles. Tiene un ciclo de aplicación completamente manual, probado y certificado. No contiene cemento, cal y resina epoxi y tiene buena resistencia a las manchas. Las imperfecciones estéticas y inexactitudes no constituyen un defecto, sino el resultado de una fabricación artesanal.

Pulizia

Per la pulizia quotidiana si consiglia di usare un panno in microfibra con un detergente neutro multiuso che non contenga ammoniaca, non usare spugne abrasive o alcool che potrebbero lasciare aloni dovuti al colorante.

Pulizia straordinaria

I normali prodotti usati in bagno (dentifricio, sapone, bagnoschiuma, etc.) non danneggiano il piano, ma si consiglia di pulire sempre a macchia fresca. Per rimuovere il calcare usare un prodotto specifico o aceto di vino bianco, spruzzare, lasciare agire per qualche secondo e poi rimuovere con una spugna in microfibra. Per evitare residui importanti di calcare asciugare sempre la vasca dopo averla usata. Non usare sul piano prodotti acidi (es. acido muriatico) o altamente basici (es. soda caustica), tinta per capelli. Evitare l'uso di diluenti, solventi, alcool, candeggina o ammoniaca, se questo dovesse accadere rimuovere subito il prodotto. Acqua e vapore non danneggiano il piano, si consiglia comunque di non lasciare l'acqua stagnare in prossimità delle giunture – tra piano e muro – e di non concentrare per lungo tempo getti di vapore sul piano (es. Vaporella).

Cleaning

For daily cleaning, we recommend using a microfiber cloth with a multi-purpose neutral detergent that does not contain ammonia, do not use abrasive pads or alcohol that may leave marks due to the dye.

Special cleaning

The normal products used in the bathroom (toothpaste, soap, shower gel, etc.) will not damage the top, but you should always clean stains rapidly. To remove limescale deposits use a specific product or white wine vinegar, spray, leave for a few seconds and then remove with a microfiber sponge. To avoid important residues of limescale, always dry the tub after use. Do not use acid products on the top (eg. Hydrochloric acid) or highly basic (eg. Caustic soda), hair color. Avoid using thinners, solvents, alcohol, bleach or ammonia, if this were to happen immediately remove the product. Water and steam will not damage the top, it is advisable not to let water stagnate in the vicinity of joints - between floor and wall - and not use for a long time steam jets on the top.

Nettoyage

Pour le nettoyage quotidien, nous vous recommandons d'utiliser un chiffon en microfibre avec un détergent neutre à usages multiples qui ne contient pas d'ammoniaque, ne pas utiliser de tampons ou d'alcool abrasifs qui peuvent laisser des marques en raison du colorant.

Nettoyage spécial

Les produits normaux utilisés dans la salle de bain (dentifrice, savon, gel douche, etc.) ne sauront pas endommager le sol, mais il faut enlever les taches rapidement. Pour enlever les dépôts de calcaire utiliser un produit spécifique ou du vinaigre de vin blanc, pulvériser, laisser agir pendant quelques secondes, puis nettoyer avec une éponge en microfibre. Pour éviter des résidus importants de calcaire, sécher toujours la baignoire après utilisation. Ne pas utiliser de produits acides sur le plan (par exemple de l'acide chlorhydrique) ou très basique (par exemple de la soude caustique), teinture pour cheveux. Évitez d'utiliser des diluants, solvants, alcool, eau de Javel ou de l'ammoniac, si cela devait se produire immédiatement éliminer le produit. L'eau et la vapeur d'eau ne sauront pas endommager le plan, il est cependant conseillé de ne pas laisser stagner de l'eau à proximité des joints - entre le plan et le mur - et non pas l'exposer longtemps à un jet de vapeur.

Reinigung

Für die tägliche Reinigung, empfehlen wir ein Mikrofasertuch mit einem mehrzweck und neutralem Reinigungsmittel, das kein Ammoniak enthält. Keine Scheuerschwämme oder Alkohol verwenden; diese können eine Bleichung der Farbstoffe zur Folge haben.

Spezielle Reinigung

Die normalen Produkte, die im Badezimmer verwendet werden (Zahnpasta, Seife, Duschgel usw.) beschädigen die Abstellfläche nicht. Es wird jedoch empfohlen die frischen Verunreinigungen sofort zu entfernen. Um Kalkablagerungen zu entfernen, ein spezifisches Produkt oder weisser Weinessig aufsprühen, ein paar Sekunden wirken lassen und danach mit einem Mikrofaserschwamm reinigen. Um Kalkspuren zu vermeiden, die Wanne sofort nach dem Gebrauch trockenreiben. Keine säurehaltige- oder stark basische Produkte (zB. Ätznatron), sowie Haarfärbemittel auf der Abstellfläche verwenden. Vermeiden Sie die Verwendung von Verdünnern, Lösungsmittel, Alkohol, Bleichmittel oder Ammoniak. Wenn dies vorkommen sollte, sofort das Produkt entfernen und reinigen. Wasser und Dampf beschädigen die Oberflächen nicht. Jedoch ist es ratsam, kein Wasser im Bereich der Fugen und im Wandbereich liegen und trocknen lassen und kein Dampfstrahler für längere Zeit auf die Flächen richten.

Limpieza

Para la limpieza cotidiana, se recomienda utilizar un paño de microfibra con un detergente neutro polivalente que no contiene amoniaco, no utilice productos abrasivos o alcohol que puedan dejar marcas debido al tinte.

Limpieza especial

Los productos normales utilizados en el baño (pasta de dientes, jabón, gel de ducha, etc.) no dañarán la encimera, pero se debe quitar enseguida la mancha fresca. Para eliminar los depósitos de cal utilizar un producto específico o vinagre de vino blanco, rociar, dejar actuar unos segundos y luego qitar con una esponja de microfibra. Para evitar importantes restos de piedra caliza siempre seque la bañera después de su uso. No utilice productos de ácido en la encimera (por ejemplo el ácido clorhídrico) o altamente básico (por ejemplo la sosa cáustica), el tinte para cabellos. Evitar el uso de diluyentes, disolventes, alcohol, lejía o amoniaco, si esto sucede inmediatamente quitar el producto. El agua y el vapor no dañarán la encimera, es recomendable no dejar que se estanque el agua en las proximidades de las juntas - entre la encimera y la pared - y no concentrarse durante mucho tiempo con chorros de vapor en la encimera.

Polimeri all'acqua, minerali italiani e pigmenti coloranti ecocompatibili. Lavorazione artigianale con cui è possibile rivestire i contenitori e alcuni piani delle collezioni Rexa Design. Per garantire un risultato eccellente e ottenere 2-3 mm di spessore viene steso un fondo, uno strato di malta media e uno di malta fine. Il prodotto viene poi levigato e, per stabilizzare e impermeabilizzare, vengono applicate tre mani di finitura trasparente opaca. Il prodotto non è tossico, non è pericoloso per l'uomo e per l'ambiente e può essere riciclato come un inerte edile.

Ecomalta is composed by water polymers, Italian minerals and colored eco-sustainable pigments. It's applied manually on cabinets and some Rexa Design's collection top. To guarantee an excellent result and to obtain 2-3 mm of thickness, it's applied a base of medium and fine mortar. Then, the product is polished and, to stabilize and to waterproof it, it's applied 3 coats of mat transparent finish. The product is not toxic and it is not dangerous for human and for the environment. It can be recycled as a construction inert.

Impiegato per la realizzazione delle finiture dei mobili.

Used for the realisation of furniture Finishes.

Utilisé pour la réalisation de la finition des meubles.

Verwendet für die Ausführung der Möbel.

Se utiliza para la realización de los acabados de los muebles.

Ecomalta est composé par de polymères d'eau, de minéraux et de pigments italiens éco-durable teints. Il est appliqué manuellement sur meubles et pans du Rexa Desing. Afin de garantir un excellent résultat et obtenir 2-3 mm d'épaisseur, nous appliquons une base de mortier moyenne et mortier fin. Ensuite, le produit vient poli et, pour stabiliser et imperméabiliser, il vient appliqué 3 couches de une finition transparent mat. Le produit n'est pas toxique et il n'est pas dangereux pour l'homme et pour l'environnement. Il peut être recyclé comme inerte de la construction.

Es ist aus Wasserpolymer, italienische Mineralien und umweltverträgliche Farben ausgestellt. Dieses Material wird auf Wandschränke und Platten von Rexa Design angebracht. Dieses Ergebnis erhält man durch folgende Vorgehensweise: es wird zuerst ein Haftgrund hergestellt, danach ein Mittelmörtel-Grund aufgetragen und danach eine Dünnmörtelschicht. Danach wird das Produkt geschliffen und für drei Male wird eine durchsichtige, matte Lackierung aufgetragen. Es ist unbrennbar, transpirierbar und unvergilblich, flexibel und es enthält kein Zement. Es ist für Personen oder Umwelt nicht giftig und nicht gefährlich. Es kann wie untätiges Baumaterial wieder verwendet werden.

La Ecomalta està componida de polimeros al agua, minerales italianos y pigmentos colorados bio-compatible. Se aplica a mano sobres colgantes y encimeras de Rexa Design. Para obtener un resultado óptimo y tener 2-3 mm de espesor se esparce un fondo, un estrato de argamasa medio y uno fino. El producto después se alisa y, para estabilizar y impermeabilizar, se aplican tres capas de acabados transparente y mate. El producto es ignifugo, transpirable, flexible, y puede ser reciclado como material inerte de la construcción.

Pulizia
Per la pulizia utilizzare normali detergenti neutri non schiumogeni e senza solventi.

Cleaning
For cleaning, use a common neutral detergent with no suds and without solvents.

Popreté
Pour le nettoyage, utiliser un détergent neutre commun sans mousse et sans solvant.

Reinigung
Reinigen Sie die Oberfläche mit milden Reinigungsmitteln, keine Treibmittel.

Limpadura
Por la limpiadura cotidiana utilice jabón neutro que no hace espuma y no solventes.

Pannello di fibra di legno a media densità impiallacciato e finito con vernice trasparente opaca.

Medium density fiber board veneered and finished with mat varnish.

Panneau en MDF plaqué et fini avec un vernis mat.

Mitteldichte Holzfaserplatte MDF mit transparenter Mattlackierung gefertigt.

Panel de MDF chapado con madera y acabado con barniz mate.

Impiegato per la realizzazione delle finiture dei mobili.

Used for the realization of the furniture finish.

Utilisé pour la réalisation de la finition du meuble.

Verwendet für die Oberflächenrealisierung der Möbel.

Se utiliza para la realización de los acabados de los muebles.
