Uno degli argomenti sfidanti della progettazione è creare elementi che si inseriscano perfettamente nello spazio rispondendo a criteri di flessibilità e di funzionalità. Un bisogno che diventa addirittura cruciale quando si parla degli ambienti più piccoli della casa.

Dalla comprensione di questa necessità nasce una gamma completa di lavamani frutto della preziosa collaborazione tra Rexa e Monica Graffeo.

Oggetti che, nonostante le loro dimensioni ridotte, sono stati progettati per soddisfare le esigenze estetiche e funzionali degli spazi bagno più compatti, grazie alle linee raffinate ed essenziali e al mondo di accessori correlati.

Creating elements that fit perfectly into the space meeting the needs of flexibility and functionality is one of the challenges of design. A requirement that becomes even crucial when we talk about the smallest rooms of the house. A complete range of washbasins resulting from the valuable collaboration between Rexa and Monica Graffeo was born from a deep understanding of this necessity. Objects that, despite their small sizes, have been designed to satisfy the aesthetic and functional needs of the most compact bathrooms, thanks to the elegant and essential lines and world of related accessories.

L'un des sujets de défi de la conception est de créer des éléments qui s'intègrent parfaitement dans l'espace en répondant à des critères de flexibilité et de fonctionnalité. Un besoin qui devient même crucial quand on parle des environnements les plus petits de la maison. De la compréhension de ce besoin naît une gamme complète de lave-mains fruit de la précieuse collaboration entre Rexa et Monica Graffeo. Des objets qui, malgré leurs petites dimensions, ont été conçus pour répondre aux exigences esthétiques et fonctionnelles des espaces de salle de bains plus compacts, grâce aux lignes épurées et essentielles et au monde des accessoires associés.

Eines der schwierigsten Themen des Designs ist es, Elemente zu schaffen, die sich perfekt in den Raum einfügen und erfüllen die Kriterien an die Flexibilität und Funktionalität. Ein Bedürfnis, das zum entscheidend, wenn es um die kleinsten Räume des Hauses geht. Aus dem Verständnis für dieses Bedürfnis erwächst ein Palette von Handwaschbecken, das Ergebnis der Zusammenarbeit zwischen Rexa und Monica Graffeo. Objekte die, trotz ihrer geringen Größe, konzipiert sind, so dass sie den ästhetischen und funktionalen Anforderungen der kompaktesten Badezimmer dank ihrer raffinierten und wesentlichen Linien und der Welt des verwandten Zubehörs befriedigen.

Uno de los temas desafiantes del diseño es crear elementos que encajen perfectamente en el espacio cumpliendo con los criterios de flexibilidad y funcionalidad. Una necesidad que se vuelve incluso crucial cuando se habla de los ambientes más pequeños de la casa. De la comprensión de esta necesidad nace una gama

completa de lavamanos fruto de la valiosa colaboración entre Rexa y Monica Graffeo. Objetos que, a pesar de su pequeño tamaño, han sido diseñados para satisfacer las exigencias estéticas y funcionales de los espacios de baño más compactos, gracias a las líneas refinadas y esenciales y al mundo de los accesorios relacionados.

Technical informations | Informations techniques | Technische Informationen | Información técnica

Caratteristiche del Corian®

Characteristics of Corian® | Caractéristiques du Corian® | Corian® Eigenschaften | Características del Corian®

Esterno e interno lastra | Inside and outside of the plate

- Ⓐ

Lato superiore
Upper side
- Ⓑ

Lato inferiore
Lower side

I Corian® sotto riportati presentano delle differenze e discontinuità di venature e texture anche tra il fronte e il retro della lastra.

The Corian® below have differences and discontinuities of veins and textures even between the front and the back of the sheet.

Les Corian® ci-dessous, présentent des différences et des discontinuités de veines et textures également entre le devant et le dos de la plaque.

Die unten aufgeführten Corian® haben Unterschiede und Diskontinuitäten in dem Adern und Texturen auch zwischen der Vorder- und Rückseite des Blattes.

Los Corian® siguientes presentan diferencias y discontinuidades de vetas y texturas también entre el frente y la parte posterior de el panel.

Raggiatura | Radius

Per la creazione di determinate forme di lavabo viene creata una raggiatura sugli spigoli inserendo un sottile listello di Corian® che verrà successivamente levigato. Sempre a causa della difficile ripetizione precisa di texture e venature spesso si possono notare alcune differenze tra superfici.

For the creation of certain washbasin shapes a radius is created on the edges by inserting a thin strip of Corian® which then will be sanded. Because of the difficult precise repetition of textures and veins, it is often possible to notice some differences between the surfaces.

Pour la création de certaines formes de lavabo est créé un rayonnage sur les arêtes en insérant une petite bande de Corian® qui sera ensuite poncée. En raison de la difficile répétition précise des textures et des veines, sont souvent marquées des différences entre les surfaces.

Para la creación de ciertas formas de lavabo, se crea un radiado en las esquinas mediante la inserción de un delgado listón de Corian® que luego se lijará. Debido a la difícil repetición precisa de texturas y vetas, a menudo se pueden notar algunas diferencias entre las superficies.

Korakril™ Blend

Impiegato per la realizzazione di lavamani | For handbasins manufacturing | Utilisé pour la réalisation de lave-mains | Für die Herstellung von Handwaschbecken | Utilizado para la fabricación de lavamanos

Parte della famiglia dei Solid Surface, Korakril™ Blend è un materiale realizzato dalla combinazione tra minerali naturali e resine di altissima qualità. Korakril™ Blend nasce sottoforma di resina liquida che viene iniettata in stampi per creare il prodotto finale. Grazie a questi processi di lavorazione, Korakril™ Blend risulta un materiale compatto e omogeneo sull'intera superficie che, non presentando nessuna porosità, lo rende igienico, ignifugo e antibatterico.

zu gewährleisten. Kompakte Bauweise, Beständigkeit gegenüber Chemikalien und / oder Lösungsmittel und Kratzfestigkeit sind die Hauptmerkmale von Korakril™ Mischung.

Parte de la familia de Solid Surface, Korakril™ Blend es un material hecho de la combinación de minerales naturales y resinas de muy alta calidad. Korakril™ Blend nació en forma de resina líquida que se inyecta en moldes para crear el producto final. Gracias a estos procesos de fabricación, Korakril™ Blend es un material compacto y homogéneo en toda la superficie que, sin presentar porosidad, lo hace higiénico, ignífugo y antibacteriano.

As a solid surface, Korakril™ Blend is a material made from the combination of natural minerals and very high quality resins. Korakril™ Blend is basically in the form of liquid resin which is injected into molds to create the final product. Thanks to these manufacturing processes, Korakril™ Blend is a compact and homogeneous material on the entire surface which, without presenting any porosity, makes it hygienic, flame retardant and antibacterial.

Faisant partie de la famille Solid Surface, le Korakril™ Blend est un matériau fabriqué à partir de la combinaison de minéraux naturels et de résines de très haute qualité. Korakril™ Blend est né sous forme de résine liquide qui est injectée dans des moules pour créer le produit final. Grâce à ces procédés de fabrication, Korakril™ Blend est un matériau compact et homogène sur toute la surface qui, sans présenter de la porosité, le rend hygiénique, ignifuge et antibactérien.

Verbundwerkstoff mit 2/3 Aluminiumhydrate, gemischt mit Polyesterharzen, modifiziert mit Acrylmonomeren mit hohen chemischen und mechanischen Leistungen gemacht, um die Homogenität und die Gleichförmigkeit durch die Dicke

fabricación de lavamanos

Corian® è un materiale non poroso, omogeneo e inalterabile alla luce, composto da ±1/3 di resina acrilica (polimetil-metacrilato o PMMA) e da ±2/3 di sostanze minerali. Il componente principale è il tri-idrato di alluminio (ATH), minerale derivato dalla bauxite, da cui si ricava l'alluminio. Dal 1967, anno della sua produzione, a oggi il Corian® ha dimostrato di essere un materiale resistente, versatile e igienico. Non essendo poroso, muffe e batteri non trovano appigli e non possono diffondersi nelle giunture o sotto la superficie. Inerte e non tossico, in condizioni normali di temperature non emette gas. Quando viene bruciato rilascia ossidi di carbonio, il fumo è leggero e non contiene gas alogeni tossici. Per ulteriori informazioni consultare il sito internet: www.dupont.it

Corian® is a solid, non-porous, homogeneous surfacing material, composed of ±1/3 acrylic resin (also known as Polymethyl Methacrylate or PMMA), and ±2/3 of natural minerals. These minerals are composed of Aluminium Trihydrate (ATH) derived from bauxite, an ore from which aluminium is extracted. Since its birth in 1967 Corian® has proved to be really resistant, versatile and hygienic. Being a non-porous material, mold and bacteria cannot root nor spread themselves in the joints or under the surface. Corian® is non-toxic and inert. In normal temperature conditions is not emitting gas. If burnt releases mostly carbon monoxide and the light smoke does not have any halogen toxic gas. For further information on its composition, consult the website: www.corian.uk

Corian® est un matériel de revêtement homogène massif et non poreux, composé de ±1/3 de résine acrylique (également connue sous le nom de Polyméthyle

Méthacrylate ou PMMA), et de ±2/3 de minéraux naturels. Son composant principal est le Trihydrate de la bauxite (ATH), un minéral dérivé de la bauxite, le minéral dont on extrait l'aluminium. Depuis sa naissance en 1967, Corian® a démontré d'être vraiment résistant, versatile et hygiénique. Etant aussi un matériel homogène et non-poreux, moisissures et bactéries ne se déposent pas ni dans les joint et ni en dessous de la surface. Corian® est inerte et nontoxique. En condition de température normale, il génère aucune émission de gaz. En cas de combustion, il émet surtout des oxydes de carbone et le fumée est léger et contient pas des gaz halogènes toxiques. Pour plus d'information, consultez le site: www.dupontdenemours.fr

Corian® ist ein massives, nicht poröses und homogenes Oberflächenmaterial aus ±1/3 Acrzlharz (auch als Polymethyl-metacrylat oder PMMA bekannt) und ±2/3 natürlichen Mineralien. Der Hauptbestandteil ist das Mineral Aluminiumhydroxid (ATH), das aus Bauxit (Aluminiumerz) gewonnen wird. Seit der Markteinführung im Jahr 1967 hat sich Corian® als langlebiges und nutzerfreundliches Material bewährt. Das porenlose, massive Corian® kann optisch fugenlos verarbeitet werden und verfügt deshalb über eine besonderes hygienische Oberfläche. Diese verhindert das Wachstum von Bakterien oder Schimmelpilzen. Corian® ist ein inaktives, nicht toxisches Material. Bei Normaltemperatur kommt es zu keiner Gasentwicklung. Wird es verbrannt, setzt der Werkstoff hauptsächlich Kohlendioxid frei. Der Rauch ist optisch hell und enthält keine toxischen halogenierten Gase. Informationen zur Materialzusammensetzung entnehmen Sie bitte dem Corian® auf: www.dupont.de

Corian® es un material no poroso, homogéneo e inalterable a la luz, compuesto de ±1/3 de resina acrílica (también conocida como Polimetil-Metacrilato o PMMA) y ±2/3 de minerales naturales. Su principal ingrediente es el mineral trihidrato de aluminio (ATH), un derivado de la bauxita que sirve de base para la producción de aluminio. Desde su introducción en 1967, Corian® ha demostrado ser un material resistente, versátil e higiénico. Como no es poroso, el moho y las bacterias no encuentran bodegas y no pueden propagarse en las articulaciones o debajo de la superficie. Corian® es un material inerte y no tóxico. Bajo condiciones normales de temperatura, no emite gases. Cuando se quema, principalmente desprende gas carbónico, el humo que genera es liviano y no contiene gases halogenados tóxicos. Para tener más información sobre la composición del material, consulte Corian® la página: www.dupont.es

Materiale realizzato con una mescola di resine acriliche e minerali naturali, il Korakril™ è resistente, igienico, antistatico, inalterabile alla luce, resistente alle macchie e termoformabile: le lastre scaldate possono essere modellate con stampi di legno o metallo, creando forme bi e tridimensionali. La sua particolare composizione permette di realizzare top in totale assenza di giunzioni percettibili con il vantaggio di una continuità estetica all'interno delle composizioni. L'uniformità del materiale impedisce che si possano verificare punti critici per lo sporco o il deposito di batteri e muffe. Questo materiale viene realizzato sia in versione bianca opaca sia in quella colorata disponibile in cinque differenti tonalità. La presenza discreta di granuli visibili dei vari minerali di diverse dimensioni e cromie, conferisce un aspetto materico alla superficie mantenendo la sua omogeneità nell'intera superficie.

Material realised with a mixture of acrylic resins and natural minerals. Korakril™ is resistant, hygienic, anti-static, inalterable to light, stain resistant and can be thermoformed: the heated slabs can be moulded with wooden or metal moulds, creating two and three-dimensional shapes. The particular composition of Korakril enables the manufacture of tops without visible joints that make the composition continuative. With its uniformity, you will not find critical point for the deposit of dust and neither for bacteria. This material is made both in a matt white version and in a colored one available in five different shades. The discreet presence of different sizes and colours of various minerals visible grains, gives the surface a texture effect while maintaining its homogeneity throughout the entire surface.

C'est un matériel réalisé avec un mélange des résines acryliques. Korakril est résistant, hygiénique,

antistatique, inaltérable à la lumière, résistant aux taches et thermoformable: les dalles chauffées peuvent être modélisées avec des moules en bois ou en métal, en créant des formes bidimensionnelles et tridimensionnelles. Sa particulière composition permet de réaliser des plans tops sans joints visibles avec l'avantage d'avoir une continuité esthétique à l'intérieur des compositions. L'uniformité de ce matériel empêche la formation des points critiques pour la poussière ou l'accumulation des bactéries. Ce matériau est fabriqué soit en version blanc mat soit en couleur disponible en cinq teintes différentes. La présence discrète de grains visibles de divers minéraux de différentes tailles et couleurs donne à la surface un aspect matériel tout en conservant son homogénéité sur toute la surface.

Ist eine Mischung von Acrylherzen und natürlichen Mineralen. Korakril ist fest, hygienisch, antistatisch, lichteht, fleckbeständig und man kann es Thermoformen: die beheizten Platten können mit Holzoder Metallformen modelliert werden, um bi oder dreidimensionale Formen zu schaffen. Mit dieser speziellen Zusammensetzung, kann man mit Korakril Platten ohne Verbindungen realisieren, die den Kompositionen eine schöne ästhetische Kontinuität bieten. Die Gleichmäßigkeit des Material gibt die Möglichkeit eine andauernde saubere Oberfläche ohne kritische Punkte für Schmutz zu haben. Inert und ungiftig, es kann an öffentlichen Plätzen verwendet werden, da es keinerlei Gas ausströmt. Die Herstellung von Korakril entsteht mit Systemen, die den Abfall minimieren, der jedoch auch in den Produktionsprozess zurückgeführt wird, ein optimiertes Verfahren, das auf die maximale Energieeinsparung führt.

Es un material realizado por una mezcla de resinas acrílicas y minerales naturales. Korakril es resistente, higiénico, antiestático, inalterable a la luz, resistentes a las manchas y puede ser termoformado: las losas calentadas pueden ser modeladas con moldes de madera o de metal, creando formas bidimensionales y tridimensionales. La composición particular de Korakril permite realizar encimeras en total ausencia de uniones perceptibles donando continuidad estética a las composiciones. La uniformidad del material no permite el deposito de mugre y bacterias. Este material está hecho tanto en una versión blanca mate como en una de color disponible en cinco tonos diferentes. La presencia discreta de granos visibles de varios minerales de diferentes tamaños y colores le da a la superficie una apariencia matérica mientras mantiene su homogeneidad en toda la superficie

Pulizia Corian® e Korakril™ (Blend e colorato)

Uso e manutenzione Corian® e Korakril™ (Blend e colorato)

Manutenzione giornaliera A – B – C

Acqua ricca di calcare, sapone, minerali A—B—F—H

Graffio signicativo, bruciatura di sigaretta, inchiostro, segni di penna A—B—C—E—H

Mercurocromo, sangue, profumo A—B—C—D—E—H

Smalto per unghie A—B—C—G—H

Ferro o ruggine A—B—C—G—H

Iodio A—B—C—E—H

Corian® colorato A—B—G

Agire sempre con movimenti circolari. Se non viene rimossa completamente risciacquando con acqua, la candeggina può scolorire il Corian®.

Metodi di pulizia

A. Rimuovere il residuo con un panno.

B. Sciacquare la superficie con acqua calda e asciugare con un panno morbido.

C. Usare un panno umido e una crema abrasiva leggera (es. Cif).

D. Usare una spugna, strofinare sulla macchia con un prodotto detergente a base di ammoniaca.

E. Usare una spugna, strofinare sulla macchia con candeggina diluita con acqua, sciacquare più volte con acqua calda e asciugare con un panno morbido.

F. Usare una spugna e strofinare sulla macchia con un prodotto di pulizia anticalcare (tipo Viakal®) o aceto. Sciacquare più volte con acqua calda ed asciugare con un panno morbido.

G. Usare una spugna e strofinare sulla macchia con un prodotto privo di acetone. Sciacquare più volte con acqua calda ed asciugare con un panno morbido.

H. Se le macchie persistono, contattare Rexa Design (tel: 0434 593182).

Molti danni dovuti a urti, calore o prodotti chimici possono essere riparati solitamente sul luogo ridando integralmente alla superficie il suo aspetto originale, regolare, igienico.

Cleaning methods for Corian®, Korakril™ (Blend and colored)

Corian® and Korakril™ (Blend and colored) use and maintainance

For everyday cleaning A – B – C

Water rich of limestone, soaps, minerals A—B—F—H

Light scratch, cigarette burns, ink, marker pen A—B—C—E—H

Mercurochrome, blood, perfume A—B—C—D—E—H

Nail varnish spills A—B—C—G—H

Iron or rust A—B—C—G—H

Iodine A—B—C—E—H

Colored Corian® A—B—G

Always clean using circular motion. Bleach can discolour Corian® if not removed completely by rinsing with water afterwards.

Cleaning methods

A. Remove excess with a soft cloth.

B. Rinse surface with warm water and dry with a soft cloth.

C. Use a damp microfiber cloth and a light abrasive cream.

D. Use a microfiber cloth and wipe the stain with an ammonia detergent

E. Use a microfiber cloth and rub over the stain with some diluted bleach. Rinse several times with warm water and dry with a soft cloth.

F. Use a microfiber cloth and rub over the stain with a standard household lime-scale remover (Viakal®, Lime-lite) or vinegar . Rinse several times with warm water and dry with a soft cloth.

G. Use a microfiber cloth and rub over the stain with a non-acetone based Nail varnish remover. Rinse several times with warm water and dry with a soft cloth.

H. If the stains persist, contact Rexa Design (tel: +39 0434 593182).

Most damages, including sever impact, heat or chemical damage, can usually be repaired on site to restore the original, smooth, hygienic solid surface integrity.

Corian®, Korakril™ (Blend et coloré) Methodes de nettoyage

Corian® et Korakril™ (Blend et coloré) utilisation et maintenance

Nettoyage quotidien A—B—C

Dépôt calcaire, savons, minéraux A—B—F—H

Égratignure importante, brûlure de cigarette, encre, marques de stylo A—B—C—E—H

Mercurochrome, sang, parfum A—B—C—D—E—H

Vernis à angle A—B—C—G—H

Fer ou rouille A—B—C—G—H

Iode A—B—C—E—H

Corian® coloré A—B—G

Nettoyez toujours en effectuant un mouvement circulaire. L'eau de javel risque de décolorer le Corian® si elle n'est pas ensuite rincée complètement à l'eau.

Methodes de nettoyage

A. Épongez avec un chiffon doux.

B. Rincez à l'eau chaude et séchez avec un chiffon doux.

C. Utilisez un chiffon humide et un détergent doux en crème (type Cif).

D. Utilisez une éponge et frottez la tâche avec un détergent ou un nettoyant pour surface dure à l'ammoniaque dilué (type Ajax ou Monsieur Propre).

E. Utilisez une éponge à récurer et frottez la tâche avec un peu d'eau de javel dilué. Rincez plusieurs fois à l'eau chaude, puis séchez avec un chiffon doux.

F. Utilisez une éponge à récurer et frotter la tâche avec un produit anti-calcaire (type Viakal®) ou de vinaigre. Rincez plusieurs fois à l'eau chaude, puis séchez avec un chiffon doux.

G. Utilisez une éponge à récurer et frottez la tâche avec un dissolvant à ongles sans acétone. Rincez plusieurs fois à l'eau chaude, puis séchez avec un chiffon doux.

H. Si la tache persiste, contactez Rexa Design (tel: +39 0434 593182).

La plupart des dégâts, y compris les dommages importants dus à un choc, à la chaleur ou à des produits chimiques, sont habituellement réparables sur place pour redonner aux

Corian®, Korakril™ (Blend y de colores) metodos de limpieza

Corian® y Korakril™ (Blend y de colores) uso y mantenimiento

Para la limpieza cotidiana A—B—C

Cal de agua dura, jabon, minerales A—B—F—H

Rasguños significativos, quemaduras de cigarrillos, tinta, marcas de lápiz A—B—C—E—H

Sangre, vino, perfume A—B—C—D—E—H

Manchas de esmalte de uñas A—B—C—G—H

Hierro u oxidacion A—B—C—G—H

Yodo A—B—C—E—H

Corian® de colores A—B—G

Siempre limpie con movimientos circulares. La Lejia puede dejar manchas blancas en la superficie de Corian® si no se aclare con agua abundante.

E. Con un estropajo que esté gastado frote la mancha con un poco de lejia diluida. Aclare varias veces con agua caliente y seque con un trapo suave.

F. Con un estropajo que esté gastado frote la mancha con un producto doméstico para eliminar los residuos de cal (Viakal®) o vinagre. Aclare varias veces con agua caliente y seque con un trapo suave.

G. Con un estropajo que esté gastado frote la mancha con un detergente sin acetona. Aclare varias veces con agua caliente y seque con un trapo suave.

H. Si la mancha persiste, contacte Rexa Design (tel: +39 0434 593182).

La mayoría de los daños, incluso los causados por un golpe, el calor y productos quimicos, se pueden reparar en el sitio de instalación.

Metodos de limpieza

A. Elimine manchas con un trapo suave.

B. Aclare la superficie con agua caliente y segue con un trapo suave.

C. aplique una crema ligeramente abrasiva (como Cif) con un paño mojado.

D. Con un estropajo que esté gastado frote la mancha con un producto para limpiar superficies sólidas a base de amoniaco.

Corian®, Korakril™ (Blend und farbig) Reinigungsmethode

Corian® et Korakril™ (Blend und farbig) gebrauch und wartung

Tägliche Reinigung A—B—C

Kalk-, Seifen- Mineralablagerungen A—B—F—I

Lilienpollen, Safran, leichte Kratzer, Zigarettenbrandfleck Tinte, Filzstift A—B—C—E—I

Mercurochrome, Blut, Rotwein, Parfum A—B—C—D—E—I

Nagellack A—B—C—G—I

Eisen oder Rost A—B—C—H—I

Jod A—B—C—E—I

*Reinigen Sie die Oberfläche immer mit kreisenden Bewegungen
**Bleiche sofort mit Waser vollständig abspülen, andernfalls kann sich die Corian® Oberfläche verfärben.

Reinigungsmethode

A. Rückstände mit einem weichen Tuch entfernen.

B. Oberfläche mit warmen Wasser abspülen und mit einem weichen Tuch trockenwischen.

C. Ein feuchtes Tuch und eine milde Scheuermilch verwenden (z.B. Viss, Frosch Scheuermilch).

D. Mit einem abrasiven Scheuerschwamm (z.B. Scotch Brite®) und einem Reinigungs-mittel oder Reiniger für Massivoberflächen auf

Ammoniakbasis (z.B. Ajax, Meister Proper, General) über den Fleck reiben.

E. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und Haushaltsbleiche. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.

F. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und einem standard-mäßigen Haushaltsmittel zur Entfernung von Kalkablagerungen (Sidlol) oder Essig über den Fleck reiben. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.

G. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und einem acetonfreien Nagellackentferner über den Fleck reiben. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.

H. Mit einem abrasiver Scheuerschwamm (z.B. Scotch Brite®) und einem Metallreiniger oder Rostentferner über den Fleck reiben. Oberfläche mehrmals mit warmem Wasser abspülen und mit einem weichen Tuch trockenwischen.

I. Wenn Flecken nicht entfernt werden können, setzen Sie sich mit Rexa Design (tel: +39 0434 593182) in Verbindung.

Die meisten Schäden, ei nschließlich Schäden, die durch starke Schläge, Hitze oder Chemikalien verursacht wurden, können in der Regel vor Ort beseitigt werden. Die Oberfläche erhält dadurch ihre ursprüngliche, glatte, hygienische und massive Oberflächenbeschaffenheit zurück.

Impiegato per la realizzazione lavamani e accessori | For handbasins and accessories manufacturing | Utilisé pour la réalisation de lave-mains et accessoires | Für die Herstellung von Handwaschbecken und Zubehör | Utilizado para la realización de lavamanos y accesorios

Lamiera laccata con vernici poliuretatiche, antingiallenti con effetto testurizzato opaco a grana fine. La verniciatura avviene tramite resine poliestere, 120 gr/m² di colore.
