Oggetto: PRICES INCREASE ON 2021 TECHBOOK

Dear All,

Unfortunately the energy costs, on which our type of processing depends, were increased during the last two months. The cost scenario is so variable and fast as to make the management of price lists difficult but of primary importance for the survival of a company. As a result we are receiving updates on raw materials and services from time to time also from our other suppliers.

For this reason we are forced to raise our pricelist:

****The increase, which will be applied to all orders received from 1 November 2022, will be 8%.**

****While all the offers already sent with validity 31/12/2022, now will be valid until 31/10/2022, date beyond which prices will have to be updated.**

We therefore remind you that:

*on the **printed TECHBOOK** the increase to be applied is **10% + 8%**.

*on **PDF** downloaded from the following link the increase to be applied is **+ 8%**

Thanking for the kind cooperation,
Best regards
